

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

in deliberative speeches it is less worth while to state matters foreign to the subject, and a deliberative speech admits less of malicious sophistry than judicial pleading, but is more widely interesting; for here the judge [i. e. the senator] decides on questions which nearly interest himself, so that no more is necessary than to prove that the question stands just as he, the adviser, asserts. In judicial questions, however, this is not sufficient, but it is worth while to engage the hearer; for the decision is about a case which does not affect himself: so that the judges, looking to their own gratification, and listening with a view to amusement, surrender themselves up to the pleaders; and, strictly speaking, do not fulfil the character of judges¹⁴. On which very account the law, in many places, as I before remarked, forbids

And this he proves, first, because that which has been is plain to all, even to diviners; secondly, the orator having law for a premiss, the demonstration is easier. To these reasons may be added one which the master of Alexander would not willingly have allowed, namely, the loss of liberty to Greece, and the consequent loss of all interest in deliberative questions, to men whose future fates were totally out of their own power.

¹⁴ A writer in the *Quarterly Review*, No. 26, after contrasting the perplexity of English law with the simplicity of Athenian jurisprudence, says, "This simplicity in the law made it the orator's business less to hunt for cases and precedents than to discriminate character; less to search for errors in a bill than for flaws or errors in a witness's life or testimony. And the prevalence of this practice may be inferred from a subsequent passage in this book, (c. ix. § 38,) where Isocrates is mentioned as an adept in the *comparison of characters*, "which," say Aristotle, "he used to do to further his *familiarity with judicial pleading*." To this we may subjoin the following remarks of Mitford on a speech by Alcibiades: "The multitude ordinarily composing an Athenian court of justice was so great, that the pleaders always addressed it as under the impulse of the same interests, and subject to the same feelings as the general assembly, and equally without responsibility. Impartiality was never supposed; the passions were always applied to; and never failed to be contended between the parties, which could most persuade the jurors that their interest was implicated with his, and that by deciding in his favour they would be gainers. Hist. of Greece, vol. v. p. 94. So also Xenophon, in his *Athenian Republic*, c. i. § 13.—*Ἐν τε τοῖς δικαστηρίοις οὐ τοῦ δικαίου αὐτοῖς μέλει μᾶλλον ἢ τοῦ αὐτοῖς συμφέροντος.*

the saying any thing irrelevant; but there [in deliberative assemblies] the judges are, of themselves, careful enough of this.

But as it is plain that an artificial system is conversant about the means of making credible, and as this is a sort of *proof*, (because we are then most persuaded when we conceive that the point has been *proved*,) but the proof of rhetoric is enthymem, (and this, to speak generally, has the most sovereign effect of all the means of persuasion;) and the enthymem is a sort of syllogism; since too it is the province of logic to consider equally every sort of syllogism, whether of that art as a whole, or of some particular branch of it; then, these points being admitted, it is evident that the man best able to consider the question, out of what sources and how the syllogism arises, will moreover be in the highest degree capable of employing enthymems; provided he make himself acquainted, besides his logic, with the kind of subjects about which enthymems are conversant, and what differences they exhibit as compared with the syllogism of logic. Because it belongs to the same faculty of the mind to recognise both truth and the semblance of truth; and more than this, mankind have a¹⁵ tolerable natural tendency toward that which is true; and, in general, hit the truth; wherefore an aptness in conjecturing probabilities belongs to him who has a similar aptness in regard to truth. It is plain, then, that other rhetoricians embrace in their systems, points foreign to the subject, and what reasons they have for inclining to the subject of judicial pleading in preference to the other branches of rhetoric.

But rhetoric is *useful*, because truth and justice are in their nature stronger than their opposites; so that if decisions be made, not in conformity to the rule of propriety, it must have been that they have been got the better of, through fault of the advocates themselves: and this is deserving reprehension. Fur-

¹⁵ Πιφύκασιν ἰκανῶς, have naturally a considerable aptitude toward what is true.

thermore, in the case of some people, not even if we had the most accurate scientific knowledge, would it be easy to persuade them were we to address them through the medium of that knowledge; for a scientific discourse, it is the privilege of education [to appreciate], and it is impossible that this [should extend to the multitude¹⁶]; but we must construct our means of persuasion, and our addresses, through the medium of ordinary language; as in fact I stated in my Topics, "on the manner of communicating with
 3rd. the multitude." Again, too, we ought to be able to persuade on opposite sides of a question; as also we ought in the case of arguing by syllogism: not that we should practise both, for it is not right to persuade to what is bad; but in order that the bearing of the case may not escape us, and that when another makes an unfair use of these reasonings, we may be able to solve them.¹⁷ Now, of all the other arts, there is not one which embraces contraries in its conclusions; but logic and rhetoric alone do this; for they are both in *an equal degree*¹⁸ conversant about contraries; not, however, that these contrary subjects present equal facilities: but the true and better side of the question is always *naturally* of a more easy inference, and has, generally speaking, a greater tendency to persuade. To illustrate further the utility
 4th. of rhetoric, it were absurd, if, while it is disgraceful

¹⁶ The communication of ideas requires a similitude of thought and language: the discourse of a philosopher would vibrate without effect on the ear of a peasant. Gibbon's Decline and Fall, c. l. note 90.

¹⁷ In the words of Falconbridge, let the orator resolve to

" ——— smack of observation;
 Which, though I will not practise to deceive,
 Yet, to avoid deceit, I mean to learn."

¹⁸ Riccobon remarks, that a person may at first be inclined to doubt the truth of the assertion that Rhetoric and Logic *alone* recognise contraries; seeing that music, for instance, recognises harmony and discord; grammar, the impropriety and the proprieties of language, etc. This doubt is however removed, he says, by the word *δυσκολως*, for these alone recognise with *equal propriety* each of the two contraries; whereas other arts apply more strictly to one than to another.

for a man not to be able to assist himself by his person, it were not disgraceful to be unable to do this by his speech, which is more a peculiarity of man than the exercise of the body¹⁹. If, however, [any one should object²⁰] that a person, unfairly availing himself of such powers of speaking, may be, in a very high degree, injurious; this is an objection which will lie in some degree against every good indiscriminately, except virtue; and with especial force against those which are most advantageous, as strength, health, wealth, and generalship. Because, employing these fairly, a person may be beneficial in points of the highest importance; and, by employing them unfairly, may be equally injurious.

13. Objection against the abuse of it answered.

That rhetoric, then, is conversant not with any one distinct class of subjects, but like logic [is of universal applicability], and that it is useful, is evident; as also that its business is not *absolute persuasion*²¹, but to consider on every subject what means of persuasion are inherent in it; just as is also the case in every

14. End and duty of Rhetoric.

¹⁹ This is an *à minori* argument, to understand the full force of which we ought to bear in mind the great importance attached to the *δύναμις δυνάμις* by the Greeks.

²⁰ Non tamen idcirco crimen liber omnis habebit:

Nil prodest quod non lædere possit idem.

Discitur innocuas ut agat facundia causas:

Protegit hæc sotes, immeritosque premit.

Ovid. Trist. lib. ii. l. 265.

²¹ Having told us what we may expect from Rhetoric, he now tells us what we are *not* to expect from it. Persuasion, though the end, is not the duty of rhetoric: "Officium ejus facultatis videtur esse, dicere apposite ad persuadendum: Finis, persuadere dictione." (Cicero de Inv.) In the arts whose foundation is conjectural [σποραδικαί τέχναι], among which we must class rhetoric, if the artist had done all that the case admitted, his duty was conceived to have been fulfilled, and he was entitled to commendation though he had entirely failed of success.

Difference in
Logic and
Rhetoric
as regards

other art: for neither is it the duty of medicine to render its patient *healthy*, but to bring him on as far as the case admits; for it is nevertheless very possible to treat properly even such as may be incapable of again partaking of health: and besides this [it is evident] that it belongs to the self-same art to observe both the real and seeming means of persuasion just as it is incumbent on logic to consider syllogism and apparent syllogisms. And this is the case, because the character of *sophist* does not consist in the faculty²² [for the *logician* possesses this as well as he] but in his fixed design [of abusing it²³]. Here [i

²² That he is consistent in thus classifying characters according to their *moral principles*, will appear from his application of the appellation Ἀλαζών by the same rule in the *Ethics*: Οὐκ ἐν τῇ δυνάμει ἐστὶν ὁ ἀλαζών, ἀλλ' ἐν τῇ προαίρεσει *Ethics*, iv. c. 7.

²³ In order more fully to illustrate the nature of rhetoric Aristotle has considered it throughout this chapter as analogous to logic. Each, he says, is founded on a faculty naturally possessed by all men; each is useful, and applicable with equal propriety to any class of subjects whatever. Besides this, logic and rhetoric alone, of all arts, are *equally* conversant with opposite inferences; and of course with sound and specious arguments (whether in the *form* of syllogism or enthymem). Now as logic and rhetoric are in their own nature indifferent to truth or falsehood, it must require an act of choice in either case to select the former or the latter, and the constant repetition of that choice will ultimately form a corresponding habit. Hence the *διαλεκτικός* may be considered as *δυνάμει σοφιστής* and the *σοφιστής* as *δυνάμει διαλεκτικός*. But when logic is prostituted to the support of false propositions, by the principles (the *προαίρεσις*) of its professors, it is branded with the name of *sophistry*, and the persons who so misapply it are called *sophists*: whereas, in the case of rhetoric, no such distinction in reference to the principles of its professors is contained; but the name of orator is enjoyed equally by all who are masters of the art, whether they exercise it fairly or not. Ἰνταῦθα μὲν, ἔσται ὁ μὲν κατὰ τὴν ἐπιστήμην, ὁ δὲ κατὰ τὴν προαίρεσιν, *Ῥήτωρ*. A reason for this distinction may perhaps be furnished from the nature of the subject-matter respectively. The subject-matter of logic is *ἀληθεία*, which is uniform, absolute, and admits not of degrees. Hence the philosophical logician may fairly be supposed aware of the fall he uses, and is stigmatized accordingly. But the subject-matter of rhetoric being τὸ ὅμοιον τῷ ἀληθεῖ, (v. § 11,) or *πιθανόν* has many and various degrees, from the lowest presumpti

rhetoric], however, the one who is considered in reference simply to his knowledge of the art, as well as he who is considered in reference to his moral principles, is indiscriminately designated an orator. But in logic, a sophist is called so in reference to his moral principles; a logician, however, without reference to his principles, simply as regards the faculty he is master of.

the name

ors.

However, commencing from this point, let us attempt to treat of the system both from what sources and in what manner we shall be able to attain the proposed objects; having then once more, as at the outset, defined what this art is, let us treat of what remains.

CHAP. II.

Definition of Rhetoric.—Εἰς δὲ :—Σημεῖον :—Τεκμήριον :—
their differences.—Example.

LET us define rhetoric to be, "A faculty of considering all the possible means of persuasion on every subject;" for this is the business of no one of the other arts, each of which is fit enough to inform or persuade respecting its own subject; medicine, for instance, on what conduces to health or sickness; and geometry, on the subject of relations incidental to magnitudes; and arithmetic, on the subject of numbers; and in the same way the remaining arts and sciences. But rhetoric, as I may say, seems able to consider the means of persuasion on *any* given subject whatsoever. And hence I declare it to have for its province, as an art, no particular limited class of subjects. Now of the means of effecting persuasion, some originate in the art, others independently of it. By *inartificial*

νοί, ἀτεχν-
νοί.

up to moral certainty. Here then a fallacy is not so easily discoverable, even by the orator himself; and candour requires us not to brand as *moral* what after all may be merely *mental* imperfection in the speaker.

I mean whatever are not furnished forth by our own means, but which are in existence already, as witnesses, torture, deeds, and all of this kind ; by *artificial*, such as may be got up by means of the system and by our own talents. So that as regards these we have to *employ* the one class, to *discover* the other.

3. Of means of persuading by speaking there are three species¹: some consist in the character of the speaker ; others in the disposing the hearer a certain way ; others in the thing itself which is said, by reason of its proving, or appearing to prove the point [Persuasion is effected] by means of the *moral character*, when the speech shall have been spoken in such a way as to render the speaker worthy confidence for we place confidence in the good to a wider extent and with less hesitation, on *all* subjects generally but on points where no real accuracy exists, but there is room for doubt, we even entirely confide in them. This feeling, however, should arise by means of *the speech*, and not by reason of its having been *preconceived* that the speaker is a certain kind of man. For it is not true, as some treatise-mongers lay down in their systems, of the probity of the speaker, that contributes nothing to persuasion ; but moral character nearly, I may say, carries with it the most sovereign efficacy in making credible². [Persuasion effected] through the medium of *the hearers*, when they shall have been brought to a state of excitement under the influence of the speech ; for we do not when influenced by pain or joy, or partiality or dislike, award our decisions in the same way ; above which means of persuasion alone, I declare that the
4. i. Character of the speaker.
5. ii. Feelings of the auditor.

¹ Πίστει δια τοῦ λόγου, or artificial, of three kinds, ἐν ἡθείᾳ τοῦ λέγοντος—ἐν τῇ τὸν ἀκροατῆς διαθεῖναι πίστι—ἐν αὐτῇ τῷ λόγῳ.

² In so high estimation did Menander hold *the manner* an address, that he attributed the whole effect to it ;—τρόπος ἔσθ' ὃ πείθων τοῦ λέγοντος, οὐ λόγος. And as Plutarch observes upon this line, καὶ τρόπος μὲν οὖν καὶ λόγος· ἡ ΤΡΟΠΟΙ ΔΙΑ ΔΟΤΟΥ. De Audiend. Poet. t. i. Op. Mor. p. 11; edit. Wytttenb.

system-mongers of the present day busy themselves. On the subject of these, however, some light will be afforded, when I speak on the subject of the passions.

Men give credit from the force of what is said, when out of the means of persuasion which attach to each subject, we evince the truth, or that which appears so. Now as persuasion is effected by these means, it is plain that it will be the privilege of him who is able to draw inferences syllogistically, and to take a full view of the subject of morals, and of the virtues, and thirdly of the passions, both *what* each of the passions is, of *what nature* it is, and *from what causes* it is engendered, and how : so that the fact is, that rhetoric is, as it were, a kind of off-shoot of logic, and of that department of moral philosophy which it is fair to call the science of social life³. Whence rhetoric is invested with the costume⁴ of that science, as well as its professors, partly from inexperience, partly arrogance, and in part from other human causes ; because, as I stated at the outset, it is a sort of subordinate division of logic, and portraiture of it ; neither of them being a science of any one definite

6. iii. The speech itself.

7. Rhetoric an off-shoot of Dialectics and Politics.

³ Πολιτική. For an explanation of this term—an enumeration of the various arts which he comprehends under it—and for an account of the estimation in which he holds it, see *Ethics*, lib. i. c. 2.

⁴ Υποδύεται. So blind are men to this affectation of rhetoric and its professors, that he who, having had no occasion for the display of his persuasive powers, other than the ordinary course of affairs presents, would be accused of great arrogance were he to talk of having exercised *rhetoric*. Now Aristotle, so far from holding a person guilty of presumption for such an use of the term, would rather retort on the *accuser* the charge of ignorance of its true import. For with a view to invest their art, and of consequence themselves, with an air of dignity, the professors of rhetoric, said he, would have the world think (some of them, poor creatures, δι' ἀπαιδευσίαν) that it was applicable *exclusively* to such cases as are of high concernment to society. This in part is true ; rhetoric is *παράφυς τῆς Πολιτικῆς* : but, as Majoragius observes, “*Virgulta magnam quidem cum arboribus quibus adnascuntur habent similitudinem, et rerum naturam redolent. Sed tamen multo sunt inferiora, neque tam uberes fructus ferunt.*” So far prevalent is this notion to this very day, that we only apply this word by way of ridicule to persuasion on ordinary topics.

subject, as to what may be its nature ; but both bear certain faculties for furnishing ourselves with arguments. Now on the subject of the powers of the two, and their mutual relation, nearly enough has been said.

8. Subdivision of *πίστεις*, *ἐν αὐτῷ τῷ λόγῳ* :
i. Enthymem, ii. Example.

With regard to means of persuading by proving or appearing to prove your point, just as in logic or is induction, another syllogism, another apparent syllogism, so also is the case here in rhetoric ; for an example is an induction, its enthymem a syllogism and enthymem I call *rhetorical* syllogism ; example *rhetorical* induction. Now all orators effect their demonstrative proofs by allegation either of enthymem or examples, and, besides these, in no other way whatever. So that if it be incumbent on you to prove with regard to any thing or person in *form* of syllogism or induction, it cannot but be (as is evident from *Analytics*) that each of these will be *essentially* the same as each of the former (enthymem and induction).

9. Example.

And what the difference is between example and enthymem is plain from the *Topics*, where, on the subject of syllogism and induction, it has been stated before, that the proving that such or such is the fact in many and similar cases, is called in the other a induction ; in this, example. But when, certain points having been granted, there results, by virtue of these, something else over and above these, virtue of their existence, either as generals or particulars ; this process is, in that art, called syllogism in this, enthymem⁵.

Definition of Syllogism.

10. Various styles of speaking.

Rhetoric, it is plain, enjoys equal advantage ; for [with respect to it] the case, in this treatise, is the same as in the *Methodica* has been stated of logic ; the speeches of orators⁶ abound in some in examples, others in enthymems ; and orators themselves being in the same way, some fond of example, others of enthymem. Reasonings, however

⁵ Or, each style of rhetoric has its peculiar advantage.

⁶ *ῥητορικά*, the words of an orator, modelled according to rhetoric, whose object it is to *persuade* ; versus, *λόγος*, words of a logician, modelled according to logic, whose object it is to *convince*.

conducted through the medium of example, are not less calculated to persuade; but those of which enthymem is the characteristic are rather applauded⁷. But I will hereafter explain what is the cause of this, and how we are to use each species of proof: let us, *at present*, distinguish more clearly respecting these proofs themselves. Now forasmuch as that which carries persuasion with it, does so in reference to some one; and either is, immediately on being enunciated, actually of a nature to persuade, and enforce belief; or [has its effect] from its appearing to prove through the medium of such [as compose the former class]; and as no art considers particular cases; medicine for example, what is wholesome for the individuals, Socrates or Callias, but what is so for any person of such a constitution; for this question comes within the province of art, but *particulars* are infinite, and cannot be known: so neither will rhetoric consider probability in reference to particular individuals; what, for instance, is probable to Socrates or Callias, but that which is so to persons such as they are; just in the same way as logic, for that art does not draw conclusions indiscriminately from *any* subjects; for some things there are which appear probable even to a madman; [yet you never would dream of arguing about them;] but it supplies itself from subjects which require reasoning, as does rhetoric from subjects which are usual matters of deliberation. Its business then is respecting points about which we deliberate, and have no art specially conversant, and before auditors of such abilities as are not able to take a connected view of reasonings, conducted through

11. Rhetoric considers the *τιθάνον* for a class, not an individual,

and draws its supplies from subjects of deliberation.

12. Audience held to be *ἀπλοί*.

⁷ *Θορυβοῦνται*. Twining, in his notes on the Poetic, quoting a subsequent passage of this Treatise, in which this word again occurs, (ii. 23,) translates it, "are applauded," and observes, that "the commentators strangely mistake the sense of this word here, and in lib. i. c. 2. They render it absurdly,—*schementiùs percellunt—perturbant maxime*. Whether an audience be *pleased* or *displeased*, to any great degree, *noise* is equally the consequence; and the word *θορυβεῖν* is used, sometimes for the uproar of *approbation*, and sometimes for that of *dislike*."

many stages, nor to deduce an argument from remote principles. Now we deliberate on subjects which appear to admit of having themselves in either of two ways: for on questions which cannot, under any circumstances, past, present, or future, be otherwise on these, I say, no one deliberates, *at least not while he apprehends them to be such*⁸; for by such a deliberation nothing is gained. And you may draw your conclusions and inferences, sometimes from premises which you have arrived at by former syllogisms; and sometimes from propositions, not syllogistically deduced, but requiring such a process by reason of their not being probable at first sight; but of these processes, it is impossible that the former should not be hard to follow up, by reason of its prolixity (for your hearer⁹ is supposed to be a man of merely ordinary understanding), and the latter defective in persuasive efficacy, by reason of its not being deduced out of principles either acknowledged, or probable; so that it is necessary that both the enthymem and example should be conversant about points which, generally speaking, admit of being otherwise, (the example answering to induction, and the enthymem to syllogism).

13. Hence concluding ἐκ συλλελογισμένων πρότερον, being lengthy, and ἐξ ἀσυλλελογιστων μὲν δεομένων δὲ συλλογισμοῦ, being unadmitted—are to be avoided.

⁸ A man under a mistaken idea of the nature of the subject may possibly deliberate on a question, the nature of which is fixed and necessary. Still, however, as long as he remains under this impression, the subject relatively to him is of a contingent nature.

⁹ Cicero gives a similar caution:—"Hæc nostra oratio multitudinis est auribus accommodanda, ad oblectandos animos, ad impellendos, ad ea probanda quæ non aurificis statera, sed quadam populari trutina examinantur." De Orat. lib. ii. V may further prove that this precept has its foundation in nature, by quoting the words of a celebrated modern writer, who at least in penetration and knowledge of mankind, had few superiors: "The receipt to make a speaker, and an applauder one too, is short and easy. Take common sense *quantum sufficit*; add a little application to the rules and orders of the House; throw obvious thoughts in a new light, and make the whole with a large quantity of purity, correctness, and elegance of style. Take it for granted that by far the greater part of mankind neither analyse nor search to the bottom; *they are incapable of penetrating deeper than the surface*." Lord Chesterfield's Letters.

gism,) and be deduced out of few, and frequently out of fewer intermediate propositions than the syllogism, in its original form, consisted of. For if any of these be known, it is not necessary to mention it; for the hearer of himself makes this addition. For example, in order to convey the information that Dorieus was conqueror in a contest where a chaplet is the prize; it suffices to say, that he conquered in the Olympic games: but as to the circumstance that, having conquered at Olympia, he got a chaplet, there is no necessity for adding it, because every one knows it.

But as the *necessary* premises out of which the syllogisms of rhetoric are formed are very few, (for the majority of questions about which decisions and consideration are exercised admit of being otherwise; because men deliberate and consider on the subjects of human conduct, and all conduct is of this contingent nature, nor is a single branch, I may say, of these subjects necessary,) and it cannot but be that you should deduce contingent conclusions from premises whose nature is such; and necessary ones, from necessary; (this is evident to us from the *Analytics*;) I say, since this is the case, it is plain that the premises out of which enthymems are deduced, will be some of them necessary, but the greatest part contingent: for enthymems are adduced from probabilities¹⁰ (*εἰκότα*) and signs (*σημεία*). And thus it follows of necessity, that, of these, each

14. Enthymems are deduced either from *εἰκότα* or *σημεία*.

¹⁰ In despair of finding adequate English expressions for the words *εἰκότα* and *σημεία*, I have acquiesced in the usual, but erroneous translation. At the risk of incurring the charge of prolixity, the following are given as the most popular ways of explaining this difficult subject. Dr. Whately considers this "a division of arguments according to the relation of the subject-matter of the premises to that of the conclusion." The *εἰκότα* (or *δεδόται* of Aristotle) he takes to be an a priori argument, which may be employed to *account* for the fact supposed granted. The *σημεία* (or *δείκναι* of Aristotle) and example, arguments which could not be so employed: vid. *Rhetoric*, p. 116. Others, again, maintain that the *σημεία* is an argument to prove past matters, the *εἰκότα* to prove future. The majority of commentators, however, consider the *εἰκότα* and *σημεία* as propositions in different matter: thus,—

15. Definition of *εἰκός*.

respectively is identified with each of the forms. For probability is what usually happens, not absolute.

εἰκός, in contingent matter; in the ratio of an universal to a particular. *σημείον* in necessary matter.

As a particular to an universal. As an universal to a particular.

{ (Illicit process of the minor term,) hence inconclusive.	{ ἀναγκαῖον or τεκμήριον. (Conclusive, and only assailable in the premises.)	{ μὴ ἀναγκαῖον ἀνυμνον. (Inconclusive, the middle term not be distributed.)
--	--	---

Another explanation, founded on three passages, the first the *Analytics*; the second by Cicero (*de Inv.* i. 30); the third in Quintilian, (*v. c.* ix. 10,) adopted by Majoragius, is as follows: The *σημείον* is some *sensible fact*, either attested by sense or reducible thereto, not a general truth; hence it will be *minor* premiss in the enthymem, not the *major*, the *σημειώμενον* or thing signified by it, being the conclusion, and as the latter is known solely through and by the former, there is always real or supposed connexion between them.

1st. The *thing signified* may be contained in the *sign* which *implies* not only that, but something more. The latter then as regards the former, will stand in the ratio of a whole to part; as individual or particular nature to common or general what is definite always containing or implying more than what is indefinite (on which principle we are told in logic that *species* is more of a whole than a *genus*). Hence it is defined *ὡς τῶν καθεκαστῶν τι πρὸς τὸ καθόλου*, and is called *ἀναγκαῖον* or *τεκμήριον*. Hence Quintilian, observing the conclusiveness of this argument, denies it the name of argument at *Non sunt argumenta, quia ubi illa sunt, quæstio non est error* resembling that made by certain modern philosophers who deny the utility of logic because the premises of a syllogism virtually imply the conclusion.

2nd. The *thing signified* may not be contained or implied in the *sign*. The latter being more vague and indefinite than the former; bearing to the thing signified the ratio of a part to whole, as common or generic nature to individual or particular *ὡς τῶν καθόλου τι πρὸς τὸ κατὰ μέρος*. This enthymem appears in the same mood as the first, scilicet, *Barbara*, but the second figure, hence an illicit process of the minor term. Note, that as the *σημείον* is always the minor and the thing signified the conclusion, the relation here spoken of as *καθόλου* and *κατὰ μέρος*, must be understood not of the logical relation in the syllogism between the major premiss and the conclusion but of the relation between two things, one specific, the other general. Now in the *εἰκός* enthymem, on the contrary,

lutely so, however, as some define it, but, at any rate, that which, in contingent matter, has itself so towards that with respect to which it is probable, as an universal to a particular ¹¹. But of the signs, one 16. Three

relation of *εἰκός* and the conclusion (*ἐκείνο πρὸς δ' εἰκός*) is the strict logical relation of universal to particular, or of a generic law to its application in an individual instance. The *εἰκός* therefore is the *major* premiss, not the *minor*.

We see that the universal major in the *σημείων* enthymem cannot be the *σημείων* itself, because it is detached from any particular relation, and involves no particular deduction: nor yet is this major, though universal, an *εἰκός*, being *ἀπλῶς* and totally true, which is inconsistent with the very meaning of the word "probable."

Again, though the minor premiss of the *εἰκός* enthymem contains a simple matter of fact, it is not a *σημείων*, for to constitute a sign it must point to something else equally necessary with itself; a condition not fulfilled by the *εἰκός* enthymem conclusion. Still there is so much affinity between the minor premiss of the *εἰκός* enthymem, and the *ἀνέκδοτον* *σημείων*, that by converting the major premiss, with the addition of the word "probably" to the copula, we shall change the *σημείων* into an *εἰκός* of low degree: e. g.

Those who breathe hard *probably* have a fever.
hard.

This man breathes hard. This man breathes hard.

This man has a fever. This man *probably* has a fever.

And this affinity perhaps led Quintilian to confound Aristotle's *ἀνέκδοτον* *σημείων* with his *εἰκός*. (lib. v. c. ix. § 8.) It is this kind of "sign" and the argument deducible from it, which constitutes what, in criminal cases, is called circumstantial evidence.

Aristotle mentions another sort of *σημείων* (§ 18) which comes out a syllogism in the third figure, with an universal conclusion, and hence its error is an illicit process of the minor term. The principle on which this syllogism proceeds is an imperfect, precarious induction, and endeavours to deduce a general truth from a particular instance. The ratio, therefore, of the sign to the thing signified, is as one to all. This, it will be observed, is a new signification of the terms *καθόλου* and *οὐδ' ἑκαστου*, but one which they will obviously admit, and borne out by the example he adduces.

The above explanation has been given rather at length, because it is not generally so well known as the others, nor so easy to follow.

¹¹ The usual definition of *εἰκός* is considered by Aristotle as too vague; he limits it, therefore, to contingent matter, and would have it stand in such a relation to the conclusion to be drawn, as an universal to a particular. For instance, the

different
sorts of
σημεία.

17. τεκ-
μήριον.

18. ση-
μεῖα δυνά-
μιμα.

has the same ratio as a particular to an universal; the other, as an universal to a particular; and these, the one which is necessarily conclusive, I call τεκμήριον; but the other, which is not necessary, I call no name assigned to it in reference to its difference [as a species]. Now by necessary propositions mean those out of which a syllogism is adduced; and hence this kind of signs is called τεκμήριον, for when they think it impossible to do away what has been stated, people then esteem that they adduce a τεκμήριον; the point having been evinced and concluded for, according to the old language, τέκμαρ is the same as "a boundary." Again, there is one species whose ratio is as that of a particular to an universal; thus, were one to assert, for instance, that "The wise are just; because Socrates was wise and just, this then is a sign, but it may be done away, even supposing the premiss stated to be true; for it violates the rules of syllogism, as to the other¹², when for instance, a person alleges as a sign that a man is sick, his being in a fever; or says a woman has a child, because she has milk; this is a necessary sign; which very one of the signs alone amounts to a τεκμήριον; since it alone, if the premiss be true, cannot be done away. The other sign is in the ratio of an universal to a particular; as if, for instance,

Corinthians at Athens state as an εἰκός, that the Corcyraeans were addicted to piracy, their shunning alliances with other states, because those who would become pirates study secrecy; but this broad fact is, when compared with the single case of the Corcyraeans, as an universal to a particular, or as a whole to a part, pirates being one class only of the many who study secrecy as a veil to crime. It is moreover a case in *confutatio* matter; for those who study secrecy, may or may not be addicted to piracy.

¹² Τεκμήριον, the other species of σημείων: e. g. "Ut Platonis illud, seu quis dixit alius, perelegans esse videtur quem cum ex alto ignotas ad terras tempestas et in deserta littus detulisset, timentibus cæteris propter ignoracionem eorum, animadvertisse dicunt in arenâ geometricas foveas quasdam esse descriptas; quas ut vidisset, exclamavisse bono essent animo; videre enim se hominum vestigia; videlicet ille non ex agri consuetudine, quam cernebat, sed ex trinitate indicii interpretabatur." Cic. de Rep. c. xvii. p. 1.

one were to say it was a sign that a man has a fever, because he breathes thickly. But this, even granting the premiss be true, may be done away : for it is very possible that one who has not a fever should breathe thickly. Now what is probability, what sign, and what *τεκμήριον*, and in what they differ, has been explained : but in the Analytics [these several gradations of proof] as well as the reasons why some are not correctly inferred, and others are, have been distinctly stated with greater clearness¹³. As to example, it has been stated that it is an induction, and induction on what kind of subjects ; and its ratio is neither that of a part to a whole, nor of a whole to a part, nor of a whole to a whole : but example is in the ratio of a part to a part¹⁴, of a similar case to a similar, when, both coming under the same genus, the one case happens to be better known than the other. For instance, you assert that Dionysius, in asking a guard, has views of setting up a tyranny, because Pisistratus before him, when designing this, began to ask for a body guard, and when he got it, established himself as tyrant ; so too did Theogenes, at Megara. And all other persons who have acted in this way, and with whom your audience are acquainted, become examples against Dionysius, with respect to whom they do not yet know whether he be asking a guard with this intention : and all these

19. Example, or rhetorical induction.

ὡς μέρος πρὸς μέρος.

¹³ In the Analytics, he says, "the *εἰκὼς* is *πρότασις ἰνδοξος*, but the *σημείον* professes to be *πρότασις ἀποδεικτική*, whether necessary or probable. Now an enthymem (he continues) is an imperfect syllogism, consisting of *εἰκότα* and *σημεῖα*, and the latter are assumed in *three* ways, according to the number of the figures of syllogism (for Aristotle made only *three*), the first, second, and third of logic. In all these the *σημείον* is the *μικρόν* (i. e. the argumentum, or *minor* proposition), but the first alone is *ἐλευθέρον*." Analytic. Prior. lib. ii. c. xxix. *Edit. Bipont.*

¹⁴ Not as a part to a whole, for that would be *σημείον* ; nor as a whole to a part, for that would be *τεκμήριον* ; nor as a whole to a whole, for that would be *παράγωγη* (which, when perfect, reasons from a whole taken *individually* to the same taken *collectively*). Example therefore is in the ratio of a part to a part.

cases come under the same general premiss¹⁵, that he who is laying schemes to set up a tyranny, asks guard. Now then the points have been stated out of which the proofs which have an air of demonstration are adduced.

20. Two different sorts of enthymem.

The difference of enthymemes is considerable, and has remarkably escaped nearly every writer : it is too, a difference the very same as exists between syllogisms in logic : for some enthymemes there are applicability equal to that of rhetoric itself, in the same way that in logic some syllogisms are ; other according to the extent of other arts and faculties existing, some already, and others not yet comprised by rules. And hence those who employ them both escape the observation of their hearers, and if they handle them more than is right, pass out of their proper characters as mere orators. This however will become clearer, if stated more in detail. I call the

21. 1st. *τὸ πολι.*

forms of reasoning¹⁶ properly logical or rhetorical, reference to which, I use the expression *places* ; such are those which apply with equal advantage to questions of justice, and natural philosophy, and of the philosophy of social life, and to numerous other subjects which differ in species. The *place* for instance of greater and less ; for there will not be a whit more advantage in deducing a syllogism or an enthymeme from this place, on a question of justice or of natural philosophy, than on any other subject whatsoever

2nd. *ἐὶ δὲ η.*

and yet there are questions specifically distinct. But I call *peculiar*, all those reasonings which arise out of propositions conversant with each species and genus of subjects ; for instance, there are propositions of subjects of natural philosophy¹⁷ out of which neither

¹⁵ By the *τὸ αὐτὸ γένος* is understood a common circumstance and property of nature ; by the *τὸ αὐτὸ καθόλου*, a general proposition in reference to all such cases.

¹⁶ *Διαλεκτικοὶ καὶ ῥητορικοὶ*, i. e. so exactly corresponding, in point of extent, to these arts, as to be applicable often, and with as little limitation, as they are themselves.

¹⁷ This appears evident enough ; yet the whole system of judicial astrology and the planetary influences was nothing more than an attempt of the kind.

enthymem nor syllogism could be constructed respecting morals; and on this subject, again, there are others out of which will arise no reasoning respecting *natural* philosophy; this is also the case equally on every subject. Now the first-mentioned reasonings (the *τότοι*) will render a man informed on no class of subjects, for they are about no distinct subject-matter: as to the other (*ἰδία*), the orator, in proportion as he makes the better¹⁸ selection of propositions peculiar, will imperceptibly produce a science different from mere rhetoric or logic¹⁹; for, if he light on first principles, thenceforth, it will no longer be rhetoric or logic which he is employing, but that science whose principles he embraces.

The greatest number of enthymems are constructed 22. out of these peculiar propositions, which are particular and limited; and from the universal ones, the less. Just then as I did in the *Topics*, so here must I make a distinction of the peculiar²⁰ *propositions* and places of enthymems, whence we are to deduce them. Now I mean by *εἰδη*, those propositions which are peculiar to the several kinds of rhetoric; by *τότοι*, those which are common alike to all. Let us then treat of the special propositions before the others. Let us, however, first ascertain the kinds of rhetoric itself; in order that, having distinguished them as to

εἰδη first
discussed.

¹⁸ *Βελτίω*, . i.e. *better*, quæ the art in question is concerned; —though as regarded by the logician or rhetorician, they will be in fact *worse*, inasmuch as they tend to merge these faculties, whose characteristic is universal applicability, in that particular art from whence the *παραδείγματα* happen to be deduced.

¹⁹ We may here mention that *διαλεκτική* is not quite what we understand by logic, but seems rather to have been the faculty of *conversation*, which the ancients cultivated as a science, and of which logic was a species. "Zeno, the Eleatic, divided his dialectics into three parts: on consequences, *ἐπὶ τῶν ἐκτενῶν* and *ἐπιστηνῶν*." Whately's *Logic*. Diog. Laert. in *Platone*, 52, § 87.

²⁰ He here designates, by the name *εἰδη*, those propositions of limited applicability which he had before called *ἰδία*; those, in fact, which he considers as contradistinguished from the *τότοι* or *general* arguments, which he tells us are applicable to a range of subjects as little limited as the subjects of rhetoric itself.

their number, we may separately ascertain the elements of persuasion and propositions peculiar to each ²¹.

CHAP. III.

He shows that there are three kinds of Rhetoric ; what is the end of each ; and on what subject we must provide ourselves with propositions.

1. An oration pre-supposes three things :
 1st. a speaker :
 2nd. a subject :
 3rd. a hearer.
2. Hearers of three sorts.
3. Hence three kinds of rhetoric ; Deliberative, Judicial, Epideictic. Business.
4. Time
- THE species of rhetoric are three in number, for of so many descriptions are the hearers of orations ; because an oration is constituted of three things, of the speaker, and of the subject about which he speaks, and of the person to whom ; and to him it is that the end of the speech has its reference ; I mean to the hearer. The hearer must of necessity be either an unconcerned hearer, or a judge ; and a judge either of things past or to come ; one then acts as judge respecting what is yet to happen, as the member of a popular assembly ; the other respecting what has already taken place, as the president of a court of justice ; the other respecting the abilities of the orator, as the unconcerned hearer¹. Thus, then, there will necessarily result three kinds of orations, the deliberative, judicial, and demonstrative². The business of deliberation is partly exhortation, partly dissuasion ; for invariably those who in their individual capacities simply advise, and those who publicly harangue, effect one of these objects. The business of judicial rhetoric is partly accusation, partly defence ; for the litigants must of course do one or the other of these things. Of demonstrative the business is partly praise, partly blame. Moreover the

²¹ Cf. lib. ii. c. 22, § 13 : στοιχείων δὲ λέγω καὶ τόπων ἐνθὺ μύματος τὸ αὐτό ; and lib. ii. c. 26, § 1 : τὸ γὰρ αὐτὸ λέγω στοιχείων καὶ τόπων.

¹ Both hearers are *interested* ; but the *ἑωρὸς* is a speculative, the *κρίτης* a practical, auditor.

² Vide Quarterly Review, July, 1822, No. liv. vol. 27, p. 391

time proper to each of these respectively is, to the deliberative orator, the *future*; for in exhorting or dissuading, he advises respecting things future⁵. The time proper to a judicial pleader is the past; for it is ever on the subject of actions *already done*, that the one party accuses, and the other defends. To the demonstrative orator the *present* time is the most appropriate, for it is in reference to qualities actually possessed that all either praise or blame. Orators, however, do very frequently avail themselves of other times; as well by awakening a recollection of what has already happened, as by anticipating what is likely to happen. The end of each of these branches is different, and, as belonging to three subjects, is itself triple.

5. and end
peculiar
to each.

The object of the deliberative orator is the expedient and inexpedient; for he who recommends, advises you to adopt the better measure; but he who dissuades, diverts you from the worse; the other considerations either of justice and injustice, of honour or disgrace, he adjoins by the way, in addition to these two. The object of the judicial pleader is justice and injustice; but he also embraces by the way those other considerations. The object of those who praise and blame is honour and disgrace; and these also refer other considerations to these two.

But we may take as a sign that what I have stated is the particular object of each, the fact that there are times when they will not feel inclined even to raise a question about the other: the litigant, for example, will not always deny that the fact has taken place, or that it has *hurt* the other party; but he

6. Proof
of this
from fact.

⁵ "Passion may be as much excited by the orator's reasonings on a future event, as on one past; and indeed the future, *ceteris paribus*, produces the greater effect on us, as that to which we are approaching, and what every moment gives us the added interest in, which it takes from the past. But then the past has the counterbalancing privilege of being susceptible of infinitely better testimony and evidence, from memory; present effects, etc.; memory, indeed, the great eye of the mind, unlike that of the body, sees all we have left behind, and nothing before it." Campbell, *Phil. of Rhet*

never, under any circumstances, would admit that he has been *guilty of injustice* toward him ; for then would there be no need of a judicial decision. In the same way the deliberative orator very often abandons the other considerations ; but as to the point that he is advising what is disadvantageous, or dissuading from what is useful, this will he never admit ; but it frequently happens that (on a question of invasion) they do not trouble themselves to make out that the subjugating a neighbouring people is not inconsistent with justice. Just so those who praise and blame do not consider whether the person's conduct has been advantageous or disadvantageous ; nay, they, in many instances, set it down on the score of praise, that, overlooking his own interests, he wrought some deed of honour : thus they praise Achilles, because he came to aid the cause of his comrade Patroclus, with full knowledge that himself was fated to die ; it being in his power, [by withholding that aid,] to live. To him, however, a death such as this was the more honourable prize : but to live would have been advantageous.

7. The orator in each class must have κοινὰ πρότασις.

From what has been said, it is plain that the orator must first be in possession of propositions on the subject of each of these divisions, *separately* ; for the τεκμήρια, the probabilities and signs, are degrees of proof available to rhetoric *generally*. *It is necessary* because syllogism, in general, is made up of propositions, and the enthymem is a syllogism made up of the propositions which have been mentioned.

8. And as it cannot be that what is impossible should ever heretofore have been done or should ever be done hereafter, but what is possible, only : as again it cannot be that what has not happened, or that what is never about to happen, ever should, the one have been already done, the other be about to be done : it becomes necessary for the deliberative, judicial, and demonstrative orator to have propositions on the subject of possibility and impossibility ; and on the questions, whether a fact has or has not happened, will or will not take place. And further,

since all, as well in praising as in blaming, as well in exhorting as in dissuading, as well in accusing as in defending, attempt to evince not only the points I have mentioned, but likewise to prove respecting this good or bad, this honourable or dishonourable, this just or unjust, that it is, moreover, either great or small, whether speaking of the things independently, or comparing them respectively one with another: as this is the case, it is plain that it will be necessary to have propositions respecting the degrees of great and small, of greater and less, as well *general*, as *peculiar to each division*: what good, for instance, is greater or less, what deviation from justice, or what conformity to it; and so in the same way also respecting the other subjects. The points then have been stated, respecting which it will be absolutely necessary to get at propositions. We must, after this, make a distinction between each of these respectively; the questions, for instance, about which deliberation is conversant; those, too, about which demonstrative rhetoric is concerned; and, thirdly, those about which judicial.

CHAP. IV.

The Questions relative to which that Orator should be in possession of Propositions, who is about to advise on points of the highest concernment.

FIRST, then, we must ascertain what kind of good or evil it is respecting which the deliberative orator gives his advice; for we have seen that it is not about every kind, but about such as may or may not befall us¹. Such however as either has or will have an existence of *necessity*; such, again, as it is impossible should exist or be produced; respecting every such description [of good or evil] there never is any de-

1. The deliberative orator advises on subjects,
2. not necessary,

¹ This limitation was established in cap. ii. § 12. He develops this point more fully, Nich. Eth. iii. cap. 3.

3. nor on all that are contingent;

but where we apprehend a power of performance.

4. Minute discussions here to be avoided, as not in the province of rhetoric,

5. which is made up of the

liberation: neither, in fact, is there about every one even of *contingent* subjects; for of goods which may or may not accrue², some exist *naturally*, others are produced by chance, on the subject of which it is not worth while to deliberate; but evidently [he is confined to subjects] about which men resolve; of which character are all such as are of a nature to be referred to ourselves, and the first principle of whose creation is in our own power; for in deliberation we carry on our views thus far, viz. till we shall ascertain whether the achievement of the object be possible to us or not³.

Now, to enumerate in accurate detail, and to divide into separate species, every subject about which men are wont to interest themselves; to enter more-over into minute distinctions conformable to the standard of truth to the very utmost that the subject admits it; these inquiries it is not necessary, on the present occasion, to institute, by reason that they belong not to the art of rhetoric, but to some art whose province is, in a more peculiar manner, intellect, and truth⁴; and because many speculations more than are proper to this art have already been assigned to it. For that remark is true, which I have before made; that rhetoric is made up of the science of

² *Τῶν ἐνδεχομένων καὶ γίνεσθαι καὶ μὴ*. It may be well to remark of this expression, which has occurred so often already, and will much more frequently in the sequel, that it is Aristotle's usual appellative for things *contingent*, things *which may as well happen as not*. He has himself defined it thus—*λέγω δ' ἐνδέχασθαι, καὶ τὸ ἐνδεχόμενον, οὐ μὴ ὄντος ἀναγκαίου, τεθέντος δ' ὑπάρχειν, οὐδὲν ἴσται διὰ τοῦτ' ἀδύνατον*. Anal. Pri. lib. i. c. 13. I call that a contingent, which not being necessary, but being supposed to be, there will follow nothing impossible from such a supposition.

³ "Inciditur omnis jam deliberatio si intelligitur non posse fieri, aut si necessitas affertur." Cicero de Orat. ii. For an account of things, *δυνατὰ ἡμῖν*, vid. lib. ii. c. 19.

⁴ Such minute research, as it tends rather to bewilder, must of necessity be excluded from rhetoric, which is always supposed to address an audience of *ordinary abilities*; *ὁ κριτὴς ὑπόκειται εἶναι ἀπλοῦς*, cap. ii. § 13; whereas such distinctions could only be appreciated by the philosopher and man of education.

logic⁵, and of that branch of the science of social life which recognises the subject of morals; and it partly resembles logic, partly the declamations of the sophists: and in exact proportion as one shall attempt to get up logic or rhetoric, not as they are *general faculties*, but as distinct sciences, he will unwittingly do away their nature by his encroaching, in the act of so tricking them out, upon sciences of certain *definite* subject-matter, and not of words alone. Let us, however, even on the present occasion, discuss such points as it is worth while to enlarge upon, and which still reserve the more full consideration for the science of social life: for nearly all the questions on which men deliberate, and on which the deliberative orator harangues, those at least of the highest concernment, are in number *five*⁶; and these are questions of *finance*, of *war and peace*, and again respecting the *safeguard of the territory*, and respecting *imports and exports*, and also respecting *legislation*.

So that it will be fitting that the orator, who is about to give his advice on the subject of the *finance* of the state, be acquainted with its revenues, both

analytical and political sciences;

6. and whoever treats it not as a faculty but a science, deviates from the art.
7.

Five occasions for the employment of deliberative oratory.

1. πόροι.
2. πολέμοι.
3. φυλακή.
4. τροφή.
5. νόμοι.
8. i. πόροι. Finances.

⁵ The analytical science seems to have been the analysis of arguments.

⁶ All society supposes *law* (νόμοι); the first object of which is the *support* of its inhabitants internally (τροφή); and the second *its territory* externally (φυλακή); in maintaining which *war* (πόλεμος) must some time or other be unavoidable, and to carry that on, fixed *revenues* (πόροι) are requisite. We may observe, then, a regular gradation in these five questions; though in his examination of them Aristotle proceeds analytically, and takes that which first presents itself in civilized society; namely, the ways and means. Xenophon also, in his *Memorabilia*, represents Socrates as using nearly the same five subjects and arrangement, when dissuading Glaucon, a young Athenian, from attempting politics too early. Perhaps Aristotle may have borrowed the hint from him. Cf. Xenoph. Mem. lib. iii. c. 6: and a translation of the whole passage in the posthumous works of Dr. Franklin, vol. v. p. 77. Lond. 1819. The reader will find an instance of τροφή practised by the piratical states of Greece, in Thucydides, lib. i. c. 5, and of πόροι in the first tax levied at Rome, when the militia were turned into a standing army, during the war with Veii. Livy, lib. iv.

what and how great they may be; in order that, if any branch is overlooked, it may be added to the rest; and, if any be in default, it may be augmented. Moreover he should be acquainted with the whole expenditure of the state, that if any expense be superfluous it may be curtailed; if any too high, it may be reduced. For men become more wealthy, not only by adding to their capital stock, but by detracting from their expenses as well. These, however, are points which we must not only learn from our own experience as individuals; but, with a view to deliberation on these subjects, one ought to be qualified by a research into the discoveries made by other people.

9. ii. πό-
λεμος καὶ
εἰρήνη.
War and
peace.

Respecting questions of *war and peace*, the orator must needs be acquainted with the force of the state, how great it actually is already, and how great it admits of becoming; of what description also it is already, and what additions admit of being made to it. Moreover he should know both what wars the state has been engaged in, and how it has conducted them. This must he needs know, not in relation to his own state only, but as regards frontier states also; particularly in the case of those with whom there is a likelihood of being at war, in order that toward the more powerful, pacific measures may be held, and that in regard to the weaker, it may rest with his own state to make war or not. He should also be acquainted with the description of force which belongs to each state, whether it resemble or differ⁷ from his own; for it is possible, even in this respect, to secure an advantage to yourself, or to have one taken by the enemy. In order to all which things, the orator must necessarily have considered with attention the wars, not of his own state only, but those also of others, what has been their issue; for it is natural that from similar causes similar results should accrue.

⁷ See this point touched on by Pericles, Thucyd. i. 141 where he declares the Peloponnesians to be πολέμιον, μὴ πρός τι ὁμοίαν ἀντιπαράσκειν, ἀδύνατον.

Moreover as regards the *safeguard of the territory*, it should not escape his attention how that is preserved; but he must be acquainted as well with the numbers, as the nature of the garrisons, and with the positions of the strong holds: this it is impossible that one not acquainted with the country should know. But known it must be, in order that if any garrison be weak, it may be reinforced; if any be unnecessary, it may be done away, and the force may rather maintain positions strictly adapted to defence.

10. iii. φυ-
λακή.
Safe-
guard of
the coun-
try.

Again, on the subject of *provision*, the orator should know how great a consumption is sufficient to subside the state, and of what kind that is which arises *at home*, and what is *imported*; and those nations whose exports there is need of, and those to whose markets he wants to import his home productions, in order that commercial treaties and agreements may be entered into with them. [All this should the orator be acquainted with], because it is absolutely necessary strictly to preserve your citizens from any ground of quarrel in two of their relations, viz. in respect to those physically their superiors⁸, and those who may be serviceable in aforementioned points.

11. iv.
τροφή.
Provi-
sion, i. e.
imports
and ex-
ports.

Thus much then it is absolutely necessary that the deliberative orator should be able to consider, in order to the security of the state; neither is an attention to legislation the least essential; for in its legislative enactments stands the safety of the state. And thus it becomes requisite, both that he should know how many forms of government there are, and what system of things is expedient for each; and what things, as well peculiar to the government, as opposite to it, have a natural tendency to destroy it⁹. I talk of a government being destroyed by

12. v. νό-
μοι. Le-
gislation.

⁸ He gives hints, § 9, about what is necessary, *ὅπως πρὸς αὐτὸν καὶ καλῶς ἀναβῇ*.

⁹ For a statement of the things, peculiar to democracy and oligarchy, which have a tendency to destroy them, see the speeches of Megabyzus and Darius, on the question of the con-

things *peculiar to itself*; because, with the exception of the most excellent form of government, every other, by being relaxed or strained too much, destroys itself. Thus a democracy, not only when relaxed, but even when overstrained, grows weaker, and thus will at last be brought an oligarchy. Just as hookedness or flatness of the nose, not only approach the mean in proportion as they relax from the excess, but also, when they become excessively hooked or flat, dispose the nostrils in such a way as no longer so resemble the nasal organ.

13. It is serviceable moreover with a view to *legislation*, to apprehend not only what constitution is expedient, by deriving your view from circumstances past, but to become acquainted also with the constitution of other states, and to what kind of constitutions what sort of measures are adapted. Thus it is plain, that accounts of travellers are of use with a view to legislation; for hence we are able to ascertain what the laws of other nations are; and with a view to debates on matters of state, the researches of those who write on human conduct are useful: all these points however form part, not of rhetoric, but of the science of social life.

The accounts given by travellers of foreign states are also useful.

So many then are the questions of highest concern touching which the deliberative orator must be in possession of propositions. We will, however, again discuss the elements out of which it is proper to exhort and dissuade, as well on these as on other questions.

stitution fittest for Persia, after the assassination of Smerdis, the Magian usurper. Herodot. iii. 81, 82. See also Eth. Nich. viii. 10.

CHAP. V.

The Objects at which Orators should aim in exhorting or dissuading.—What Happiness is ; and whence its constituents are deduced.

NEARLY every one individually, and all men in general, have some object, at which directing every aim, they both choose and avoid ; and this, to speak summarily, is happiness¹ and its constituents. Let us then, for the sake of getting at a received standard, ascertain what happiness, generally speaking, is ; and what are its constituents ; for on the subject of it, and what conduces to it, and of its opposites, exhortation or dissuasion is always conversant ; and this, because we needs do the things which procure it or any of its constituents, or which render it greater from having been less, and refrain from doing the things which destroy or impede it, or produce its opposites.

Let happiness then be defined to be good fortune in conjunction with virtue²,—or, independency of life,—or, the life which is most pleasant, accompanied by security,—or, abundance of property and slaves, with power to preserve and augment it ; for mankind allow either one or more of these things to amount nearly to happiness. If then happiness be such as I have described, its constituents must necessarily be—1st, noble birth³, many and excellent friends, wealth, a good and numerous offspring, a good old age ; and moreover personal excellencies ; as health, comeliness, strength, stature, ability in the games ; character ;

¹ The end of deliberation is τὰ συμφέροντα, of action εὐδαιμονία.

² The first of these is the opinion of the Socratic school ; the second, of the Stoics ; the third, of the Epicureans ; the last, the popular one. See a similar description, Hooker, v. § 76, p. 413.

³ Of these, the first enumerated as far as “ character ” inclusive, may be considered εὐδαιμονία : the two next, “ honour and good fortune,” as τίμια : the last, namely, “ virtue and its constituents,” as εὐαρεστά, according to the mode of philosophic division mentioned in the Ethics, lib. i. c. 12.

Goods are
internal
or external.

5. External.
1st. High
birth.
i. National.

ii. Individual.

6. Good
offspring.
i. Public.

ii. Private.

—2nd, honour, good fortune;—3rd, virtue, and its constituents, prudence, courage, justice, temperance. Thus furnished, one would be most independent, were both external and internal goods his own; for besides these there are no others. But the internal goods are mental and personal; the external, noble birth, friends, wealth, and distinction. We deem, moreover, that power and good fortune ought to be present, for thus would life be most independent. Wherefore, let us ascertain what each of these advantages is.—Noble birth then is, in the case of a nation or state, their being aborigines⁴, or at least ancient possessors, and for their first leaders to have been illustrious, and indeed for many to have been born from among them illustrious on the score of things which men emulate. Considered in reference to individuals, noble birth is derivable from male or female ancestry, and legitimacy on both sides; and, just as in the case of a state, to have had the first of their line well known on the score of virtue, wealth, or any other valued quality; and for many of their kindred to have been illustrious, as well men as women, as well young as old:—we cannot be at a loss for the constituents of a good and numerous progeny. As referred to the commonwealth; a *good offspring* will be, youth who are numerous and accomplished. Accomplished in respect to personal excellence, as stature, comeliness, strength, ability in the games: and as to that of the mind, temperance and courage; these all, in their two divisions, are excellencies of the young. In reference to individuals, a good and numerous offspring consists in your own children being numerous, and they, as well male as female, such as I have described. The excellence of females in regard to person, is beauty and stature; in regard to the mind, temperance and fondness for employment, without meanness:—and we ought, as well individually as collectively,

⁴ It was the boast of the Athenians that they were αὐτόχθονες; and in reference to this Cicero says of their state, "Quæ vetustate ea est, ut ipsa ex sese suos cives genuisse dicatur." Orat. pro L. Flacco.

in respect both to men and women, to see that each of these qualities exists. Since all states among whom the regulations regarding women are bad (as is the case among the Lacedæmonians), enjoy scarcely the half of happiness.

The constituents of wealth are, plenty of money, the being master of lands and seats, with the possession moreover of personal property of live stock and slaves, such as are remarkable for number, stature, and comeliness; and all these should be secure, and respectable, and useful. The useful are of that description rather which are profitable; the respectable, which conduce to enjoyment. But by profitable I mean those out of which the rent arises; by those conducing to enjoyment, all out of which arises nothing (that's worth mentioning at least) beyond their mere use. The definition of security is the having possession there, and in such a manner, that the enjoyment of the property is one's own. The essentials of a *property* then exist, when the right of alienating is in one's hands: I understand by alienation either gift or sale. But, in a word, the being rich stands more in enjoyment than in possession; for the active employment and the use of such means is wealth.

7. Wealth must be,

- i. ἀσφαλῆ.
- ii. ἐλευθερία.
- iii. χρησίμια.

Goodness of character is the apprehension of mankind, that you are a worthy person, or in possession of something of such a kind that all men aim at it, or at least the generality, or the good, or the well-judging. Honour is an evidence of your having a character for beneficence; and those are honoured with justice, and in an eminent degree⁶, whose beneficence has already been exercised: not but that he, too, is honoured who simply has the power to benefit. Beneficence relates either to the safety, and the causes, whatever they are, of the existence of its object, or to his wealth, or to any other goods whose acquisition is not easy, whether it be so generally, or at that place or time. For many meet with honour

8. Goodness of character.

9. Honour.

⁶ Aristotle's *οἱ εὐεργετηκότες* may be found beautifully enumerated in the book of Ecclesiasticus, chap. 44.

in consequence of things apparently trifling ; but then it is the manner or the time [of conferring the benefit] which is the reason. The constituent parts of honour are sacrifices,—monumental inscriptions, in metre or prose,—rewards,—consecrated pieces of ground⁶,—precedence,—public burial,—statues,—pensions from the state ; those received among barbarians are—prostration,—giving place⁷. The presents also usual among each people are, with them, respectively marks of honour ; for a present is at once the gift of property, and a mark of honour. Wherefore it is that the avaricious are equally desirous of these, as the ambitious ; because they convey to both that which they desire, since at once it is a property, the object which the avaricious desire, and includes honour, the object of the ambitious.

10. Inter-
nal.
2nd.
Health.

The excellencies of the body are health ; and that in such a degree as for us to be exempt from sickness, while we have the free exercise of the body. For many are in a state of health, indeed, whom, like Herodicus⁸, no one would feel inclined to congratulate on the score of health, by reason of their depriving themselves of most, if not all, the enjoyments proper to man.

11.
Beauty.

Comeliness is different according to the several ages. Now the comeliness of a youth, is the having a body useful in enduring toils, whether those of the course, or of personal exertion, himself being pleasant withal to look upon with a view to delight. On which account those who practise the pentathlon are most comely, inasmuch as they are formed for violent

⁶ Instanced in the compliment paid to the memory of Brasidas at Amphipolis, Thucyd. v. Hooker, v. § 34, p. 133 ; and § 47, p. 179.

⁷ Here perhaps we may mention a remarkable compliment paid to fallen valour by the civil law ; a father of three sons was entitled to considerable immunities, which continued to him even after their death, if they had fallen in battle : “ *Hi enim qui pro Republicâ ceciderunt in perpetuum per gloriam vivere intelliguntur.*” Instit. lib. ii. tit. xxv. § I. Hooker, ii. p. 293.

⁸ Herodicus was a physician, B. C. 440.

exertion, and swiftness as well. But the comeliness of one who has attained life's prime, is a person adapted to the fatigues of war, with an aspect to be looked upon with pleasure tempered by awe. That of the old consists in the body being capable of the fatigues which it needs must undergo, and exempt withal from pain, by reason that it has none of the afflictions by which an old age is disfigured. Strength is the capability of moving another at will: you move another, of course, either by dragging, or shoving, or lifting, or crushing him; so that the man who is endowed with strength, is requisitely so for some, if not for all these purposes. Excellence of stature, is the exceeding the generality in height, substance, and breadth, in such a ratio as not, by reason of that excess, to render one's motions more tardy. Gymnastic excellence of person is made up of stature, strength, and speed; for the swift is also endued with strength: for he who is able to throw out his legs in a particular way, and move them rapidly, and in a forward direction, is fit for running; but he who can crush and grapple with an adversary, is fit for wrestling; while he who can send him forward by a blow, is the man for boxing: but if any be endued with the two latter qualifications, he is fit for a pancratiast; while he who has all three may contend in the pentathlon.

12. Strength.

13. Stature.

14. Gymnastic excellence.

A good old age is an old age slow in approach, unattended by pain; for neither is it a good old age if one grows rapidly old; nor if he does so slowly, indeed, but painfully: this blessing, however, is of the number both of the excellencies of the body and of fortune. For one who is neither unmolested by sickness, nor endued with strength, will not be exempt from sufferings; and his days will be but few, and those not void of pain: nor without good fortune will he hold out at all. Indeed, independently both of strength and health there is means of long life; for many, without the excellencies of the body, are long-lived. But accuracy of statement on these subjects makes nothing to our present purpose.

15. Good old age.

16. Friends. In what number and excellence of friends consists is not doubtful, it having been distinctly stated, respecting a friend, that he is a friend who exerts himself to do for another whatever he esteems good for him, solely for the other's sake. He to whom *many* are so affected, has numerous friends; he to whom *worthy* men, has excellent friends.
17. Good fortune. Good fortune is the accession, and actual possession, either of all, of most, or the greatest of those goods of which chance is the cause. Now chance is the cause of some things about which there are arts conversant⁹; of many things, too, unrecognised by art; for instance, of whatever things nature is a cause; for it is possible that they should happen contrarily to nature: for art is a cause of health; nature, of comeliness and stature. In a word, those goods proceed from chance, about which envy is felt¹⁰. Chance is also a cause of those goods which baffle all calculation; when, for instance, one is handsome, the rest of whose brothers are ugly; or when every one else overlooked a treasure, and he found it; or if a weapon hit one's neighbour and not one's self; or if he alone, who used always to frequent a place, did not come there, while they who came then *only* were destroyed; for all such things appear to be pieces of good luck.
18. Virtue. As to moral excellence, since that topic is most intimately connected with praise¹¹, we must lay down distinctions respecting it when we treat of the subject of praise. It is then plain at what objects we ought to aim in exhorting, as likely to take place, or

⁹ On the affinity of art and chance, see Eth. Nich. vi. 4.—

Τέχνη τύχην ἰστέρεξε, καὶ τύχη τέχνην. Agatho.

The affinity appears to consist in this, that arts very often owe their origin to chance; as the capital of the Corinthian pillar, for instance, from a basket of acanthus flowers; and painting from tracing a shadow on the wall. Compare also the Poetics, ch. vi. where he deduces poetry from the αὐτοσχεδιάσματα or extemporaneous effusions of its rude votaries.

¹⁰ Cf. ch. x. § 12.

¹¹ The subject of Epideictic Rhetoric.

already in existence ; and what in dissuading, for they are the contraries of these.

CHAP. VI.

Of the Good and Expedient treated generally.

SINCE the expedient is the object proposed to the deliberative orator, and as all form their conclusions, not about the end itself, but about the means conducive to that end ; as moreover these are all things which are expedient in reference to human conduct (now every thing expedient is a good), we shall have to ascertain certain elementary propositions, on the subjects of the good and the expedient in general.

Let good, then, be defined to be, 1. Whatever is an object of choice independently, for its own sake ; 2. and for the sake of which we choose something else. 3. What every thing aims at¹, or every thing which has perception, or which has intelligence ; or every thing would aim at, were it possessed of intelligence. 4. Whatever intelligence would award to each. 5. Whatever the intelligence conversant with every instance awards to each, that to each individual is his good. 6. That which being present, one is well disposed and independent. 7. Independency. 8. Whatever produces or preserves such advantages² ; 9. and that on which they are consequent. 10. Whatever, too, has a tendency to prevent or destroy their opposites. Now, things are consequent in two ways ; for either they may be consequent *simultaneously* or *subsequently*.—Knowledge, for instance, is a consequent on learning *subsequently* ; life is so on health *simultaneously*. Again, things are productive in Things

1. The deliberative orator advises on "the means," therefore he must know the *συνφίρον*.
2.

3. Consequences are twofold.

¹ This principle, which he insists on even in his moral treatises, is peculiarly adapted for a test in rhetoric ; where, if the subject be only reconciled to this standard of previous opinion, the end, persuasion, is forthwith answered.

² Hooker, v. § 65, p. 306.

are productive in three ways.

three ways³; first, in the way that the being healthy is productive of health, or as food is so of health, or as exercise is, because usually it does produce health.

4. Indisputable goods.

These things being laid down, it must be of course that acquisitions of good, and the exemptions from evil, are good; for on the one is consequent the non-possession of evil simultaneously; on the other, the possession of good subsequently.

5. And the acquisition of a greater instead of a less good; of a less evil instead of a greater; for this becomes an acquisition of the one and an exemption from the other, in the ratio of the excess of the greater above the less. The virtues also must of course be a good, for in reference to them are their possessors well-disposed⁴; they are also productive of goods, and bear on moral conduct: respecting each, however, severally what, and of what kind it is,
7. must be distinctly treated. It must be also that pleasure is a good, for all living things naturally desire it. Thus, too, things pleasant and honourable must needs be good; for the first are productive of pleasure; while, of things honourable, some are pleasant, and the rest are by themselves objects of
8. choice on their own account. So that to speak of them severally, it must be that the following things are good.—Happiness; for it is both an object of choice by itself, and independent, and for the sake of it
9. we choose many things. Justice, courage, temperance,

³ First, continuous; second, discrete; third, contingent.

⁴ We may observe of Aristotle's several enumerations of *ἀγαθὰ*, that he usually refers a few instances of earliest occurrence to the respective definitions or axioms at the outset of the subject, by virtue of which they belong to the class to which he assigns them. Thus, in the enumeration of good here instituted, he refers to his general canons of good which have just been admitted; e. g. virtue may be classed among goods, by virtue of def. 5 and 7. It would be useful to pursue the comparison, if not through all the instances quoted, at least through the greater part of them; since it will at once serve the purpose of impressing on the memory his leading examples, and of helping us to a fuller acquaintance with his theory.

magnanimity, magnificence, and other habits of that 10. sort; for they are excellencies of the soul;—and health and comeliness, and things of that sort, for they are excellencies of the body, and productive of many things; health, for instance, both of pleasure and of life; and it seems, on this account, to be the very best possession, because it is the cause of two things, which the generality of men value most, viz. of pleasure and life:—Wealth; because it is an excellence of 11. possession, and productive of many things. A friend 12. and friendship; for a friend is an object of choice independently, and productive of many advantages. Honour, character; for they are pleasant, and pro- 13. ductive of much; and there is usually consequent on them the actual possession of the qualities, on account of which the subject is honoured. Ability, in 14. speaking and acting; for all such powers are productive of good. Again, high genius, memory, readiness 15. in learning, quickness of thought, and all such qualities; for these faculties are productive of good; and in the same way all the arts and sciences. And 16. life; for were no other good consequent on it, of itself it is an object of choice. And that which is just, 17. for it is a kind of general advantage. Such, then, are the things which are good, as it were confessedly.

But in the case of questionable goods, your reason- 18. Dis-
ings will be deduced from these formulæ,—that of putable
which the contrary is an evil, is itself a good; as is goods.
that of which the contrary is expedient to an enemy: 19.
for example, if your being cowards be above all things expedient to your enemies, it is plain, that to the citizens your courage will be above all things beneficial. And, in a word, whatever be the things 20.
which the enemy desires and in which they rejoice, the contrary of those things appear beneficial; and hence was it well said;—

“Priam surely would exult,” etc. II. 4, l. 255⁴.

⁴ See Otho's speech to the soldiers on Vitellius's usurpation after the murder of Galba:—*Si Vitellio et satellitibus ejus eligendi facultas detur, quem nobis animum, quas mentes imprecantur; quid aliud quam seditionem et discordiam optabunt?* Tacit. Hist. i. 84.

- And yet this case does not always hold, though it does generally ; for there is no reason why the self-same things should not, at times, be expedient to two hostile parties ; from which comes the saying that evils bring men together⁶, when the same thing happens to be injurious to both. That too is a good, which is not in excess⁷ ; but whatever exceeds what it ought, is an evil. And that on account of which much toil or expense has been bestowed, for already will it have appeared to be a good ; and we already conceive of every such thing as of an *end*, and as an end of many efforts ; but the end is a good ; and on this principle rests the force of that appeal,

"It were in accordance forsooth with Priam's heartiest prayer ;"

Il. β, l. 176.

and of this,

"Base indeed is it to remain so long ;" Il. β, l. 298.

and that of the proverb of

"Breaking the pitcher at the very door."

Vide Erasmi Adagia II. i. 75.

23. That too of which many are desirous, and which appears to be disputed for ; because that of which all are desirous, was laid down to be a good ; the *generality*, however, have the appearance of being *all*.
24. And that which is recommended ; because no one recommends that which is not good⁸. And that which your enemies and the bad recommend ; for all, as it were, already acknowledge it when even they do who are ill affected ; for solely on account of its being plainly such will these acknowledge it⁹ : and in ex-

⁶ So Shakspeare quotes the proverb, "Misery makes a man acquainted with strange bedfellows."

⁷ A good which requires no qualification ; e. g. moral truths.

⁸ To desire evil as evil, and feel pleasure in it as such, is perfectly unnatural. Hence St. Paul, in his Epistle to the Romans, ch. i. ver. 32, sums up the iniquity of the Gentile world in this one word ; that not only did they in person commit the enormities, but "had pleasure in them that do them."

⁹ Virgil therefore could not have praised Æneas more than when he makes Diomede say,—

— Stetimus tela aspera contra,

Contulimusque manus : experto credite, quantus

In clypeum assurgat, quo turbine torqueat hastam. *Æn.*

actly the same way they are held to be but paltry characters [and with these even their friends find fault, and all good men] with whom their enemy finds no fault: on which very principle the Corinthians conceived themselves to have been scandalized by Simonides introducing in his verses,

"Troy finds no fault with the Corinthians"¹⁰.

And that is a good which any who are practically wise, 25. whether among men or women, have preferred; instanced in Minerva's choice of Ulysses; Theseus' of Helen; and the Goddesses' of Paris¹¹; and Homer's of Achilles. In a word, all objects of determined 26. choice are good. And men determinately choose to do both the things which have been mentioned, and those which are evil to foes and good to friends; and those which are possible—these are varied in two 27. ways; such as may be done, and such as may *easily* be done¹². Easy things are such as are done either without pain, or in a short time; for difficulty is defined in reference either to the pain, or length of time. And men choose what is done as they wish; and they wish what either is in no respect an evil, or in a less degree than it is good. This will occur in the case of unjust action, where the punishment either escapes notice or is trifling: and such actions as are 28. peculiar; as no one has done; or which are extraordinary, for thus is their value greater: and those things which have an adaptation to ourselves; of which kind are things belonging to us in respect of family, and power. Things too which men consider are wanting to the completion of something else; for

¹⁰ Glaucus the Lycian, who was of Corinthian descent, assisted the Trojans, consequently Simonides meant to praise them; but from the known bias of this writer to "censure in disguise," (of which another instance may be found, lib. iii. ch. 2.) the Corinthians might very fairly suspect his purpose.

¹¹ Vid. ii. c. 23, § 12, sub fin. *περὶ Ἀλεξάνδρου*, "ὅν αἱ θεαὶ προίκουσιν."

¹² Vid. c. xii. § 1, εἴτε ἐν λαθεῖν πράξαντες, ἢ, μὴ λαθόντες, καὶ δοῦναι δίκην, κ. τ. λ.

- be they ever so trifling¹³, they in no less degree determine on putting them in execution : and things easily brought about ; for they are possible, inasmuch as they are easy : but things easily brought about, are such as every one, or many, or our equals, or our inferiors, have succeeded in. Whatever gratifies one's friends, or will be disliked by one's foes. Every thing, too, which they whom we admire deliberately set about. Things toward which men are well fitted by nature, and about which they have experience ; for they suppose they shall more easily succeed in them. Things too which no bad man does ; for they are the rather commendable. What people happen to be desirous of ; for not only does it appear pleasant, but it is viewed in the more favourable light¹⁴. And men more particularly choose on deliberation the things in reference to which they severally are of a certain disposition ; the ambitious for instance, if the object be victory ; the avaricious if it be money ; and other characters in the same way

On questions then of good and of expediency, we must deduce our means of persuading from hence.

CHAP. VII.

On the subject of the greater Good, and the more expedient Measures.

1. The greater good must be discussed.
2. Definition of the excess and the exceeded.

BUT as the advocates of opposite measures, while they in many instances allow both to be expedient dispute nevertheless on the question which is the more so ; we shall have next to speak of greater good and what is in a higher degree expedient. Let excess, then, be defined to be, as much and yet more the thing exceeded, however, to be that comprise

¹³ So Horace. O ! si angulus ille
Proximus accedat, qui nunc denormat agellum !

¹⁴ If seen through the deceitful medium of desire.

within the excess. Again, *greater and more*¹ are terms relative always to some particular *less* thing:² but *great* or *small*, *much* or *little*, have reference to the size of things *generally*. And that which is great exceeds; but that which is deficient is small; and of the terms much and little in the like manner.

Now as we call that good, which, independently, for its own sake, and not on account of any thing else, is an object of choice; that, too, which every thing desires; and which, if invested with intelligence and practical wisdom, every thing would choose; as also what is preservative or productive of, or on which such things are consequent; and as that, with a view to which we act, is the end; and as an end is that for whose sake every thing else is done: but that is good to a man's self which has these affections in reference to himself: this being the case, it must be that plurality is a greater good than one or a few, provided that one or those few be enumerated in conjunction with it³; for it then exceeds them, and the within comprised one or few is exceeded. And if the 4. greatest individual of one species exceed the greatest individual of another, then also will the first species itself exceed the second.⁴ And, *vice versa*, wherever one species exceeds another, the greatest

3. Different *σρούχρεια* of the greater good.

¹ *Greater*, in reference to quantity *continuous*, or magnitude; *more*, in reference to quantity *discrete*, or multitude.

² The meaning of this passage appears to be this,—that while all terms designating quantity are relative, the grammatical degrees of comparison imply relation to certain objects then more immediately before us. Those who are puzzled by this doctrine of excess and defect, had better take Victorius's hint, and illustrate each remark by an example from numbers.

³ This qualification is absolutely necessary to the truth of the position; for it may happen, if the plurality be not of things of the same species as the less number, that the less number is of higher value than the greater. Five guineas are "a greater good" than two, i. e. the greater number than the less, of things of the same species; yet it does not therefore follow that five farthings are better than two guineas, for there the less number is not, as in the first case it was, virtually enumerated in the greater. Compare *Ethics*, lib. i. c. vii. § 8.

⁴ Or, as Lord Bacon expresses it, "That kind is *altogether* best, whose *excellence* or *pre-eminence* is best."

individual of the exceeding, exceeds the greatest individuals of the exceeded species: for example, if the greatest man be greater than the greatest woman, then will also men, in general, be greater than women; and if men generally be greater than women, then will also the greatest man be greater than the greatest woman; for the excesses of species, and of the greatest individuals under them, have a common ratio.⁵

5. When one thing is a consequence of another, but that other thing is not a consequence of it; (now, things are consequent, recollect, either *simultaneously* or *subsequently*, or virtually;) *then is that of which the other is a consequence the greater good*; because the enjoyment of the consequent is inherent in the enjoyment of the other. Things are consequent simultaneously, as life on health; but it is not consequent on life: and subsequently, as knowledge on learning; virtually, as larceny on sacrilege; for the man who has committed sacrilege would be ready also
6. to steal. Things which exceed the same thing in a greater degree [than itself], are greater⁶; for of necessity they exceed even the greater. Things productive of a greater good are greater, for this would be by virtue of their being productive of something greater. That, too, the productive cause of which is greater, is likewise greater; for if that which is healthy, be preferable to, and a greater good than, that which is pleasant; then also will health be superior to pleasure. As also that which, independently of any thing, is preferable, is superior to that which is not preferable independently: thus strength is above things conducing to health; for the latter are not sought on their own account, while the former is
9. the which was assumed as a criterion of good. And should one object be an end, the other not an end

⁵ As is the excess of the male above the female sex, so is the excess of the greatest man above the greatest woman; and conversely, as is the excess of the greatest man above the greatest woman, so is the excess of the male above the female sex.

⁶ E. g. Eight exceeds two by six, which is also greater than the original number two.

for the one is for the sake of something else, the other, for its own sake; thus is exercise inferior to a good habit of body⁷. That too is a greater good which in a less degree stands in need of any one or more things as accessions, for it is in a higher degree independent: now that is said less to need accessions, which needs such as either are fewer or more easily obtained. And whenever one thing does not exist, nor can possibly be brought into existence independently of another, but that other can without it; then that which needs not the accession, is more independent, and thus shows itself to be a greater good. Again, if one be a principle and the other not; and for the same reason, if one be a cause, the other not; since without a cause or principle, existence or production is impossible⁸. And of goods both proceeding from principles, that is the greater good which arises from the higher principle; as also that is the greater good which originates in the higher of two causes. And, *vice versa*, that of two principles which is the principle of the greater good, is greater; and that of two causes which is the cause of the greater, is itself greater. It is evident then from what has been said, that it is possible for a thing to appear the greater both ways; for supposing this to be a principle, and the other not, it will appear the greater⁹; as also will it, supposing it not to be a principle¹⁰ while the other is;

13. The same object may be made to appear the greater good in different ways.

⁷ Man's will hath two several kinds of operation, the one natural or necessary, whereby it desireth simply whatsoever is good in itself, and shunneth as generally all things which hurt; the other deliberate, when we *therefore* embrace things as good, because the eye of understanding judgeth them good to that end which we simply desire. Thus *in itself* we desire health, physica only for health's sake; and in this sort special reason oftentimes causeth the will by choice to prefer one thing before another, etc. Hooker, v. § 48, p. 186.

⁸ ἀρχή is the beginning of a thing, αἰτίον the cause; the latter consequently is prior to the former. In a plant, the seed is the ἀρχή, the vegetative power the αἰτίον.

⁹ By the rule which states the principle to be superior to that which is not so.

¹⁰ That is, supposing it to be an *end*; for, by a former rule,

- because the end, and not the principle, was above stated to be the greater. Just like the saying of Leodamus in impeaching Callistratus, "that the man who devised the deed was worse than he who executed it; for had he not devised it, the other could not have executed it:" and conversely, against Chabrias, he argued that "the agent was worse than the deviser; for had there not been an agent, it would not have been realized in action, because people devised plots on this very account, that others may
14. execute them." The more rare good is greater than the abundant¹¹; thus gold is better than steel, notwithstanding that it is less useful; for the acquisition, by reason of its being more difficult, is greater. And in another view, the abundant is better than the rare, for the enjoyment of it exceeds that of the other; for the idea of *often* exceeds that of *seldom*; whence
 15. it is said, "Water¹² is the best of things:" and, in a word, the more difficult is superior to the easier acquisition, for it is more rare. In another point of view, the easier is above the more difficult; for it has
 16. itself as we wish. That also is the greater good, the contrary of which is the greater evil; as is also that of which the deprivation is the greater loss. Virtue, too, is greater than what is not positive virtue, and vice than what is not positive vice; for the former
 17. severally are ends, the latter are not ends. Causes, the productions of which are more becoming or more disgraceful, are themselves of greater importance.

ends are superior to means: thus, by one rule the superiority is assigned to ends, and by another to principles. So that, whichever side you take, you will have something to allege.

¹¹ On this principle Aristotle argues in his Poetics for the superiority of the fable above the other five constituents of the drama, inferring its superior *worth* from its superior *difficulty* and *rarity*. "Quæ rara, cara."

¹² Perrault, the French critic, misled possibly by this very passage, impotently ridiculed Pindar for the triteness of this idea: being ignorant that the poet alluded to the philosophy of Thales, who borrowed and taught the Phœnician doctrine, that water was the principle of all things. Vide Wharton on Pope, vol. i. p. 132.

Also of whatever things the excellencies and deficiencies are of greater importance, of them are also the productions of greater importance: since results stand to each other in the same ratio, as their several causes and principles; and, *vice versa*, causes and principles, in the ratio of their several results. Things, 18 the excess of which is preferable or more becoming, as *accuracy* of sight is preferable to that of smelling, for sight is preferable to smelling; and the being greatly attached to friends is more becoming than to be greatly attached to money¹³, so that attachment to friends is more becoming than fondness for money. And conversely, too, the excesses of better feelings are themselves better; and of the more becoming, themselves, more becoming: as, too, are those things of 19. which the desires are better or more becoming; for the greater desire is of the greater object: and, for the same reason, the desires which fasten on the more excellent and becoming objects, are themselves more excellent and becoming. Again, where the sciences 20. are more grave or becoming, there the subject-matter also is more grave and becoming; for, as is the science, so is its truth; for each science takes cognisance of its peculiar truths: and analogous to this precedence of subjects is that also of the sciences, which recognise graver and more becoming subjects, above the rest; for the same reasons. And that which men of practical wisdom, or every person, or the generality, or the majority, or the best of men have, or would have pronounced to be a greater good; that of course must be such, either absolutely, or so far at least as they decided conformably to their prudence. This, too, is a test available in common to the other questions about good; for their substance, quantity, and quality, have themselves so as science and prudence may direct; on this subject however we have treated. For that has been defined to be good which every

¹³ Τὸ φιλέταιρον εἶναι καὶ τὸ φιλοχρήματον; i. e. the being affected by these several feelings to such a degree, that they become a leading feature of the character; in which case, there is an *ἐπιπόρχη*, as it were, of the feelings.

- being, if fraught with prudence¹⁴, would choose; wherefore it is evident, that what prudence pronounces
22. good in a high degree is a greater good. Also that which belongs to the better men, either absolutely, or in respect of their being better; as courage is better than strength. Also what the better man would make the object of his choice, either absolutely or in respect of its being better; as, the suffering rather than the doing an injury, for this would he choose
 23. who is more just. And that which conduces more to pleasure rather than what conduces less; because every being pursues pleasure, and is desirous of enjoying it for its own sake; now it is in reference to this, that the good and the end have been defined: that is said to conduce more to pleasure, which is conducive to it with less alloy of pain, and for a
 24. greater length of time. That which is more becoming rather than what is less so; for the becoming either is that which tends to please, or is desirable on
 25. its own account. Whatever things people prefer being the causes of to themselves or to their friends, those are greater goods; but whatever they would
 26. least wish, are greater evils. Things whose duration is long, rather than those whose duration is short; and those which are more secure, rather than those which are less so: for there is an advantage in their enjoyment; of the former, in respect to time; of the latter, from their being at will: for the enjoyment of what is secure is more in their power whenever
 27. they wish. And as are the terms arising from conjugates and similar inflections, so are the qualities they denote; for example, if *courageously* be an idea more noble and desirable than *temperately*, *courage* will also be something more noble than *temperance*, and the idea of a man's being courageous than of his
 28. being temperate. What every one chooses is better than what some do not, as also is the choice of a majority better than that of a minority; for as that was supposed a good which all desire, so that is propor-

¹⁴ Whence it follows that prudence is competent to decide on the nature of good.

tionately greater which is more desired. That, too, which litigants or foes, judges, or arbitrators selected by judges, prefer, is better; for in one case the decision is equivalent to that of all mankind; and in the other, men of authority and information actually do pronounce. And sometimes good is greater in which all participate; for not to participate in it is a disgrace: while at others, that is which none, or which few share with you; for it is more rare. Things more commended, because more becoming; and in the same way things are better to which belongs the greater honour, because honour is as a kind of estimate of worth. Those things again are more heinous on which are imposed the greater punishments. Again, what is greater than things confessedly or apparently great, is itself superior in greatness. And the same objects, when separated into their several constituents, have an air of superior greatness, for the excess of a plurality of objects is conspicuous. Whence the poet says that Meleager's wife persuaded him to rise up to the war by entering into detail:—

"She paints the horrors of a conquer'd town,
The heroes slain, the palaces o'erthrown,
The matrons ravish'd, the whole race enslaved."

Iliad ix. 705.

Again, the condensing and accumulating of circumstances in the way Epicharmus used to do, is productive of effect, and that on the same principle as their separation; viz. because the condensing of them evinces great excess, and for the further reason, that it appears a principle and a cause of great results. But as that is greater which is more rare and difficult, circumstances both of opportunity, and age, and place, and time, and strength, produce great effect.

"Another striking instance of the effect produced by a detail of circumstances may be found in the *Septem contra Thebas* of *Æschylus*, 302, ed. Bl.—

*οικτρὸν γὰρ πόλιν ᾧδ'
ἀγγύϊαν αἰδοῖ προΐσψαι, κ. τ. λ.*

and in Burke's speech on the Nabob of Arcot's Debts, Works, vol. ii. p. 480: see also Sheridan's celebrated speech against Warren Hastings.

- For an exploit beyond one's strength, and age, and equals, if achieved, or if under such circumstances, at such a place or time, will gain importance whether it be good, or honourable, or just, or the opposite. Whence originated the inscription of the Olympic victor, "*Formerly, indeed, with a rough basket¹⁶ on my shoulders, I used to carry fish from Argos to Tegea.*" [Simonides.] And on this proceeds that encomium of Iphicrates [who was the son of a shoemaker] on himself, when he said, "*From what beginnings have these things been realized!*" That, too, which is innate is superior to what is adscititious, from its greater difficulty; wherefore the poet says,
33. "*Of myself am I taught¹⁷.*" And the greatest part of what is great; as Pericles said in his funeral oration¹⁸, "*That the youth were swept from the city, just as the spring, were it to be withdrawn from the*
35. *year.*" That, too, is more precious which is available in the greater need; as in old age, or sickness, for instance. And of two means, that more immediately conducing to the end. That whose qualities have direct reference to one's self, than those which are general. What is possible, rather than what is impossible; for the one attaches to one's self, the other not. And things which are comprised in the end¹⁹ of life; for things conducing to the end partake in a
36. greater degree of the nature of ends. Things having reference to truth rather than to opinion:—as a definition of matter of opinion we may take what one, likely to escape observation, would not choose to do: and on this principle the receiving good would appear more desirable than the doing it; since one would

¹⁶ ἀσπίλα is properly the yoke which was laid across the shoulder, from which the basket hung.

¹⁷ Hom. Odys. xxii. 347.

¹⁸ Whether we suppose the ἐπιτάφιον to have been lost, or feel inclined to charge Aristotle with a *lapsus memoriae*, so it is that the words are not attributed to Pericles in any work which has come down to us. The same illustration was used by Gelon, tyrant of Syracuse, to the deputies from the states of Greece, who implored his assistance. Herodotus, vii. 162.

¹⁹ Τέλος, the end or object of life: εὐδαιμονία scilicet.

choose the first eye should it be unobserved; with respect however to the doing good, that it seems no one about to be unnoticed would choose²⁰. Those things, too, are better, of which men prefer the real possession to the appearance; for they have a nearer reference to truth: on which principle some argue that justice is a trifling good, because it is better for it to appear, than merely to exist²¹: in respect to health, however, this is not the case. That which is conducive to the greater number of uses; as what conduces to life, to happy life, to pleasure, and to noble conduct; wherefore health and wealth appear the highest goods, for these include every thing. That which is accompanied by less pain, and on which pleasure is attendant; for the good is more than merely single, since it is realised both in the positive pleasure, and in the absence of pain. And of two goods, that which, added to the same good, renders the sum greater. That, too, whose presence does not escape us, rather than that which does²²; for such approach reality; whence the being really rich will seem a greater good than the appearance of being so. That, too, which is held dear, is a greater good:—whether, as in some cases, it be single; or, as in others, accompanied by more: on which account the punishment is not equal, in the case of putting out the eye of a person who has but one²³, and of

²⁰ A strikingly ostentatious principle of benevolence this: but it is one which an exact observance of human nature, even now that it has met the rebuke of Divine wisdom, will perhaps too fully justify Aristotle in laying down.

²¹ According to the argument of the sophist Thrasymachus. Plato. Rep. lib. i.

²² I have thus ventured to understand *ἡμᾶς* with *λαοβάνας*; for it appears the simplest way of getting over the difficulty which is caused by the illustration, which would appear better adapted to one of the former *εἰδῆ* than to this.

²³ Zaleucus established among the Locrians the law of retaliation, "an eye for an eye." But on one occasion a man with a single eye being threatened with blindness by his enemy, procured a clause to be added, denouncing the loss of both eyes to him who deprived another of his only one. Demosth. Cont. Timocr. p. 744.

one who has two eyes ; for there is, in the one case, a deprivation of the dearest object²⁴.

The sources then from which, in exhortation and dissuasion, we must deduce our means of persuading, have nearly been enumerated.

CHAP. VIII.

*On Forms of Government ;—what and how many they are ;
—and on the end of each.*

1. Reasons why the deliberative orator must know governments.

THE means of greatest and most paramount importance with a view to being able to persuade and give advice in a becoming style, is the having made one's self master of all the forms of government ; and the having clearly distinguished their several practices, and legal principles, and interests : for all men are persuaded by what is advantageous ; but that which is preservative of the constitution, is absolute expediency¹. And further, the dictum of the authoritative power of the state, is itself authoritative. But the authorities are distinguished according to the forms of government under which they exist ; for

²⁴ Dr. Parr, quoting the following passage from the Politics, “ δύο γὰρ ἑστὶν ἃ μάλιστα ποιεῖ κηδεσθαι τοὺς ἀνθρώπους καὶ φιλεῖν, τὸ τε ἴδιον καὶ τὸ ἀγαπητόν,” remarks :—“ I suspect that ἀγαπητόν here means *more* than carum, it may be rendered unicum, atque adeo carum. Aristotle, in lib. i. c. 7, Rhetor. says of the eye, destroyed in him who had only one, ἀγαπητόν ἀφύρηται : see Hen. Stephens's Thesaurus : but I should observe, that in the margin of Aristotle, καὶ μόνον are added, *perhaps*, as explanatory. Upon the word ἀγαπητόν in SS. for μονογῆνη, see Suidas and Hesychius in v. and the notes.” Spital. Sermon, notes, p. 39.

¹ Τὸ σῶζον πολιτείας appears with Aristotle to have been equivalent to abstract expediency ; and he therefore cannot be charged with a violation of his own rule against entering into particulars on any subject as peculiar to rhetoric, because every question of expediency will ultimately be viewed in reference to the constitution under which the parties live : at any rate the question is treated merely in a popular way—διηκριβῶνται γὰρ ἐν τοῖς πολιτικοῖς.

as many forms of government as there are, so many are the authorities.

Now there are four forms of government; democracy, oligarchy, aristocracy, and monarchy. So that the authoritative and judicial functions will be merely one constituent of these, or the whole. Democracy is a form of government³, in which men apportion out the magistracies to themselves by lot. But an oligarchy, in which those only who, from the valuation of property, are entitled. Aristocracy, in which those bear magistracy who can conform to the constitutional plan of education. By such education I mean that established by the law: for those who adhere to the principles of the law, are the men who, in an aristocracy, hold magistracies; and it must be that these should appear the best, whence this form of government took its name. Monarchy is that form in which, conformably to its name, one man is supreme; and, of monarchies, those which are held by conformity to some limitations are kingdoms, but the unlimited are tyrannies³.

3. Four forms.

4. Democracy.

Oligarchy.

Aristocracy.

Monarchy.

Neither should the ends of the respective forms of government escape us; for men choose whatever conduces to the end. The end then of a democracy, is liberty; of an oligarchy, it is wealth; of an aristocracy, the institutions relating to education and the principles of the law; the end of a tyranny, is the protection of the tyrant's person⁴. It is evident then, if

5. Ends of each government.

³ In the Ethics (lib. viii. c. 10) democracy is not stated as a distinct form, but merely as a deviation (*παρίκλισις*) from timocracy, or *πολιτεία ἡ ἀπὸ τιμημάτων*.

³ *Παρίκλισις βασιλείας μὲν τυραννίς ἀμφὶ γὰρ μοναρχίας. Ibid.*

⁴ We find a remarkable proof of this in the account given by Herodotus of the anxiety of the Persians for the personal safety of Xerxes after the battle of Salamis;—*οὐκ οὕτω περὶ τῶν νῦν ἀχθόμενοι, ὡς περὶ αὐτῶ ἄλγος δειμαίνοντες*, viii. 99. A remarkable expression occurs in Sophocles from which the same inference may be drawn; Œdipus, asking Oreoṇ why the murder of Laius had not been more fully investigated, thus expresses himself:

Κακὸν δὲ ποῖον ἔμποδόν, ΤΥΡΑΝΝΙΑΟΣ

Ὅντις πιασούσης, αἴργει τοῦτ' ἐξιδίναι;—Œdip. Tyran. 128.

men fix their choice by reference to the end; that we must accurately distinguish the respective practices, laws, and interests of each form.

6. The speaker must know these constitutional forms in order to impress the hearers with a good-will towards him.

But as means of persuasion originate not in argumentative oratory alone, but in such also as bears an impress of character; for it is from the speaker's appearing a man of certain character that we trust him; that is to say, if he appears an honest man, or well affected⁵, or both: as this is the case, it will be necessary for us to be masters of the character of each form of government; for the character which is peculiar to each, must needs be most available to persuasion in addressing each. These points, however, will be ascertained by means of the same information; for the character will manifestly be conformable to the choice; now the settled choice has reference to the end.

7. Thus then have the objects which we ought to aim at in exhorting and dissuading, as probable or actually in existence; the sources, too, out of which we must draw our means of proof on the subject of the expedient, and on the subject moreover of the character and legal principles belonging to the forms of government; and the means by which, and the manner how, we shall have facilities on such questions: all these points have been discussed, so far as was within the scope of the present occasion. For accuracy of detail on these points has been observed in the Politics.

Where we may observe, that not simply is the person of the tyrant spoken of, but the very government itself, as though it had fallen with him.

⁵ It is required (lib. ii. c. 1) that he be further possessed of *φρόνησις*. Let it be remembered that these qualities must be evinced by the speech, and not simply be taken for granted from a previous knowledge of the man. See Pearson on the Creed, Art. i. p. 5.

CHAP. IX.

On the subject of Virtue and Vice, the honourable and disgraceful ;—Of what considerations praise and blame are derived.

LET us next speak of virtue and vice, and of the honourable and disgraceful; because these are the objects of the orator who praises or blames¹; and because it will happen that, in speaking of these subjects, we shall at the same time throw light on the means by which we may ourselves be conceived to be of a certain turn of character, which was stated to be the *second* means of effecting belief; since we shall be able, by the application of the same points, to render ourselves or others deserving belief on the score of moral excellence. But as there frequently 2. are instances, as well in sober earnest as without it, of praising not men or gods only, but even inanimate objects, and any animal whatever, as it may happen; we must here, in the same way as before, ascertain propositions on these subjects also. Let us then, so far as may serve for a specimen, discuss these subjects.

That then is honourable, which, while it is an object of choice on its own account, is commendable also; or which, being good, is pleasant, simply because it is good. But if the honourable be this, virtue must necessarily be honourable; for, being good, it is commendable. And virtue, as it should seem, is a faculty tending to provide us with goods and preserve them to us; a faculty moreover capable of benefiting in many and important cases; of benefiting, in a word, every object in every respect².

1. The subjects of Epideictic oratory discussed.

3. τὸ καλὸν defined in two ways.

4. Perfect virtue and its constituent parts are honourable.

¹ As praise is the proper reward of virtue, so are blame and disgrace proper to vice; in order that the world may be warned by the example of the one, and excited to emulate that of the other: ἀρετὰ γὰρ ἰταμιεύει, δειδρον ὧς, αἰξεται.

² Aristotle never omits an opportunity of inculcating this wholesome lesson, that the practice of virtue conduces to our true interest. Its necessity in bodies politic, as being emi-

5. The constituent parts of virtue are justice, courage, temperance, magnificence, magnanimity, liberality,
6. placability, prudence, wisdom; and it must needs be, that those virtues are the highest which are the most beneficial to others, if at least virtue be (as it was defined) a faculty capable of benefiting on this account, men honour in the greatest degree the just and brave; for justice and courage are useful to them, the one in war, and the other in peace³. Next is liberality; for the liberal are profuse, and do not wrangle with people about money, the object which the rest of the world hanker after more than any
7. thing. Now justice is the virtue by which each has his own, as the law prescribes: injustice, however, is that habit by which some take the property of
8. others in contravention to law. Courage, that by which men are ready to achieve honourable exploits in the midst of danger, conformably to the direction of and in subservience to law⁴: cowardice, however,
9. is its contrary. But temperance is a virtue by which men carry themselves so, in respect to the pleasures of the body, as the law directs; intemperance, however, is its contrary. But liberality tends to benefit in pecuniary matters; stinginess is its
10. contrary. Magnanimity is that virtue which is apt to confer important benefits; narrowness of soul
11. contrary. Magnanimity is that virtue which is apt to confer important benefits; narrowness of soul

nently τὸ σώζον τὴν πολιτείαν, is thus stated in another of his works: "Ἔστι δ' οὐθεν ἐν τοῖς πολιτικοῖς δυνατόν πράξαι ἀνευ τοῦ ποῖον τίνα εἶναι, λίγω δὲ οἶον σπουδαῖον. Τὸ δὲ σπουδαῖον εἶναι, ἐστὶ τὸ τὰς ἀρετὰς ἔχειν. Magn. Mor. lib. i. c. 1.

³ In the Ethics he places liberality first;—φιλοῦνται σχεδὸν μάλιστα οἱ ἐλευθέροι τῶν ἀπ' ἀρετῆς ὠφέλιμοι γὰρ τοῦτο δι' ἐν τῇ δόσει. Eth. Nich. iv. 1. Courage may be ranked first, because on occasions we may be disqualified from the exercise of other virtues if this be wanting.

⁴ Consistently with the doctrine held in the Ethics, he does not admit every sort of daring to the praise of courage. For of some persons, whose daring is at first sight not inconsiderable, it is true, as Juvenal remarks—

Justa pericli

Si ratio est et honesta, timent pavidoque gelantur

Pectore, nec tremulis possunt insistere plantis:

Fortem animum præstant rebus, quas turpiter audent.

SAT. vi. 94.

is its opposite. Magnificence is the virtue which 12.
produces grandeur in expenditures :—again, narrow-
ness of soul and meanness are opposed. Prudence 13.
however is an intellectual⁵ virtue, by conforming to
which men have the faculty of actually determining
on the subjects of the good and evil⁶, which has
been mentioned as entering into happiness.

Enough has been said on the subject of virtue and 14.
vice in general, and of their constituent parts, to suit
the present⁷ occasion : respecting the other points, τα καλὰ
enumerated.
there is no difficulty in discerning what they are ; for
it is plainly necessary both that the productives of
virtue should be honourable (because they have re-
ference to virtue), and also the fruits of virtue ; of
which kind are both the indications and actions of
virtue ; but as the indications and all actions or suf- 15.
ferings of a good man are honourable, it will neces-
sarily follow that all exploits of courage whatever,
and all indications of courage, that all conduct, in
a word, which has been marked with courage is
honourable ; and so of things just and conforming
to justice, so far at least as *actions* are concerned :
(but as relates to *sufferings* this is not the case ;
for in this single instance of all the virtues, does
it occur that what is conformable to justice is not
invariably honourable, but in the case of suffering
punishment, that which is justly suffered is in a

⁵ Alluding to the division made in the Ethics of virtues into those of the *ἐπιθυμητικόν* and *λόγον ἔχον υἷος* of the soul ; the former whereof is the subject of the *moral*, the latter of the *intellectual* virtues. Vid. Eth. i. 13.

⁶ Ἡ μὲν φρόνησις περὶ τὰ ποιητρία ὅρουσ αὐτοῖς τιθεῖσα. Philo. p. 35, Allegor. ed. Par.

⁷ Those who have not read the Ethics will be surprised to hear that the virtues which he here despatches in one section, should there occupy a book and a half. This popular discussion of them is, as far as it goes, conformable to the more philosophical view taken in the other treatise, except in respect to the criterion which is assigned of the comparative excellence of each virtue, viz. μέγιστος εἶναι ἀρετὴς τὰς τοῖς ἄλλοις χρησιμώτατος ; and that stated § 23—αἱ ἀπολαύστικαι ἄλλοις μᾶλλον, κ. τ. λ. Such a test, however inadequate to the views of the philosopher, is good enough for the orator, since it is one in which nine-tenths of the world will acquiesce.

- higher degree disgraceful than what is unjustly⁸;) and so likewise in respect to the other virtues.
16. Whatever actions have national distinctions as their reward are honourable, or whatever have such distinctions rather than money. Whatever things, among those which are objects of choice, one does, not for his own sake. And whatever things which abstractedly viewed are good, one has achieved for his country's sake, overlooking his own interest. Things good in their own nature; things which are good, but not to one's self; every thing of that kind being
17. Every thing free from the selfish principle is honourable.
18. chosen on its own account. Whatever things admit of being realized to one when dead, rather than in his life-time; for that which appertains to one in his life, rather carries the idea of its being for one's self.
19. Whatever actions are for the sake of others; for they
20. are not so much for one's own sake. And as many instances of successful management as occur where others are concerned, and where one's self is not; and this particularly respecting benefactors, for it then is just. Benefits, too, are honourable; for they attach not to one's self. And the contraries of all cases in which men feel a delicacy; for men are sensible of delicacy both in mentioning, or doing, or intending any thing disgraceful; just as Sappho has expressed in verse on the occasion of Alcæus' saying, "I would say something, but delicacy restrains me." "If thou entertainedst a desire of speaking things either good or honourable, and were not thy tongue teeming with the utterance of some evil; shame had not suffused thine eyes, but thou wouldest have
21. spoken what was fit." Objects for which men are keenly anxious without being affected by fear⁹, are honourable; for men are thus affected respecting

⁸ The passage from *πάθη* to *ἀδίκως* must be considered as a note; and the words *κατὰ τὰς ἄλλας—ᾧσάυτως*, considered as the conclusion of the sentence preceding it.

⁹ Victorius cites an anecdote of Themistocles, preserved by Cicero, as illustrative of this remark. "Noctu ambulabat in publico Themistocles, quod somnum capere non posset: quaerentibusque respondebat, *Miltiadis tropæis se e somno excitari.*" Tusc. iv. 19. It will be needless to remark, that "noble

goods which tend to reputation. Those virtues and 22.
their fruits are honourable in a higher degree, which
belong to subjects naturally more excellent¹⁰; as, for
example, those of a man are higher than those of a
woman. And those which are of a nature to be en-
joyed by *others*, rather than by *ourselves*; the prin- 23.
ciple on which the just and justice are honourable.

Thus, the taking vengeance on a foe rather than
the being reconciled; both because to compensate is
just, and what is just is honourable¹¹; and further,
because it belongs to the courageous man never to be
worsted. Both victory and national distinction are 25.
of the number of things honourable; for they are
desirable, though unattended by lucre, and evince
more than ordinary virtue; and the memorials of
one's name; and what partakes of these respective
characters more decidedly, is also more decidedly
honourable. Again, things which do not follow one
in his life; and whatever honour is attendant on;
that which presents features of vastness; that, too,
is honourable in a higher degree which belongs to
one's self *alone*, for it is longer remembered. And 26.
possessions unattended by profit, for they are more
becoming a gentleman¹²; and whatever is peculiarly
esteemed among each people, is honourable. Every
badge of what is held commendable in each nation: 27.
at Lacedæmon¹³, for instance, it is honourable to wear

24. Re-
venge is
honour-
able.

Badges
are hon-
ourable.

minds" alone can be sensible of this high excitement—*ἀγωνία*.
And Thucydides on hearing Herodotus read his History.

¹⁰ The greatness and dignity of all manner of actions is
measured by the worthiness of the subject from which they
proceed, and of the object whereabout they are conversant.
Hooker, Eccles. Pol. v. § 6, p. 23.

¹¹ This is a striking instance of that species of sophistry by
which our unenlightened reason reconciles us to the gratifica-
tion of our worst passions; and we should learn from it to
glory in that heavenly wisdom which has taught us "to do
good to those who hate us, to pray for those who spitefully
use us and persecute us."

¹² *Ἐλευθέρια, τὰ μὴ πρὸς ἀπόλαυσιν*. See cap. v. § 7.

¹³ This idea appears, in ancient times, to have been very
prevalent; a singular instance of its influence is mentioned in
Stobæus: "*Παρ' Ἰνδοῖς ἰδὼν τις ἀποστερηθῇ δανείου, ἢ παρα-
καταθήκῃ, οὐκ ἔστι κρῖναι ἀλλ' αὐτὸν αἰτιάται ὁ πιστεύσας.*"

- long hair¹⁴, because it is the badge of a free man, since it is not easy for a man with long hair to do any servile work. And the not exercising any vulgar craft; for it belongs to a gentleman not to live in dependence on another¹⁵. And we must take for granted that qualities, akin to real ones, are actually identified with them, and this with a view as well to praise as to blame; for instance, taking the cautious man to be a cold-hearted, designing fellow; or a sim-
 28. We must regard apparent good qualities as real.
 29. pleton to be a good kind of man; and the man who is dead to feeling, to be of a mild disposition: and in a word, we must make a selection, invariably on the most favourable side, out of the qualities concomitant on the character of each; making out the passionate and furious to be men void of all duplicity; and the self-willed to be magnificent and dignified: and such as are in excess, to be in the virtuous mean; the rash, for instance, to be brave; the profuse, liberal¹⁶; for it will both seem to be the case

ὁ δὲ τεχνίτου πηρώσας χεῖρα ἢ ὀφθαλμὸν θανάτῳ ζημιούται. τὸν δὲ μίγιστα ἀδίκησαντα, ὁ βασιλεὺς κελεύει κείρασθαι, ὡς ἰσχάτης οὐσης ταύτης ἀτιμίας. Parr, Spit. Serm. p. 146.

¹⁴ The Lacedæmonians used to wear their hair long, in commemoration of the victory obtained by Othryades and his two comrades over the three Argive champions, for the land at Thyrea. Herodot. i. 82. Or perhaps, being inconvenient to those engaged in servile occupations, length of hair might be considered as a badge of the more noble pursuits of the wearer. Collins has a fine allusion to this practice in the opening of his Ode to Liberty:—

Who shall awake the Spartan life,
 And call in solemn sounds to life
 The youths, whose locks divinely spreading,
 Like vernal hyacinths in sullen hue,
 At once the breath of fear and virtue shedding,
 Applauding Freedom loved of old to view?

Among the Franks, the privilege of wearing the hair long was peculiar to the princes and their descendants, the rest of the nation being obliged to shave the hinder part of the head. Gibbon's Decline and Fall, c. xxxv. note 17, and Agathias quoted in Heraldic Anomalies, vol. i. p. 168.

¹⁵ Aristotle, in his Ethics, makes this remark of the *μεγαλόψυχος*, observing, *πρὸς ἄλλον μὴ δύνασθαι ζῆν, ἀλλ' ἢ πρὸς φθλον' δουλικὸν γάρ*. iv. 3.

¹⁶ Horace recommends an innocent use of this sort of sophistry among friends, as a preservative of friendship—

to the nine-tenths of the world, and will afford room for deducing a piece of false reasoning out of the motives of the agent; for if one rush into danger where there is no necessity, much more should it seem that he will, where it is honourable¹⁷; and if a man be lavish on all who fall in his way, surely he will also be so on his friends; for to benefit *all* is an excess of virtue. We ought to consider also before whom our panegyric is pronounced; for, as Socrates used to remark, "It is no difficult thing to panegyrisse Athenians in the presence of Athenians." We must also assert that what is valued by each auditory, is to be essentially valuable; what, for instance, either Scythians or Lacedæmonians or philosophers value: and, in short, to refer to the class of things really honourable, whatever is *held in esteem*; since by virtue of their being so esteemed, they appear to approximate closely that class. Again, whatever is 31. natural under such circumstances, for instance, if one's actions be worthy of his ancestors or his own former achievements; since the additional acquisition of glory tends to happiness, and is honourable. Likewise every action contrary to what is natural to one, so it be on one side of what is better and honourable; as when one in good fortune has been moderate, or magnanimous in adversity; or has become better and easier to be won over in proportion as he became greater. Of this nature was the appeal of Iphicrates, "From what beginnings to what have I attained!" And that of the Olympic conqueror, "Formerly bearing on my shoulders a rough basket," etc. And that of the epitaph by Simonides, "Though daughter, wife, and sister of tyrants¹⁸," etc.

Vellem in amicitia sic erraremus, et isti
Errori virtus nomen posuisset honestum, etc.

Opinor

Hæc res et jungit, junctos et servat amicos.

SAR. i. 3, 41.

¹⁷ That is, under the direction of the law, *ὡς δὲ νόμος καλεῖται, καὶ ὑπηρετικὸς τοῦ νόμου*. § 7.

¹⁸ The epitaph was on Archedice, daughter of Hippias, and wife of Oantides, tyrant of Lampsacus. See Thucyd. vi. 59.

30. We must see in whose presence our commendation is held.

31.

32. We must show that the person praised has acted on principle.

33. *ἱπαινος* defined.

- But as commendation arises out of moral conduct, and it is a peculiar characteristic of the good man to act on principle¹⁹, we must endeavour to put the object of our commendation in the light of one who has acted on principle. Now his appearing to have acted so in many instances will be serviceable with a view to this; wherefore coincidences and fortuitous occurrences must be assumed as done on principle: and should many and like circumstances be alleged, it will appear to be a sign of virtue and principle. Now commendation is language exhibiting greatness in the case of virtue; we should therefore give this further proof of the actions of him we commend, that they are of this character. Encomium²⁰, however, is of actions; (and circumstances concur to the enforcing persuasion, as excellence of birth and education; for it is probable that a person so brought up, will be of such a character;) and hence we pass encomia on those who have acted. And a man's actions are signs of his habit; since we commend even the man who has not acted, if we believe him to be of such a character. But felicitation (*μακαρισμός*), and congratulation (*εὐδαιμονισμός*), are synonymous the one to the other; but are not so to the other two: but felicitation comprehends them, just as happiness comprehends virtue.

35. Common point of epideictic and deliberative oratory.

Demonstrative and deliberative oratory have one point in common; for whatever you would suggest to a man in giving advice, that, by a change of the diction, becomes an encomium²¹. When, therefore, we

¹⁹ See Ethics, lib. ii. c. 4. *Δικαίως ἢ σωφρόνως πράττεται ἰάν ὁ πράττων πῶς ἔχων πράττη· πρῶτον μὲν ἰάν εἰδῶς, ἵπαιτ' ἰάν προαιρούμενος, καὶ προαιρούμενος δι' αὐτὰ, τὸ δὲ τρίτον καὶ ἰάν βεβαίως καὶ ἀμετακινήτως ἔχων πράττη* and, in fact, unless the *καλὰ* be done under some restriction of principle, mode, and propriety, they lose their character, as Zonaras has, on another occasion, observed: "Ὅτι οὐ καλὸν ἔστιν μὴ καλῶς γίνεσθαι": in Can. Apost. 66, quoted in Hooker, at the end of book i.

²⁰ On the subject of *ἐγκώμιον* and *ἱπαινος*, see Eth. Nich. i. 12, where he is inquiring whether commendation or praise be more appropriate to happiness:—*ὁ μὲν ἱπαινος τῇ δριττῇ, πρακτικοὶ γὰρ τῶν καλῶν ἀπὸ ταύτης· τὰ δὲ ἐγκώμια τῶν ἐργῶν, ὁμοίως καὶ τῶν σωματικῶν, καὶ τῶν ψυχικῶν.*

²¹ *Laudes nonnullæ a voluntate bona cum reverentia con-*

know what a man ought to do, and what kind of per- 36.
son he should be, it is necessary, if we would state
this in the form of advice, to transpose and change
the sentiment in its diction: for instance, suppose we
are aware that we are not to think highly of goods
obtained by chance, but of those obtained by our own
means. Thus expressed the sentiment has the force
of a *suggestion*; but thus, of *commendation*, "think-
ing highly, not of goods which were his by chance,
but those obtained by his own means." So that,
when you wish to commend, see what you would
suggest in advising; and when to advise, see what
you would commend. But the diction will of neces- 37.
sity be reversed, when there has been submitted to
change an idea which in one form is prohibitive, in
another is not prohibitive.

We must avail ourselves also of amplification in 38. Am-
many cases: thus, if a man has done a thing alone, plification
or first, or with few to share it, or even if it be a to be
thing which he has done more than any other; these used;
all are circumstances of honour. The topic also
which is deducible from times and seasons; these are
circumstances contrary to what is natural. Also if
a man has often succeeded in the same thing; for this
is a feature of greatness, and originates not in chance,
but will appear to arise through his own means.
Also if orations commendatory and exhorting to
emulation have been founded and got up on his ac-
count; if also he be one on whom an encomium was
first passed, as it was on Hippolochus; and the hav-
ing a statue set up in the forum first occurred to
Harmodius and Aristogiton; and in the same way
we use amplification with opposite views; and should
you not abound in topics bearing on your subject
himself, you should set him in comparison with
others; which Isocrates used to do from his familiar-
ity with judicial pleading. You should compare the and com-

juarta proficiantur, quæ sane laudum formula Principibus et
Viris quibuscunque dignioribus debetur: *Laudando præcipere*:
cum arduet apud illos prædicando quales sint, humiliter mo-
neat quales esse debeant. Bacon's Essays, De Laude.

parison of person of whom you speak, with men of character ; character. for it is a feature of amplification, and honourable, if he be better than the good.

39. Am- Amplification falls in easily with demonstrative plification oratory ; for its essence is the being above medi- suits epi- ocrity. On which account we should make a com- deictic parison with the generality of men, if we cannot oratory. with men of character ; since the being above the

40. average seems to indicate virtue. In a word, of all the formulæ common to each branch of rhetoric, amplification best suits demonstrative ; for the orator takes the actions for granted, and it thus remains only to invest them with greatness and beauty. Example²², however, suits deliberative ; because we there decide, by arguing of the future from what has gone before. Enthymem, however, suits judicial ; for by reason of its not being clear, the past most especially leaves room for assignment of reasons and demonstration.

Example suits deliberative, enthymem judicial oratory.

41. Nearly all the sources out of which praise and blame are deduced, and on what sort of things we ought to have an eye in praising and blaming, the means too by which encomia and reproaches are produced, are these : for being possessed of these points,

²² For the general principles upon which EXAMPLES influence us, and their peculiar adaptation to deliberative cases, see book ii. chap. 20. Meanwhile let us anticipate our author's discussion of the subject, and quote a few words of a modern writer to show how completely this vehicle of proof is adapted to the purpose of the orator, whose demonstrations should always be as little laboured as possible.—“ Our lives in this world are partly guided in rules, and partly directed by *examples*. To conclude out of general rules and axioms by discourse of wit our duties in every particular action, is both troublesome, and many times so full of difficulty, that it maketh deliberations hard and tedious to the wisest men. Whereupon we naturally all incline to observe examples, to mark what others have done before us, and, in favour of our own ease, rather to follow them, than to enter into a new consultation, if in regard of their virtue and wisdom we may but probably think they have waded without error. So that the willingness of men to be led by example of others, both discovereth and helpeth the imbecility of our judgment.” Hooker, Ecc. Pol. v. § 65, p. 307.

their contraries are plain ; for blame is deduced from the opposite sources.

CHAP. X.

The number and nature of the Sources out of which the Orator must construct his reasonings in Accusation and Defence.

It will be for me next to speak of the number and nature of the sources out of which the orator must construct his reasonings, touching accusation and defence. Now we must ascertain three points ; one, what and how many are the objects for the sake of which men act unjustly ; the second, how themselves are disposed ; and the third, towards persons of what character and of what disposition they do so act.

Let us then, after defining the acting unjustly, speak in order of the rest. Let the acting unjustly be defined to be, the voluntary¹ commission of hurt in contravention of law. Now law is either general or peculiar. The *peculiar* law I call that, by whose written enactments men direct their polity: the *general*, whatever unwritten rules appear to be recognised among all men. Men are voluntary agents in whatever they do wittingly, and without compulsion. Men, therefore, do not every thing on fixed principle, which they do wittingly: but whatever they do on fixed principle, that they do wittingly ; because no one is ignorant of that which he chooses on principle. Now, the principles by whose motion men de-

4. Two

¹ Rewards and punishments do always presuppose something *willingly* done well or ill ; without which respect, though we may sometimes receive good or harm, yet then the one is only a benefit and not a reward, the other simply a hurt and not a punishment. From the sundry dispositions of man's will, *which is the root of all his actions*, there groweth variety in the sequel of rewards and punishments, which are by these and the like rules measured : *Take away the will, and all acts are equal : That which we do not, and would do, is commonly accepted as done.* Hooker, i. § 9, p. 239.

causes of
injustice.
i. De-
pravity.
ii. Incon-
tinence.

- liberately choose to hurt and do evil in contravention of law, are depravity and moral weakness²; for if any are depraved either in one or more respects, it is in reference to that point, on which they are so depraved, that they are guilty of injustice. The illiberal man, for instance, on the subject of money; the intemperate, touching the pleasure of the body; and the effeminate, respecting objects of ease; and the coward, respecting danger; (for it is by reason of fear that men abandon their comrades in danger;) the ambitious man, on the score of honour; the hasty man, by reason of anger; the man eager to excel, on account of victory; the vindictive, for the sake of revenge; a silly man, owing to his being mistaken on points of right and wrong; a man of effrontery, from his contempt of character. And in other characters in the same way each [goes wrong] respecting his own particular weakness. But my meaning on these matters will be evident from what has been already said on the subject of the virtues, and from what hereafter will be stated on the subject of the passions. It merely remains for me to state on what account, how effected, and toward whom, men do commit injustice.

6. The
motives of
injustice
proceed
from

First, then, let us distinctly enumerate the objects, which desiring, or which avoiding, we set about injustice³: because it evidently should be considered by the plaintiff how many, and what sort of those things, from a desire of which men wrong their neighbours, have an existence on the side of his adversary; and by the defendant again, what, and

² Cf. James, chap. i. 15.

³ How complete an insight into the nature of man does this disquisition display; and how admirable a key is here afforded to all the operations of the human heart! This branch of knowledge has always been insisted on as essential to those employed in *judicial* investigations.—Thus, Bolingbroke, speaking of the education of lawyers, says, "They must pry into the secret recesses of the human heart, and become well acquainted with the whole moral world, that they may discover the abstract reason of all laws," etc. Stud. of Hist. p. 353: edit. 4to.

what number of these things do not so exist. Now all men do all things either of themselves, or not of themselves. The things which they do not of themselves, they do either by chance, or from necessity; and the things done by necessity, they do either by compulsion, or by nature. So that all things whatsoever which men do not of themselves, they do either by chance, or from compulsion, or by nature. Again, the things which they do of themselves, and of which they are themselves the causes, some they do through custom, and others through natural desire; and this partly through this desire influenced by reason, and in part through it devoid of reason. Now the act of wishing is desire accompanied by reason, fixing on some good as its object; because no one wishes for any thing other than what he conceives to be a good. The desires devoid of reason, are anger and appetite. So that all things whatever which men do, they necessarily do from seven causes; by chance, compulsion, nature, custom, will, anger, or appetite. But to carry on distinctions in reference to age, or habits, or whatever else enacts itself in conduct, were superfluous. For, granting that it happens to young men to be passionate, it is not by motion of their *youth* that they act thus, but by motion of anger and appetite: neither is it by motion either of wealth or poverty, simply, but (in the case of the poor) it is on account of their neediness that it happens that they cherish an appetite for wealth; and (in the case of the rich) on account of their having the means, that they risk an appetite for unnecessary pleasure; and these persons will act neither by motion of their wealth nor of their poverty, but by motion of appetite. And in exactly the same way, the just and unjust, and all such as are said to act conformably to habits, will in reality act, under all circumstances, by motion of these principles; for they on the impulse either of reason or of passion; but some from good manners and passions, others from the contrary. Still, however, it happens that on habits of this particular character, principles of action the same in

7. the motives of all human action.

These are seven in number:

ii. Compulsion.
iii. Nature.
iv. Custom.
v. Will.
vi. Anger.
vii. Appetite.
9.

10.

- character are consequent ; and on those of that kind, principles also of that kind. For on the temperate man perhaps forthwith, by motion of his temperance, are attendant good opinions and appetites respecting pleasures ; but on the intemperate, the contrary on these same subjects. For which reason we must wave distinctions of such a kind ; but we must consider, on what conditions⁴, what principles of conduct are wont to follow : for it is not ordained, (in the nature of things,) that, if a man be white or black, or tall or short, principles of this or that kind should be attendant on him ; but if he be young or old, just or unjust, here some difference begins ; and so, in a word, in the case of all contingent circumstances whatever, which produce a difference in the tempers of men, for instance, a man's seeming to himself to be rich or poor, fortunate or unfortunate ; in all these cases there will be some essential difference. Of this, however, we will speak hereafter ; let
11. us now treat first of the remaining points. Things
- i. Chance. proceed from *chance* which are of such kind that their cause is not definite⁵, and are produced in the absence of any final motive, and that neither invariably, nor usually, nor in any prescribed order. My meaning on these subjects will be plain from the definition
13. of chance. All those things exist *naturally* whose
- ii. Nature. cause is internal and ordinate ; for they turn out, either invariably or generally, in the same way ; since there is no need of an accurate inquiry on results contrary to nature, whether they be produced conformably to a certain nature, or any other cause. It would appear,
14. too, that chance is the cause of such results. All
- iii. Compulsion.

⁴ He here first informs us that he shall not make his exclusion so rigid as he had above stated, but will admit *youth* and *age*, etc. to a particular consideration, as holding an important influence over character, though that influence ought philosophically to be referred to one of the seven above-mentioned principles ; while every thing else which people choose to fix upon as a principle of conduct will, on examination, prove to be merely *secondary*, and to act *mediately* through one or other of the seven.

⁵ Vid. chap. v. § 17.

things originate in *compulsion*, which are produced through the instrumentality of the agents themselves, contrary to their inclination and reason. In *habit* originates every thing which men do because they have often done it before. From *will* proceed whatever of the forementioned goods appear to be useful, either as an end or as conducing to the end, when it is by reason of such their usefulness that they are realized in action: for even the intemperate do some things which are useful; but not on account of their usefulness, but on account of pleasure. Through the medium of *anger* and excited feeling arise acts of vengeance. Now, between revenge and punishment there is a difference; for punishment is for the sake of the sufferer, but revenge for that of the person inflicting it, in order that he may be satiated⁶. On what subjects this excitement of feeling exists, will therefore be plain in my treatise of the passions. But all such things as appear pleasant are produced in action on the impulse of *appetite*. But that which is familiar and has become habitual, is of the number of things pleasant; for many things there are, even among such as are not pleasant *naturally*, which, when men have been habituated to, they do with pleasure. So that, to speak in one word comprehending the whole, every thing whatsoever which men do of their own proper motion, either is good, or apparently good; pleasant, or apparently pleasant. But as they act voluntarily in whatever they do of their own motion, and involuntarily in whatever they do not of their own motion; all things whatsoever in respect to which they act voluntarily, will be either good or apparently good; pleasant or apparently pleasant. For I also set down the getting quit either of evils or apparent evils, and the getting a less evil in exchange for a greater, in the class of goods; because they are in a certain way desirable things.* And, among things pleasant, I likewise set down the getting quit of things bringing pain, or appearing to do so; or the getting things

15.
iv. Habit.16.
v. Will.17.
vi. Anger.18.
vii. Appetite.

These motives are briefly comprehended in one word, pleasure.

* Revenge is a kind of wild justice. Bacon's Essays.

less so, in exchange for such as are so in greater degree.

19. What objects are pleasant, therefore, must be discussed. We have therefore to ascertain the number of things pleasant⁷ and of what kinds they are. Now on the subject of what is useful, something has been already said in my treating of deliberative rhetoric; but on the subject of what is pleasant let us treat, beginning at this point. As to the definitions, you must deem them to be adequate [to my purpose] if they be found, on each subject, exempt from obscurity, though not accurately precise.

CHAP. XI.

What things are pleasant.

1. Immediate motives of injustice considered. Definition of pleasure.
2. Pain is *ἐκτραχίς*.
LET it be laid down by us, that pleasure is a certain motion of the soul, and a settlement of it, at once rapid and perceptible, into its own proper nature; and that pain is the contrary. If then pleasure be a thing of this nature, it is plain that whatever is productive of the disposition I have described, is pleasant; while every thing of a nature to destroy it, or produce a disposition the opposite to it, is painful.

3. A reversion to nature is pleasant.
Generally speaking, therefore, it is necessary, both that the being in progress toward a state conformable to nature, should be pleasant; and that, in the highest degree, when those feelings, whose original is conformable to it, shall have recovered that their nature; and habits, because that which is habitual becomes by that time natural, as it were; for, in a certain way, custom is like nature, because the idea of *frequency* is proximate to that of *always*; now nature belongs to the idea of *always*, custom to that of

⁷ In all judicial questions a knowledge of the constituents of pleasure will be of essential service; for they all suppose some wrong done, and *there is no man doth a wrong for the wrong's sake, but thereby to purchase himself profit, or pleasure, or honour, or the like.* Bacon's Essays.

often. What is not compulsory, also, is pleasant ; for compulsion is contrary to nature. Wherefore acts of necessity are painful ; and it has been truly remarked, "Every act of necessity is in its nature painful." It must be also that a state of sedulous attention, anxiety, the having the mind on the stretch, are painful, for they all are acts of necessity, and constrained, unless they have become habitual ; but it is custom which, under such circumstances, renders them pleasant. The contraries of these must also be pleasant ; wherefore, relaxation of mind, leisure, listlessness, amusements, and intervals of rest, rank in the class of things pleasant ; for none of these has any thing to do with necessity. Every thing of which there is an innate appetite, is pleasant ; for appetite is a desire of what is pleasant. Now, of appetites, some are irrational, others attended by reason. I call all those irrational, which men desire, not from any conception which they form : of this kind are all which are said to exist naturally, as those of the body ; thirst or hunger, for instance, in the case of sustenance ; and the appetite of sustenance in every kind. And the appetites connected with objects of taste, and of lust, and, in fact, objects of touch generally ; the appetite of fragrant odours, too, as connected with smelling, and hearing, and sight. Appetites attended by reason, are all those whatsoever which men exercise from a persuasion : for many things there are which they desire to behold, and possess, on hearsay and persuasion. Now, as the being pleased stands in the perception of a certain affection, and as imagination is a kind of faint perception, there will attend on him who exercises either memory or hope, a kind of imagination of that which is the object of his memory or hope ; but if so, it is plain that they who exercise memory or hope, certainly feel pleasure, since they have also a perception. So that every thing pleasant consists either in the perception of present objects, or in the remembrance of those which have already been, or in the hope of such as are yet to be ; for men exercise perception

4. All freedom from constraint.

5. Appetites are pleasant.

Irrational.

Rational.

6. Hope and memory are pleasant.

7.

- on present, memory on past, and hope on future objects. Now the objects of memory are pleasant, not only such as at the moment while present were pleasant, but some even which were not pleasant, should their consequence subsequently be honourable and good; and hence this saying, "But it is indeed pleasant for a man, when preserved, to remember his toils;" and this, "For after his sufferings, a man who has suffered much, and much achieved, is gladdened at the recollection." But the reason of this is, that to be exempt from evil is pleasant¹. And all objects are pleasant in hope, which appear by their presence either to delight or benefit in a great degree; or to benefit, without giving pain. In a word, whatever objects by their presence delight us, do so, generally speaking, as we hope for, or remember them. On which account, too, the feeling of anger is pleasant; just as Homer has remarked of anger in his poem, "That which with sweetness far greater than distilling honey as it drops;" for there is no one who feels anger where the object seems impracticable to his revenge; nor with those far their superiors in power do men feel anger at all, or if they do, it is in a less degree.
10. There is also a kind of pleasure consequent on most appetites; for either in the recollection that they have enjoyed them, or in the hope that they shall enjoy them, men are affected and delighted by a certain pleasure: thus men possessed by fevers feel delight, amid their thirst, as well at the remembrance how they used to drink, as at the hope of drinking
11. yet again. Lovers, too, feel delight in conversing, writing, and composing something, ever about the object beloved; because, in all those energies, they have a perception, as it were, of the object they love. And this is in all cases a criterion of the commencement of love, when persons feel pleasure not only in the *presence* of the object, but are enamoured also of it when *absent*, on memory; wherefore, even when
12. Sor-
row.
- Criterion of love.
- ¹ *Suave mari magno, turbantibus æquora ventis,
Alterius procul e terra spectare dolorem, etc. Lucretius.*

pain arises at absence, nay in the midst of mourning, and the very dirge of death, there yet arises within us a certain pleasure. For the pain is felt because the object is not present; but the pleasure consists in remembering and seeing, as it were, both the person, and what he used to do, and the kind of character of which he was. Whence has it been said, and with probability enough, "Thus spake he, and excited within them all a desire of lamentation." Also the avenging one's self is pleasant¹; for the getting of that is pleasant, the failing to get which is painful: now the angry do feel pain in an excessive degree if they be not avenged; but in the hope of revenge they take pleasure. Again, to overcome is pleasant, not to the ambitious only, but even to all; for there arises an imagination of superiority, for which all, either in a faint or more violent degree, have an appetite. But since to overcome is pleasant, it must follow of course, that amusements where there is field for rivalry, as those of music and disputations, are pleasant; for it frequently occurs, in the course of these, that we overcome; also chess, ball, dice, and draughts. Again, it is the same with respect to amusements where a lively interest is taken²; for, of these, some become pleasant as accustomed to them; others are pleasant at first; for instance, hunting and every kind of sporting; for where there is rivalry, there is also victory; on which principle the disputations of the bar and of the schools are pleasant to those who have become accustomed to them, and have abilities. Also honour and good character are most pleasant, by reason that an idea arises, that one is such as is the good man; and this in a greater degree should those people pronounce one such, who

13. Revenge.

14. Victory.

15. Hence, amusements.

16. Honour and character.

¹ See book ii. chap. 2, § 1.

² If this rendering for the word *ἀσπασμῶν* be not that which the Greek might first suggest, yet it is that which seems best to suit the context; for sporting and hunting do not very well accord with our ideas of grave and serious amusements, though exercised as they were by the Greeks, as mere preparatives for the labours of military duty, they might justly deserve serious attention.

he think speaks truth : such are those immediately about one, rather than those who are more removed ; familiar friends, and acquaintances, and one's fellow citizens, rather than those who are at a distance ; the present, rather than a future generation ; a man of practical wisdom, rather than a mere ignoramus ; many, than a few ; for it is more likely that these I have mentioned will adhere to the truth, than that the opposite characters will : since one has no anxiety about the honour or the opinions of such as one greatly despises, children and animals for instance, not at least for the sake of such opinion itself ; but if one is anxious about it, then it is on account of

17. something else. A friend, too, ranks among things
 Friends. pleasant ; for the affection of love is pleasant ; since there is no lover of wine, who does not delight in wine : also the having affection felt toward one is pleasant ; for there is in this case also an idea of one's being an excellent person, which all who have any sensibility to it are desirous of ; now the having affection felt for you is the being beloved yourself, on your own account. Also the being held in admiration is pleasant, on the very account of being honoured by it. Flattery and the flatterer are pleasant ; since the flatterer is a seeming admirer and a seeming friend⁴. To continue the same course of action is also pleasant ; for what is habitual was laid down to be pleasant. To vary is also pleasant ; for change is an approach to what is natural : for sameness produces an excess of a stated habit ; whence it has been said, "In every thing change is pleasant⁵." For on this principle, whatever occurs at intervals of time is pleasant, whether persons or things ; for
18. Being admired.
 Flattery.
 19. Habitual action.
 20. Variety.

⁴ It may be interesting to compare the grounds on which Dr. Johnson considered flattery pleasant with these of Aristotle. The Doctor's words are, "Flattery pleases very generally. In the first place, the flatterer may think what he says to be true ; but, in the second place, whether he thinks so or not, he certainly thinks those whom he flatters of consequence enough to be flattered." Boswell's Life, A. D. 1775, Æt. 66, p. 86, vol. iii.

⁵ Eurip. Orest. 234.

it is a variation of present objects ; and at the same time that which occurs merely at intervals possesses the merit of rarity. Also learning and admiration, generally speaking, are pleasant ; for under admiration exists a desire [to learn], so that what is admired is desired ; and in the act of learning there is a settlement into a state conformable to nature. To benefit and to be benefited are also of the number of pleasant things ; for to be benefited, is to get what people desire ; but to benefit, is to possess and abound ; things, the both of which men desire. And because a tendency to beneficence is pleasant⁶, it is also pleasant to a man to set his neighbour on his legs again, and to put a finish to that which was deficient in some particular. But as the acquisition of knowledge is pleasant, and the feeling admiration, and such things ; that, too, must necessarily be pleasant which has been expressed in imitation, as in painting, sculpture, and poetry : also, every thing is pleasant which has been correctly imitated, although the original object, of which it is the imitation, may not in itself be pleasant ; for one does not feel pleasure on that account ; but there is an inference that "this means that:" and thus it happens that we learn something. Also sudden revolutions⁷, and the being saved from danger narrowly ; for all these are cases exciting admiration. Again, since that is pleasant which is conformable to nature, and things which are akin are respectively conformable to nature, every thing like and akin, speaking generally, is pleasant ;

21. Learning : admiration.

22. To do good : to receive good.

23. Imitation.

Painting
Sculpture.
Poetry.

24. Reverses.
Narrow escapes.

25. Similarity and conformity to nature and ourselves.

⁶ This principle of pleasure has been thus developed by Hooker : "As to love them of whom we receive good things is a duty, because they satisfy our desires in that which else we should want ; so to love them on whom we bestow is nature, because in them we behold the effects of our own virtue."—Ecc. Pol. v. § 63, p. 285. See also what is said towards the end of this chapter, of the love borne towards whatever is, in any sense, an *ἑργον* of own—as children, works of genius, etc.

⁷ Ἐστὶ δὲ περιπέτεια ἡ εἰς τὸ ἑναντίον τῶν πραττομένων μεταβολή, κ. τ. λ. Poet. 21. Twining explains it to be, "when," in a drama, "the things that are doing have an effect the very reverse of which is expected from them." ii. 77.

- as man to man, horse to horse, and youth to youth. Whence also these proverbs originate: "Fellows in age, delight;"—"Whatever is similar;"—"Beasts recognise their species;"—"Birds of a feather flock together;" and every other saying of this sort. But as every thing like and akin is delightful to it, and as every one stands to himself in this relation in a most special manner, all must be, more or less, lovers of themselves; for all these qualities do in a particular manner exist in reference to self. But as all are lovers of themselves, that necessarily which is their own must be pleasant to all; as, for instance, their sayings and productions. On which account men are in general fond of flatterers and lovers, and are ambitious and fond of children; for children are their own production⁸. It is also pleasant to put a finish to what is deficient⁹; for it became by that time one's own production. And as rule is the most pleasant of all things, the appearing to be wise is also pleasant; for knowledge is a principle of power; and wisdom is a knowledge of many subjects, and those commanding admiration. Moreover, as men in general are ambitious, the power of rebuking one's neighbour must needs be pleasant. Also the pausing on that province in which he appears to be best, when compared with his own powers in other respects; just as Euripides remarks, "And this he plies, allotting the greatest part of each day to it,
27. Power.
- Wisdom.
Censure.
28. Dwelling on one's own excellencies.

⁸ One passion is often productive of another: examples are without number; the sole difficulty is a proper choice. I begin with self-love, and the power it hath to generate love to children. Every man, beside making part of a greater system, like a comet, a planet, or satellite only, hath a less system of his own, in the centre of which he represents the sun, darting his fire and heat all around; especially upon his nearest connexions: the connexion between a man and his children, *fundamentally that of cause and effect*, becomes, by the addition of other circumstances, the completest that can be among individuals; and therefore self-love, the most vigorous of all passions, is readily expanded upon children. Lord Kames's *Elements of Criticism*, chap. ii. part 1, § 5.

⁹ The completion of what has been left unfinished was before stated to be pleasant on another principle. See § 22.

in which, himself being compared with himself, he appears most excellent."

In a similar way, since amusement ranks among 20. pleasant things, and as every relaxation and laughter is of the number, things ridiculous must therefore of course be pleasant, as well persons as expressions and productions. But on the subject of the ridiculous, a detailed discussion has been entered into in the Poetics¹⁰. Let thus much have been said on the subject of things pleasant; from the contraries of these things, what is painful will be evident. These, then, are the objects for the sake of which men act unjustly. Laughter.

CHAP. XII.

With what Dispositions men commit Injustice, in what instances, and towards whom.

LET us now state with what dispositions men commit injustice, and towards whom they do so. As regards themselves then, it is when they think the thing is one possible to be done, and possible to themselves; and either that, in doing it, they shall escape detection, or, if they do not escape it, that they shall not suffer punishment, or that they shall indeed suffer a punishment, but that the damage thereby incurred will be less than the gain, either to themselves or those for whom they have a regard. Now the subject of things which appear possible, and those 2 which appear impossible, will be explained in the sequel; for these are points applicable in common to all kinds of rhetoric¹. Now as to their own advantages, those men think they are in the highest degree likely to commit injustice with impunity, who are of ability in speaking, and men of the world, and such as have experienced many a forensic contest. If, 1. Πῶς ἔχοντες, or the agents of injustice, then act unjustly, when it seems possible that they shall escape detection.

¹⁰ In one of the books which has unfortunately been lost. His definition of it is, ἀεὶ ἔχειν δὲ καὶ λυπηρῶς.

¹ They are, in fact, τῶνος, ii. 19.

The talented.

- The powerful. too, they happen to have many friends. If they be rich². And more particularly do they think they
3. can get off, if they be themselves³ possessed of the forestated qualities; and if they be not *themselves* so qualified, yet if they have friends, or supporters, or associates⁴ of such talents, then also they think to get off; for these are the endowments, by aid of which men are able both to act, to escape detection, and avoid punishment⁵. Again, if they be friends, either of the injured party, or of the judge; because friends are off their guard against injustice, and are moreover appeased before prosecuting their revenge. But the judges gratify their friends, and either altogether let them off, or amerce them in a trifle.
4. If likely to escape detection. People likely to escape detection, are those the very opposite in character to the charge; as, a man of personal imbecility, on a charge of assault; or one poor and deformed, on a charge of adultery. Again, circumstances exceedingly palpable, and in the eyes of all the world; for these are unobserved, by reason
5. Such as the opposites to the charge, etc. 6. that no one would think of them at all. Acts, too, of such enormity and such a character that no one would presume; for in regard to these also men are off their guard: for it is against crimes which are

² He remarks, in his Politics, the general tendency to insubordination and disobedience to laws observable in the rich and prosperous;—οἱ μὲν ἐν ὑπεροχαῖς εὐτυχημάτων ὄντες, ισχύος, καὶ πλούτου, καὶ φίλων, καὶ τῶν ἄλλων τῶν τοιούτων, ἀρχεσθαι οὐτε βούλονται οὐτε ἐπίστανται. Polit. iv. c. 11. Upon the same principle Tacitus remarks, "Opes principibus infensas." Ann. lib. xi. c. 1.

³ In the Ethics, where, in speaking of Βούλευσις, he limits its sphere first and generally to things *possible*, he remarks—Δυνατὰ δὲ, ἃ δι' ἡμῶν γένοιτο ἂν. τὰ δὲ διὰ τῶν φίλων δι' ἡμῶν πῶς ἐστὶν ἢ γὰρ ἀρχὴ ἐν ἡμῖν. Eth. Nich. iii. 3.

⁴ The Thessalonian Menon, in Xenophon, courted the friendship of men in power with this view: φίλος τ' ἐβούλετο εἶναι τοῖς μέγιστον δυναμένοις, ἵνα ἀδικῶν μὴ διδοίη δίκην. Anab. lib. ii. c. 6. vid. infra.

⁵ The vast assistance to be derived from friends and supporters by those who are under accusation, may be illustrated by the following strong expressions of Augustus, who said, "Cunctari se, ne, si superasset, eriperet legibus roum; sin desset, destituere, ac prædamnare amicum videretur." Sueton.

ordinary, as it is against bodily infirmity of an usual kind, that men set themselves on their guard ; but as to cases in which no one yet has been afflicted, no one is cautious. Also those people are open to attack, to whom no one is an enemy, or to whom many are ; for in the one case the aggressors think to escape detection from their not being on their guard ; and in the other, they escape from its not seeming likely that they would make an attempt on people ever on their guard, and from their having ever at hand the plea, that they never could have been so mad as to attempt it. Those again are likely to act unjustly, who have at hand means of concealing or changing property, places to hide, or any easy means of disposing of it. All those persons, too, who, if they do not escape, having nevertheless means of setting aside the sentence, or of tedious delay, or of corrupting the judges ; and who, if the fine be imposed, can yet set aside its payment, or put it off a length of time, or who, from their neediness, have nothing to lose. All, too, who have the gain clearly in view, or great, or close at hand ; while the loss is trifling, indistinct, and at a distance. Also any one to whom the punishment is not adequate to the advantage ; of which kind a tyranny seems to be. All, again, in whose case the commission of injustice is an act of gain, while the punishment is mere opprobrium. So, on the contrary, are they whose unjust acts lead to a kind of credit, (as if it should happen for one, in their commission to avenge a father or mother, as was the case of Zeno,) while the punishment leads merely to fine, banishment, or something of that kind ; for both descriptions of persons act unjustly ; however, they are not the same in character, but the very opposite. Persons, too, who have often escaped notice, or who have not been punished. People who have often met with ill success ; for these, like persons engaged in warlike operations, are of a disposition to renew the contest. Every one also to whom the pleasant is immediate, while the painful is subsequent ; or if the object be gain, while the loss is subsequent ; for all inconti-

7.

8. Such as have means of concealment.

9. Where there is great gain.

10. Where the punishment is only opprobrium.

11. The undetected. The unlucky.

12. Where the pleasure is immediate.

13. Or sometimes when remote.

14. Where another motive will be attributed.

15. Men in want.
i. Who want necessities.
ii. Who want superfluities.

16. Men of good character.
Men of bad character.

17. The persons exposed to injustice are: such as have the desired object.

18. The distant.
The near.

nent persons are thus affected: now incontinence is conversant about all objects whatsoever which men desire⁶. And on the contrary, persons are wont to act unjustly in cases where the painful or loss is immediate, but the pleasant and expedient is subsequent, and slow in presenting itself; for continent persons, and such as have rather more practical wisdom, pursue objects of this kind. Wherever, too, a person may appear to have acted by chance, by necessity, natural bent, or habit; and, in a word, to be guilty of *error*, not of *injustice*. Also in whatever cases it may happen that one would meet with equity. Again, whatever persons are in want: now men are in want two ways; for either they want necessities, like the poor; or something in excess, just as the rich⁷. People, too, of exceedingly good character, or such as are utterly destitute of character; the first, on the principle that they shall not appear the culprits; the last, that they shall not be a whit worse off as to character. Thus affected in themselves, then, it is that men attack their neighbours.

But they act unjustly against persons, and on account of objects, of the following descriptions. Persons who possess things which themselves are in need of, be it for necessities, for superfluity, or for sensual enjoyment: people who are at a distance, and those who are near; for the means of getting at the one are quick, and the vengeance of the others is slow; as on those, for instance, who plunder Carthaginians⁸: and

⁶ Although *incontinence*, properly so called, is excited by a limited description of objects, yet there is a feeling analogous to, and, in the vague language of the world, synonymous with it, which may be excited by any objects whatsoever;—*ὑποληπτόν μόνον ἀκρασίαν καὶ ἐγκράτειαν εἶναι, ἥτις ἐστὶ περὶ τὰ αὐτὰ τῇ σωφροσύνῃ καὶ τῇ ἀκολασίᾳ. Περὶ δὲ θυμόν, καθ' ὁμοιότητα λέγομεν.* Eth. Nich. vii. 4. This is another of the many instances, in which Aristotle supposes the rhetorician to take a popular view of his subject.

⁷ *Exilis domus est ubi non et multa supersunt.* Hor. Ep. lib. i. 6, 45.

⁸ This may have been a proverbial expression for designating any attack on a remote object; since, considered in

men who are not cautious, nor apt to be on their guard, but are of a disposition to repose confidence ; for it is easy enough to elude all such. Also towards such as are of an indolent turn ; for to prosecute is the part of a man who is strenuous. Against such also as have a delicate sense of honour ; for these are not apt to squabble about gain : and again, those who have been wronged by many already, yet without their prosecuting ; as though these were, in the words of the proverb, "a prey to very Mysians⁹." Both against those who never yet have been wronged, and those who frequently have been, men are wont to act unjustly ; both being off their guard, the first under the idea that they never shall be wronged, the last as though they should not be wronged any more : also against those who have had imputations thrown on their characters, or who are open to it ; for such people, from a fear of the judges, do not take on themselves to effect persuasion, neither, in fact, are they able ; of which class are all who are disliked and envied. Men act unjustly also towards those against whom they have any pretext, on the part either of their ancestors, themselves, or friends, that they have wrought ill, or intended it, either against themselves, or their ancestors, or those for whom they have a regard ; for, as the proverb goes, "Malice wants only an excuse." Against friends¹⁰ and against enemies are acts of injustice committed ; for against the first it is easy¹¹, against the others pleasant : also against

The indolent.

Those who have a high sense of honour.

20.
21. The wronged. The unharmed.

23. Those in disgrace.

23. Such as offer a pretext.

24. Friends. Enemies.

reference to Greece under the then imperfect state of navigation, Carthage was an object not easily got at.

⁹ The Mysians were so effeminate and unwarlike, that their neighbours made encroachments on their territory with impunity, so that they became proverbial through Greece.

¹⁰ Some traits in the character of the Thessalian Menon, as given by Xenophon, will serve to illustrate Aristotle's catalogue of these objects of villany. Of Menon it was remarked, τοῖς μὲν τῶν ΠΟΛΕΜΙΩΝ κτήμασιν οὐκ ἐπιβούλευε—χαλεπὸν γὰρ ἦεντο εἶναι τὰ τῶν ΦΥΛΑΤΤΟΜΕΝΩΝ λαμβάνειν—τὰ δὲ τῶν ΦΙΛΩΝ μόνος ἦεντο εἰδέναι ὅτι ῥῆστον ἈΦΥΛΑΚΤΑ λαμβάνειν. Καὶ ὅσους μὲν ἀναισθάνοιτο ἐπιόρκοι καὶ ἀδικοῦν, οἱ εὖ ἀπλισμίνουσι φόβειτο τοῖς δ' ὁσίοις καὶ ἀλήθειαν ἀκούουσιν ὅτι ἀνάνδρως ἐπιειράτω χρησθῆναι. Anab. lib. ii. c. 6.

¹¹ Upon this principle the remark of Demonax was grounded

The

quent nor
active.
25. Those
who can-
not afford
to wait.
26. The
unjust.

- those who are friendless, and those who are not of ability in speaking or acting; because these either do not at all attempt to prosecute, or are reconciled, or bring nothing to the point: also against those whom it will not pay to be waiting in watch for the sentence of court, or the payment of the fine; for instance, foreigners and mechanics; for people under these circumstances are reconciled for a trifle, and are easily hushed. People, too, who themselves have been guilty of injustice in many instances, or in cases of the very character under which they now are wronged; because it appears to approximate in some degree to non-commission of injustice, when a person shall have been wronged in a particular, in which he is himself wont to be guilty; it is, I mean, as if one were insolently to assault the person of a man who is himself
27. in the habit of being insolent. Those also get injured who have wrought ill, or who possessed, or do now possess, an inclination to do so, or who are about to do so; for the act involves what is pleasant and honourable; and it appears to approximate to non-
28. commission of injury: those, too, in injuring whom, a man gratifies his friends, those he admires or loves, on whom he is in dependence, or, in a word, all at whose control he lives, and at whose hands it happens he will meet with equitable consideration. Men also wrong those with whom they have ground of quarrel, and have been previously at variance, as Calippus did in the case about Dion; for acts of this nature seem to approximate to a non-commission of injus-
29. Our
enemies.
- tice: and those who are on the eve of being injured by others, should we not do so ourselves; since this
30. Those
just on
the point

—Εἰ λάσσω κακὰ πάσχουσιν οἱ ἄνθρωποι ὑπὸ τῶν ἐχθρῶν, ἢ ὑπὸ τῶν φίλων. τοὺς μὲν γὰρ ἐχθροὺς δεδιότες φυλάσσονται τοῖς δὲ φίλοις ἀνεωγμένοι εἰσὶ, καὶ γίνονται σφαλεροὶ καὶ εὐεπιβούλευτοι. Nor did this escape the penetration of that keen observer of human nature, Tacitus: Quibus deerat inimicus, per amicos oppressi. Hist. i. 3. Pomponium Flaccum, veterem stipendiis, et arctâ cum rege amicitia, eo accommodatiorem ad fallendum, ob id maxime Mœsiæ præfecit. Ann. ii. 66. To this purpose, too, is the maxim of P. Syrus, Mage cavenda est amicorum invidia, quam insidiæ hostium. See also Proverbs, iii. 29.

admits no longer any deliberation ; just as Ænesidemus is said to have sent presents of cups ¹² to Gelon after he had reduced some state, because he had gotten the start, himself being on the eve of attempting it. Injurers attack those, also, by injuring whom they will be enabled to do many acts of justice, as though they could easily amend their error ; just as Jason the Thessalian said, "that in some particulars one must needs act with injustice, in order to his being able to do many deeds of justice ¹³:" again, they attack people in those particulars, in regard to which, all or most persons usually act wrong ; because here they think to meet with fellow feeling : in regard also to particulars easy to conceal, of which nature are articles quickly consumed, victuals for instance ; or articles admitting a ready change, either in shape, colour, or composition ; or which it is easy to put out of sight in a variety of places ; of which sort are articles easily portable, and hidden in small places ; articles also the like to which, or some undistinguishable from them, have previously been in the possession of the individuals who thus violate justice. Men injure, moreover, in regard to such particulars, as the injured parties have a delicacy in mentioning ; thus in assaults on females intimately connected, or on themselves, or on their children : in all cases, too, in regard to which the prosecuting party would appear litigious ; of this nature are trifling things, and those in which people sympathize and forgive.

of being injured by others.

31. Those whom they can compensate.

32. Men injure where the articles are easy to conceal.

34. Portable.

35. Difficult to be identified. Where the party injured feels a delicacy in alluding to the subject. Where it looks litigious to demand justice.

¹² The amusement of the *κότταβος* had become so popular at the Grecian banquets, that persons who practised it with superior dexterity were presented with rewards, *κοτταβία*, supposed by some commentators to have been a sort of cups or vessels peculiarly adapted to the purposes of the game. See Meursius de Ludis Vet. Græc. p. 28, v. *Κοτταβισμός*. Vid. Athenæ, fol. 666, ubi de Cottabo. Critias ibid. :

Κότταβος ἐκ Σικελῆς ἐστὶ χθονὸς, ἐκπρεπὲς ἔργον .
Ὁν σκοπὸν ἐς λαταγίων τόξα καθιστάμεθα.

See Victorinus, and also Barnes's note on Frag. 105, in his edition of Anacreon.

¹³ Thus, too, the Jesuits contended that "evil might be done in order to produce good."

The dispositions then under which, the objects for whose sake, and the person towards whom, men act unjustly, and why they do so, are nearly these which I have stated.

CHAP. XIII.

Of Acts of Injustice, and Matters of Equity.

1. All injuries offend against either:
2. i. The particular.
- ii. The general law.

COMMENCING from this point, let me mark in detail all acts which conform to, or which violate justice. Now right and wrong have been defined in reference to two kinds of law, and in a twofold way also in regard to those persons to whom they refer¹. Law², now, I understand, to be either peculiar or universal; peculiar, to be that which has been marked out by each people in reference to itself, and that this is partly unwritten, partly written. I call that law universal, which is conformable merely to dictates of nature; for there does exist naturally an universal sense of right and wrong³, which, in a certain degree, all

¹ Vid. Eth. Nich. v. 7.

² The description of Law given by Demosthenes is, perhaps, the most perfect and satisfactory that can either be found or conceived: Οἱ δὲ νόμοι τὸ δίκαιον καὶ τὸ καλὸν καὶ τὸ συμφέρον βούλονται, καὶ τοῦτο ζητοῦσι· καὶ ἐπειδὴν εὐρεθῇ κοινὸν τοῦτο πρόσταγμα ἀπεδείχθη, πᾶσιν ἴσον καὶ ὅμοιον. καὶ τοῦτ' ἐστὶ νόμος, ὃ πάντας προσήκει πείθεσθαι, διὰ πολλὰ, καὶ μάλιστα, ὅτι πᾶς ἐστὶ νόμος εὖρημα μὲν καὶ δῶρον Θεῶν, δόγμα δ' ἀνθρώπων φρονίμων, ἐπανόρθωμα δὲ τῶν ἱκανῶν καὶ ἀκουσίων ἀμαρτημάτων, πόλις δὲ συνθήκη κοινή· καθ' ἣν πᾶσι προσήκει ζῆν τοῖς ἐν τῇ πόλει. The design and object of LAWS is to ascertain what is just, honourable, and expedient; and when that is discovered, it is proclaimed as a general ordinance, equal and impartial to all. This is the origin of law, which, for various reasons, all are under an obligation to obey, but especially because all law is the invention and gift of Heaven, the sentiment of wise men, the correction of every offence, and the general compact of the state; to live in conformity with which is the duty of every individual in society. Orat. i. contr. Aristogit. Notes on Blackstone.

³ This law of nature, being coeval with mankind, and dictated by God himself, is of course superior in obligation to any

intuitively divine, even should no intercourse with each other, nor any compact have existed⁴; which sentiment the Antigone of Sophocles enters uttering, that it was just, namely to bury Polynices, though denounced, since this by nature was a deed of justice: "For by no means is it for this or the next day merely that this maxim is in force, but for ever; nor is there any one who knows from whom it proceeded⁵. And as Empedocles says on the subject of not slaying that which has life: for this maxim is not right here, and wrong there, "but a principle of law to all, it is extended uninterruptedly throughout the spacious firmament and boundless light." And as Alcidas remarks in the Messeniatic oration.

As to the persons also in reference to whom right 3. and wrong have been defined, a twofold distinction has been made⁶; for that which we ought to do and to leave undone, exists in reference either to the community, or to an individual member of it. And hence we may, as regards acts of justice, and the contrary, violate justice or adhere to it in two ways; for we may do so in reference either to an individual, or to the community: for the man who is guilty of adultery, or of an assault, injures some *individual*; but he who will not bear arms injures the *community*.

Injustice
against
the com-
munity.

Injustice
against
the indi-
vidual.

other. It is binding over all the globe, in all countries, and at all times: no human laws are of any validity, if contrary to this; and such of them as are valid derive all their force and all their authority, mediately or immediately, from this original. Blackstone, Comment. Introd. § 2, p. 41.

⁴ See the subject of natural law admirably illustrated in the first book of Hooker's Ecclesiastical Polity, § 8, 9.

⁵ Thus Lord Hale says of the common law of England, "The original of the common law is as undiscoverable as the head of the Nile." Hist. Com. Law, 55.

⁶ Wrongs are divisible into two sorts or species,—*private wrongs* and *public wrongs*. The former are an infringement or privation of the private or civil rights belonging to individuals, considered as individuals, and are therefrom frequently termed civil injuries. The latter are a breach and violation of public rights and duties, which affect the whole community, considered as a community," etc. Blackstone's Commentaries, b. iii. c. 1.

4. Now as all acts of violating justice have been distinguished, and as some of them are against the community, and others against one or more individual members of it, let me, after reverting to what the suffering injustice is, explain the rest. Now to be injured, is to suffer injustice at the hands of a willing agent;
5. for commission of injustice has been previously defined to be a voluntary act. As however it is necessary that the person injured should be hurt, and involuntarily hurt. Now what *hurt* is will be evident from what has gone before; for things good and evil have been distinctly spoken of above, and voluntary acts also; namely, that they are all things done knowingly. So that all grounds for complaint must exist, necessarily in reference either to the community, or to individual interests; the agent being either unconscious, or unwilling, or willing, and conscious; and [in the last] of these cases, acting either on deliberate choice, or on the impulse of passion. Now I shall treat on the subject of anger in my discussion of the passions; but it has been above explained under what circumstances, and with what dispositions, men act on deliberate principle.

9. We must know the definition of the various acts of injustice.

- But as people, while they acknowledge their having acted in such a way, very frequently will not acknowledge the designation in the indictment, or the view of the case on which the indictment turns: a man will avow, for example, his having taken a thing, but not his having *stolen* it; that he struck the first blow, but yet did not *insult*; that he cohabited, but did not *commit adultery*, with the woman in question; or that he stole, but was not guilty of *sacrilege*, for it was not consecrated property; or that he did till beyond his boundary, but encroached not upon *public* land; or conversed with the enemy, but was yet not guilty of *treason*: it will, for these reasons, be necessary to lay down definitions on these matters; as to what essentially constitutes *theft*, *insult*, and *adultery*; in order that, if we wish to show that they really do or do not exist, we may be able
10. to set the right of the case in a true light. Now all

these questions, as to a matter being unjust and criminal, or not unjust, do in fact constitute the ground of inquiry ; for the criminality and injustice of the act stands essentially in the deliberate principle on which it is done ; and this sort of terms marks, over and above the matter of fact, the principle also of the agent ; the terms, assault and felony, for instance ; for because a man has struck another, he will not under all circumstances have assaulted him, but if he has done so with a view to something, as with a view to treat him with disrespect, or to his own gratification : neither, supposing a man has taken privily, has he been guilty, in every case, of larceny ; but if he took it to the injury of another, or in order to appropriate it to himself, then indeed he has been guilty of larceny. The case too is similar respecting other terms designating crimes to what has been remarked respecting these.

But as there were two species of things right and 11. wrong ; for one was of written prescript, the other of unwritten law ; now those on the subject of which the laws speak a written language have been treated of ; and of those arising from unwritten law there are two kinds. And these are, the one class which is always in proportion to the excess of vice or virtue of the agent, on which are consequent either censures and praises, or deprivation of rank and marks of distinction and public grants ; thus, for instance, the being grateful to a benefactor, and the repaying with kindness one who has been kind to yourself, and the having an inclination to aid one's friends, and whatever other duties are of this kind : the other class, are the supplement⁷ of the peculiar and written law of states ; for the equitable should seem to be somewhat just. And equity is that idea of justice, which contravenes the written law.⁸ And this con-

The unwritten law is twofold ; 12. i. καθ' ὑπερβολὴν ἀρετῆς καὶ κακίας.

ii. τὸ τοῦ ἰδίου καὶ γυγραμμένου ἑλευμενα, or equity. 13.

⁷ ἘΠΙΔΙΟΡΡΟΙΑ νόμον, ἣ ἀλλοίπει διὰ τὸ καθόλου. *Ethics*, v. 10. "The correction of that, wherein the law (by reason of its universality) is deficient." Grotius de *Æquitate*, § 3.

⁸ We see in contracts, and other dealings which daily pass

tradition happens, partly indeed *against* the will, and partly *with* the will of the legislator: it then happens against his will, when the question may have escaped his notice; but, with his will, whenever he has it not in his power accurately to make distinction, but it is necessary that he pronounce universally, though the case be not so absolutely without exceptions, but *generally* only. Thus also in respect to all cases about which, by reason of their infinitude, it is not easy to make distinctions; such, with regard to wounding with steel, are the distinctions as to the size and nature of the instrument, for an age would

14. fail one in the enumeration. Be it then that the case admits not such distinctions, yet if one must needs enact a law respecting it, he cannot do otherwise than speak in *general* terms⁹; so that one who has so much as a ring on his finger, and lifts up his hand and strikes you, does by the *letter* of the written law stand guilty, and acts unjustly; but in *real truth* he does not act unjustly¹⁰; and this is the equity of the

between man and man, that, to the utter undoing of some, many things by strictness of law may be done, which EQUITY and HONEST MEANING forbiddeth. *Not that the LAW is unjust, but imperfect*; nor equity *against*, but *above* the law, *binding men's consciences in things which the law cannot reach unto*.

Will any man say that the virtue of private equity is opposite and repugnant to that law, *the silence whereof it supplieth* in all such private dealing? No more is public equity against the law of public affairs; albeit, the one permit unto some, in *special considerations*, that which the other, *agreeably with general rules* of justice, doth in *general sort* forbid. For, sith all good laws are the voices of right reason, which is the instrument wherewith God will have the world guided, and impossible it is that right should withstand right; it must follow that principles and rules of justice, be they never so generally uttered, do no less effectually intend, than if they did plainly express, *an exception of all particulars, wherein their literal practice might any way prejudice equity*. Hooker, b. v. § 9, p. 35.

⁹ Αἴτιον δ', ὅτι ὁ μὲν νόμος καθόλου πᾶς· περὶ ἐνίων δὲ οὐχ οἷον τὶ ὀρθῶς εἰπεῖν καθόλου. Arist. Ethics, v. 10. Compare the whole chapter with what is said above.

¹⁰ Not without singular wisdom, therefore, it hath been provided, that as the *ordinary* course of common affairs is disposed of by *general* laws, so likewise men's *rarer incident* necessities and utilities should be with *special equity* considered. Hooker, b. v. c. 9, p. 35.

case. Now if equity be what it has been stated to be, it will be evident what kind of things are equitable, and what not so; also what kind of persons are not equitable. Since in whatever cases one is bound to have a fellow-feeling, these are all cases of equity. Again, equity is the not esteeming faults and crimes of equal guilt, nor accidents, and faults. Now *accidents* are whatever things happen against all calculation, and proceed not from criminal principle; and *faults* are whatever things do not happen against calculation, nor proceed from criminal principle; but *crimes* are whatever things, not falling out contrary to calculation, proceed from criminal principle; for the things which are done through desire, proceed from criminal principle. Equity also is the having a sympathy for human failings; and the having an eye, not to the *law*, but to the *lawgiver*; and not to the *language*, but to the *intention* of the lawgiver¹¹. And not to the *conduct*, but to the *principles* of the agent; not to his conduct in *one particular*, but to its *whole tenor*. Not what kind of person he has been in this instance, but what he has always shown himself, or generally at least. The having, too, a remembrance of the good one has received, rather than of the ill; of the good one has received, rather than what one has done; though injured, to endure it patiently; to prefer a decision by argument, rather than by recourse to action: a wish to proceed to arbitration, rather than to judicial decision, for the arbitrator looks to what is equitable, the judge to what is law; and in order to this it was that arbitration was introduced, in order, namely, that equity might prevail. So far then for our distinctions on the subject of what is equitable.

15. Equity consists in fellow-feeling.

16.

17. In sympathy.

18. In looking to the motive more than the act.

19. Willingness to arbitrate.

¹¹ Therefore the Bolognian law, mentioned by Puffendorf, which enacted, "that whoever drew blood in the streets should be punished with the utmost severity," was held after long debate not to extend to the surgeon, who opened the vein of a person that fell down in the street with a fit. Blackstone, Comment. Introd. § 2, p. 61. For a variety of such cases, see Rhet. ad Herennium, lib. i. c. ii. etc.

CHAP. XIV.

Of the Degrees of Guilt.

1. Greater offences are those arising from greater principle.

2. Where the penalty is not equivalent.

3. Where the injured party hath wronged himself in consequence.

THOSE acts of injustice are greater in degree, which proceed from the greater principle of injustice¹; and on this account the most trifling are the greatest; as the charge which Callistratus laid against Melenopus, that he had defrauded the builders of the temple in his accounts, to the amount of three half farthings of consecrated property; but in the case of justice, things are more or less *just* in a contrary ratio². Now these criteria arise from the actions virtually exceeding; for he who stole three half farthings of consecrated money would cheat one in any thing. The degree of an act of injustice is decided then, sometimes on *this* principle, at others on that of the *harm done*. Those also are very flagrant, for which no punishment is an equivalent, but of which every one falls short; as also that which there is no means of healing; for such a case is difficult and impracticable: also where the injured party can get no redress in court; for the evil is without cure, because chastisement and a judicial sentence are a cure. If the party suffering, and who was wronged, hath grievously injured himself³; for then the man who did the wrong deserves punishment in a still greater degree; just as Sophocles said when pleading in behalf of Euctemon, who, on being insolently assaulted, slew himself; "that he would price the deed at no

¹ See Gibbon's Decline and Fall, c. 44, at note 188. Measure of Guilt, vol. viii. p. 98.

² So much for the standard of *injustice*; for it is evident that any man who is sufficiently depraved to cheat you for a farthing, would not scruple to do so for a larger sum. But in the contrary habit of the mind, a contrary ratio holds, in the case of conforming to rules of justice—*τὰ ἐλαχίστα, ἐλαχίστα*; for a man may be very honest in minor transactions, who would not scruple to cheat you if a greater temptation were thrown in his way.

³ As in the case of Lucretia; her killing herself was an aggravation of the guilt of Tarquin.

less cost than the sufferer had prized himself at." Crimes, too, of which the present criminal has alone been guilty, or he first, or very few besides. Also the being frequently guilty of the same enormity. Any thing too on account of, which new prohibitory and penal statutes have been sought out, and introduced; as at Argos they punish any one on whose account a law may have been enacted, and those on account of whom the prison was erected. That act of injustice also is greater, which is of a more brutal character. That too which proceeds more immediately from malice aforethought. That too which, as they hear of, people are affected by *dread*, rather than *compassion*. And the rhetorical expedients for exaggeration are as follows;—"he hath swept away or overleaped many principles of justice," as oaths, the plighting of his hand, pledges of fidelity, and marriage contracts; for there is an excess by the ratio of many crimes. And its being on the very spot where criminals receive punishment; which they do who bear false witness; for where would he not be ready to act wrong, if at least he does so even in the judgment hall⁴? Those deeds too on which shame is most especially felt. Also if the party has injured him at whose hands he has been benefited: for he is guilty in more than one way, both in that he does him *wrong*, and in that he did not *good* to him. Also the man who has violated the unwritten principles of right; for it belongs to a man of superior excellence to be just unconstrainedly; now what is of written prescript is done of necessity, but not so what is unwritten. Taking it in another way, it is a feature of aggravation if it be in violation of *written* law; for you may say, the man who is unjust in matters where is room for apprehending punishment, and on which loss attends, surely would be likely to be

4. Where the offending was the first.

5. The more brutal.

6. Those done on the place of punishment.

7. Violation of the unwritten

and written law.

⁴ Among the aggravations of *affrays* by the law of England one is, "Where a respect for the particular place ought to restrain and regulate men's behaviour, more than in common ones; as in the king's court, and the like." Blackstone, b. iv. c. 11, § 5.

unjust in respect of matters on which no loss is consequent. Thus, then, the greater and less degrees of injustice have been treated of.

CHAP. XV.

Respecting Proofs originating independently of Art.

1. ἀτέχνοι
πίστεις. It comes next to the subject just treated of, for me to run over the proofs which are called inartificial; because these are peculiar to judicial oratory¹. And they are *five* in number, viz. laws, witnesses, deeds, torture, oaths.
2. Five in number.
3. i. Laws. First, then, let me speak of *Laws*, in what way an orator, in exhorting or dissuading, and in accusing or defending, is to turn them to his purpose. Because it is plain, that if the written law be opposed to his case, he must avail himself of the universal law, and of topics of equity, as more absolutely just: and he must argue that, really "to act to the best of his judgment²," is to decline an implicit adherence to written prescript: he must insist, moreover, that equity remains for ever, and varies not at any time, neither does the universal law, for this is in conformity to nature; but that the *written* law does frequently vary; whence it was said in the *Antigone*
4. Arguments for the orator to whom the written law is opposed.
- 5.
- 6.

¹ He here apologizes for his violation of the proposed arrangement, in treating of the ἀτέχναι πίστεις, before he has fully despatched the ἐντέχναι. In fact, the former class of πίστεις are so nearly confined to judicial, that their introduction, though a little out of place, as an appendix to the subject of judicial rhetoric, is very appropriate. Not, however, but that πίστεις of this class may be available in deliberative oratory; and indeed Aristotle himself seems to hint as much in using the words προτρέποντα καὶ ἀποτρέποντα (expressions peculiar to deliberation), as well as κατηγοροῦντα καὶ ἀπολογούμενον, § 3.

² The judges were bound by oath, first, to an adherence to the laws, and in cases unrecognised by law, to exercise their best judgment, (γνώμη ἢ ἀρίστη:) this, as Aristotle here observes, left grounds for the appeal of an orator.

of Sophocles ; for she is defending herself because she acted in opposition to the law of Creon, but not in opposition to the universal law³, "for these are not of this or of the next day merely, but ever exist ; their prescript would I, not for the sake of any one, ———." He must insist, also, that justice is something substantially true and expedient, but not so that mere seeming of justice, so that neither is the written law, for it does not the duty of law. And that the judge is, as it were, an assay-master, that he may distinguish between counterfeit and real ideas of justice. And that it is the part of a better man to employ and abide by the unwritten law than the written. He should also observe, if the law which stands in his way be at variance with any approved law, or be itself at variance with itself ; thus sometimes one law directs that whatever men shall have covenanted should be valid ; another forbids that they should covenant any thing contrary to the law. Observe, also, whether it be equivocal, so that you may wrest it to your purpose, and discover to which construction either justice or expediency will best adjust itself ; then let him avail himself of that law. And if the circumstances under which the law was enacted be no longer remaining⁴, but the law itself is remaining, he should endeavour to make this clear, and battle against it on this ground. But should the written law be in favour of his case, the orator then must state that "the best of one's judgment" is inserted, not for the sake of a judge's deciding contrary to the law, but in order that, if he be ignorant of what the law directs, he may not forswear himself. He should insist also, that no one chooses good in the abstract, but what is so to himself ; and that there is no difference between a law not enacted and one not put in force. And he should observe that, in other arts, it advantages not for one to indulge himself in such over-wisdom ; as, for example, in respect of a

³ Already quoted in chap. 13, § 2.

⁴ Vide the arguments adduced in favour of Catholic emancipation.

12. Arguments for him on whose side is the written law.

physician ; for there the errors of his physician do not so greatly hurt a man, as the habituating himself to disobey him who has the direction of his health. And that the seeking to be wiser than the law, is the very thing which in well-approved laws is prohibited. And on the subject of *laws* let such be our distinctions.

13. 2nd.
On witnesses,
which
are twofold.

i. παλαί-
οι.

ii. πρόσφατοι.

14. Witnesses of the future are soothsayers. Proverbs are witnesses.

But to the subject of *Witnesses*: witnesses are twofold, some ancient, others modern⁵, and of these some are partners in the risk, others are uninvolved in it. I mean by *ancient* witnesses, both poets and all other illustrious persons whose decisions are open to the world ; as, for example, the Athenians employed Homer as their witness in the matter of Salamis ; and the people of Tenedos but recently employed Periander the Corinthian, against the people of Sigæum ; Cleophon, also, employed the Elegies of Solon against Critias, saying, that the family of old time was a dissolute one, for Solon would never otherwise have said, "Go, bid my Critias, with his yellow locks, to listen to his father." Such, then, are the witnesses on the subject of the past. But, respecting the future, we have also soothsayers ; thus Themistocles insisted that they were to engage by sea, alleging the expression the wooden wall⁶. Moreover, proverbs also are testimonies, according to what has been stated above⁷ ; as, if one were going to advise another not to make an old man his friend, the proverb testifies to that point, "Never benefit an old man ;" also as to the taking off the children whose parents one has slain, "Foolish is he who having slain the father shall

⁵ Πρόσφατοι seems to imply vivâ voce witnesses, those from whom oral testimony may be gained, and perhaps for that reason applied to signify modern in general.

⁶ See Herodotus, Polymnia, 143.

⁷ That is, according to his declaration that any known decisions of illustrious persons might be of service in proof. Now proverbs have the advantage of being universally known, and are acquiesced in by all as the decisions of men of prudence at least. Vater explains the passage differently : vid. Animadv.

leave the son behind⁸." Modern witnesses are all those people of note who have passed an opinion on any point; for these their opinions are useful to those who are debating on the same questions; as Eubulus, for instance, in the trial against Chares, availed himself of that saying of Plato, in reference to Archibius, that "the avowal of being wicked has gained ground in the city." Also those who participate the risk, should they appear to falsify. Witnesses, however, of this class, prove merely such points as these; whether the fact has or has not taken place; whether it be in existence or not; but as to the further question of its *character*, they are not at all witnesses; on the questions, for instance, whether a thing be just or unjust, expedient or prejudicial. But witnesses who are at a distance⁹ are very credible, even touching questions of this nature. But ancient witnesses are of supreme credibility¹⁰, because they are beyond the reach of corruption. But in reference to testimony the following may be adduced as confirmations of proof, by the orator, namely, who has no witnesses: it should be insisted that the judge ought to decide from probabilities, and that this is the spirit of his oath, "to the best of his judgment." Let him also say that it is impossible to lead probability astray on the score of money; and that probability never is detected bearing false testimony. But it must be urged by him who *has* witnesses, against him who has them not, that neither is probability amenable to trial; and that there would be no need at all of offering testimony, if it were enough to consider matters on the ground of reasonings only. And testimony is partly

15. Modern witnesses partake of the risk,

16. and only testify to the fact.

17. Most ancient and most credible.

Arguments for him who has no witnesses:

and for him who has.

18. Testimony is

⁸ Vid. Herodot. i. 155. Cyrus is apprehensive of constant annoyance if he should not enslave the Lydians:—*ομοίως γὰρ μοι νῦν γε φαίνομαι πεποιηκέναι, ὥς εἰ τις πατέρα ἀποκτείναι, τῶν παίδων αὐτοῦ φείσεται.*

⁹ By the *οἱ ἀπὸθεν* he should seem to imply both *οἱ παλαιοί*, and *οἱ ἐκτὸς πρόσφατοι*: the first removed by time, the last by their being unconcerned in the present question, which may be considered in one sense as a distance in point of interest at least.

¹⁰ *Τὸ ἐκ ποδῶν οὐτ' ἀντιπίπτει καὶ τατίμηται ἀφθόνη.* Gregor. Naz. *ἐν Στιχ.* Hooker, vol. ii. p. 26.

either for
one's self
or the ad-
versary.

- in reference to one's self, partly in reference to the adversary ; partly to fact, partly to moral character. Insomuch that it is plain that we can never be at a loss for testimony to suit our purpose ; for if there be not at hand any such testimony, bearing on the case itself, as is either admitted on our own part, or opposed to our adversary, we still may have enough, bearing on the subject of moral character, with a view either to our own excellence of character, or our adversary's depravity.
19. Whatever else we allege on the subject of witnesses, as to their being friendly, inimical, or indifferent, of good character, or bad, or neither particularly, and whatever other distinctions of this kind there happen to be, must be alleged from the same places out of which we adduce enthymems.
20. But on the subject of *Deeds*, pleading is useful so far as regards enhancing or depreciating their authority, or showing them to be valid, or void ; in showing, if they exist on your own side, that they are deserving credit and valid ; if, however, they be on your adversary's side, in showing the contrary. Now in order to set them out as deserving credit or undeserving it, there is no difference from the process respecting witnesses. For of whatever characters those who have subscribed, or had the custody¹¹ of the deeds, happen to be, of the same authority will the deeds themselves also be. When, however, the deeds are acknowledged to have been made, we must, in case they be on our side, aggrandize their authority ; for a deed is law, private and particular¹². And deeds
- 3rd.
Deeds.
21. To be treated as witnesses. Arguments for him who has them on his side.

¹¹ Thus it is one of the arguments in favour of the validity of the prophecies of our Saviour's coming, that they are contained in books of which the Jews, who are the enemies of Christianity, had the custody. See Horne's Sermon on "The case of the Jews."

¹² Law is essentially distinguished from deeds or private compacts, in that it is a *rule* ; "for a compact is a promise proceeding from us, law is a command directed to us. The language of a compact is, 'I will, or will not, do this ;' that of a law is, 'Thou shalt, or shalt not, do it.' It is true there is an obligation which a compact carries with it, equal in point of conscience to that of a law ; but then the original of the obligation is different. In compacts we ourselves determine

do not make valid the law, but the law makes valid those deeds which are conformable to law. And, in short, the law is itself a sort of deed ; so that whoever casts discredit on, or does away deeds, does away, in fact, with law. Moreover the greater part of the 22. bargains of men, and their voluntary transactions, are carried on by means of deeds : so that if these become invalid, the intercourse of mankind with each other is subverted. And it is easy enough to discover what other topics are adapted to the purpose. But should the deeds be *opposed* to you, and on the side of your adversary, these arguments will be to your purpose : —first, those with which one would contend against a law which made against him ; for it is absurd if we think we are not bound to obey the laws, unless well enacted, and if the legislators have been guilty of mistaking their point, but yet hold it necessary to abide by mere deeds. Next to argue that the judge is an 24. arbiter of what is just, that he ought therefore to regard, not the matter of the deed, but something partaking more of justice. And that it is not possible to alter what is just, either by fraud or force ; for it has an existence in the nature of things¹³ : deeds, how- 25. ever, are made both by persons who are imposed on, and those who are compelled to make them. Observe, moreover, whether it be in opposition to any written law, or any universal principle of right, and to the principles of justice and honour ; whether again it be opposed to other later or earlier deeds ; for either the later are valid, and the earlier invalid ; or the earlier are correct, and the later have been obtained by stratagem ; urging whichever of these cases may happen to suit the purpose. Have an eye moreover to the matter of expediency, whether the deed stand in any respect in the way of the judges, and every other such consideration, for these may also be easily discovered.

23. Arguments for him who has them not on his side.

and promise what shall be done, before we are obliged to do it ; in laws we are obliged to act without ourselves determining or promising any thing at all." Blackstone, Comment. Introd. § 2, p. 45

¹³ Vid. Ethica.

26. 4th. Torture a kind of evidence. When on our side. When against us.

Torture is a kind of evidence, and appears to carry with it absolute credibility, because a kind of constraint is applied. Now, it is not at all difficult respecting this to discern those considerations which the cause admits of, and to set them forth; out of which, should the torture be on our side, it is possible to enhance its value, by insisting that of all evidence this alone is true. Should it be, however, opposed to us, and on the side of our adversary, one may do away with the very truth, by declaiming against every sort of torture; for that men, when constrained, speak falsehood no less than truth, and will persist in not speaking the truth; and will easily falsify, as being likely the sooner to get off:¹⁴ and one ought to have it in his power to allege, over and above all these considerations, some actual instances, which the judges are acquainted with, besides topics such as I have described.

27. 5th. Oaths; a four-fold division made.

On the subject of *oaths* we may make a four-fold division; for a party either tenders an oath, and accepts it; or he does neither; or he does the one, and not the other; that is, he either tenders, but does not accept it; or accepts, but does not tender it.¹⁵

i. Moreover, it may happen in a different way from this
 ii. still, supposing the oath to have been previously
 iii. taken by this or that party.
 iv.

28. i. When the orator refuses to tender the oath.

1. Now, an advocate does *not tender* an oath on the ground that men easily forswear themselves; and because the other party will take it, and never repay; but that he is of opinion that the judges, if his ad-

¹⁴ The Pandects (lib. xlviii. tit. xviii.) contain the sentiments of the most eminent civilians on the subject of torture. They confine it to slaves; and Ulpian acknowledges, that "Res est fragilis, et periculosa, et quæ veritatem fallit."

¹⁵ However strangely this wrangling for the administration of oaths may sound, at the present day, when they are uniformly insisted on, yet in the early periods of our own history the evidence for accused persons against the king could not be examined on oath,—nor till the reign of Anne could any one accused of felony produce witnesses on oath. Edin. Review, No. lxxxix. Art. 3, p. 79, 80. It was not till so late as the reign of Anne, that the English courts were authorized to administer an oath to persons called by a prisoner on his defence.

versary does not take the oath, will give a verdict against him: that he esteems the risk which depends on the judges the preferable one, for in them he reposes confidence, but in his adversary, none.

2. But an advocate *declines accepting* it on the ground of its being an oath for a pecuniary object; and because, if he were a worthless fellow, he would forswear himself without more ado; since it were better surely to be a villain for some object, rather than for none; for if he but take the oath, he will gain his cause, if he decline taking it, he will not. Thus, then, his not taking it will be from virtuous motives, not from fear of forswearing himself; here, too, the saying of Xenophanes is in point, viz. that this sort of appeal, made by an impious man to a pious, is not fair, but is just such an one, as if a robust fellow were to challenge an infirm man, either to strike him, or to get beaten himself.

3. If, however, he *accepts* it, the advocate alleges that he feels confidence in himself, but none in his adversary. Let him also declare, inverting the saying of Xenophanes, that it is fair enough if the impious man tenders the oath, and the pious man takes it; also, that it is surely a strange thing that a man should be unwilling *himself* to take an oath, in a question about which he calls on the judges to give their verdict on oath.

4. If, however, he *tenders* the oath, let him insist that a willingness to intrust the question to the gods is a matter of piety; and that his adversary need call on no other judges, since he throws the decision of the case into his own hands; and that an unwillingness to take an oath, in a question about which he calls upon other people to swear, is absurd.

Now, as it is thus plain how we are to speak in reference to each [of the four *simple* cases], it will also be plain how we are to speak when taking them conjointly; supposing, for instance, either that yourself are willing to *take* the oath, but *not* to *tender* it; or, if you *tender* it, but are *not willing* to *take* it; or if you are inclined *both* to *take* it *and* to *tender* it;

29.

or to do *neither*; for these cases must be made up of those above mentioned, so that our reasonings must also be made up of those above stated.

Argu-
ments if
any pre-
vious oath
has been
taken.

33. Per-
jury.

But if a former oath, and that contradictory of your present, has been taken by yourself, you have to make out that it is not *perjury*; for injustice is essentially *voluntary*, and perjury is injustice; but that which is done under constraint, or deceit, is *involuntary*, [and therefore not unjust.] Here then we may introduce the saying about perjury, viz. "that it is a thing not of the tongue, but of the mind." If, however, an oath of this description shall have been taken by your adversary, declare, "that he who abides not by what he has sworn to, subverts every thing which is established; for this is the reason that judges administer the law only on oath:" exclaim, too, "that these men are calling on you, judges, to abide by those oaths, by virtue of taking which you give your verdict; and do they not themselves abide by them?" And whatever else one may allege in way of amplification. So much, then, for the subject of proof not originated by art.

BOOK II.

CHAP. I.

The necessity of investing the Judge with a favourable feeling.

THE materials, then, from which we must exhort and dissuade, praise and blame, accuse and defend, the notions also and propositions, useful in order to render these points credible, are those [which we have discussed]: for respecting these questions, and out of these sources, are enthymems deduced, so that an orator, thus provided, may speak on each separate department of questions. But as rhetoric has in view the coming to a decision (for in deliberative oratory, the *assembly* arrive at decisions; and the sentence of a *court of justice* is *ipso facto* a decision); it is necessary to look not only to your speech, in what way that will be of a character to convince and persuade, but also to invest yourself with a certain kind of character, and the judge with a certain kind of feeling. For it is a point of great consequence, particularly in deliberative¹ cases; and, next to these, in judicial; as well that the speaker seem to be a man of a certain character, as that his audience conceive him to be of a certain disposition toward themselves; moreover it is of consequence if your audience chance to be themselves also disposed in a certain way.

¹ Those subjects about which deliberative oratory is concerned, least of all admit any thing like absolute certainty, for we can only form conjectures of what will be from what has been; and Aristotle has already told us, "that men lend a readier and more implicit belief to the good on all questions whatsoever; but on those whose nature precludes our arriving at certainty, but compels us to remain in doubt, we rely *entirely* on them." Book i. chap. ii. § 4.

1. Discussion of the
πίστις ἐν
τῷ ἡθελί
τοῦ λή-
γοντος.

4. Now, as to a speaker's appearing to be *himself* of a certain character, this point is more available in deliberations: but the disposing the *auditor* in a certain way, in judicial cases; for things do not show themselves in the same light to persons affected by love and by hatred, nor to those under emotions of anger, as to those who are disposed to placability; but they appear either utterly different in character, or at least different in degree. For to a judge who is affected by love toward the party respecting whom he pronounces his decision, that party appears either not at all to be unjust, or to be so in a very trivial degree. To a judge, however, who is affected by hatred, the case has a contrary appearance. So also to a person who is eager and sanguine, the proposed object, if pleasant, takes the appearance, as well of being likely to accrue, as of being likely to prove really a good; while by one who is indifferent and reluctant, the opposite view is taken.

5. Three
requisites
for the
orator's
gaining
belief.

i. φρόνη-
σις.

ii. ἀρετή.

iii. εὐνοία.

6.

7. The

Now, there are three causes of a speaker's deserving belief; for so many in number are the qualities on account of which we lend our credit, independently of proof adduced; and these are prudence, moral excellence, and the having our interests at heart²; (for men are fallacious in what they allege or advise by reason, either of all, or some, of these causes; for either, from want of ability, they do not rightly apprehend the question; or, rightly apprehending it, from their depravity, they do not tell you what they think; or, being men both of ability and moral excellence, they have not your interests at heart, on which account it is possible they should not give you the best advice, though fully known what is best;) and besides these there is no other: it follows therefore, of course, that the speaker who appears to possess *all* these qualities, is considered by his audience as deserving credit³. Now the means by which men

² See Pericles's defence of himself, Thucyd. ii. 60; and above, book i. chap. viii. § 6.

³ A celebrated scholar of the present day, after having described the eloquence of Mr. Fox, as remarkably characterized

may appear virtuous and prudent, are to be derived from what has been laid down on the subject of the virtues; for it is by help of the very same things, that an orator may invest himself, and any one else, in a certain character. The subject of feeling an interest, and of friendliness, must be discussed in my treatise of the passions, commencing henceforth. Passions⁴ however are, all emotions whatsoever, on which pain and pleasure are consequent, by whose operation, undergoing a change, men differ in respect to their decisions: for instance, anger, pity, fear, and whatever other emotions are of such a nature, and those opposed to them. But it will be fitting to divide what I have to say, respecting each, into three considerations; to consider, respecting anger, for example, how those who are susceptible of anger are affected; with whom they usually are angry; and on what occasions. For, granted that we be in possession of one, or even two of these points, and not of them all, it will be impossible for us to kindle anger in the breast; and in the case of the rest of the passions in a similar way. In the same way, then, as on the subjects treated of above I have separately drawn up the several propositions, so let me do in respect of these also, and make my distinctions according to the manner specified.

two first discussed before.

8. The latter to be known by the emotions, which must therefore be considered.

9. The discussion is divided into three heads in every instance.

iii.

CHAP. II.

Persons against whom Anger is felt, and by whom, and why.

LET anger be defined¹ to be "a desire accompanied by pain of a revenge which presents itself, on ac-

1. Anger defined.

by *πρότις ἡθικῇ*, proceeds thus—"Hac de causa, quos audienti mihi motus adhibere voluit, illi semper in animo oratoris impressi et iniusti esse videbantur." Parr's Pref. to Bellenden, p. 12, edit. 1787.

⁴ The definition, given more briefly in the Ethics, is "οἷς ἔστιν ἡδονὴ ἢ λύπη." Eth. Nich. ii. 5.

¹ Ὁμοίως ἀντιληπόμενον. Eth. Nich.

2. Anger is felt against the individual, not the species.

Is attended with pleasure.

count of an apparent slight from persons acting toward one's self, or some of one's friends, unbecomingly." Now, if anger be this, it must be that he who is affected by anger, is so affected invariably towards some *individual* (for instance, towards Cleon), but not towards *mankind*², generally: and this, because the individual has already wrought some indignity, either on himself or some of his friends, or intends doing so. It must be also that there is a sort of pleasure consequent on all anger, arising out of the hope of avenging one's self³; for the idea of attaining what one desires is pleasant; and no one is desirous of objects which appear impracticable to him; and he who is under the affection of anger is desirous of objects which appear practicable to him. Wherefore it has been happily remarked of anger, that it is,

"Far, far too dear to every mortal breast,
Sweet to the soul, as honey to the taste⁴."

3. We feel anger on account of a supposed slight.

Three species of *ὀλιγωρία*.
i. *καταφρόνησις*.
ii. *ἐπιήρησμός*.
iii. *ὑβρις*.

Because a sort of pleasure is consequent on it, as well on this account, as because men linger in thought on compassing revenge. Now the phantasy which then arises excites a pleasure within us, as do the phantasies of dreams. But as a slight is the operation of an opinion conceived of an object which appears not worth consideration (for we esteem things absolutely bad, and those which are good, and what conduces to them, to be worth some consideration; that however which is mere nothing, or absolutely trivial, we conceive worth none). There are three species of slight, contempt, vexatiousness, and contumely: for he who manifests contempt is guilty of a slight, since men condemn whatever they think worth nothing, and what is worth nothing, they slight. Again, he who is vexatious appears to condemn, for *vexatiousness* is a thwarting another's wishes, not that any thing may accrue to the person himself who so impedes, but in

² Compare lib. i. c. xi. § 9, οὐδεὶς γὰρ ὀργίζεται τῷ ἀνθρώπῳ, κ. τ. λ.

³ Compare book i. chap. xi. § 13; and also book i. chap. x. § 17. This is expressed in the Ethics, lib. iii. c. viii. Καὶ οἱ ἀνθρώποι δὴ ὀργίζονται μὲν ἀλγοῦσι, τιμωρούμενοι δ' ἡδονῇ.

⁴ Pope's translation of Homer.

order that something may not accrue to that other. Since, then, he slights not with a view to any advantage to himself, it is plain that he conceives you can neither hurt him, (for, if he did, he would be afraid, and would not be guilty of slight,) nor can benefit him in any respect worth mentioning, since he would otherwise hold you in consideration, in order to become your friend.⁵ He, too, who acts *contumeliously* manifests slight; for *contumely* is the doing and saying those things about which the person who is the subject of this treatment, has feelings of delicacy, not with a view that any thing should accrue to himself, other than what arises to him in the act, but in order that he may be gratified; for they who requite an injury, do not act contumeliously, but take revenge. Now the cause of the pleasure felt by those 6. who act contumeliously, is that, by injuring, they conceive themselves to be more decidedly superior: on which account young men and the rich are given to contumely, for in manifesting the contumely, they conceive themselves superior. To contumely belongs the withholding of respect; but he who withholds respect, manifests slight; for that which is of no value, is held in no consideration, either good or bad. On which principle Achilles, in his anger, says, "He hath withheld from me respect, for he hath seized and possesses my prize himself, having taken it from me." And again, "Like some unregarded vagabond;" as though he were, on this account, affected by anger. Now people think it becoming that they 7. should be looked up to by their inferiors, whether in birth, power, or moral excellence, or generally speaking, in whatever respect one may happen to be

⁵ It is an essential feature of vexatiousness, and in fact of every species of slight, that there is a total absence of any selfish motive on the part of him who offers it; the appearance of any such motive having actuated him, would be a salvo to the pride of him who is made the subject of such treatment; but to be exposed to an opinion that one is utterly beneath consideration (*δόξα πρὸς τὸ μηδενὸς ἄξιον φαινόμενον*), is a reflection to which no person, actuated by the common feelings of our nature, ever can submit.

much superior: thus the rich man thinks to be looked up to by the poor, in regard to money; also the man who has a faculty of speaking, by him who is destitute of it, in the case of speaking; and he who thinks himself worthy to bear office, by him who deserves to be subject to rule. Whence it has been said,

"Beware! for dreadful is the wrath of kings:"

and in another place,

"'Tis sure the mighty will revenge at last:"

for they feel indignant by reason of their superiority.

8. Moreover [men think it becoming that they should be looked up to] by those at whose hands they think they ought to receive good; and these are such as they have benefited, or continue to benefit, whether in their own persons, or as instruments of any one, and whom any of their relatives have benefited, or wish, or did wish to benefit.

9. With what feelings, and how situated, men are angry.

1. From hence it is by this time manifest both under what affections as regards themselves, and with what objects, and for what reasons, men feel anger. For as regards themselves, it is when they happen to be aggrieved, since he who is aggrieved is anxious for something. Now a man [will feel thus aggrieved], as well on any person's clashing with him in regard to any object, *directly*; when he is thirsty, for example, in regard to drinking: as also should they *not directly* clash, yet will he appear to do the same thing; and if a person thwarts, or does not co-operate with one, and if a person annoys one in any respect, when thus circumstanced, one feels anger against all these.
10. On which account people who are ill, in poverty, love, thirst, in a word, who are under desire, and fail of success, these all are fretful and irritable, and particularly with those who slight their present condition: the sick man, for example, is annoyed by those who slight him in regard to his disease: the poor man too, with those who do so in regard to his poverty; and the warrior, in regard to war; the lover, in regard to love; and in other cases similarly, for each one has the way paved to the feeling anger in each case, by

the passion which exists in his mind. Again, a man 11. is nettled should he happen to be expecting the very opposite of what results; for that pains one more deeply which falls out very unexpectedly; just in the same ratio as that which is very unexpected delights, should it be what one wishes for. On which account seasons, times, dispositions, and ages, which class of them are readily excited to anger, and when, and how, will be plain from this which I have said; also it will be plain that they are then excited with greater readiness, when more immediately influenced by these circumstances. As then regards the persons themselves, under these dispositions it is that they are readily excited to anger.

2. But people feel anger towards those who laugh 12. To-
at them excessively, and gibe, and scoff at them, for wards
these treat them with contumely; with such also as whom
hurt them in all particulars, of such a nature as are men feel
tokens of contumely: these of course must be such as anger.
neither are in requital for any thing, or beneficial to
those who are the agents⁶; for this is enough to make
it appear to be an act solely of contumely: towards 13.
those also who underrate and despise what themselves
take a warm interest in; thus all those who are fond
of philosophy, are angry if any one undervalues phi-
losophy; so, too, they who embrace the notion of an
universal idea⁷, are nettled if a person despises the
doctrine; and as regards other things in a similar
manner. But all this will be felt much more keenly, 14.
if these persons suspect that the qualities so under-
rated do not really belong to them, or not completely,
or not firmly, or that they do not *appear* to belong to
them; since, if they conceive themselves to be very
strong in the points on which they happen to be ral-
lied, they do not regard it⁸, and anger is felt to-

⁶ Here also Aristotle maintains the absolute exclusion of any thing like self-interest as characteristic of this species of *δολογία*. See note on the last chapter.

⁷ Alluding to Plato's doctrine of ideas, which Aristotle himself so warmly controverted. See *Eth. Nich.* i. 6.

⁸ See chap. iv. § 14, where he says, we are fond of those who praise us on points where we esteem ourselves weak.

- wards friends, in a greater degree than towards such
15. as are not friends ; because people conceive it to be more fitting to receive good at their hands than not
 16. also towards those who have been in the habit of honouring or bestowing consideration on them, if on the contrary, they do not keep on the same terms with them ; because people conceive themselves despised by them, for otherwise they would do as before.
 17. Towards those also who do not requite a kindness, or who do not return an equivalent, towards those also who thwart them, if they be inferiors ; for these all appear to despise them, the latter as though they were their inferiors, the former as though [the kindness had been received] from inferiors.
 18. Men feel it also in a greater degree towards persons of account, should they slight them ; for anger is supposed to arise from a slight, and to exist towards persons whose conduct misbecame them ; now it becomes inferiors to make no manifestation of slight.
 19. Towards friends, anger is felt if they do not or speak not well ; and still more so if they do the contrary also if they should not perceive us to be in want, just as the Plexippus⁹ of Antipho was angry with Meleager ; for not to perceive this is a token of slight, since in regard to those for whom we have deference, this does not escape our notice : towards those also it is felt who exult in their misfortune, and, in a word, towards such as are in good spirits amid their misfortunes ; for this marks either a man or one who manifests slight : towards those also who do not care if they give us pain ; wherefore, men feel anger towards those who announce evil tidings.
 20. Against those also is anger felt who either refuse to listen to, or scrutinize our failings ; for they resemble persons who slight us, or who are our enemies ; so that a friend sympathizes with one, and all men, as they feel that peculiar failings are scrutinized, feel pain.
 21. Men
 22. To-

⁹ Plexippus was a brother of Althæa, Meleager's mother, and a character in a play of Antipho's, now lost.

Hath but a losing office. Shakspeare.

over men feel anger towards those who slight them in the presence of five descriptions of persons, viz. in the presence of those whom they emulate, whom they admire, by whom they are desirous of being admired, in whose presence they are alive to delicacy of feeling, and before those who have a delicacy of feeling towards them; if before these any one should slight them, they feel anger more sensibly: with those also do men feel angry who slight them in such respects, as it is disgraceful for them not to stand up in defence of; in regard to parents, for instance, or children, wives, or persons in subjection: with those, too, who make no return of favours; for the slight then is contrary to what is becoming: and with those who play off sarcasms upon them when seriously engaged; for sarcasm has an air of contempt: also with those who benefit others, if they do not also benefit them; since this also carries an air of contempt, the not thinking them worthy what all are worthy of. Also the letting a man escape our memory is a thing very apt to provoke anger; for example, the nearly forgetting even his name, since forgetfulness seems to be an indication of slight; because forgetfulness arises from disregard, and disregard is a kind of slight. Now, it has been told you against whom men feel anger, and under what dispositions, and why¹¹. It evidently will be needful for an orator to work up his audience by his speech, into such a frame of mind as that under which men are prone to anger, and his adversary, too, as being obnoxious to that on account of which men feel anger, and as being such an one as people feel anger against.

wards those who slight them before persons of five descriptions.
i. Whom they emulate.
ii. Whom they admire.
iii. By whom they wish to be admired.
iv. Before whom they are sensible of delicate feelings.
v. Before those who have a delicacy of feeling towards them.

CHAP. III.

The Persons susceptible of Placability, also those towards whom, and the occasions on which it is felt.

1. As the feeling anger is the opposite of being appeased, and anger itself of placability, we must ascertain with what dispositions men are placable, towards whom they are thus affected, and by what means they are appeased. Let placability, then, be defined to be "a subsiding and appeasement of anger¹."
2. Placability defined.
3. Towards whom men are placable.
4. Now, if men feel anger towards those who slight them, and if slight be voluntary, it is plain that they are placable in regard to those who do no such thing or who either do so, or appear to do so, involuntarily towards those also who wish the contrary of what they do; and those who behave in the same way toward themselves also, for no one seems likely himself to be guilty of slight towards himself. Men are thus disposed also towards such as acknowledge and repent of their guilt; for taking their feeling of pain for what they have done as a punishment they are appeased:—there is proof of this in the case of chastising servants; for we chastise more violently those who contradict us, and deny their guilt but towards such as acknowledge themselves to be justly punished, we cease from our wrath²; the reason of which is, that the denial of what is evident is a sort of impudence, and impudence is slight and contempt: therefore we are not alive to sense shame, in regard to those whom we despise very much. Men are thus disposed also towards those who humble themselves before them³, and do not
5. The repentant.
6. The humble.

¹ This passion, different from all the others, supposes previous existence of another in the mind, the emotions which it may be said to allay more properly, than to be its an emotion. Rochefoucault, Maxim 328.

² "A soft answer turneth away wrath."

³ See the instance of Ahab's humiliation of himself, (1 Ki xxi. 27,) and that of the Ninevites, (Jonah iii. 5, etc.,) which we may add David.

contradict their imputations ; for they appear to acknowledge themselves inferior ; but inferiors fear us, and no one who fears is guilty of slight. But the fact that anger ceases towards such as humble themselves, even dogs evince by their not biting those who sit as suppliants. Placability is also felt towards such as are earnestly attentive, where they are themselves attentive ; for they think themselves regarded with attention, and not despised : towards such as [*subsequently* to their manifesting slight] 7. Those who are attentive to us. 8. have gratified us in more important points, and with those who implore us, and deprecate our anger ; for these are more humble : towards those also, who are not given to contumely, nor to jeering one ; and who do not manifest slight towards any one, or towards those alone who are not good men, and not towards such as we ourselves are. In a word, we 10. should consider the subject of placability, from the opposite of the doctrine of anger. Once more, it is felt towards those whom men fear, or have a delicacy toward ; for so long as they are thus affected, they are not influenced by anger ; since it is impossible to feel anger and fear at the same time. Again, 11. Towards the angry. people either do not feel anger at all, or feel it in a less degree, towards those who have themselves acted under the influences of anger ; for these appear to have acted, not from any motive of slight ; for no one who is angry with you slights you ; since slight 12. is unattended by pain, anger, however, is so attended. Thus are they also disposed towards such as regard them with respect.

It is evident, also, that men are placable, when in a frame of mind contrary to the feeling of anger ; thus in amusements, in mirth, in festivity, amid rejoicings, or a course of success and of gratification, or, in a word, when in a state of freedom from pain, and amid chastened pleasure and virtuous hope. Those, too, who have suffered some time to elapse, and are not fresh from the influence of anger ; for time makes anger cease⁴. Also vengeance previously taken on 13. When

⁴ Cleon was aware of this when he exclaimed against a

venge-
ance has
been
taken.

one object allays the anger felt against another, even if he be more violent. For which reason, Philocrates when some one asked him "how it was, as the populace were enraged with him, that he did not make his defence," very justly said, "I will not do it yet."—"But when will you?"—"I will do it, when I see some one else criminated." For people, after they have exhausted their anger on some other object become placable; which happened in the case of Ergophilus; for the populace, though more indignant with him than with Callisthenes, yet acquitted him because, on the day before, they had condemned Ca-

14. listhenes to death. Men are thus disposed if they have convicted the object, and if he have suffered greater ill than they, with all their anger, would have themselves inflicted; for they think they have gotten, as it were, their revenge. Again, if they are aware that they are themselves unjust, and suffer

16. servingly⁵; because anger is not felt at what is just in that case men no longer conceive themselves sufferers contrary to what is becoming; but anger was defined to be such a feeling. On which account we should preface punishment with a sort of lecture for thus even slaves feel less indignant at being punished. Moreover they are thus disposed, if they conceive that the sufferer will not perceive that he is punished by *them*, and in return for what *they* have suffered; for anger is felt against individu-

16. When
the object
is insensi-
ble.

second hearing of the Mitylenæans;—Θαυμάζω μὲν τῶν Χρῆστων διατριβὴν ἐμποιοῦσάντων, ὃ ἐστὶ πρὸς τῶν ἡδικοκώτων μᾶλλον ὅ γὰρ παθὼν τὸ δρᾶσαντι ἀμβλυτέρα τῇ ὀργῇ ἐπεξέρχεται. Thucyd. iii. 38.

Χρόνος γὰρ εὐμαρῆς Σοφ. Soph. Elec. 179.

⁵ Well illustrated in Richard the First's pardon of Bertram de Gourdon, on his death-bed:—"Wretch," said the king, "what have I ever done to you to oblige you to seek my life?"—"What have you done to me?" coolly replied the prisoner, "you killed, with your own hands, my father and my brothers; and you intended to have hanged myself;" Richard, struck with the reasonableness of this reply, humbled by the near approach of death, ordered Gourdon to be set at liberty, and a sum of money to be given to him.

and this is plain from the definition. Hence is it said in the poem with great propriety, "Go, say 'twas Ulysses, subverter of cities," etc.; as though the hero had not been revenged, unless Polyphemus perceived both by whom⁶, and in return for what⁷, he suffered. So that men are not angry with any who are no longer sensible; neither any longer with those who are dead⁸, as being persons who have endured the extremity of suffering; nor with those who will not be susceptible of pain, nor feel the punishment inflicted, a point of which those affected by anger are desirous. On which account the poet, wishing to restrain Achilles from his anger against Hector now that he is dead, aptly says, "In his madness he is vexing a senseless clod." It is evident that arguments must be deduced from the topics here furnished, by those who would appease their audience; by working up the *hearers* themselves into feelings such as I have described; and those with whom they are enraged, either as objects of fear, or as deserving reverence, or as persons who have benefited them, or as having been involuntary agents, or as now exceedingly pained at what they have done.

17. How we are to appease the audience.

⁶ Thus Gloucester, in Henry VI.,

Down, down to hell, and say—I sent thee thither, etc.

⁷ Again, in the *Æneid*, the hero tells Turnus,

Pallas te hoc vulnere, Pallas

Immolat.

⁸ Πᾶσα δαίμνεια τῷ βίῳ τοῦτο στυγερὸν ἔσται. Synes. Quoted in Hooker, v. § 7, vol. ii. p. 26. Compare Byron's tragedy of the Two Foscari, act v. last scene:

BARBARIGO (to Loredano).—What art thou writing,

With such an earnest brow, upon thy tablets?

LOREDANO (pointing to the Doge's body).—That he has paid me.*

* "L'ha pagata." An historical fact; see History of Venice, by P. Dume, p. 411, vol. ii.

CHAP. IV.

The Characters towards whom men entertain friendships, or hatred; and the reasons why.

1. LET us discuss the characters towards whom we bear friendly feelings, and hatred, and the reasons why they do so; setting out with a definition of friendliness and the act of cherishing this feeling.
2. Definition of friendliness. Let the bearing friendly feeling, then, be defined as "the wishing a person what we think good for his sake and not for our own, and, as far as is in our power, the exerting ourselves to procure it." A friend is he who entertains and meets a return feeling.¹ And those people consider themselves friends who consider themselves to stand thus as regards each other.
3. Towards whom we feel it. These considerations being laid down, of necessity it must be, that one who participates in another's good at good fortune, and in his sorrow at what afflicts him, not from any other motive, but simply for his sake, is his friend. For every one, when that which he wishes happens, rejoices; but when the contrary happens, all are grieved. So that the pleasures which men feel are an indication of their virtues.
4. Those, too, are friends, to whom the same thing becomes by this time good, and the same evil; and those, too, who are friends and foes to the same person. These must necessarily desire similar objects: that he who wishes for another what he desires himself, appears to be a friend to that other.
5. Benefactors. We love also those who have benefited either themselves or those for whom they have a regard; whether with important particulars, or with readiness², at their own sakes, or those whom they deem will benefit them.
6. benefit them. Again, people love the friends of their friends, and such as cherish friendly feelings towards them.

¹ Thus the feeling discussed in the Ethics is called *ἀντιπεποιθός*, *μὴ λανθάνουσα*. Eth. Nich. viii. 2.

² *Bis dat, qui cito dat.*

those for whom they do themselves; likewise those who are loved by such as are beloved by themselves; those also who are enemies to the same people, and 7. who hate those whom they hate themselves, and those who are hated by those who also are hated by themselves; for to all these the same objects seem good as to themselves; so that they wish for things which are good to them, both which were laid down to be characteristic of a friend. Moreover men love 8. those who benefit them in regard to money matters, and the security of life; on which account people honour the liberal and brave. They love also the just, of which character they esteem those who do 9. The just. not live at the cost of others, such are all who are supported by their bodily labour, and of these are husbandmen, and among the rest handicraftsmen 10. Husbandmen. They love also the temperate, for they are not unjust; and those who are disengaged from business, for the same reason. We love also 11. those of whom we wish to become the friends, should they appear to desire it also. Of this sort are those who are good in respect to moral excellence, and men of approved character, either among all men, or among the best men, or those who are held in admiration by ourselves, or who themselves admire us. Again, we love those who are pleasant companions 12. Companions, for passing time, or spending a day with; of this description are the good-tempered, and such as are etc. not fond of chiding those who err, and are not quarrelsome or contentious³. For all people of this sort are fond of dispute; but such as are fond of dispute give us the idea of desiring the opposite of

³ The character given by Clarendon of Sir Edward Herbert (afterwards Earl of Montgomery), one of the favourites of James I., seems to answer to Aristotle's description of a person likely to conciliate friendship:—"He pretended to no other qualifications than to understand horses and dogs very well; which his master loved him the better for, (being at his first coming to England very jealous of those who had the reputation of great parts,) and to be believed *honest and generous*, which made him many friends, and left him no enemy." Clarendon's History, vol. i. p. 59.

13. what we do. Also those who have a happy turn passing and taking a joke ; for both seem bent on same things as their neighbours, being able to endure being rallied and neatly rallying others.
14. Men love also those who praise their good qualities and particularly such as they apprehend not to be to them : also those who are neat in their appearance, their dress, and their whole manner of living.
15. Those neat in dress. 16. those who do not reproach them with errors of their own benefits ; for both these descriptions of people have an air of reproving them. People also love also those who forget old grievances ; and who do not treasure up grounds of quarrel, but are easily conciled ; because of whatever disposition they take themselves towards others, people naturally think that they will prove to be of use towards themselves also : as those who do not talk scandal, nor inform them of the faults either of their neighbours or themselves, but of their good points only ; for this is the duty of a good man. We are friendly disposed towards those who are not at cross purposes to us when angry, or seriously engaged ; for all people are fond of dispute : towards those also who comport themselves seriously towards us ; thus, for instance, those who admire us, or consider us worthy of the company of men, and take a pleasure in our society, and who are thus affected in regard particularly to points in which ourselves are desirous to be admired, or to appear excellent or agreeable : as also towards equals, and those who have the same objects in view, supposing they do not clash with us⁶, and that their livelihood arise not from the same profession, for

⁴ See Eth. Nich. iv. 8.

⁵ So long as we are *imitated* at a respectful distance :

Non ita certandi cupidus, quam propter amorem
Quod te imitari aveo : Lucretius, iii

our pride is *flattered* ; but when this imitation has been successfully continued as to resemble *competition*, our error is quickly awakened. To this point Rochefoucault well serves,—“Those who endeavour to *imitate* us we like better than those who endeavour to *equal* us. Imitation is a sign of esteem, but competition of envy.” Maxims, No.

arises an instance of the proverb, "Potter hates potter⁶." We stand thus affected towards those also who are desirous of the same objects with ourselves, and which it is possible for us to participate in as well as them; otherwise the same collision takes place in this case: towards those also, in regard to whom men have themselves in such a way as, while they do not hold them cheap, not to feel shame on mere matters of opinion. With this feeling do people regard those also in respect to whom they feel shame about matters really shameful: and those before whom they are studious to stand approved, and by whom they wish to be emulated, yet without being envied, all these men either love as friends, or wish to become their friends; also those with whom they would co-operate toward some good, were it not that greater ills are likely thereby to befall themselves: and such as regard with friendly feeling, the absent equally with the present; on which account all love those who manifest this disposition in regard to the dead. Also men entirely love those who are particularly zealous for their friends and never abandon them; for eminently beyond all the good, people love those who are good *as friends*. They also love those who do not dissemble towards them; of this class are such as mention their own failings; for it has been said already, that before friends we feel no shame about mere matters of opinion; if, then, he who is so ashamed has not the feelings of a friend, the man who is without such shame bears a resemblance to one who has friendly feelings. Also we love those who do not inspire us with fear, and before whom we feel confidence; for no one loves a person whom he fears⁷. But the species of friendship are companionship, intimacy, relationship, and the like. And the efficient causes of friendship are gratuitous benefits, the rendering a service unsolicited, and the not disclosing it after it has been ren-

dered ; for thus done the favour appears to be for the sake of your friend himself, and from no motive.

30. The subject of hatred, however, and of bearing may, it is plain, be considered by taking the coraries. But the efficient causes of hatred are a vexatiousness, calumny.

and of
hatred.

31. Six
points of
compari-
son be-
tween an-
ger and
hatred.

1. Now anger arises out of something which reference to ourselves ; hatred, however, even independently of any thing having reference to ourselves since if we conceive a person to be of a certain description, we bear hatred towards him. 2. And anger invariably has reference to *individual* objects as to Callias⁸ or Socrates ; but hatred may be even to *whole classes* ; for every one hates the character of a thief and an informer. 3. Again, the feeling is to be remedied by time ; the other is incurable. 4. Also the first is a desire of inflicting ; on its object, the last of doing him deadly *harm* ; the angry man wishes to be felt⁹, to him who bears hatred this matters not ; and all things which pain may be felt ; but what does harm in the highest degree, is least capable of being felt, for instance, justice and folly, for the presence of vice does not all pain [him to whom it is present]. 5. And anger attended by pain, hatred is not ; for he who is affected by anger is pained, but he who is affected

⁸ Callias is attacked by Lucian in his dialogue, entitled *Τιμὸν ἢ Μισάνθρωπος*, where Mercury, taxing Plutus with going to those who deserve riches, says, ' *Ἀριστείδην κατὰ τὴν Ἰππονίκην καὶ Καλλιᾶ προσήεις*. p. 232, Scrip. Græc. ; several times in Aristophanes.

⁹ So chap. iii. § 16. It was remarked that a man who is affected by anger does not consider that he has his revenge unless the object perceive both at whose hands, and in re- for what, he suffers. From this, as from many other distinctive characteristics, ANGER will be confessed to be more generous passion than HATRED. To this purpose Lord Bacon well remarks, that "Some, when they take revenge are desirous the party should know whence it cometh : the more generous ; for the delight seemeth to be not so in doing the hurt, as in making the party repent ; but base crafty cowards are like the arrow that flieth in the darkness." Essays: Of Revenge.

hatred is not. 6. The former, too, had many ills befallen the object of his anger, might be inclined to pity him; the latter would not, in any case; for the former wishes the object of his anger to suffer in his turn, the latter desires the extinction of the object of his hate¹⁰. Out of these heads, then, it is plain that the orator may both prove those to be friends and enemies who really are such, and render such those who are not, and may do away the assertions of people on the subject, and may draw over those who hesitate whether an act was done from motives of anger or hatred, to whatsoever side he may fix on.

32. These heads the orator is to use.

CHAP. V.

The nature of Fear, and the objects which excite it, and the dispositions under which men are afraid.

THE sort of things which men fear, and the persons whom, and under what affections as regards themselves, will thus become plain. Now, let fear be defined to be "A sort of pain or agitation, arising out of an idea that an evil, capable either of destroying or giving pain, is impending on us." People do not fear every evil¹; for example, a man does not fear lest he shall become unjust or stupid; but people fear all those evils whose effect is either a considerable degree of pain, or destruction, and these, provided they be not far removed, but give one the idea of being close at hand, so as to be on the eve of happening²; for they do not fear that which is very far

1. Fear defined.

¹⁰ Quem oderunt, perisse expetunt. Ennius ap. Cic. de Off.

¹ It is essential to that evil which is the object of fear, that it seem qualified to destroy or inflict pain. It must be in fact such an evil as anger would inflict, rather than which hatred would.

² This is the description of evil against which the brave man must arm himself, or, in the language of the Ethics, *ἡς θάνατος ἐπιφέρει πρόγνυα ὄντα*. Eth. Nich. iii. 6.

off: for all know that they shall die; but since event is not near, they pay no attention to it.

2. Objects
which
occasion it.

If then fear be this, it must follow that all things are to be feared which appear to possess power either of destroying, or of hurting, in whose tendency is toward considerable pain. which account even the symptoms of such thing alarming, for the evil appears to be at hand; this in fact is danger, viz. "the approach of

3. Danger.

excites fear." Of this description, however, are the hatred and the anger of those who have it in power to do us any harm³; for it is evident that have both the will and the power, so that they not far from doing it. Also injustice, possesses power; for [it is evident that it does not want inclination to do harm] since it is from settled inclination that the unjust man is unjust. Also insulted viz

justice.

5. Insult-
ed virtue.

invested with power; for it is evident that, inevitably, when it is insulted, it determines on a requital and now it has the power of exacting one.

6. The
fear of our
enemies.

fear also of those who have the power of doing any harm, is itself an object to be dreaded; for one, in such circumstances, will of course be prepared against us.

7. But as men in general are depraved, and may be prevailed on by gain, and are timid amid dangers, is, generally speaking, a fearful thing to be at the disposal of another. So that accomplices in

Accom-
plices.

8. denounce you, or abandon you to trial. Also those who have the power to act unjustly, are always objects of fear to such as may be attacked by injustice, for, in nine cases out of ten, a man when he has power, perpetrates the injustice. Also those who

³ Compare c. 19, § 19. See Dr. Johnson's motives for suppressing some of Savage's remarks on the great: "What the result of Mr. S.'s inquiry, though he was not accustomed to conceal his discoveries, it may not be entirely safe to relate because the persons whose characters he criticised are powerful; AND POWER AND RESENTMENT ARE SELDOM STRANGERS etc. Life of Savage, p. 336.

have been wronged⁴, or who conceive themselves to have been wronged; for they are ever on the watch for an opportunity [of retaliating]. Also those who have wronged others⁵, if possessed of power, are to be feared, from their apprehension of being retaliated on; for cases of this kind were laid down to be such as to excite alarm. Those, too, who are rivals for the same objects, and which it is not possible should accrue to both, for people are ever at variance with those towards whom they stand on this footing. Those who are objects of fear to our superiors, are also objects of fear to ourselves; for much more will they be able to injure us, than our superiors: and for the same reason [we needs must fear those] whom our superiors fear⁶. Men dread those also who have already annihilated persons superior to themselves; and those who have attacked their inferiors; for, either they are *already* deserving fear, or they will become so by being aggrandized in power. And among those who have been wronged, or are enemies, or opponents, it is not the passionate, and those who speak their minds freely, who are to be dreaded; but the mild, the dissembling, and the insidious; for they give us to doubt, whether they be not close upon us, so that they are never clearly known to be too far off to reach us.

The wronged.

9. Rivals.

10.

11.

The mild and dissembling, etc.: more to be feared than the hasty.

⁴ "It is too common for those who have unjustly suffered pain, to inflict it likewise in their turn with the same injustice, and to imagine that they have a right to treat others as they have themselves been treated." Ibid. p. 339.

⁵ If the maxim of Tacitus be true—"Proprium humani ingenii est odire quem læseris;" then surely Aristotle's position, that they are to be feared, will follow as a corollary from it;—

Quem metuunt oderunt,

Quem oderunt, perisse expetunt. Ennius apud Cic. de Offic.

⁶ Victorius, wishing to show that this is not "a distinction without a difference," remarks, that by φοβησθαι, the term used in the former case, we are to understand persons *evidently* possessed of that which all the world knows to be dreadful: whereas, in the latter case, Aristotle alludes to persons, whose power not being quite so manifest, we fear only because we see those people fear it, whose means of resistance are superior to our own.

12. Greatest objects of terror.

Fear and pity closely allied.

13. How those are affected that feel fear.

But all those circumstances which excite fear a still greater tendency to do so, in respect of should a man have committed a mistake, it is not possible for him to recover himself, but which either impracticable altogether, or which cannot be cured by himself, but by his enemies only : as have also which we have no means, or no easy means of averting. So that, to speak generally, all those are to be feared, which, happening or being likely to happen in the case of others, excite compassion. circumstances then of fear, and which men are affected at, those at least of greatest importance, are may say, nearly those which I have enumerated now let me state under what dispositions, as respects themselves, men are susceptible of fear.

Now, if fear be attended by an apprehension of suffering some *destructive* evil, it is plain that of those who consider that they shall not suffer anything, is subject to fear ; and that no one is susceptible to it, in regard to those things which he does not consider that he shall suffer ; nor in regard to persons at whose hands he does not apprehend anything ; nor at a time when he is without apprehensions. It must follow, therefore, that those are subject to fear, who apprehend they shall suffer something, and this in regard to the persons at whose hands, and the things which, and at the times when they so apprehend. But neither are those who and who think themselves to be, in the midst of good fortune, at all apprehensive of suffering anything, (on which account they are contumelious, importunate, and rash ; but it is wealth, strength, number of friends, power, which renders men of temper,) nor those who think that already they have suffered the sum of all that is horrible⁷, and whose feelings have been chilled with respect to what awaits them, just as those who have been already beaten on the rack ; but [in order to the existence of fear there must needs arise some hope of safety, at

⁷ ——— Fuiisset ;
Quem metui moritura ? *Æn.* iv. 603.

which men feel the painful anxiety⁸; and this is a proof of it, that fear makes men deliberate; and yet no one deliberates about that which is utterly hopeless. So that, when it shall better serve our cause 15. that the audience be affected by fear, we must set them off as persons liable to suffer, inasmuch as others of greater power have suffered, and also to show that their equals are or have been exposed to sufferings; and this, at the hands of persons from whom they would not have apprehended it, and such things, and at times when they would not have apprehended it.

But since on the subject of fear, it is plain what it is; and on the subject of things exciting fear, and also with what dispositions men experience it; from this it will be plain both what confidence is, and on what points men are confident, and with what dispositions; for both confidence itself is the opposite of fear, and what inspires it is the opposite of what excites fear; so that it is the hope of things conducive to safety, accompanied by an idea that they are near; and of things to be feared, that they either do not exist, or are at a distance.

But these are circumstances inspiring confidence; 17. Circumstances to have danger afar off, and that in which we may confide, near: also means of recovering from, or of that create averting loss, whether these be numerous, or valua- confidence.

⁸ Thus Seneca;—"Desines timere, si sperare desieris." "I have often thought, that after a man has taken the resolution to kill himself, it is not courage in him to do any thing, however desperate, because he has nothing to fear. When a man, either from fear, or pride, or conscience, or whatever motive, has resolved to kill himself; when once the resolution is taken, he has nothing to fear. He may then go and take the king of Prussia by the nose at the head of his army. He cannot fear the rack who is resolved to kill himself. When Eustace Budgell was walking down to the Thames, determined to drown himself, he might if he pleased, without any apprehension of danger, have turned aside and first set fire to St. James's palace."—Boswell's Johnson, A. D. 1773; Æt. 64. Satan, in his address to the sun, says,—

So farewell hope, and with hope farewell fear,
Farewell remorse; all good to me is lost.

Par. Lost, lib. iv. 108.

ble, or both : again, should we never have been injured, nor have ourselves injured others ; also, have no rival at all ; or should those we have, be void of power ; or, supposing they have power, should they be our friends ; or should they have been our enemies, or have been themselves benefited by us ; or should those, to whom the same things are an advantage as to ourselves, be more numerous than those to whom they are not, or more powerful, or both at once.

18. Persons who feel confidence. The successful.

But, as regards themselves, people feel confidence when thus affected : should they conceive themselves to have been often successful, and this without having suffered ; or should they often have fallen into danger, and have escaped⁹ : for there are two cases in which men become dead to apprehension, either from never having experienced, or from being over-possessed of resources against calamity ; just as, in the case of danger by sea, both those who never have experienced a storm feel confidence as to the result, and those who from their experience possess resources

19. against it. Men feel it also, when the case does not alarm their equals, nor their inferiors, nor those whom they conceive themselves superior ; but when they conceive thus of those whom, either *absolutely* in their own persons, or *virtually* in the persons of their superiors or of their equals, they have overcome. Men again, if they conceive there belong to themselves a greater number and degree, those things in which they have the advantage, men are objects of fear ; and these are, store of wealth, and strength with respect to retainers, and friends, and territory, and warlike preparation, either *all together*, or the

20. The rich, etc.

⁹ It is on this topic that Æneas rests his consolation on his distressed followers.

O socii, (neque enim ignari sumus ante malorum
O passi graviores ; dabit Deus his quoque finem.
Vos et Scyllæam rabiem penitusque sonantes
Adcestis scopulos : vos et Cyclopa saxa
Experti. Æn. i. 198.

I've scaped a bloodier hour than this.

important of them. Also, if they have not wronged The innocent.
 any one, or not many, or not any of such a character
 as men are apprehensive of. And, in a word, if their
 account stands well with heaven, as well in other re-
 spects, as in what regards omens and oracles¹⁰: be-
 cause anger is a thing which inspires confidence;
 and the being free from the commission of injustice,
 while you are wronged yourself, is productive of
 anger; and the deity is supposed to aid such as have
 been wronged. [Once more, people feel confidence]
 when, being the first aggressors, they think they can
 suffer nothing, or shall not, or shall succeed at last.
 And of the subject of what inspires confidence and
 fear, we have spoken.

21.

22. Such as think themselves secure.

CHAP. VI.

*Touching what points men are alive to, or insensible to,
 Delicacy of Feeling; towards whom; and, as regards
 themselves, with what dispositions.*

THE points about which men feel delicate, or are in-
 sensible to such feelings, and towards whom, and
 with what dispositions, will be manifest from what
 follows. Now, let sense of shame be defined to be
 "a kind of pain and agitation about evils present,
 past, or to come, which appear to tend to loss of cha-
 racter." And impudence to be, "a sort of neglect
 and callousness about these points."

1.
2. Definition of shame; of impudence.

Now, if the sensibility defined be actually sensi-
 bility to shame, it must follow that a man is affected
 by it, on the occurrence of evils of a kind which ap-
 pear to be disgraceful, either to himself, or those for

3. The occasions when shame is felt.

¹⁰ Aristotle is here giving us the reasons why the two last-mentioned descriptions of persons are confident: those who never injured any, because it is natural to them to feel anger, which is in itself a source of confidence; and those who are well with heaven, from their reliance on the protection of the gods. The last case is beautifully exemplified in the confidence felt by Nicias in Sicily.

- whom he has a regard: and such are all resu depravity whatsoever; for example, the casting one's shield, or the turning to flight, for this ceeds from cowardice; and the withholding a *def* from a person, for it is the result of injustice.
4. that cohabitation with those with whom we c not, or where, or when we ought not, [is a sour shame;] for it is the result of intemperance: also the deriving gain from paltry, mean, or im ticable sources, as from the poor, for instanc from the dead; whence also the proverb, "*to p even from the dead:*" for it is the result of a s
5. hankering after lucre, and of meanness. It is a source of shame for a person, who has the m not to contribute his aid in money matters, or so in a minor degree; and for one to be assist

proach a person with his obligations to you; for they are all indications of a mean and abject spirit. Again, to talk about one's self, and to be one's own trumpeter; and to assert that to be one's own which belongs to another; for these are indications of arrogance. In the same way, too, in the several other instances of moral depravity, both their results, their indications, and the like attendant circumstances, are all subjects of shame; for they are disgraceful, and make one ashamed. And to the afore-mentioned we may add, the non-participation in those creditable qualities which either every body, or all our equals, or the greatest part of them, partake of. By equals I mean, fellow countrymen, citizens, those of the same age, relations; in a word, those with whom we are on an equality; for [when a thing is so general] the non-participation in it begins to be disgraceful; for instance, the not having been educated², at least in a certain degree, and so in the case of other deficiencies; but the disgrace of all these things becomes much greater, should they appear to be wanting by *our own* fault; for thus, they are more properly the result of depravity should one be himself the cause of what has attached to him, or does now, or is likely so to attach. Again, men are sensible to feelings of shame, when they are suffering, have suffered, or are about to suffer any thing of such a nature, as tends to loss of respect, and disgrace: and these are all services consisting in the lending one's self either personally, or in any shameful action where there is an idea of suffering insult: and whatever administers to intemperance, whether it be voluntary, or not: and submission to violence, if invo-

11. Vanity.

12.

13.

² It was by a somewhat similar consideration that Dr. Johnson refuted the argument of those who opposed the education of the poor on the ground of its raising their ideas above their sphere of life. "If," said he, "a few only are educated, it is a distinction, and those few may be proud; if it be general, it ceases to be a distinction, and, of course, to be a ground of pride. And the contrary will be the result; for instead of its being ground of *pride* that a man has been educated, it will be matter of *shame* if he has not." Boswell's Life.

luntary; for such submission, without deference to one's self, proceeds from an unmanly character, from cowardice. These then, and the like to them, are the things about which men are sensible of shame.

- But as the sense of shame is an idea entertained in the loss of character; and of this loss, in itself alone, without reference to its consequences; and as no one regards the opinion, except for the sake of those who hold it; it must follow that a man is thus sensible of shame in regard to those for whom he has an esteem. But he will have an esteem for those who admire him, whom he does himself admire, and by whom he wishes to be admired, and in regard to whom he feels emulation, and whose opinion he does not hold cheap. Now, people wish to be admired by, and do themselves admire, all those who possess any of the goods which are valued; or from whom they have to be very much in want of getting something, which they have the disposal; for instance, those who are in love. But people have their emulation excited in reference to their equals; and they hold in consideration the prudent³, as being men who adhere to truth; of this description are men of education, such as are advanced in years. Also actions done in the eyes of the world and in public [excite our shame, and hence the proverb, that "Shame dwells in the eyes." On this account, people are more sensible of shame before those with whom they are always liable to be present, and those who fix their attention on them, for both these are instances of being before the eyes of persons:—again, they are sensible of it before those who are not open to charges on the same points; for their sentiments, it is evident, are the opposite of their own: before those also who do not make allowances for such as appear to be faulty; errors which a man commits *himself*, these he is
14. Persons in whose presence men feel shame. Whom they esteem.
- 15.
16. Admire.
17. Their equals.

19. The innocent.

³ Οἱ φρόνιμοι, more properly, *men of the world*. See character Cicero seems to have had in view, according to Cato, when he says, "*qui est versatus in rebus, vel usu, et ætas denique affert, vel auditione et cogitatione, quæ studii diligentia præcurrit ætatem.*" Cic. de Orat. ii. 30.

not to take amiss in his neighbours; so that he evidently will take amiss such as he does *not* commit himself: and before those who are fond of divulging what they know to the world; for whether a man does not think one's conduct faulty, or does not divulge it, makes no difference. But persons likely to divulge [what they know to one's discredit] are such as have been injured, from their being anxiously on the watch to retaliate; and those who are slanderers *generally*; for if they speak ill even of those who are not culpable, much more will they of those who are: as are also those who are on the look-out for the errors of their neighbours, for instance, jesters, and the poets of the old comedy; for these are in some sense slanderers, and fond of divulging. Again, [men are sensible of shame] before those with whom they never met with a repulse; for they are disposed towards them as admirers. On which account men have a sense of shame, even towards those who ask any thing for the first time, as having never yet forfeited their good opinion in any points. And of this description are both those who have *lately* sought to be our friends, for they have observed our excellent qualities; and hence, the reply of Euripides to the Syracusans is a good one⁴; and, of our *old acquaintances*, those who know no ill of us. And men are 21. sensible of shame not only about the things themselves which have been mentioned as delicate points, but even about the indications of them; for instance, not only about licentious conduct, but also about all indications of it; not only in doing what is disgraceful, but even in mentioning it⁵. And in the same 22. way they are sensible of shame, not only before those who have been mentioned, but before those also who

20. Tattlers.

⁴ It appears that Euripides had been sent to Sicily as ambassador, but finding the Syracusans inclined to reject his proposals for a peace, he told them, "that they surely ought to have some respect for a people who held them in such high consideration, particularly as this was their first request."

⁵ Quod factum fœdum est, idem est et dictum turpe.

whose tutors or advisers they have been⁷. And if there be others, their equals, with whom they are at rivalry; for, from a feeling of shame, on account of persons of this description, men both do and leave undone very many things. Again, when people are likely to be seen, and openly to be engaged before those who are privy [to their disgrace], they become in a higher degree susceptible of shame. And hence the poet Antiphon, just as he was going to be beaten on the rack by Dionysius, observing those who were about to be executed with him muffling themselves up as they went through the gate, said, "Why do you muffle yourselves up;—is it lest any of these present should see you to-morrow?"

26. With their equals.

27. When openly disgraced.

Thus much then on the subject of the sense of shame; but of insensibility to it, we shall evidently know enough from the contraries.

CHAP. VII.

Those towards whom people feel Gratitude; on what occasions; and, as regards themselves, with what dispositions.

THE persons towards whom men feel gratitude, and the occasions on which, and with what dispositions on their own part, will be plain to us, after we have defined gratuitous benevolence. Now, let gratuitous

2. Definition of χάρις.

⁷ The Stoics had observed this feeling of carrying our views onward to posthumous glory; and found the love of glory the most difficult of all passions to eradicate:—*διὸ καὶ ἰσχυροτέρως λίγεται τῶν παθῶν χιτῶν ἡ φιλοδοξία, διότι τῶν ἄλλων πολὺ μᾶλλον δι' αὐτὴν ἀποδυσκόμενον αὐτὴ προσίσχεται τῇ ψυχῇ*. Simplicius in Comm. ad Epicteti, cap. 48. Tacitus, in speaking of the great love of fame manifested by Helvidius Priscus, justifies him, by observing that *Etiam sapientibus cupido gloriæ novissima exsultat*. Hist. iv. 6. A mode of expression which strongly brings to our recollection the passage in Milton's

Lycidas,

Fame is the spur that the clear spirit doth raise,
That last infirmity of noble mind. Lycid. 70

benevolence¹ be "that conformably to which, he who has the power is said to confer a benefit on one who needs it, not in return for any thing, nor in order that any thing may accrue to him who so confers it, but that some benefit may arise to the object." But the benefit becomes great should it be conferred on one who is in extreme want², or if the boon be great and difficult of attainment, or at a crisis of a certain description, or if the giver has bestowed it *alone*, or *first*, or in

3. *greater* degree than any other. Wants are however of two kinds: some are necessary, as for instance, our desires of these; such particularly as are attended by pain on failing of their objects; and of this description are our lusts, as for instance, love. Agony, such as arise in the suffering of the body, and in danger; for both the man who is exposed to danger, and who suffers pain, is anxious for something. On what account, those who stand by us in poverty and banishment, should they confer even trifling benefits will yet have gratified us by reason of the greatness of our need, and the circumstances of the time; take for instance the instance of him who gave but a mat [to a beggar].
4. in the Lyceum. It is necessary, then, that our obligations have reference, if possible, by all means to some case of this sort, but if not, to some one of equal or greater need. So that, as it is evident both when and in what cases, an act of free benevolence takes place, and how the parties are affected, it is plain that out of these principles we must get up our speech showing that, as regards the one party, they were exposed to pain, or want of this description, and as regards the other, that in such their want they assisted them by administering some boon of this description.

5. How
the orator
must in-

And it is also evident, by recurring to what topic we may do away the obligation, and make our at-

¹ This chapter presents considerable difficulty from the double meaning of which the word *χάρις* is capable. Schrader's Note, Animadv.

² Hence the value of the aid sent by the Athenians to the Lacedæmonians, when the Helots had possessed themselves of the

ence insensible of grateful feelings³; for either we may urge that they are or were assisting them for their own sakes, and this was supposed not to be free benevolence; or are doing so just because it fell out by chance, or because they were compelled to do so; or that they paid back a debt, but did not bestow a gift, and this as well if the party was conscious of his having been so indebted, as if he was not; because there is in both cases the idea of a *quid pro quo*; so that neither on this view of the case will any gratitude be felt. We should also examine the point under all the predicaments; for free benevolence stands in this, either that that particular thing was given, or in such quantity, or of such a quality, or as to the time when, or the place where, it was given. And we may adduce it as a sign to suit this purpose, if the parties in question have refused a less favour; and if they have conferred on an enemy either the same favour, or an equal one, or a greater; for then it will be evident that they did it not for our sakes. Or, if he wittingly has given something paltry⁴; for no one acknowledges that he stands in need of what is paltry.

And now have my sentiments respecting benevolence, and the want of it, been explained.

³ The ease with which impressions of gratitude might be effaced, appears to have been fully conceived by that French statesman, who said, when he granted a favour, "*J'ai fait dix mécontents, et un ingrat.*"

⁴ Horace sneers at this kind of liberality.

— Quo more pyris vesci Calaber jubet hospes,

Tu me fecisti locupletem.—Vescere sodes.—

Jam satis est.—At tu quantum vis tolle.—Benigne.—

Non invisa feres pueris munuscula parvis.—

Tam teneor dono, quam si dimittar onustus.—

Ut libet: "*hæc porcis hodie comedenda relinquis.*"

CHAP. VIII.

Of Pity.

1. LET us explain the circumstances which excite and the persons whom men pity; and, as regards themselves, with what dispositions. Now let pity be defined to be¹, "a sort of pain occasioned by an object capable of hurting or destroying², appearing to fall on one who does not deserve it, which one does not expect to endure³, or that some one connected with him will; and this when it appears necessary that a person like him should feel pity should be actually such as to deem either in his own person, or of some one connected with him, he may suffer some evil, and that an object of *such a description* as has been stated in the definition, or one similar to it, or nearly equivalent to it." On which account neither do those who are a
2. Definition of pity.
3. Per

¹ *Grief for the calamity of another is PITY; and αἰσέθῃ, the imagination that the like calamity may befall himself; therefore it is called also compassion, and, in the phrase of the present time, a fellow-feeling: and therefore, for calamity arriving from great wickedness the best men have the least pity; and for the same calamity those men hate pity, who think themselves least obnoxious to the same. Hobbes's Leviathan. See Rochefoucault's Maxims, No. 342, where the above is quoted in the note.*

² The evil in the case of pity is of the same character as that which was stated to be the object of fear. In fact, whatever evil befalling another excites *pity*, in one's own case excites *fear*. Vid. chap. v. § 12.

³ It is on this principle that, in the Poetics, describing character best adapted to the purposes of tragedy, and in what sufferings we shall be most likely to take an interest, he excludes an absolutely vicious character;—ἀνταγωνιστάτων τοῦτο ἐστὶ· πάντων οὐδὲν γὰρ ἔχει ὧν δεῖ· οὐτε γὰρ φιλόστοργον, οὐτε ἐλεεινόν, οὐτε φοβερόν ἐστι. And a little afterwards gives the reason of this:—ἐλαστό μιν περὶ τὸν ἀνέξιον φόβον περὶ τὸν ὅμοιον, § 25.

⁴ Perhaps the whole germ of Aristotle's doctrine on this subject may be traced, however briefly expressed, in the celebrated sentence of Terence, "Homo sum; humani nihil a me alienum puto."

lutely lost, feel pity; for these think they shall no longer be exposed to suffering, for their sufferings are past; nor those who esteem themselves excessively happy, but these wax insolent; for evidently, if they esteem every good to be realized to them, they also esteem their lot to be incapable of suffering any evil; since this also enters into the number of goods. But 4. of this description, viz. such as think they may yet suffer evil, are both who already have suffered and escaped⁵; and those advanced in years, as well by reason of their prudence, as of their experience: and the weak; and those who are rather timid; and men of education, for these calculate life's contingencies aright; and those to whom belong parents⁶, or children, or wives, for these attach to one's self, and are liable to suffer the above-mentioned evils. Those do not feel pity who are under the excitements of 6. and do courage, for instance, under anger or confidence; for these feelings little calculate the future: nor do those feel pity who are under insolent dispositions⁷; for these persons also calculate little of suffering any thing: but those who are of the mean temperament between these are susceptible of pity: and those again are not susceptible of it who are vehemently affected by fear; for such as are horror-struck do not feel pity⁸, by reason of its being akin to an evil which comes home to themselves. Also people are suscep- 7. tible of pity, should they esteem some persons to be good; for he who esteems no one to be such⁹, will

sons who
feel pity,

6. and do
not feel
pity.

⁵ So Dido, "Haud ignara mali miseris succurrere disco."

⁶ Exemplified in Priam's appeal to Achilles:

Μῆσαι πατρός σῆο, θεοῖς ἐπεικέλ' Ἀχιλλεῦ,
Τηλίκου, ὅσπερ ἔγωγ, κ. τ. λ. Il. xxiv. 486.

⁷ Sophocles, CEd. Tyr. 873:—ὕβρις φυνταύει τύραννον. With the same view of human nature Aristotle, when he says that persons affected by pleasure are disposed to placability, qualified his expression by the exclusion of wanton insolence:—οἱ ἐν ἡδονῇ μὴ ὕβριστικῇ, καὶ ἐν ἐλπίδι ἐπεικεῖ cap. iii. § 12.

⁸ Lear, Act v. sc. iii.:

This judgment of the heavens, which makes us tremble,
Touches us not with pity.

⁹ Thus the old, from their experience of the depravity of

think every one deserving of evil. And in a way every one, when he is so affected as to call to recollection the fact, that evils of such a chara have befallen either him or his, or to apprehend they may befall either him or his. And now it been stated with what dispositions men feel pity

8. Circumstances which excite pity.

- The circumstances which excite their pity will evident from the definition: for whatever thing the number of those which cause pain and ang have a tendency to destroy, are all such as to c pity: again, every thing whose tendency is a abolition; also all those evils which involve quality of greatness, and of which chance is
9. cause¹⁰. But the evils whose characteristic is g anguish and destruction, are as follows: death saults, personal injuries, and age, and sickness,
 10. want of food. And the evils of which chance is cause, are, absolute want, or fewness of friends, which account even the being torn from friends familiars is a circumstance to be pitied,) ugliness firmity, deformity, and the circumstance that a evil befalls one from a source whence it were be ing for some good to have arisen; and the freq occurrence of a similar thing: and the accessio some good, when one has already passed his su ings; as for example, the gifts of the king were
 11. down to Diopithes after he was dead¹¹; and the either that no good has acerued, or of there bein enjoyment of it when it has arrived. These, t and the like, are the circumstances on accour which men feel pity.

12. Persons to be pitied.

But people are sensible of pity toward their quaintances, if they be not of extremely close nexion, but about such they feel just as they do a themselves when on the eve of suffering: and on

man, are less susceptible of pity than the young, whose in rience judges well of human nature. See chapters xii. and

¹⁰ For chance in a great measure excludes the idea o person's deserving the evil he suffers.

¹¹ In the last act of *The Gamester* there is a fine illustr of this; where Beverley hears of his succession to the inl ance just as he has drunk poison.

account Amasis¹³, as they say, did not shed a tear over his *son* when he was being led to execution, but he did over his *friend* who was asking an alms; for this was a circumstance to call for pity; the other, to excite horror. For horror is distinct from pity, and has a tendency to expel pity from the breast, and is frequently available to produce a contrary effect¹³. Still men feel pity while the evil is yet approaching. And they feel it towards their equals, whether in age, in temper, in habits, in rank, or in family; for in all these relations, the evil is seen with greater clearness as possible to befall also one's self. For we must here also assume generally, that whatever people *fear* in their own case, that they *pity* as happening in the case of others. But as the disasters which excite pity always appear to be close at hand, while, as to those removed at the distance of ten thousand years, men neither in the expectation of them, if *future*, nor in the remembrance of them, if *past*, are sensible of pity at all, or at least not in an equal degree; this being the case, it must follow that those characters which are got up with the aid of gesture, and voice, and dress, and of acting, generally have the greater effect in producing pity¹⁴. For thus, by setting the evil before our eyes, as either

Horror is
distinct
from pity
13.

14.

¹³ Perhaps Aristotle quoted from memory; and it is not improbable that he may have been mistaken as to the person to whom he attributes this conduct, since Herodotus relates the story, not of Amasis, but of his son Psammenitus; who remarks, in perfect accordance with the principles of the philosopher, τὰ μὲν οὐκ ἴδια—μῆζω κακὰ ἢ ὥστε ἀνακλαίειν, Herod. iii. 14. See the conduct of Gelimer, the Vandal king of Africa, who burst into laughter at his interview with Belisarius after the loss of his kingdom and liberty. Gibbon, Dec. and Fall, chap. 41, note 31.

¹⁴ On this principle is founded one of his criteria of excess of criminality, viz. if the recital of its effects produce fear instead of pity;—δ οἱ ἀκούοντες φοβούνται μᾶλλον, ἢ ἐλεοῦσι, μᾶλλον, lib. i. c. xiv. § 5.

¹⁵ Ἐστὶ μὲν οὖν τὸ φοβερόν καὶ ἐλεεινὸν ἐκ τῆς δέψεως γίνεσθαι, Poet. § 27. See a very pleasant paper of Addison's on this subject, Spectator, No. 42. "We know the effect of the skull and black hangings in *The Fair Penitent*, the scaffold in *Venice Preserved*, the tomb in *Romeo and Juliet*," etc. Twining.

- being on the eve of taking place, or as having happened, men make it appear to be close at hand.
15. Likewise things which have just taken place quickly about to do so, have on this very account.
 16. greater tendency to excite pity. Also the indications and actions of persons; for instance, the garments of those who have suffered, and other things of this sort. And the expressions of those under suffering, for instance, of those already in act of dying, especially is it a circumstance to move pity, that even in these crises the persons have borne themselves virtuously¹⁵. For all these circumstances produce pity in a higher degree from its appearing *near*; the fact of the person's being *unworthy*, and his disaster appearing in view before our eyes.

CHAP. IX.

Of Indignation.

1. Indignation opposed to pity.
Definition of it. To pity is opposed, most directly, that feeling which men call indignation; for, to the feeling pain at a deserved *misfortune*, is opposed in a certain way feeling pain at undeserved *good fortune*, and indignates in the same disposition; and these feelings are both those of a virtuous disposition. For we ought to sympathize with, and to pity those who are undeservedly unfortunate; and to feel indignant those who are undeservedly fortunate; for what happens contrary to desert is unjust; and on this account we make indignation an attribute even
- 2.

¹⁵ Witness the effect of Antony's display of the robe of blood stained with his blood. Julius Cæsar.

¹⁶ Illustrated in the effect produced by Polyxena's reaction and anxiety to preserve, even in death, the delicate female delicacy:—

ἡ δὲ καὶ θυήσκουσ', ὅμως
πολλὴν πρόνοιαν εἶχεν εὐσχήμως πεσεῖν,
κρύπτουσα, ἃ κρύπτειν ὀμματα' ἀρσένων χρεῶν.
Eurip. Hecuba,

the gods¹. It should seem, too, that envy stands opposed to pity in the same way, as *appearing* to be akin to, and in fact the same thing as, indignation; and yet it *really* is distinct. For envy is also a pain causing agitation, *it* also is felt at good fortune, not, however, at the good fortune of the *undeserving* [only], but of equals and fellows². The feeling, however, in all cases equally [of envy and of indignation], must exist [in the breasts of those affected by it], not because any difference will be likely to accrue to themselves, but on account of their neighbour, solely as regards himself. For no longer will the one feeling be envy, and the other indignation, but fear, should the pain and agitation exist on this account, viz. because some evil will probably result to *themselves* from the good fortune of the other.

But it is plain that opposite feelings will be consequent on these passions: for he who feels *pain* at those who are *undeservedly* unfortunate, will feel *pleasure*, or at least be *unaffected* by pain, at those who are unfortunate *under different circumstances*³: for instance, no good man would feel pain about parricides and murderers when they meet with punishment; since we *ought* to feel joy at such occurrences; and so in the case of those who are deservedly fortunate; for both are instances of justice, and cause the good man to rejoice, since it must be that he has a hope that what has been realized to his equal, will be realized also to himself, and these are all feelings

3. Envy opposed to pity.

Definition of it.

4. Opposite feelings are consequent on these emotions.

5. Both are useful to repress pity.

¹ Thus Herodotus attributes the turn in the fortunes of Croesus to his having incurred the divine indignation:—Μετὰ Σόλωνα οἰχόμενον, ἔλαβη ἐκ θεοῦ νέμεσις μεγάλη Κροίσου· ὡς εἰκάσαι, ὅτι ἐνόμισεν ἑαυτὸν εἶναι ἀνθρώπων ἀπάντων ὀλβιώτατον. Herodotus, i. 34.

² The envious and indignant have this in common, viz. the good fortune of their neighbour, as the object of their respective passions; and the absence of any apprehension as to the degree in which their own circumstances may be affected by such good fortune; for the moment they begin to calculate the probability of any detriment arising to themselves therefrom, the feeling, ceasing to be any longer envy or indignation, will have become fear.

³ That is, *deservedly*.

of the same disposition; and their opposites, of opposite dispositions. Since the same man who exults in misfortune⁴ is also envious; for any who pain at the accession and acquisition of any good that person necessarily must rejoice when that is in act of being withdrawn and lost. On what account these feelings are all of them objects of pity; but, among themselves, they differ for the going reasons, so that all are alike available for view to render a thing not an object of pity.

6. Persons who excite indignation.

On the subject of indignation, then, let us state who the persons are with whom men feel dignant, the occasions on which, and, as regards themselves, with what dispositions; then, after that

7. of other points. But the subject will be plain what has already been said; for if indignation feeling pain on a man's appearing to be *undeserved* fortunate, it will be evident in the first place that it is not possible to feel indignation in the case of good. For there is no one who, if another be or brave, or shall make acquisitions of virtue feel indignation at that other; for neither is pity at the contraries of these qualities⁵: but it is

8. Not such as have moral advantages, but

⁴ 'Ἐπὶ χαίρεκακία, or, in the language of the "Ethica na," χαίρεκακία, is one of the extremes between which is said to exist: the other extreme is φθονερία, an aptitude of feelings of envy. Speaking of the "great power and of the Greek language, a late translator of the Agamemnon, Æschylus remarks, that "One word would sometimes for its translation a whole sentence of modern language for instance, 'Ἐπὶ χαίρεκακία, a disposition to feel pleasure in the misfortunes of others; which makes a sentence, an antithesis a maxim in Rochefoucault, "Il y a toujours du malheur d'autrui quelque chose qui ne nous déplaît pas adds in a note, that Lord Bacon (Essays) has been touched on this disposition: "There is a natural malice for there be that in their nature do not affect the good others." Preface to Symmons's translation of the Agamemnon.

⁵ Pity is not felt at the *absence* of these qualities for one, because they cannot be absent without being deserved; and it is essential to pity that its object be *undeserved* exposed to that inconvenience which he suffers; on the other hand, indignation cannot be felt at their *presence*, because the distinguishing feature of moral advantages that they be possessed, without being deserved.

wealth and power and the like possessions [that those of people feel indignant], and in a word, about all those fortune. things of which the good are deserving, and such as are *naturally* possessed of advantages; as, for example, of high birth, of beauty, and advantages of that description. But as what is ancient seems, in a certain sense, akin to what is natural, it must follow, that men are indignant, in a greater degree, at those who possess the very same good, if they be *recently* possessed of it, and are by its means in good circumstances, [than with those who have long possessed it.] For those who have recently become rich give greater pain than those who have long been rich, and by right of birth. And, in the same way, persons in office, and men of power, and possessed of numerous friends, and of good children, and any good of this description; and likewise if, through the instrumentality of these, there should accrue to them any further good: here, too, those of recent wealth, who by means of their wealth get into office, give greater pain than those who have been wealthy of old. And in a similar manner in the case of the others. But the reason of this is, that while the one sort appear to possess what is *their own*, the others do not; for that which appears ever to have held this rank, seems to involve an idea of truth; insomuch that the others seem to possess what does not belong to them. And as, of the goods, each does not become any one who may accidentally present himself, but there is a certain proportion and idea of adaptation; for example, splendour in respect of armour, is not adapted to a man whose virtue is justice, but to him who possesses courage; and splendid marriage feasts are not adapted to those of recent wealth, but to those of high birth: therefore if any one, though he may be a good man, meet with a possession which is not adapted to him, we should feel indignant; as also with an inferior who disputes with his superior; and particularly if he does so on the very points in which he is inferior. Whence also this was remarked by Homer: "He missed engaging with Ajax the son of

Such as
are newly
fortunate.

10. They
seem to
possess
what they
have no
right to.

11. Such
as have
any good
incongru-
ously.

- Such as compare two objects which admit not of comparison.
12. Men likely to feel indignation.
- 13.
14. The ambitious.
- 15.
16. On what occasions men feel indignant.
- Telamon; for Jupiter was *indignant* because he fain to engage a hero his superior⁶. But, if not on the *same* grounds, we feel indignant if a ferior challenge a superior, even on any ground for instance, if a musician were to dispute with a just man, for justice is superior to music. The sons then with whom, and the reasons why men indignant will be evident from this; for they these or others of the same description.
- As regards themselves, men have a tendency to indignation, if they deserve and have acquired highest goods; for the circumstance of those their equals being thought worthy of equal advantages, is not just. Next, they feel it, if they claim to be good and excellent persons; for they judge aright, and hate what is unjust. Again, if they be ambitious and desirous of certain objects, especially should they be ambitious about those things, of which others who are undeserving obtain. Those, in a word, who think themselves worthy of things, of which they do not esteem *others* worthy, are apt to feel indignant at those others, and at those very objects. On which account slaves, fellows, and men devoid of ambition, are not the objects of feelings of indignation, since there is nothing which they think themselves worthy of. And from it is evident on what occasions of misfortunes, luck, or failure of success, persons ought to revere or at least to be unaffected by pain; for, from what has been stated, the contraries will be evident that should the speech have wrought up the judge into this disposition, and should it have shown those who claim to be pitied, and that the circumstances under which they claim it, are undeserving of pity, and really deserving not to gain it, it is impossible for the judges to feel pity.

⁶ The remark is made of Cebriones, II. ii. v. 542; however, the second line quoted by Aristotle does not

CHAP. X.

Of Envy.

It is plain also on what occasions, with whom, and with what dispositions men feel envy, if in truth envy be “a sort of pain at apparent good fortune, touching the above-mentioned goods¹, in the case of equals, not in order that any thing may happen to one’s self, and simply on account of their [being thus fortunate];” for those who have, or seem to have equals, will be the people to be envious. I mean by equals, those who are like in circumstances of birth, connexions, age, habits, character, and property. They, too, will be envious who fall but little short of possessing all²: hence those who are carrying on mighty projects, and those who are prosperous, are envious; for they think that every one is carrying off what belongs to them. Again, those who are remarkably esteemed on any account, and particularly on account of their wisdom or happiness. And those who are ambitious are more given to envy than those who are devoid of ambition. And those who make a show of wisdom, for they are ambitious on the score of wisdom. And, in a word, those who in any respect are ambitious of glory are given to envy in that respect. And the narrow-minded; for, to them, every thing appears of consequence.

The goods respecting which men feel envy have been told you; for all those things whatsoever, about which men are eager for praise, and ambitious, whe-

Men like-
ly to feel
envy are:
those
within a
little of
the sum-
mit.

3.
The am-
bitious.
The wisc.

The nar-
row-
minded.

4. Objects
which ex-
cite envy.

¹ See § 7 and 8 of the last chapter, where he excludes moral excellence from the number of the goods which excite indignation; and in justification of their exclusion *in that place* it may be observed, that the simple fact of their being possessed is proof of their being deserved. And their exclusion from the subjects of *envy* may be justified by the consideration that the envious will, in general, esteem moral excellence scarcely worth troubling themselves about.

² See the parable of the ewe lamb, addressed by Nathan to David.

ther they be productions or acquisitions, and respecting which they are desirous of renown, and cases of good luck; about all these nearly is felt; and particularly about such of them as the individuals are themselves desirous of, or think ought themselves to possess, or those things in possession of which they are themselves superior or deficient in a trifling degree.

5. Men likely to be envied.

Equals.

Rivals.

Again, it is evident with whom men are envied for this has been already stated in connexion [what has gone before]; since men envy those who come near them in time, and place, and age, and character; whence the saying, "kindred too is consociation of envy³." Men also envy those with whom they are at rivalry; for they are rivals of those already mentioned; but of those who existed ten thousand years back, or who may live ten thousand years hence, or who are already dead, of these no one is the rival; nor again of those who live at the Pillar of Hercules⁴; nor of those of whom, in the opinion of either of themselves or of others, they are greatly inferiors; nor again of those to whom they consider themselves to be in a great degree superior; with like indifference do they regard those [at all

6. gaged] in pursuits of this description. And as men are affected by ambition in regard to rivals, competitors, and all, in a word, who are eager for the same objects, it must follow that they envy in an especial manner; whence the saying, "potters envy potters." And those who either succeed with *difficulty*, or do not succeed at all, envy those who succeed *quickly*. Again, they envy those whose acquisitions and success are a reproach to themselves and these are those who are near them, or equals; for it becomes evident that they do themselves fail of success through their own fault, so

7. The successful.

8. Those whose success is a tacit reproach to us.

³ This apophthegm should seem to justify the caution Cleobulus, — Κλεόβουλος ὁ Διδυμῶντος ἐρωτηθεὶς ὑπὸ τινος τὴν μάλιστα φυλάττεσθαι; εἶπεν, τῶν μὲν φίλων τὸν φθόνο δι' ἐχθρῶν τὴν ἐπιβουλὴν. Stobæus.

⁴ Πρὸς τοὺς ἐκ ποδῶν, φθόνο οὐδεὶς φύεται. Philo. H. v. § 2, p. 26.

this, galling them, produces envy. And those who 9.
 either possess or have acquired that which it would
 become themselves to possess, or which themselves
 had at one time acquired; at least the old, on this
 account, envy the young. And those who have been 10.
 at considerable expense on an object, envy those who
 have expended little on the same object. But it is 11.
 evident both with whom, and on what occasions, and
 with what dispositions people of this sort feel pleasure;
 for they will be delighted, having in the contrary
 circumstances that very temper, the which
 being without, they are pained. So that if the
 judges themselves shall have been wrought up into
 this disposition, while those who lay claim to our
 pity or to the acquisition of some good, are such as
 have been described, it is evident that they will not
 obtain pity at the hands of those on whom they depend
 for it.

The orator by exciting envy will remove pity.

CHAP. XI.

Of Emulation.

HENCE likewise it will be evident both with what 1. Emu-
 dispositions, and in regard to what objects, and of
 whom, persons are emulous. Because if emulation
 be "a sort of pain at the apparent¹ presence of goods
 which are held in honour, and which admit of one's
 gaining them himself, in the case of those naturally
 our equals; felt, not because they are present to *another*,
 but because they are *not likewise* present to
 one's self," (on which very account emulation is a virtuous
 feeling, and belongs to virtuous people, whereas
 envy is a depraved feeling, and belongs to persons
 who are depraved: for the one, by motion of his emu-

Its definition.

It is a virtuous emotion.

¹ The merely *apparent* presence of this description of goods is sufficient to excite emulation. The character of the goods which this passion has as its object is entirely different from that which excites envy and indignation.

Persons likely to feel emulation.

The young and high-spirited.

2. Those whom others esteem.

3. Whose ancestry or relations are worthy.

4. Things which are objects of emulation. Virtues.

Goods.

Wealth, etc.

5. Persons who are objects of emulation.

6. All whom men wish to resemble,

lation, sets himself to acquire the good ; while other, by motion of his envy, sets himself to the dispossession of his neighbour). It must be, that persons who deem themselves worthy of goods which they do not possess, are apt to feel emulation since no one arrogates to himself that which appears impossible : and hence the young and the high-spirited are thus affected ; and also those to whom belong goods of such a description as to be worth the attention of men in repute ; these are wealth, number of friends, office, and whatever other goods are of this kind ; for men feel emulous of such goods ; as though because they properly belong to such as are men of virtuous dispositions, it were matter of absolute reproach that themselves should be virtuous. Again, those persons emulous whom others esteem worthy of such goods, and those again whose ancestors, or relations, or intimate friends, or whose tribe or city is held in esteem about any point, such persons are apt to feel emulation on that point ; for they think they belong properly to them, and that themselves are worthy of them.

But if those goods are matter of emulation which are held in esteem, it must of course follow that the *virtues* are of this description ; and whatever things have a tendency to aid and benefit others ; since people honour *virtuous* people, and those who benefit them : likewise that all goods whatsoever, the enjoyment of which accrues to one's neighbours, are of this sort ; for instance, wealth, and beauty, rather than health.

And it will also be evident who the persons who are objects of emulation ; since they who possess these, and the like goods, become objects of emulation. These goods are such as have been mentioned, for example, courage, wisdom, sovereignty ; for those are sovereigns have a power of benefiting men. Generals, orators, all, in fact, who have abilities [are objects of emulation]. And those whom many wish to resemble, or who have many acquaintances, or many friends. Or those whom many admire,

or whom they do themselves admire. And those on whom are pronounced the praises and encomia of poets and panegyrist². Persons, however, of a contrary description, men despise; for contempt is the contrary of emulation; and the despising of the being emulous. And it must be that persons so affected as to emulate certain persons, or to be themselves objects of emulation, are apt to feel contempt for those things and persons who possess evils the contraries of those goods which are the objects of emulation. On which account men frequently despise the fortunate, when their good fortune is unconnected with those goods which are held in esteem.

7. or admire.

Contempt is the contrary to emulation.

Of the means, then, by which the passions are excited in the breast, and are allayed, one of the sources³ out of which means of persuasion arise, of these we now have treated.

CHAP. XII.

*Of the Passions and Habits of the Young*¹.

LET us next go over in detail the dispositions² of men; considering of what kind of a turn they are, in reference to their passions, habits, ages, and fortunes.

1. Characters of mankind.

² This description of orators were justly said to be *λογογράφοι*, (*λόγους γραφείς*;) indeed it appears from the third book, that epideictic orations in general were intended rather for *persuasion* than *recitation*. Speaking of the style of epideictic orators, he remarks, τὸ ἔργον αὐτῆς ἀνάγνωσις, lib. iii. cap. xii. § 6.

³ Viz. *πίστις παθητική*, the third branch of *πίστις ἐντέλχη*. See book i. chap. ii. § 3, 4, 5.

¹ This discussion of the dispositions of persons, under a few of the most striking circumstances of life, was promised in the first book (chap. x. § 11).

² "The word *ἥθος*, taken in its utmost extent, includes every thing that is *habitual* and *characteristic*; but it is often used in a limited sense, for the *habitual temper* or *disposition*." *Twinning*. Probably "*humour*," in the sense in which it has been defined by Ben Jonson, comes nearer to *ἥθος* than any word in our language:—

2. Vary in their
i. Passions.
ii. Habits.
iii. Ages.
iv. Fortunes.
- I call anger, lust, and the like, by the name *passions*; a subject of which we have treated above. I the name *habits*, I designate virtues and vices: all of these we have treated above, both as to the point on which men form deliberate choice, and that to which they give birth in action. And the *ages* are youth, prime, and old age. By *fortune* I mean, high birth and wealth, and abilities, and their opposites; all in one word, good and bad fortune.
3. Character of the young.
Ardent.
Inconstant.
- Now the young are in their dispositions prone to desire, and of a character to effect what they desire. And they are in the highest degree apt to pursue pleasures of love above all desires about which the body is concerned, and in these they are incontinent. But they are prone to change, and fastidious in objects of their desires. And they desire with eagerness, but speedily cease to desire; for their wishes are keen, without being durable; just like the hunger and thirst of the sick. And they are passionate and irritable, and of a temperament to follow the impulse.
4. Irritable.
5. Ambitious.
- And they cannot overcome their anger; for by reason of their ambition they do not endure a slight, become indignant, and fancy themselves injured: they are ambitious indeed of honour, but more so of victory; for youth is desirous of superiority, and victory is a sort of superiority. And of both these they desirous in a higher degree than of gain; least of all are they desirous of gain³, by reason of their having never yet experienced want; just according to the proverbial saying of Pittacus to Alcibiades⁴. And they do not view things in a
7. Savage.

When some one peculiar quality
Doth so possess a man, that it doth draw
All his affects, his spirits, and his powers,
In their confusions, all to run one way,
This may be truly said to be a *Humour*.

Every Man out of his Humour: where see Whalley's

³ Power pleases the violent and proud: wealth delights the placid and timorous. Youth therefore flies at power, and grovels after riches. Johnson's Journey to the Hebrides, p. 344.

⁴ It is not known what this saying of Pittacus was.

light, but in a good, by reason of their never having yet been witnesses of much depravity. And they are credulous, from their never having yet been much imposed on. And they are sanguine in their expectations; for like those who are affected by wine, so the young are warmed by their nature; and at the same time from their having never yet met with many repulses. Their life, too, for the most part, is one of hope; for hope is of that which is yet to be, while memory is of that which is passed: but to the young that which is yet to be, is long; but that which has passed, is short; for in the early days of life they think they remember nothing, while they hope for every thing; and they are easily imposed on, for the reason which has been stated; because they soon cherish expectation. And they are brave rather to an excess; for they are irritable and sanguine, qualities, the one whereof cancels fear, and the other inspires courage; for while no one who is affected by anger ever is afraid, the being in hope of some good is a thing to give courage. And they are bashful; for they do not as yet conceive the honourable to be any thing distinct, but they have been educated only under the established usage of the state. And they are high-minded; for they have not as yet been humbled by the course of life, but are unexperienced in peremptory circumstances: again, high-mindedness is the deeming one's self worthy of much; and this belongs to persons of sanguine expectations. And they prefer succeeding in an honourable sense than in points of expediency; for they live more in conformity to moral feeling than to mere calculations^b; and calculation is of the expedient, moral excellence, however, of that which is honourable. Again, they are fond of friends and companions rather than of their other compeers in age, by reason of their delighting in social intercourse, and of their not yet deciding on any thing in reference to what is

Credulous.

8.

Their life is one of hope.

9. Rash.

10. Bashful.

11. High-spirited.

12. With a sense of honour.

13. Social.

^b *Aoryiαμὸς* is that one of the seven causes of human action which *least* affects the young. They *usually* act from *θυμὸς* or *ἐπιθυμία*.

- expedient ; so that they do not decide on their friend [upon that principle]. And all their errors are the side of excess and too great earnestness, in contravention of Chilo's rule ; for *the young* carry everything to an excess ; for their friendships are in excess, their hatreds are in excess, and they do everything else with the same degree of earnestness ; they think also that they know every thing, and fir asseverate that they do ; for this is the cause of their pushing every thing to an excess. And, in their trespasses, they trespass on the side of wantonness and not of malice. They are likewise prone to pass from their conceiving every one to be good, more worthy than in fact he is⁶ ; for they measure others by the standard of their own guiltlessness that they conceive them to be suffering what they not deserve. And they are fond of mirth, on which account they are also of a facetious turn⁷ ; for facetiousness is chastened forwardness of manner. Such, then, is the disposition of the young.
14. Their errors are on the side of excess.
15. Their insults are mischievous not malicious. Prone to pity.
16. Are gracefully facetious.

CHAP. XIII.

Of the Passions and Habits of those advanced in Life

1. Character of the old. BUT those who are advanced in life, and who have passed their prime, are of dispositions in most part

⁶ Vide note ², chap. xiii. p. 154.

⁷ *Εὐτραπελοί*. I know no word in our language of similar moral signification in which the metaphorical allusion to *the turn*, or easy adaptation of manner, is preserved, unless indeed Minshew be correct in his etymology of *Buzome*, which, according to him, is derived from the German word *booghen* i. FLEXILIS, and refers to the article *pliant* for further explanation. If this etymology be true, then Milton's expressions *buzom*, *blythe*, and *debonnaire*, though applied rather to feelings than manly grace, will convey a notion of what is here intended by Aristotle. But see Minshew, p. 106, edit. 1. In the *Ethics*, b. 4, he compares *εὐτραπελία* to graceful person ; which, in conformity with the notions of most ancient writers, he seems to think only discoverable in *motion*, not *rest*. Compare also " *Crito*, or a Dialogue on Beauty."

the very opposite of these. Since by reason of their having lived many years, and having been deceived in a greater number of instances, and having mistaken, by reason, too, that the majority of human affairs are but worthless, they neither positively asseverate any thing, and they err in every thing more on the side of defect than they ought. And they always "*suppose*," but never "*know*" certainly; and, questioning every thing, they always subjoin a "*perhaps*," or a "*possibly*." And they talk of every thing in this undecisive tone, asserting nothing decisively. And they are apt to view things in an unfavourable light; for a disposition thus to view things, is the judging of every thing on the worse side. Moreover they are apt to be suspicious from distrust, and they are distrustful from their experience. And on this account they neither love nor hate with great earnestness; but, conformably to the remark of Bias, they both love as though about to hate, and hate as though about to love. And they are pusillanimous, from their having been humbled by the course of life; for they raise their desires to nothing great or vast, but to things only which conduce to support of life. And they are illiberal; for property is one of the necessities; and they are at the same time aware, from their experience, of the difficulty of its acquisition, and of the ease with which it is lost. And they are timid and apprehensive of every thing; for their disposition is the reverse of that of the young; for they have been chilled by years, but the young are warm in their temperament; so that their age has paved the way to timidity; for fear is a certain kind of chill. And they are attached to life, and particularly at its last closing day, from the circumstance that desire is of some object which is absent, and that men more especially desire that of which they stand in need. And they have self-love more than is fitting; for this too is a kind of littleness of spirit. And they live in a greater degree than they ought by the standard of expediency, and not of what is honourable, by reason

The old
are doubtful.
2.

Indecisive.

3. View things on the dark side.

Suspicious.

4. Cautious.

5. Cowardly.

6. Illiberal.

7. Timid.

8. Tenacious of life.

9. Selfish.

- of their self-love: for what is expedient is good *tively*, to one's self; but what is honourable is *absolutely*. And they are insensible to shame, rather than liable to be affected by it; for on account of their not holding equally in esteem the honour and the expedient, they despise appearances. And they are not easily inspired with hope, on account of their experience; for the majority of things are paltry; wherefore the generality turn out inferior to the expectation; and once more on account of their timidity [they are apt to despond]. And they are more in memory than in hope; for the remnant of life is brief, but what has passed is considerable; *hope* indeed is of what is to come; whereas memory is of things gone by: the very reason this, of their garrulity; for they never cease talking of that which has taken place, since they are delighted in awaking the recollections of things. And their anger is keen, but faint. And their desires have, some, abandoned them, the others are faint; so that neither are they liable to the influence of desire, nor apt to conform to it, but with a view to gain; which account men of this age appear to be naturally temperate, for both their desires have relaxed, they are enslaved to gain. And they live more by calculation¹ than by moral feeling; for calculation of expediency, but moral feeling is of virtue. And in their trespasses, they trespass on the side of malice, not of wanton insolence. The old have more over a tendency to pity, but not on the same principle with the young; for the latter are thus disposed from their love of human nature, the former from their imbecility; since they consider the endurance of every calamity at hand to them, and this was taken down as a principle of pity². Whence they are querulous.

¹ Their principles of action are the very contraries of that which principally influence the young; *ἔθος* and *λογισμός* being the usual springs of action in the man of advanced life.

² The two leading principles of pity were stated to be, *a conviction that the sufferer is undeserving what he suffers*, and *you consider yourself liable to be placed in similar circumstances*. It was on the former of these principles that the young were set

rulous, and neither facetious, nor fond of mirth ; for querulousness is the very reverse of fondness for mirth.

Such, then, are the dispositions of the young, and of those in advanced life². So that, as all welcome an address worded to their own disposition, and a speaker who resembles themselves, it is clear by employing his oration in what way the orator will appear of this description, as regards himself and what he says.

16. How the orator must use these characters.

CHAP. XIV.

Of the Dispositions of Persons in their mature Age.

THOSE who are in their prime will, it is evident, be in a mean in point of disposition between these, subtracting the excesses of each : being neither rash in too great a degree, (for rashness is of this description, i. e. *in excess*,) nor too much given to fear, but keeping themselves right in respect to both. Neither placing confidence in all, nor distrusting all, but judging rather in conformity to the truth. Neither living with a view solely to what is honourable, nor with a view only to expediency, but with a respect to both. And conformed neither to penurious parsimony, nor to extravagance, but to what is fitting. With the same equality do they carry themselves also in respect to anger and to desire. And they are of a tempering coolness joined with spirit, and are spirited not with-

1. Character of the matured.

They are moderate.
2.

3. Are spirited with coolness.

to be apt to pity ; because they take a favourable view of human nature. The old are equally liable to be affected by that passion, but it is on the latter principle ; for though they view human nature in an unfavourable light, yet have they so strong a sense of their own liability to suffering, that they are led to commiserate others. Compare chap. viii. § 7 ; and chap. xii. § 15.

² In the Rambler, No. 196, the change of sentiments usual as men advance from youth to age is beautifully traced ; and the whole paper affords a striking illustration of the subject treated in this and the preceding chapter.

out temperate coolness: for in the young and elderly persons these qualities are separated; so the young are spirited, and of an intemperate rashness, while elderly persons are of a chastened spirit and timid. And thus, in a word, whatever advantages youth and age have divided between them, middle age possesses both; and in whatever respect they are either in excess or defect, in all these it has a mean and what is fitting.

4. Prime of life for the body and mind. But the body is in its prime from the age of thirty to five and thirty; and the mind about the age of forty-nine. Let thus much, then, have been said respecting youth, and old and mature age, and the positions which they severally are of.

CHAP. XV.

The characteristic Dispositions of Persons of high birth

1. Character of men of high birth. BUT let us treat of the goods of fortune next in order so many of them at least as influence the disposition of men in any particular way.
2. Ambitious. Now it is the disposition of high birth, that its possessor is more ambitious than others; for all, where any possession is realized to them, are wont to cumulate upon it. But high birth is nobility of ancestry; and it is apt to indulge in contempt even those who are as good as its own ancestors; because distinctions, in proportion as they are more remote rather than recent, are held in greater esteem, afford a ready plea for arrogance.
3. Distinction between the noble and generous. The generations of man. But, *noble*, is an appellation referring to excellence of birth; whereas, *generous* refers to one's not generating from the nature [of his ancestry]; which generally speaking, is not the case with the noble but the majority of them are ordinary persons. there is a kind of richness of produce in the generations of man, just as there is in that which arises from

the land ; and at times, should the stock be good, there arise in a family at intervals extraordinary persons ; and afterwards it again relaxes. And a family of brilliant talent run wild into dispositions bordering on madness¹ ; as in the instances of the descendants of Alcibiades, and Dionysius the elder : and one of sedate wisdom, into stupidity and dullness ; as in the instances of the descendants of Cimon, and Pericles, and Socrates.

CHAP. XVI.

The Dispositions consequent on Wealth.

ANY one, without any great penetration, may distinguish the dispositions consequent on wealth ; for [its possessors] are insolent and overbearing, from being tainted in a certain way by the getting of their wealth. For they are affected as though they possessed every good ; since wealth is a sort of standard of the worth of other things ; whence every thing seems to be purchaseable by it. And they are affectedly delicate and purse-proud ; they are thus delicate on account of their luxurious lives, and the display they make of their prosperity. They are purse-proud, and violate the rules of good breeding²,

1. Character of the wealthy. Insolent.

2. Fastidious.

Purse-proud.

¹ *Μανικώτερα*. In connexion with this word it should be borne in mind, that the Greeks were accustomed to consider every kind of enthusiastic impetuosity as a species of *madness*. See Twining on the Poetics, note 140.

² *Σόλοι*, the inhabitants of Soli in Cilicia, whose corruptions of the Greek language became proverbial. The word was used also to designate those who were guilty of impropriety in *conduct*, as well as in *expression*. Massinger, in enumerating some instances of ill breeding, uses the expression.

He ne'er observed you
To twirl a dish about, you did not like of,
All being pleasing to you ; or to take
A say of venison or stale fowl by your nose,
Which is a *solecism* at another's table, etc.

Unnatural Combat, act iii. sc. 1.

See too Ben Jonson's *Fox*, vol. iii. p. 275.

Presuming.

from the circumstance that every one is wont dwell upon that which is beloved and admire him, and because they think that others are envious of that, of which they are themselves. But at the same time they are thus affected reasonably enough for many are they who need the aid of men of party. Whence, too, that remark of Simo addressed to the wife of Hiero respecting the wealthy and the wise; for when she asked him, "whether were better to have been born wealthy or wise," replied, "wealthy; for," he said, "he used to the wise hanging on at the doors of the wealthy. And [it is a characteristic of the rich] that esteem themselves worthy of being in office; they consider themselves possessed of that on account of which they are entitled to be in office. And in a word, the disposition of the rich is that of a man amid prosperity.

3. Arrogant of place and power.

4. Difference between the newly rich and those who have been so from of old.

However, the dispositions of those who are lately rich, and of those who have been so from old, are different; inasmuch as those who have recently become rich³ have all these faults in a greater and a worse degree; for the having recently become rich is as it were an inexpertness in wealth. They are guilty of offences, not of a malicious nature but such as are either offences of contumely or intemperance; for instance, in the case of assault and adultery.

³ It is on this principle that Clytemnestra congratulates Agamemnon on being the slave of an ancient family, rather than recently advanced in the world:—

*ἀρχαιοπλούτων δεσποτῶν πολλή χάρις·
οἱ δ', οὐποτ' ἱλπίσαντες, ἤμυσαν καλῶς,
ἡμῶι τι δούλοισι πάντα, καὶ παρὰ στάθμην.*

Æsch. Agam. 101

ἅπας δὲ τραχὺς, ὅστις ἀν νόον κρατῇ.

CHAP. XVII.

Of the Dispositions of Men in Power, and of the Fortunate.

AND in the same way on the subject of power, the most striking almost of its dispositions are evident; for of these power has some in common with wealth, and others which are better. For men in power are more ambitious and more manly in their dispositions than the wealthy; from their aiming at all duties, whatsoever, which from their power they have the means of discharging. And they are less given to trifling, because, from a necessity of looking carefully to their power, they are constrained to a diligent attention. And they comport themselves with a dignity which is conciliatory rather than repulsive; for their claims for dignity render them more conspicuous; on which account, they bear themselves moderately: but conciliatory dignity is a softened and graceful sedateness. And, if they do transgress the bounds of right, it is not in small points, but in those which are of importance, that they are guilty.

But good fortune, according to its constituents, is of the disposition of the states which have been described; since those which appear to be the greatest instances of good fortune resolve themselves ultimately into these states: and, besides these, to the excellence of one's progeny, and to personal advantages. But men are usually more overbearing and inconsiderate in consequence of prosperity. But one disposition, and that most excellent, is a concomitant of good fortune, viz. that the fortunate are lovers of the gods, and are disposed toward the deity with a resort of confidence, in consequence of the goods which have accrued to them from fortune.

The subject, then, of the dispositions as they conform to age and to fortune has been discussed; for from the opposites of my remarks the opposite subjects will be evident; the subject, for example, of the disposition of a poor, or unfortunate person, or of one out of power.

1. Character of men in power resembles the rich; but they are more ambitious, more manly.
- 2.
3. Less trifling.
4. Are dignified.

5. Character of the fortunate.

6. Overbearing.

- Yet religious.

CHAP. XVIII.

That there are some Topics common to all the species of Oratory.

1. That
there are
certain
κοινὰ
αἰδη.

BUT since the use of persuasive orations has a reference to the forming a decision (since on questions which we are acquainted with, and have decided there is no further need of an oration); and as to their use, whether addressing his speech to a single individual, the speaker endeavours to exhort or persuade (which they do who admonish or persuade since that *individual* is in no less degree a *judge* because the person [be he who he may], whomsoever we want to persuade is, once for all, a judge); also if one be speaking against an adversary, on any supposed question, it has equally [a reference to a decision]; (for one needs must employ a speech, sweep away objections against which, as against an adversary, he directs his address); this is just as in the case in demonstrative oratory (since the speaker commends itself to the listener just as though a judge). But he alone is *strictly* a judge, who decides on the questions at issue in civil¹ controversies: such as both forensic questions, and those on which men deliberate, are agitated as to how they stand. But dispositions, as they are affected by the constitution of states, we have spoken above. So that the means will now have been distinctly unfolded, both by the use of what things, we may render addresses ethical.

2. But as there was, in each species of orations, a certain distinct end proposed; and as respecting them some ideas and propositions have been ascertained, out of which the deliberative, demonstrative and judicial orators deduce their means of persuading and as, in addition to these, the means by which it is possible for us to render our speeches ethical, have been developed; it merely remains, that we go on

¹ Under the word πολιτικός, he seems, according to Virius, to embrace judicial as well as deliberative questions.

in detail the topics which are common to the three species of oratory²: for it is necessary that every orator should connect with his speech the topics of possibility or impossibility; and for some it will be necessary to attempt to show that certain things will take place, and for others that they have taken place. And again, the topic of greatness is common to all oratory; for every orator, whether he exhort or dissuade, praise or blame, accuse or defend, avails himself of amplification and diminution.

Let us also, after these points have been explained, attempt to treat of enthymems in general (if we are in possession of any thing on the subject) and of examples; in order that by subjoining what remains we may make good our original proposal.

But of these common topics, amplification is most congenial to demonstrative oratory, as has been remarked; possibility, as relating to the past, to judicial³; since on what *has been* its decision is made; but possibility, as relating to the future, is most congenial to deliberative.

3. They are four in number.

i. The possible or impossible.

4. ii. Whether the fact has or has not taken place.

iii. Whether it will or will not.

5. iv. The great and small.

CHAP. XIX.

Of Things Possible and Impossible.

FIRST, then, let us speak of things possible and those which are impossible.

If then it be possible that one contrary should exist, or be called into existence, the other contrary will also appear to be possible; for instance, if it be possible for a man to be convalescent, it also is possible for him to be sick; for the effective power of contraries, inasmuch as they are contraries, is the

1. First of the possible and impossible.

The possible is of which the contrary is possible.

² We may, if we please, consider this as the *ἀνέκδοτος* of the sentence; and all the previous clauses as so many distinct parentheses; as the author of the Analysis has done, p. 101.

³ This discussion of possibility was promised in the course of what he said on judicial oratory, book i. chap. xii. § 2.

2. The like. same. If, of two similar things, the one be possible, the other which is similar will be possible also.
3. The more difficult. the more difficult be possible, so will also that which is easier. And if it be possible for a thing to be produced in a state of excellence or beauty, it is possible for it to be produced under general circumstances; for it is more difficult for a building made beautiful, than simply a building. And in whatever case the commencement is possible, fulfilment also is possible¹: for of things which are impossible, none either take place or begin to do so; for instance, it neither is the case, that the diameter of a square is commensurable with the side, nor will it ever *begin* to be so. Also, wherever the fulfilment is possible, so is the commencement;
4. The more excellent. every thing proceeds from a beginning. And if a thing subsequent in being or production be possible, so is the antecedent: if, for example, it be possible for a man to be produced, so also is it that a man should, since it is antecedent in its production: and if it be possible for a child, so is it also for a man to be produced; on the principle that the former is the commencement. Things likewise are possible which there is a natural love or desire; for man loves what is impossible, neither desires it, for the most part at least. Also, any thing which is the subject of an art or science, is possible both to be produced and to be produced. Likewise any thing which is the principle of whose production resides in those whom we can compel or persuade; such as those whose superiors, or lords, or friends we can persuade.
5. The beginning. And wherever the *parts* are possible, so also is the *whole*. Wherever again the *whole* is possible, so are the *parts*, generally speaking: for if the last part be the forepart, and the upperleather of the shoe of being brought into being, so also do the other parts themselves: and if the shoes, then also the last.
6. The subsequent. 7. Things which we love. 8. Subjects of art or science. 9. 10. Where the parts are possible, so is the whole.

¹ Thus it is argued, that if all may receive the ἀρχή generation, baptism; all may receive its τέλος, salvation. Baptism is expressly called by St. Basil, ἀρχὴ καὶ τέλος βαπτίσματος. De Spir. Sanct. c. 10.

the forepart, and upperleather²; also, if the genus be of the number of things possible, so also will be the species; and if the species, so also the genus: for example, if a vessel can be produced, so can a trireme; and if a trireme, so can a vessel. And if, of things which have a natural relation to each other, the one be possible, so is also the other; as if the double be possible, so also is the half; and if the half, so also is the double. And if a thing admits of being brought into being without art or preparation, *à fortiori* it will admit of it by the help of art and attention. On which principle too it has been remarked by Agatho, "Yes, truly, in some things you must fare just as fortune goes; other things there are which attach to us by necessity and *art*." Also, if any thing be possible to persons who are worse, or our inferiors, or less prudent, much more will it also be possible to their opposites; just as Isocrates said, that "it would be strange if Euthynus learnt it, and he were not able to find it out."

With regard, however, to things impossible, it is plain that they result from the contraries of the above-mentioned principles.

Questions as to the actual occurrence of any thing, are to be viewed under the following considerations. For, in the first place, if that which had a less natural tendency to occur, has occurred; then may that have occurred which had a greater tendency. And if that which is wont to take place subsequently, has taken place, that also has taken place which usually does primarily: if, for instance, a man has forgotten, then also must he at some time have learnt that [of which he is now forgetful]. Also, if a man was able and willing, he achieved the deed; for all men when, being willing, they have power, proceed to act; for there is nothing in their way. If, moreover, a man was willing and had no external impediment. If, again, the act

11. If the genus, then the species; and vice versa, etc.
12.

13. If without art, then with art.

14. If inferiors can do it, then can superiors.

15. Things impossible are the opposite.

16. Secondly, a thing has taken place.

17. When its subsequent has happened.

18. If the agent was willing.

19. And

² The admirers of Sterne will do well, on reading this passage, to borrow a hint from him, and consult the learned Albertus Rubenius upon it, or at least some one of the many great authorities mentioned chap. 19, vol. vi. of Tristram Shandy.

under the influence of anger or desire. was possible, and he was under the influence of anger³. And if it was possible, and he [the person in question] was influenced by lust; for, generally speaking, men, if they have the power, execute that which they are desirous; the bad from weak principle; and the virtuous because they desire subjects compatible with virtue. Also, if a man is at the point of bringing the thing into action, he will do it; since the probability is, that he who is at the eve of acting, did moreover really act.

20. If he was on the eve of doing it, etc.

21. *the eve* of acting, did moreover really act. All those things have taken place which naturally occur, either as preparatory to, or on account of the occurrence in question; as for instance, if it has thundered, it has also thundered; and if he attempted, he has also achieved it. And if all those things which naturally occur subsequently, and that count of which the deed is done, have taken place, then has also the prior to them and that which cause taken place: if, for instance, it has thundered, it has also lightened; and if he acted, he also acted. Of all this number there are some thus consequent of necessity; others however merely generally.

22. Things which have not happened are to be inferred from the opposite. Thirdly, what will happen

23. are subjects of the passions.

24. If the antecedents have happened.

With regard, however, to the non-occurrence of things, the considerations applicable will be plain, the contraries of those above stated.

Also with regard to what will happen, matters become evident from the same consideration, that which is within the power and the wishes of one will take place. Also things which are subjects of lust, anger, and reasonings, accompanied by passion. On this account, too, if persons be on the eve of doing any thing, it will be done: generally speaking, things which are on the eve of taking place occur, rather than those which are antecedents. Also, if all those things have preceded which naturally occur before; for instance, if it lowers, there is a probability that it will rain. Also, if that has happened which is on account of the thing in question.

25.

³ Compare chap. v. § 3, 4.

⁴ Fulmen est ubi cum potestate habitat iracundia. Syrus.

it is probable that that will also happen ; for instance, if there be a foundation, it is probable that there will also be a house.

The subject of greatness and smallness in regard to affairs, also of the degrees of greater and less, and of things great and small in general, is clear to us from what has been said. For, in the discussion of deliberative oratory, the doctrine of the greatness of *goods* has been stated, and respecting the greater and less *in the abstract*. So that as with respect to each class of speeches the proposed end is a good ; (for instance, the expedient,—the honourable,—and the just ;) it is evident that by every orator, his means of amplification are to be arrived at through the medium of these. But to institute, besides this, a further inquiry into the subject of greatness and of excess in the abstract, is to talk idly ; since particular cases are more completely applicable to use than mere generalities.

On the subject, then, of what is possible and impossible,—and whether the fact *has* or *has not* occurred,—*will* or *will not* occur, and moreover on the subject of greatness and smallness in regard to affairs, let thus much have been said.

26.
Fourthly,
of the
great and
small.

27.

CHAP. XX.

Of Examples ;—how many species there are of them, in what manner, and when we are to employ them.

It remains that I treat of the means of effecting persuasion which are *common* to every class of subjects, since I have already treated of such as are *peculiar*. And these *common* means of persuasion are two in species, example and enthymem : for the sentiment is part of an enthymem. Let us then first treat of example ; for the example is correspondent to induction ; and induction is a principle.

1. Exam-
ple dis-
cussed.

2. A spe-
cies of in-
duction.

But of examples there are two species ; for one Twosorts.

- 1st. Quoting real instances.
 2nd. Fabricating them.
 3. This latter is subdivided into
 i. παραβολή.
 ii. λόγος.
 Example.

species of example is the quoting real matters of which have actually taken place; another is the fabricating them yourself: and of this method, one species is illustration, the other fable; like those of the Greeks and the African legends. Again¹, example is of two kinds: that of the good, as if one were to assert that the state ought to set itself in order against the Persians and not to allow him to make himself master of Egypt and this, because aforetime Darius passed not into Greece, before that he had seized that country; and that of the bad, as if one were to say that when he had seized it, he passed across; so that the present king, should he seize Egypt, will pass on which account he is not to be permitted.

4. Illustration.

Illustration is of the nature of Socrates's courses: for instance, were one to say that it is fitting that magistrates chosen by lot should be of good office; for it is just the same thing as though one were to pick out wrestlers by lot; not taking account of those who are able to contend, but those on whom they may fall: or as though men were to draw lots for that person of the crew whom it might befit to take the helm; as if it became the person on whom the lot fell, and not him who understood the art.

5. Fable.

But fable is such as that of Stesichorus in opposition to Phalaris, and that of Æsop in behalf of the demagogue. For Stesichorus, when the citizen Himera had chosen Phalaris² general with absolute powers, and were on the eve of assigning him a guard, after other things which he said, related them a *fable*: "That a horse was sole master of a meadow; but that on a stag's coming in and spreading the pasture, in his wish to be avenged of the horse, he asked some man whether he should be ab-

¹ He here applies the generic term to the species first mentioned, viz. the citing actual matters of fact.

² Bentley seems to suspect this story as applying to Phalaris, "because," says he, "Conon, a writer in Julius Cæsar's time, gives us the very same narrative; but, instead of Phalaris, he says it was Gelon that Stesichorus spoke of. A circumstance of Gelon's history seem to countenance Cæsar's story: for Gelon was in great favour and esteem with the Himerians." Conon, Narrat. 42. Bentl. in Phalaris, p. 38.

conjunction with him, to chastise the stag. The man said [that he would be able] if he would take the bit, and himself were to mount him with his darts. When, however, he had agreed to this, and the man was mounted, the horse, instead of being revenged, was himself already the slave of the man. And in the same way do you also (says he) look to it, lest, in your wish to avenge yourselves on your enemies, you suffer in the same way as the horse; for already, through your choice of a commander with independent power, you have the bit in your mouths: but if you assign him a body guard, and permit him to mount into the saddle, you will become, from that moment forth, the slaves of Phalaris."

And Æsop, when pleading at Samos in behalf of a demagogue who was tried for his life, said, "That a fox in crossing a river was thrust out of her course into a drain, and that, being unable to get out, she was harassed for a long time, many horse leeches having got hold of her; but a hedgehog wandering by, when he saw her, taking compassion on her, asked whether he should pick off the horse leeches from her; that the fox however would not permit him; but on his asking why, she replied, 'Because these are indeed already filled from me, and now suck but a little blood; if, however, you should pick them off, others, who are hungry, coming up will drain off the little blood which remains. But (said he), Oh Samians, thus also does this man no longer injure you; for he is wealthy: should you, however, put him to death, others who are poor will come, who will exhaust you while they filch the public money."

But fables are adapted to deliberative oratory, and possess this advantage; that to hit upon *facts* which have occurred in point is difficult; but with regard to *fables* it is comparatively easy. For an orator ought to construct them just as he does his illustrations, if he be able to discover the point of similitude, a thing which will be easy if he be of a philosophical

7. Fables are suited to the deliberative orator:

8. being easy. turn of mind³. Cases, then, in the shape of facts are the easier to bring forward; but those are availing with a view to deliberation, which are upon the ground of facts; because, generally speaking, the future resembles the past⁴.

9. He who has not enthymems will use examples as proofs, and put them first. He who has enthymems uses examples as testimonies, and puts them last. It will, moreover, be right for one who has enthymems to employ his examples like proofs; since the persuasive efficacy of your sayings will be produced by them: but one who possesses [enthymems] should employ them like evidence, putting them forward after his enthymems, in way of conclusion. Because, if they be put first, they resemble induction; and induction, except in a few instances, is not proper to rhetoric; when put in *at the end*, they resemble evidence; a witness in every case influences belief. On the other account, there is moreover a necessity imposed upon him who puts them *first* of citing many; for, however, who states them in conclusion even one is sufficient; for a credible witness, though but single, is serviceable.

The number, then, of the species of examples, how many they are, and how and when they are to be used, has been stated.

³ He again remarks on the facility here ascribed to that of a philosophical turn, when, in speaking of metaphorical remarks, τὸ ὁμοιον καὶ ἐν πολλῷ διέχουσι θεωρεῖν, εὐστόχως iii. cap. xi. § 5.

⁴ This is the principle on which he has all along recommended *example* as more peculiarly available to the view of the deliberative orator. At the end of his illustrations of the subject of demonstrative rhetoric, after stating amplification to be more proper to it than either of the other common methods of persuasion, he says, τὰ παραδείγματα τοῖς συμβουλευτικοῖς ἐκ γὰρ τῶν προγεγονότων τὰ μέλλοντα καταμαντεύμεν νομεν, lib. i. cap. ix. § 40. Neither, says he, (cap. iv.) ought the orator to rely on the result of his own observation, ἀλλ' ἀναγκαῖον καὶ τῶν παρὰ τοῖς ἄλλοις εὐρημένων ἰσχυρῶς εἶναι, πρὸς τὴν περὶ τούτων συμβουλίην.

CHAP. XXI.

Of Moral Sentiments,—what they are, and of how many species,—how they are to be employed,—and what advantages they possess.

ON the subject of the use of maxims, after it has been stated what a maxim is, it will most easily become clear both in what cases, on what occasions, and what persons it befits to avail themselves of the enunciation of maxims in their speeches.

Now the maxim is an assertion, and yet not respecting *particulars*, as what kind of person Iphicrates was, but on some *general* subject; neither is it on *every* general subject¹, as, that what is straight is opposed to what is curved; but it is respecting as many subjects as moral conduct is concerned about, and as are objects of choice or avoidance in acting. So that, as the enthymem is a form of reasoning *nearly* [confined] to this description of subjects, both the conclusions of enthymems and their premises, after the syllogistic form has been done away, become maxims². Take an instance: "A man who is

1. Maxim,
γνώμη.

2. Its definition.

Conclusions of most enthymems are maxims.

¹ Having told you that maxims are certain general propositions, he cautions you against supposing that every general proposition deserves this appellation. For example, mathematical truths are asserted in propositions, general enough it is true, which however do not come up to the notion which Aristotle would have you form of the γνώμη. I hardly know whether it be allowable to attempt an explanation of Aristotle from a popular comedy; but those readers who remember the School for Scandal, may probably derive some illustration of this subject from the '*sentiments*' there put in the mouth of *Joseph Surface*; e. g. "The heart that is conscious of its own integrity, is ever slow to credit another's treachery." Act iv. scene 3.

² In other words, the maxim is to the enthymem what propositions are to syllogisms. Not to every enthymem does the γνώμη hold this relation, but to such only as are conversant with "the actions and passions of common life." Aristotle has not ventured to tell us that *all* enthymems relate to these subjects; he says only that "nearly" all of them are so conversant; περί τοιοῦτων ἔστι σχεδόν.

in his sound mind never ought to educate his children so as to be too highly skilled³." Now this maxim: but if the reason, and the cause why should not do so, be added, the whole [conjunctly] become an enthymem; thus, "_____ for beset the indolence which they contract, they will attach to themselves the bitter jealousy of the citizen. Again, this: "There is not a man who in every respect is happy⁴;" and the following: "There is not one of all mankind who is free⁵," are maxims and the last becomes an enthymem, if added to the following proposition, "_____ for either he is slave of money or of fortune."

3. Maxims are of four kinds. If, then, the maxim be what it has been described there will necessarily be four kinds of maxims: either they will be *with* the annexed reason, or *without* it. Now the maxims which need proof are

4. i. μετ' ἐπιλόγου.
ii. ἀνεὺ ἐπιλόγου.

such as assert any thing which contravenes received opinion, or is doubtful; but those which state nothing contrary to people's notions [do well enough] without the addition of proof. And of these last it can

5. not but be that some will need no proof⁶, from them having been *previously known*; as, "The best thing for a man, as it seems to me at least, is health;"—a cause to nine-tenths of mankind this seems to be the case: and that others *simultaneously with their being uttered become evident* to such as turn their attention to them; as, "There is no lover who does not always love." And again, of those which have proof added, some are a part of an enthymem, just as, "A man who is in his sound mind never ought," Others are essentially enthymems, and not part of an enthymem; the which obtain more than one other species. And these are all those in which the reason for what is asserted appears wrought in

6. Those μετ' ἐπιλόγου are either, 1st. part of an enthymem; or 2nd. Enthymematic.

³ Euripides, *Medea*, 294.

⁴ From a lost drama of Euripides, entitled *Sthenobœa*.

⁵ Euripides, *Hecuba*, 864.

⁶ I have ventured thus to render ἐπιλόγου; for that such Aristotle's meaning, is evident from his having himself ἀπόδειξις, at the beginning of the section, to denote the thing.

in this maxim: "Being yourself a mortal, do not cherish immortal wrath:"—for the assertion that, "one ought not always to cherish wrath," is a maxim; that, however, which is added, viz. "because you are a mortal," states the reason why. Similar to which is the following: "It is fitting that a mortal conceive mortal notions, not that a being destined to death should think of what is immortal⁷."

These last
are most
approved.

From what has been said it has then become evident, as well how many the species of maxims are, as also to what kind of subjects they are severally adapted. For on subjects which may be questioned, or contravene received opinions, the orator must not use those without the reason annexed; but let him either, *prefixing* the reason, use the conclusion as a maxim, thus—"For my part, as then it neither is good to be exposed to envy, nor to be indolent, I assert that it is not good to be educated;" or, stating this [which here is the conclusion] first, *subjoin* that which was prefixed⁸. Observing that on subjects which do not contravene received opinions, but are doubtful, that he annex the reason why as concisely as possible. And on subjects such as these the apophthegms of the Lacedæmonians are very suitable, and sayings which have an air of mystery; as if one were to apply that which Stesichorus said before the Locrians, "that they ought not to be insolent, lest their cigalas should sing upon the ground⁹." The employment of maxims becomes him who is

7. Maxims
not evi-
dent must
have the
reason
prefixed
or sub-
joined.

8. With
concise-
ness.

9. Maxims

⁷ So also says Horace:—

Quid æternis minorem
Consiliis animum fatigas? Od. ii. 11, 11.

A notion, by the way, which Aristotle controverts elsewhere, Nich. Eth. x. 7.

⁸ To state the rule in the words of Hobbes, it is this—"A sentence not manifest ought to be either inferred or confirmed; *inferred*, (as in the text,) *confirmed* thus,—*A wise man will not have his children over-learned*, (prefixing what, in the former disposition, had been put last,) *seeing too much learning both softens a man's mind, and procures him envy among his fellow-citizens*," (and *subjoining* what before had been *prefixed*.)

⁹ Meaning, lest their country should be so utterly devastated as that not a tree would remain for a cigala to sit upon.

suit the
old.

rather advanced in life; and particularly as respects subjects about which each happens to be well informed¹⁰. Since for one not so advanced in age to speak maxims is bad taste, just as it is for him to have recourse to fables: and the use of them on subjects about which one is ignorant is silly, and argues want of education. There is a sufficient sign of the truth of this; for the boors of the country are of other people most fond of hammering out maxims

10. and set them forth with great volubility. Also the stating generally a maxim which is, in fact, not general, is most especially befitting in appeals to the feelings, and in the act of exciting indignation; and then either at the beginning, or after the process

11. Common ones
are useful.

Again, it is proper to avail one's self of maxims which are current and common, if they be of any service; for from their being common they appear to be correct, as though every one acknowledged the truth¹¹: this one, for instance, (if the orator be exhorting persons to face the hazard, though they have not sacrificed,) "One omen there is which is best, to defend one's country;"—or to face it, though they be few in number,—"Mars is common;" and to cut off the children of their foes, what though they have done no injury,—"He is a fool who, after slaying the father, still spares the child¹²."

12. Old sayings.

13. It is good to contravene a common maxim.

Some old sayings too are maxims; for example the expression, "Next neighbour to an Athenian." It is also proper to quote maxims which even contravene the current sayings, (I mean by current sayings such as this, "Know thyself;" or this, "Too much of one thing is good for nothing;") whenever your moral character may be likely to show itself to great advantage, or the thing spoken is said in an impressive

¹⁰ A young man ought not to use maxims.

¹¹ On the principle,—*Vox populi est vox Dei*.

¹² So thought Lee's hero, Cæsar Borgia, for he tells Montchivael in the tragedy,

"Tis not my way to lop, for then the tree
May sprout again; but root him, and he lies
Never to bluster. Act v. sc. 2.

sioned manner. The speaking in an impassioned manner is, as if one in a passion were to assert, "that it was a falsehood that one ought to know himself; at least, this man, had he known himself, would never have claimed to be your general"¹³. The moral character appears better [when we contradict a maxim] thus, "it does not become men, as some assert, to love as though they were about to hate, but to hate as though they were about to love." And we ought ¹⁴ to give a manifestation of our moral principle by means of the diction we employ, otherwise to subjoin the reason; for instance, either stating the sentence thus, "we ought to love, not as they tell us, but as though always about to love, for the other is the part of an insidious man:" or thus, "the common maxim does not please me; for it is the duty of the true friend at least to love as though he were always about to love." "Nor again [does this please me], that we ought to carry nothing to excess; since 'tis our duty to hate the wicked at least to the very extreme."

They contribute, too, a considerable aid to our orations: first owing to the vanity of the audience; for they feel a pleasure if one, speaking generally, happens to hit upon ideas which they hold on any particular point. My meaning, however, will be plain in this way, as also the manner in which we ought to catch at them; for the maxim, as has been stated, is an assertion universally, and men feel delighted when that is asserted universally, which they happen previously to have taken up as their opinion upon particulars. If, for instance, a man chanced to have bad neighbours or children, he would hail the man who should say, "nothing is more annoying than dwelling near people," or, "nothing is more silly than to beget children."

15. Maxims aid a speech.
i. From gratifying the vanity of the audience.

¹³ The words probably of some panegyrist of Iphicrates, who, in the warmth of declamation, must have produced a very great effect by contradicting a maxim so generally received, and which bore an authority more than human, (εὐ αἰὲν ἐκείνου γένεσθαι σωτῆρα,) while at the same time he placed the merit of the general in a most striking light. For the original obscurity of Iphicrates, see book i. chap. vii § 32.

- So that we should form a guess, some how or other as to the opinions which our audience happen to have taken up with; then to speak on these subjects generally conformably to them. This one advantage the application of maxims must needs possess, another superior to it; for it gives our orations an air of character. But those orations bear an impress of character in which the principle is manifest. And all maxims produce this effect by reason of the speaker's asserting universally on things which are the objects of deliberate choice: so that should the maxims be good, they make the speaker also to appear a man of worthy character.

16. ii. They give the speech an air of character.

Such, then, be our discussion on the subject of the maxim, of its nature, its species, the manner in which it is to be employed, and the advantages which it possesses.

CHAP. XXII.

Of Enthymems.

1. Enthymems. LET us speak generally of enthymems, in what way we ought to seek for them, and afterwards of the topics, (*τόποι*), for the nature of the two is respectively different¹.
2. It has been stated before, that the enthymem is a kind of syllogism, also in what way it is a syllogism and in what respect it differs from the syllogism; for we should make our conclusions without taking up our assumptions either many stages back or all of them together: the one process from length is obscure; the other, from its stating what is plain, is waste of words.
3. i. They must not be far-fetched.

And this is the reason why men of no education have more persuasive influence over the mob than

¹ See the argument founded on the distinction between the chap. xxvi. § 1.

men of high acquirements, as the poet² says, "that the unlearned speak more in unison with the feelings of the mob;" for the latter address them in common and general points, the former, from the store of their information, in a manner which comes home to them. So that we are not to found our address on *any* thing which may seem to the purpose, but on certain definite points; such, for example, as seem right to the judges, or those whose opinions they acknowledge; and the reason for this is, that it will appear to be the case either to all or most of them: moreover we should draw our conclusions not only from necessary, but also from contingent premises³.

First, then, you ought to be aware that it is necessary, respecting every subject on which you have to speak and to draw conclusions, whether it be through the medium of the rhetorical syllogism⁴, or of any other whatsoever, to be masters either of all or some of the facts inherent in it: for having none of them, you will not be able to draw your inferences from any thing⁵. My meaning is this: how shall we be able to give advice to the Athenians, whether they ought to go to war, without being informed what their forces are, whether naval or military, or both; and these in how great numbers; also what are their resources; or their allies and enemies; and yet further, what former wars they have waged, and in what manner, and other points of this description: or how to eulogize them, unless we be informed of the sea-fight at Salamis, or the battle at Marathon, or the exploits achieved by them in behalf of the Heraclidæ, or some other such points; for it is on the real or apparent honourable traits attaching to each object that all orators found their panegyrics. And in the same

ii. They must be on definite points.

iii. Our conclusions must be drawn both necessarily and contingently.
4. We must know the facts of the case in every species of oratory.
5. Deliberative.

6. Epi-deictic.

² Euripides, Hippolytus, 969.

³ We should allege not τεκμήρια alone, but εἰκота as well.

⁴ Πελαγικὸν συλλογισμὸν means the syllogism peculiar to rhetoric. Victor. vid. Animadv.

⁵ Aristotle has himself given an outline of the kind of information which ought to be possessed with a view to speaking on five of the most important questions of deliberative oratory, book i. chap. 4.

way it is on their opposites that they ground their reprehension, always looking out for any thing of that nature which either attaches, or appears to attach, to the subject; suppose [the case of a censure passed on the Athenians] because they subjected the Greeks to themselves, and reduced to a state of servitude the people of Ægina and Potidæa, who were their all against the barbarian, and bore off the prize of highest worth⁶; and every other transaction of this nature and whatever other such error may attach to them.

Judicial.

- And in the same way those orators who accuse or defend, construct their accusations and defences on the view of existing circumstances⁷: there is no difference in your pursuing this process, whether it be respecting Athenians or Lacedæmonians, men or gods. For in advising Achilles, or in praising or blaming him, in accusing and defending him, we must assume the traits which attach, or appear to attach, to his character; in order that from among their number we may, in so praising or blaming him, allege whatever things honourable or base attach to him; and in accusing or defending him, whatever things just or unjust; and in advising him, whatever is beneficial or injurious. And in a similar manner respect any business whatsoever; as, respecting justice, the question whether it be expedient [must be discussed on the ground of what appertains to justice or expediency. So that as all men appear thus to construct their proofs, whether they draw their inferences with greater accuracy or remissness, (for they do make their assumptions out of every subject, from those circumstances which are inherent in the question,) and by reason that it is manifestly impossible otherwise to prove; it is evident, then, that it is necessary, as I said in the Topics, to be in]

⁶ Herodotus, viii. 93.

⁷ Having illustrated his meaning by two examples, taken respectively from subjects of deliberative and demonstrative rhetoric, he concludes with a third from the subjects recognized by judicial; it being his great object to keep awake in memory of the reader the original grand division of ques-

session of certain select propositions on points which may occur, and are most convenient: and [it is evident] that the orator should conduct his inquiry respecting questions which arise on the sudden in the same manner, not turning his view aside to indefinite points, but to the actual points of the case which the oration is concerning; and embracing in his sketch the greatest number he is able, and those coming the nearest to the point; for in proportion as he is master of the greater number of the things inherent in the case, by so much the easier will it be to effect proof; and in proportion as these are the nearer to the point, in the very same proportion will they be more peculiar, and less vague. By *vague* I mean, the praising Achilles because he is a man, and one of the deified heroes, and made war against Troy; for these are points attaching to a thousand others beside: so that such an orator no more praises Achilles than he does Diomed. But by *peculiar* I mean, those which befall no one else than to Achilles, for instance, the slaying Hector, the bravest of the Trojans; and Cycnus, who, being himself invulnerable, prevented all the forces from landing; and that he joined the expedition the youngest, and without being bound by an oath; and whatever other topics are of this description. One element of enthymems, then, is that of *selection*; and this is the first which partakes of the nature of topics.

11. The orator must seize the peculiar points.

12.

The topic of selection.

And now let us state the elements of enthymems; 13. (but by *place*^a and *element* of an enthymem I mean the same thing). First, however, let us treat of those points concerning which it is necessary first to speak. For of enthymems there are two species; the one species are *confirmative*, that such is or is not the fact; and the other *refutative*: and they differ just as, in logic, the syllogism and the elenchus differ. And the confirmative enthymem is the deducing a conclusion from acknowledged premises; the refuta-

14. Two sorts of enthymems: δεικτικά. ἐλεγκτικά.

^a Cum pervestigare argumentum aliquod volumus, locos nosse debemus: sic enim appellatæ sunt hæ quasi sedes, e quibus argumenta promuntur. Cicero, Topic. cap. ii.

- tive, however, is the deducing an inference which is not admitted. Now the general arguments necessary for each class of subjects necessary and useful known are in our possession; for propositions have been selected on each [branch of rhetoric]; the topics out of which one must allege his theses, whether on questions of good or evil, just, unjust, honourable or dishonourable, select moreover respecting the dispositions, the passions and the habits, having been collected above, are likewise actually before us.
17. But let us, in a different manner, further make assumptions respecting all the classes of rhetoric, putting a mark on them severally as we proceed, to state both the refutative and confirmative elements as well as those of apparent enthymemes, which, however, are not really enthymemes, for neither indeed are they [the elements of actual] syllogisms. Since these points have been elucidated, we shall discuss the subject of starting objections to enthymemes, a means of their solution, from what sources we can adduce them.

CHAP. XXIII.

Elements of Enthymemes.

1. i. Element, that of contraries. **THERE** is one element of confirmative enthymemes derivable from *contraries*; for we should consider whether the contrary quality be inherent in the contrary subject; doing away the argument [grounded thereon] if it be not inherent; and if it be inherent, founding one thereon ourselves: for example, the argument that "Temperance is good, because intemperance is injurious:" or, as it is in the Mesomachus oration, "If *war* be the cause of our present

¹ An oration spoken by Alcidas in behalf of the Lacedaemonians, referred to above, i. 13, § 3. See the *Sophists' Bras*, P. ii. c. ii. § 123.

bles, of course we shall put ourselves right again with the return of peace." And, "If in truth it be not just to be angry with those who *unwillingly* do us harm; neither, if one *on compulsion* shall do good to any one, is it his duty to be grateful to him." And, "If to speak falsely is among men available to persuade; there is no anomaly in supposing, on the contrary, that many things which are true fail of being believed."

Another is derivable from conjugate *inflections*²; for the qualities must either be inherent consistently, or not at all; for example, the argument, that "the just is not in every case a good, for then also would that which is *justly* be well; now it is not, however, desirable *to die justly*³."

Another from *relatives*; for if to one party attach the idea of his having *acted* honourably or justly, to the other also will attach that of having *suffered* [honourably, etc.]. Also, if to *command* be just, so also is the having *executed* [the command]; for example, just as that farmer of the revenue, Diomedon⁴, said of the revenues, "If it be not base for you to *put them up for sale*, neither is it for us to *purchase* them." And if the idea that he has suffered justly or honourably be on the side of the *patient*, so will it also be on that of the *agent*; and if on that of the *agent*, then also on that of the *patient*. There is, however, in this way of arguing, room for passing off some false reasoning⁵: for if the person has justly suffered any thing, he indeed has justly been a sufferer, but perhaps not so at your hands. On which

2. ii. Of conjugate inflections.

3. iii. From relatives.

² See book i. 7, § 27. Hobbes calls this *cognomination*, or *affinity of words*.

³ See book i. 9, § 15.

⁴ Cicero illustrates this "*place*" by a similar example: "*Nam si Rhodiis turpe non est portorium locare, nec Hermaeonti quidem turpe est conducere.*" De Inven. lib. i.

⁵ Upon this fallacy the reasoning of Cleon was grounded in the debate about the Mitylenæans; and Dioclotus, in his reply, uniformly strives at exposing it, while he urges, that however they might merit death, the Athenians were not the people who should inflict it. Thucyd. lib. iii.

account we should view the question separately whether the patient deserve to suffer, and whether the agent have a right to inflict the suffering done, to employ the facts in whatever way may serve our purpose: for at times, considerations of one kind do not harmonize; just as in the *Alcmaeon* Theodectus, "Did no man hate thy mother?" In reply he tells her, that it is fitting to consider the points taken separately; and when Alpheisibœus how, taking her up, he says, "That she indeed deserved death, they did decree; but at the same time that I ought not to be the slayer." And just as in a trial respecting Demosthenes, and of the person who slew Nicanor. For when they had been adjudged to have slain him justly, it appeared that he had been justly put to death. Again, respecting the son who met his death at Thebes, respecting some one bade the question be decided, whether he were deserving death; as though it were not to slay one who deserved to die.

4. Another element is derivable from the relation of greater and less⁶; for instance: "If not even thou know every thing, hardly I should suppose do so; for it is to say, that if the quality be not inherent in that which would *more naturally* possess it; it is evident, that in that which would *less naturally* possess it, it is not inherent.

ii. à minori. And the argument, that "he assaults his neighbours, who even does so to his father;" is derived from the element, if *the less* probability exist, it does *the greater*; [which is available] in reference to whether of the two points it may be needful to consider whether that it is or is not the fact.

5. iii. By parity of reasoning. And again, *by parity of reasoning*, when it is said, "And is thy father to be pitied in that he has lost his children, and is not in truth Cœneus who has lost his noble offspring?" and the argument, "If indeed Cœneus committed no wrong, neither did Paris; neither if Tyndarus' sons did not act unjustly, neither

⁶ The argument *à fortiori*.

Paris;" and this, "Suppose Hector did slay Patroclus, Paris slew Achilles;" and this, "If other artists are not to be held cheap, neither are philosophers;" and, "If generals are not held cheap because they are frequently vanquished, neither are sophists;" and that, "If it behoves an individual to have a care for your glory, it also behoves you to regard that of Greece."

Another element arises from the consideration of *time*⁷, as Iphicrates urged in his oration against Harmodius, "that if before my doing it, I had claimed to have the honour of a statue, ye would have granted it; will ye not then grant it me now that I have achieved it?—Do not, therefore, engage yourselves under promises, when about to receive; and, when you have experienced the benefit, withdraw them." And, on another occasion, in reference to the Thebans permitting Philip to pass through into Attica, the argument that, "if, before his aiding them against the Phocians, he had claimed a passage, they would have promised; it were then an absurd thing, if, because he threw himself on them, and had confidence in them, they should not let him march through⁸."

Another element is deduced from assertions made respecting yourself retorted upon your adversary; and the term is of exceeding service, as is exemplified

6. v. From respect of time.

7. vi. From retorting assertions

⁷ Under this head he considers both *Time* generally, and also *Opportunity* (καιρός), which, however, have been thus distinguished—Χρόνος ἔστιν ἐν ᾧ καιρός, καὶ Καιρός, ἐν ᾧ χρόνος οὐ πολὺς. Hippocrates, in *Præcept.* 61. Καιρός again has been described as ὁ προσφύς καὶ ἀρμόδιος ἰκαστέρ χρόνος.

⁸ A striking instance of appeal to this topic occurs in Macbeth, act i.

Lady Macbeth. ————— then you were a man;

————— Nor time, nor place,

Did then adhere, and yet you would make both:

They have made themselves, and that their fitness now
Does unmake you.

See also Thucyd. book i. 140; ii. 6. Demosthenes frequently employs this topic, as in Olynth. iii. τίνα χρόνον, ἢ τίνα καιρόν, ὃ ἀνδρες Ἀθηναῖοι, τοῦ παρόντος βίλτω ζητεῖτε. The force of the appeal thus made cannot be better illustrated than by the frequency of its employment.

on your
adver-
sary.

in the Teucer; one too it is of which Iphicrates availed himself against Aristophon, when he put the question home to him, whether he would betray the fleet for a bribe; and on his denying that he would then said he, "Would you, who are Aristophon, not betray them, and shall I, who am Iphicrates?" You ought, however, to be dealing with an opposite party who appears in a greater degree to have been gail of injustice; otherwise it would appear ridiculous were any one laying an accusation against an Aristides, to allege this; but it ought always to tend directly to the discredit of him who lays the impeachment; for, generally speaking, the plaintiff presumes himself better than the defendant; this notion, then it behoves us to refute. And generally it is absurd when one chides in another what he does himself, would feel inclined to do; or exhorts him to do what he does not himself, neither would be induced to do.

vii. From
defini-
tion.

8. Another place is from *definitions*⁹; as, "that genius is nothing else than either the deity, or production. And yet whoever conceives the existence of, the production of a deity, must necessarily think at the same time that gods are in existence. And, as Iphicrates said, "that that man was more noble who was the best; for that there did not attach any nobility to Harmodius and Aristogiton before they had achieved some noble exploit." This is his proof that himself was more nearly akin to the deity by saying, "At any rate my deeds are more akin to those of Harmodius and Aristogiton, than yours are."¹¹ And, as was said in that speech about Iphicrates

⁹ In addition to the instances of recourse to this topic in the text, we may mention that of expediency in the speech of the Plataeans (Thucydides, iii. 56); and one used by Alcibiades in his speech at Sparta, vi. 89, *πάν το ἀναντιοῦναι δυναστεύοντι, δῆμος ὀνομασται, κ. τ. λ.*

¹⁰ One of the arguments used by Socrates to prove the existence of gods; for if, as was granted, he himself had the existence of his attending spirit (*τὸ δαιμόνιον*), then necessarily must it either be itself a god, or at least a divinity. See Plato, *Apolog. Socr.*

¹¹ See the concluding chapter of Tacitus's *Life of A*

"All will be free to acknowledge that the intemperate do not acquiesce in the enjoyment of a single person." And the reason on account of which Socrates refused to go to Archelaus, "because," said he, "it is a disgrace for one who has been treated well to be unable to make a retort on terms of equality, just as it would be for one who has been treated ill." For all these deduce their inferences about the points respecting which they speak, after having defined and ascertained the question.

Another element is deducible from the *number of senses* in which a word may be taken, as in the Topics respecting the acceptations of the word *rightly*. Another from taking the *different bearings* of the case; as, "If all act unjustly for three objects, for the sake either of this, or this, or this, and from two of these motives it is impossible that he should have acted; but that he acted on the third, not even the accusers themselves allege." 9.
viii. From the number of meanings of the term.
10.
ix. From the division.

Another from *induction*, as may be illustrated from the oration respecting Peparthus, to establish that women every where discern truly respecting their children; because first at Athens the mother made the matter clear to Mantias, the orator, when undertaking a suit against his son; and again at Thebes, when Ismenias and Stilbon were at issue on the point, the Dodonian woman proved the child to be the son of Ismenias; and on this account they considered Thessaliscus to be the son of Ismenias. And again, from the law of Theodectes, "If people do not give their own horses in charge to those who manage those of others amiss, nor [their ships] to those who overturn the ships of others; neither ought we, if in every case it happens in the same way, to employ those who but ill protect the safety of others, for our own protection." And, as Alcidamas asserted, that "all pay honour to the wise, at least the Parians honoured Archilochus, what though he was a calumniator of them; and the Chians, Homer, who was not their citizen; the Mitylenæans, Sappho, though she was a woman; and the Lacedæmonians, who of

11.
x. From induction.

all people are the least attached to learning, made Chilon one of their senators; the Greeks of Italy also honoured Pythagoras, and the people of Lampsacus buried Anaxagoras, though a foreigner, and honour him even to this day; the Athenians again were prosperous while they abode by the laws of Solon, and the Lacedæmonians, while by those of Lycurgus; also at Thebes, at the time that the magistrates were men of learning, the state enjoyed prosperity."

12. Another element of enthymems is derivable from a
xi. From former decisions.
former decision of the same, a similar, or opposite question; more especially indeed if all men so decide, and that uniformly; and otherwise, [if not all,] but the majority; or the wise, either all, or most of them; or the good; or if the very judges themselves, or those whom they approve, or those in opposition to whom they cannot decide (as for instance those on whom they depend); or those contrary to whom it is not becoming to decide; for instance, a god, or a father, or teacher, [happen so to have decided]. Just on the principle of the appeal of Autocles to Mixidemides, "whether it beseemed the awful goddesses to render an account to the Areopagus, and not Mixidemides?" Or, as Sappho insisted, "that to die was an evil, the gods having so decided; since [had it not been so] they would themselves have died;" or as Aristippus told Plato when he asserted something, as he thought, rather dogmatically, "Yet," said he, "our companion at least held no such thing," meaning Socrates. And Hegesippus, having first consulted the oracle at Olympia, put the question secondly at Delphi,—whether he [Apollo] was of the same opinion as his father; as though it were disgraceful to contradict a father. And of Helen, as Isocrates wrote¹², that "she was worthy, since indeed Theseus judged her so." And of Paris, "whom the goddesses

¹² Ἐγραψεν, because demonstrative orations were seldom composed for delivery, but rather, as we should say, for the closet, book iii. c. 12, § 6, ἡ μὲν ἐπιδεικτικὴ λέξις γραφικωτάτη, τὸ γὰρ ἔργον αὐτῆς ἀνάγνωσις. See note chap. xi. § 7.

preferred¹³," and of Evagoras, as Isocrates says, that must needs be virtuous, "since Conon, when unfortunately passing by every one else, came to Evagoras."

Another element arises from *an enumeration of parts*; as in the Topica, "what kind of motion the soul is; it is either of this, or that description." And an instance occurs in the Socrates of Theodectes: "Toward what temple hath he been guilty of impiety? whom of the gods which the ritual of our state acknowledges, hath he not honoured?"

Another consists in, Since, in the generality of instances, it happens that on the same circumstances somewhat is *consequent* whether good or evil, the exhortation or dissuasion by means of these consequences, the accusation or defence, the praising or blaming; for instance, on education is consequent envy, which is an evil; and the being wise, which is a good: [on the one hand then you may assert that] men should not seek to be educated, because it is not good to be envied; [on the other that] it is fitting to be educated, for it is good to be wise. In this topic¹⁴, with the addition of that on possibility, and the other [universal means of proof], as they have been stated, consists the system of Calippus.

Another occurs, when we want to exhort or dissuade respecting two propositions, and those opposed to each other; and to avail ourselves of the forementioned argument in the case of both. The difference [between this and the element last mentioned] is, that in it the opposition is merely between any propositions which may happen, it here holds between contraries: for instance, a priestess was endeavouring to prevent her son from becoming a public speaker;

¹³ See book i. chap. vi. § 26; where, in stating that to be good which is an object of preference, he cites these two instances.

¹⁴ It is, however, a mode of argument sometimes so fallacious, that we may say with Ovid,

—————careat successibus opto

Quisquis *ab eventu* facta notanda putat.

Phyllis Demoph.

13.
xii. From
the enu-
meration
of parts.

14.
xiii. From
the conse-
quents.

15.
xiv. From
the di-
lemma.

because, said she, "If on the one hand you speak what is just, *men* will hate you ; if what is unjust, the *gods*." [Here then it might be retorted], therefore you ought to become a public speaker ; for, "if you speak what is just, the gods will love you ; if what is unjust, *men* ¹⁵." And this is equivalent to the proverb "*of buying dirt as well as salt.*" And the retortion is this, when on each of two contraries good and evil is consequent, they being respectively opposed.

16. Another arises from the circumstance, that men do not approve the same things privately as before the world ; but when in public, they praise beyond all things what is just and honourable ; but within themselves they prefer what is expedient : the orator should endeavour to infer whichever suits his purpose, for this element is of sovereign use in exposing anomalies of opinion.

xv. From the different motives of mankind.
17. Another element is deducible from the analogy of results ; as Iphicrates urged when they compelled his son to serve who was under the standard age, because he was tall, that "if they esteem great children as men, they assuredly will vote small men to be children." And Theodectes, in the oration respecting the law, asked, "Do ye make the mercenaries, such as Strabax and Charidemus, citizens on account of their virtue, and will ye not make exiles of those among the mercenaries who have committed these intolerable acts?"

xvii. From the similarity of consequences.
18. Another arises out of the argument, that if the result be the same, the principle from which it arises will be the same ; just as Xenophanes used to argue, that "they are equally guilty of impiety who assert that the gods were produced, as those who assert that they die ; for in both cases it happens that in some period or other the gods do not exist." And generally

¹⁵ See an instance of this mode of arguing used by Tiresias, Euripides, *Phœnissæ*, 968. Of this kind is also the argument of Gamaliel : "If this counsel or this work be of men, it will come to nought ; but, if it be of God, ye cannot overthrow it." Acts v. 38, 39.

assuming that the result of each act is in every case identified with it. [Take this argument as an illustration]: "Ye are about to pronounce, not respecting Socrates, but respecting the pursuit in general, whether it be right to addict one's self to philosophy." And this, "that the giving earth and water is the being slaves." And "that the participating in the common peace is the performing of what is enjoined." Now we are to take whichever side may suit our purpose.

Another may be deduced from the circumstance, 19.
that the same persons do not choose the same things ^{xviii.}
subsequently as before, but contrariwise; as, for instance, this appeal:—"If, when in banishment, we fought that we might return; shall we, now that we have returned, take to flight, in order that we may not fight¹⁶?" For one while they chose abiding in their country at the expense of fighting; at another, the possibility of avoiding fighting at the expense of non-continuance in their native land. ^{From the inconsistency of men.}

Another element which may be resorted to is, the 20.
assertion that a thing either exists or was produced, ^{xix. From assuming a possible end as the real one.}
for the sake of that for which it might have existed or been produced; as if some one were to give a person any thing, in order that by taking it from him he may annoy him. Whence also it has been said, "To many, fortune, not bearing them good will, gives great good luck; but it is in order that they may receive the more conspicuous calamities¹⁷." And this from the Meleager of Antiphon: "Not in order that they might slay the beast, but that they may become witnesses, before Greece, of Meleager's valour." And that insinuation in the Ajax of Theodectes, "that Diomedes chose Ulysses, not as any compliment, but in order that his attendant might at the same time be his inferior." For it is very possible that he did so on this account.

Another, common both to the judicial and de- 21.
liberative orators, is the consideration of the motives ^{xx. From consideration}

¹⁶ From an Oration by Lysias.

¹⁷ *Evertère domos totas optantibus ipsis Dii faciles.*

ing the
motives.

which stimulate or retard men, and the objects with a view to which they both act and avoid; for these are such as, if they be actually in existence, we needs must proceed to action; for instance, if the undertaking be possible, and easy, and beneficial, either to the person in question himself, or to his friends, or pernicious to his enemies, and entailing loss on them; or if the loss be less than the object proposed¹⁸. And it is upon these considerations that orators *exhort*, and on their opposites that they *dissuade*; moreover they both *defend* and *accuse* upon the ground of these considerations; they rest their *defences* on those which are used to *dissuade*, and their *accusations* on those used to *exhort*¹⁹. The whole system of Calippus, as well as that of Pamphilus, is nothing more than this element.

22.
xxi. From
that
which is
incredible
yet true.

Another is deducible from circumstances which appear to have taken place, but which are improbable, on the ground that they would not seem to be facts, had they not well nigh occurred or actually done so; and that they have a yet stronger claim to belief; for men apprehend as truths either facts or probabilities; if then it be passing belief, and not probable, it will be true²⁰; for at all events, it is not on account of its likelihood and plausibility that it has this appearance of being the case. Just as Androcles of the burgh Pithos, said in his impeachment

¹⁸ Πράγμα: by this word he designates the object of desire and pursuit. Victor.

¹⁹ That is to say, those very same faculties which the deliberative orator would employ in *exhorting* a person to act, would, if existing in reference to one under *accusation*, be turned against him by the judicial speaker as circumstances confirmative of suspicion. And, *vice versâ*, the circumstances of difficulty attending the undertaking, which would be employed to *dissuade* from its attempt, might be alleged in *defence* of an individual under suspicion, as points of the case which render his guilt improbable.

²⁰ The argument may be formally stated thus: Men believe either what is actual fact, or probable; this is believed; this therefore is either fact, or probable; it is not probable, therefore it is fact. It is needless to observe that the slight possibility, that it may be neither one nor the other, is completely slurred over.

of the law, when the multitude were tumultuous as he spoke, "The laws require some law to set them right, for the very fishes require salt;" and yet it is neither likely nor plausible that creatures bred in the brine of the sea should require salt. "Nay, the olive lees require oil," and yet it is a fact not to be credited, that the very things from which oil is produced should require oil."

Another element, REFUTATIVE, is the consideration of contradictions; if there occur any contradiction under all the circumstances of time, conduct²¹, sayings, and the like. And this independently, respecting your adversary, as "He tells you that he loves you, yet did he conspire with the thirty [tyrants];" or independently respecting yourself, "He tells you that I am litigious, but is not able to prove that I have brought any action into court;" or respecting both yourself and the adversary distinctly, "This man never lent any thing, but I have ransomed many of you."

Another, applicable to those who have been calumniated, or who appear so, whether men or actions, is the explaining the cause of the mistaken notion; for there is some circumstance, on account of which it appears to be the case; for example, when a certain woman had come in contact with her son, she seemed from her embracing him to have had connexion with the youth; when, however, the circumstance which caused it had been stated, the charge was quashed. And as in the Ajax of Theodectes, Ulysses tells Ajax why, though he is braver than Ajax, he does not seem so.

Another is derived from the cause, if that be in existence, arguing that the effect is also; and should it not exist, that neither does the effect. For cause,

23. Refutative element.

i. From consideration of contradictions.

24. ii. From explanation.

25. iii. By arguing from

²¹ Thus M. Livius Salinator having at one period narrowly escaped conviction for embezzlement, afterwards, when he was made Censor, disfranchised all the tribes except that by whose vote he had been acquitted, "*quod aut prius se injuste condemnassent; aut postea tantos honores non recte tribuissent.*" Aur. Victor. de viris illis.

cause to
effect, and
vice versa.

and that of which it is the cause, exist conjointly, and nothing exists without a cause. Just as Leodamas in his defence, when Thrasybulus accused him, because he had been inscribed with infamy on a pillar in the Acropolis, but erased it in the time of the thirty tyrants, urged, "that it was not possible, because the thirty tyrants would put greater confidence in him, while his hatred toward the democracy remained inscribed in public."

26.
iv. From
observing
whether
the fact
could
have been
done bet-
ter.

Another is, the observing whether the thing respecting which the party is deliberating, or acting, or has acted, did or does admit of being on another and better footing; since it will become evident that, if this be the case, he has not acted; since no one voluntarily, and of his own knowledge, deliberately chooses what is bad. This, however, involves a fallacy; for in many cases it becomes clear [only] when too late, how it might have been managed better, whereas it was before unknown.

27.
v. From
the ano-
maly of
the pre-
sent act to
the past.

Another, which occurs when any thing anomalous to former acts is about to be done, is the considering the both in connexion; just as Xenophanes advised the people of Elea, when they asked him whether they should sacrifice and sing a dirge to Leucothea²² or not, "if they conceived her to be a deity, not to sing a dirge; but if a human being, not to sacrifice."

28.
vi. From
errors be-
fore com-
mitted.

Another element is, the accusing or defending on the ground of errors committed; for instance, in the Medea of Carcinus, some persons accuse her because she slew her children, [alleging] that at all events they were not forthcoming; for, respecting the sending away her children, Medea *was* in fault: she, however, defends herself [alleging that, if any one], she would have murdered Jason, not her children; which in truth had she done, she would have erred in not doing the other. And this element and species of enthymem constitutes the whole of that system of Theodorus, which is first.

29.
vii. From

Another is deducible from the name; as Sophocles

²² Ino, Cadmi filia, nonne Leucothea nominata a Græciis, Matuta habetur a nostris? Cicero, Tusc. i. 12.

says, "*Steel* in truth you are, and bear the name." the And as they are wont to say in their praises of the gods²³; and as Canon used to call Thrasybulus, the equivoca-
"rash in counsel," (Θρασύβουλος); and Herodicus tion of
told Thrasy-machus, "You are always rash in fight, the term.
(Θρασύμαχος); and Polus, "You always are a colt,"
(Πῶλος); and Draco the legislator, that "his laws
were not those of a man, but of a *dragon*²⁴; for they
were harsh." And as the Hecuba of Euripides says
of Venus, "The very name of the goddess rightly
begins with folly²⁵." And as Charemon says, "Pen-
theus, rightly named from the calamities²⁶ awaiting
him."

Refutative enthymema, however, are more in re-
pute than the confirmative; by reason of the refutative
enthymem being a setting contraries briefly together;
and because things when put in contrast are more
palpable to the auditor. Of all forms of reasoning,
however, as well confirmative as refutative, those
produce the greatest effect²⁷, which are of such a de-
scription that, on the commencement of their enun-
ciation, men anticipate the conclusion, yet without
their being superficial; for the hearers on their own
parts, feel a pleasure²⁸, in having of themselves anti-

30. Rea-
sons why
refutative
enthym-
emas are
more in
repute
than con-
firmative.

²³ Though he does not inform us what mode of praise this
is to which he alludes, we may infer that it consisted in *pun-*
ning on their respective appellations as often as the case ad-
mitted it.

²⁴ In this solitary instance of all the tissue does our language
admit of preserving the pun of the original; and this, while it
will serve sufficiently to illustrate our author's meaning, will
not leave him any great cause to regret that he has lost the
force of the others.

²⁵ Folly, in Greek ἀφροσύνη. The tragedian seems to have
strained the etymology of Ἀφροδίτη to suit his purpose.
However, there are no liberties which punsters and theorists
will not take. The words occur in the Troades, 990. Byron,
speaking of love, says, "Begun in Folly, closed in Tears."
Gisour.

²⁶ Πένθεια.

²⁷ Θορυβούρται: respecting this word, see a note, book i.
chap. 2.

²⁸ For the principles on which this pleasure arises, see b. i.
.1, § 21, on the ground that the apprehension of them is facili-

cipated it; and [next to these may we class] all those, by which the hearers are left behind, just so much as that they apprehend them simultaneously with their having been enunciated.

CHAP. XXIV.

Elements of Apparent Enthymems.

1. Fallacious enthymems. JUST as it is possible that [one form of reasoning] may be a syllogism, and that another, without really being such, may appear to be so; even so it must needs be with respect to the enthymem also, that one description should really be enthymems, and another not, however they may *appear* to be; for the enthymem is a species of syllogism.
2. But the elements of these apparent enthymems are, one derivable from the diction: and of this, the first kind is, as in logic, the asserting your last proposition with all the air of a conclusion, although you have deduced no [legitimate] inference at all: thus, "So and so is assuredly not the case, necessarily, therefore, so and so is." And the expressing yourself in the course of your reasonings concisely and pointedly; for this kind of style is the very province of the enthymem, and this kind of fallacy is, it is probable, that which is [demonstrated] "the result of the style of the diction;" but the stringing together the heads of many syllogisms, is a good expedient with a view to expressing yourself with all the air of syllogism in your style; thus, "that he preserved some, avenged others, emancipated the Greek people." For each of these propositions has been demonstrated from others; and when they are put in conjunction, it appears that something results ever from them. Another kind arises from similarity of names, as the assertion, that tated, and our admiration excited; and § 27 on the principle that τὸ σοφὸν δοκεῖν ἡδύ. For our self-admiration is gratified by so easily perceiving the drift of the speaker.

1st. From the diction of two kinds, i. Asserting a conclusion not inferred.

ii. Ambiguous terms, etc.

"the mouse is an excellent animal, being that from which the most esteemed of all rites have derived their name;" for of all rites, the *mysteries* are held in most esteem. Or, if any one in praising a dog, were to embrace in his panegyric the dog in the heavens, or Pan; because Pindar thus addresses him, "O blessed being, whom the inhabitants of Olympus call the all-various dog of the mighty goddess." Or the arguing, that "it is a most disgraceful thing, that there should be not even a dog in the house; and therefore it is evident that a dog is honourable." And the assertion, that Mercury is "communicative" above all the gods, because Mercury alone is called "common." And the stating that *λόγος*, *speech*, is most excellent; because the good are worthy of *λόγος*, *esteem*, not of wealth: for the words (*λόγου ἄξιον*) are not used in a single sense.

Another [element of fallacy] is the asserting conjointly what is true separately; or separately, what is true conjointly; for as it appears to be the same thing, what though in many instances it be not the same, the orator should practise whatever method is more available to his purpose. The saying of Euthydemus is neither more nor less than an instance of this; the declaration, for instance, that "he knew there was a galley in the Piræus¹," for he knew each [separate fact of his assertion]. And to declare of one who knows the constituent letters, "that he knows the verse²," for the verse is the same thing. Again, the saying that "as twice so much is prejudicial, he denied that the one was wholesome; for it is absurd that two good things should constitute one that is noxious." Thus enunciated, it is adapted to *refutation*; but thus it is *confirmative*; "for two evils do not constitute one good," etc. But the whole topic

3.
2nd. From
division
and com-
position.

¹ An instance of the flagrant absurdity which may arise from taking *conjointly* what is true only separately: Euthydemus knew there were galleys in existence, and he was in the Piræus when he had this knowledge; he knew therefore that there were galleys in the Piræus, i. e. he being in the Piræus.

² Of this nature was the sneering recommendation of a *Dictionary* as a *book of general information*.

is replete with fallacy. Such again is the saying of Polycrates respecting Thrasybulus, that he had deposed thirty tyrants³; for he takes them conjointly. Or, as in the *Orestes* of Theodectes, from distinct cases, "It is just that she who has slain her husband should die; as also that a son at least should avenge his father. Now, are not these the very things that have been done?" for, taking the cases conjointly, perhaps it is no longer just. This may also come under the fallacy of omission, for it is not explained "by whom [she should be put to death]."

3rd. From exaggeration. 4. Another element is the doing away or establishing a point by exaggeration⁴; and this occurs when, without having shown that [the prisoner] has really committed the crime, [the accuser] proceeds to exaggerate it; for this fallacy causes it to appear (when the *accused* employs the exaggeration) that he has not done the deed; or, (supposing it be the *accuser* who gets into a passion,) that he has done it. Thus then there is no enthymem; for the hearer is sophistically brought over to a belief either that [the accused] has or has not done it, without any proof having been adduced.

4th. From a *σημείον*. 5. Another is the argument drawn from a sign⁵, for this also is illogical; as if one were to say, "Lovers are an advantage to states; for the love of Harmodius and Aristogiton deposed the tyrant Hipparchus." And if one were to say, "Dionysius is a robber, for he is a wicked man;" for this also is illogical, because not every wicked man is a thief, although every thief is a wicked man.

³ The fallacy consists in this, that it leads you to suppose that Thrasybulus had destroyed thirty *distinct tyrannies*, whereas he had in fact only suppressed one, the power of which happened to be shared between thirty different individuals.

⁴ This is the first of the fallacies which are independent of the diction, and may be termed, for the sake of distinction, *real* or *material* fallacies.

⁵ Meaning of course the *specific σημείον*, for no fallacy can result from the *τεκμήριον*, vid. book i. chap. ii. § 16. This fallacy has elsewhere denominated τὸ παρὰ τὴν ἀγνοίαν τοῦ ἐλλείγχου.

Another is the arguing from an accidental circumstance; exemplified in that which Polycrates⁶ said about mice, that "they lent their aid by gnawing through the [enemy's] bowstrings." Or supposing one to declare, "that the being bidden to supper is the most honourable; for Achilles was wroth, on account of his not being invited by the Greeks at Tenedos:" he however was enraged, as though he was treated with disrespect, and this occurred upon his not being invited.

Another arises from establishing the consequent; 7. as in the oration respecting Paris, [it is contended] that "he is of a noble spirit; because, despising the society of many, he abode on Ida by himself;" for, because the noble-spirited are thus disposed, he, too, it should seem, is noble-spirited. Again, "Since he is both foppish in his dress, and strolls about by night, he is an adulterer;" because adulterers are persons of such habits⁷. Similar to this is also the argument, that "the poor, because they dance and sing in the temples; and that exiles, because it is permitted them to dwell where they list, [are happy.]" For as these advantages belong to those who appear to be happy; they too would appear to be happy, to whom they belong. Moreover, the case varies with the circumstances of the transaction; on which account, the argument falls under the charge of omission.

Another arises from stating as a cause that which in fact is not; [arguing], for instance, on its having happened "simultaneously," or "after;" for men do assume that what occurs "*subsequently*," [occurs] "*by means of*" [that which preceded], and more especially those engaged in state affairs; just as Demades [insinuated] "that the administration of

⁶ This Polycrates was one of the Sophists; he was mentioned above (§ 3). The circumstance respecting the mice is recorded by Herodotus, ii. 141.

⁷ The fallacy in this instance arises from taking the simple converse of a universal affirmative proposition; as also in the instance cited § 5.

Demosthenes was the cause of all their misfortunes ; because a war happened *after* it."

8th. From the omission of particulars. 9. Another, from the omission of the "when" and "manner how;" for instance, the argument "that Paris carried off Helen justly; because free choice had been given her by her father⁸;" for very possibly it was not [granted] for a continuance, but at first merely; because so far only was she at her father's disposal. Or if any one were to say, "that the striking free men was an insult:" because under all circumstances this is not the case, but when one begins the violence.

10. Again, as in the disputations of the Sophists, there arises an apparent syllogism from stating things absolutely or not absolutely, but conditionally; as [it is contended] in logic, that "what is a nonentity, does exist; because a nonentity *exists* as a nonentity;" and that "what is unknown is known, for it is *known* to be unknown⁹;" just so in rhetoric also, we have an apparent enthymem from what is not *absolutely* probable, but *conditionally* probable. This, however, is not universally the case; as in truth Agatho remarks, "Perhaps some one will be inclined to assert this to be probable, that many improbabilities will befall men:" for that which is contrary to probability does occur; so that even what is contrary to probability is probable¹⁰; this, however, is not the case *absolutely*; but just as in sophistical disputations, it is the omission of the circumstances of extent, relation, and place, which produces the imposition; so also here [in rhetoric], it results from the things being probable not absolutely, but conditionally probable. 11. The system of Corax is constructed upon this topic: for supposing your client, without being open to the charge, as for instance, being infirm,

⁸ See Euripides, Iphig. in Aul. 66.

⁹ See the epigram, which, alluding to Socrates's declaration, "that he knew nothing," concludes thus,

Hoc aliquid nihil est, hoc nihil est aliquid.

¹⁰ Compare the words of Sir Philip Sidney, that "a wonder is no wonder in a wonderful subject."

should be under a charge for an assault, [you have grounds for your defence,] because the case is not probable: and if he be open to the charge, from his being, for example, a powerful man, [still you may defend him] on the ground that it is not likely, because it was sure to seem to be likely¹¹. And so also respecting all other cases, for he needs must be either open to the imputation or not. Both cases then appear to be likely; but the one is likely [*absolutely*], the other *not absolutely*, but so as has been explained. And this is [the secret] "of making the worse, the better side¹²." And hence mankind were justly indignant at the annunciation of Protagoras¹³; for it is an imposition, and not the real, but an apparent probability, and has a place in no art except rhetoric, and the art of disputation. And now the subject of enthymemes, as well real as apparent, has been discussed.

goras.

CHAP. XXV.

The Solution of Arguments.

It follows that I speak of the modes of disengaging one's self from arguments. They are either the meeting them with contradictory arguments, or starting an objection¹. Now as to the meeting them with counter

1. Solution of arguments two ways. Contradictory.

¹¹ Compare lib. i. cap. xiii. § 5, τὰ λίαν ἐν φανερώ, κ. τ. λ.

¹² There were some persons who charged Socrates with doing this, and thence concluded that he was a person dangerous to the state—ἴσται τις Σωκράτης, ἀνὴρ σοφός, τὰ τε μετῴρω φροντιστής, καὶ τὰ ὑπὸ γῆν πάντα ἀναζητηκῶς, ΚΑ'Ι Τ'ΟΝ ἤΤΤΩ Α'ΟΓΟΝ ΚΡΕ'ΙΤΤΩ ΠΟ'ΙΩΝ. Plato Apol. Socr. § 2. Compare also the dialogue of the two λόγοι, in the Clouds of Aristophanes.

¹³ Protagoras Abderites, Prodicus Ceius, Hippias Eleus, alique multi docere se profitebantur arrogantibus sane verbis, "quemadmodum causa inferior, ita enim loquebantur, dicendo fieri superior posset." Cicero, Brut. c. viii. Τῶν ἄλλων τεχνῶν οὐδεμία τὰναντία συλλογίζεται, i. i. § 12.

¹ Ἀντισυλλογισμοὶ is a syllogism, whose conclusion is con-

argu-
ments.
Objec-
tions.

arguments, it is evident that we may do it on the ground of the same topics [as were given for refutation]: for the arguments arise out of probabilities, and many things which appear likely are opposed to each other.

3. Objec-
tions are
fourfold.

Objections, however, (as was stated in the Topics,) are started in four ways: 1. for either it may be from the same subject: 2. from a similar: 3. or an opposite [to that from which the adversary argues]: 4. or from points already decided.

1st. From
the same
source.

i. Gener-
ally.
ii. Parti-
cularly.

2nd. From
a contra-
ry.

3rd. From
a similar
case.

4th. From
points de-
cided.

By deriving your objection from the *same* source, I mean that, supposing the enthymem were respecting love, "that it was a good feeling;" there would be a twofold objection; for it [might be started] asserting *generally* that "every want is bad:" or *particularly*, that "the proverbial expression *Caunian loves*², would not have arisen had there not been some wicked loves." Again, an objection is alleged on the ground of a *contrary* fact; as, if the enthymem was this, "The good man benefits all his friends;" [and the objection,] "But the bad man does not hurt all his." And on the ground of *similar* cases³; if the argument be, "Those who have been treated ill always hate;" [the objection,] that "those who have been treated well do not always love⁴." And again, the decisions of men of celebrity: thus, suppose one brought forward the argument, that "we ought to have some feeling for those who are intoxicated, because they err ignorantly⁵:" this objection [may be started], that "Pittacus

tradietory of that adduced by your opponent: *ivotaais* is the showing that his reasonings are fallacious either in matter or form.

² Alluding to the loves of Byblis and her brother Caunus. See Ovid. Metaph. ix. 453.

³ Or to use the English phrase, "by parity of reasoning."

⁴ Victorius remarks, that "however at first sight this instance would seem to be one of *ivotaais* ἢ ἀπὸ τοῦ ἐναντίου, it is not inapplicable to the present case, inasmuch as the injured stand to the injurers in a relation *similar* to that in which the *benefited* stand to their *benefactors*."

⁵ The question how far ἀγνώμων may be considered a free agent, is discussed in the Nicomachean Ethics, lib. iii. cap. i. 5; and Hooker, book i.

is not therefore entitled to praise, otherwise he would not in his enactments have imposed higher fines, in case the party committed the error while intoxicated."

But as all reasonings [of the orator] are derived from four sources, and these four are probability, example, proof positive (*τεκμήριον*), and signs; and as the reasonings drawn from what is usual, or appears to be so, are drawn from probabilities, while those drawn by inference from similarity of circumstances, whether in one or more instances, (when the speaker embracing what is general, then infers particulars,) exist by virtue of example; while those again which are inferred from what is necessary and fact, are founded on proof positive; and lastly, as those drawn from what does or does not hold good, whether universally or particularly, result from signs, [it being remembered] that probability is not what *always*, but what *usually* occurs; it is plain that it is, in every case, possible to get rid of reasonings such as these by starting an objection. The solution is, however, [sometimes] apparent, and not always real; for the objector does not do it away on the ground of its not being *probable*, but on that of its not being *necessary*⁶. Wherefore it always happens, that the defendant has the advantage of the accuser, by means of this piece of sophistry. For as the accuser constructs his proof by means of probabilities (the task of getting rid of the positive certainty being by no means the same [in point of difficulty], as that of getting rid of the *probability* of the charge); and as that which is merely probable, is *invariably* open to an objection; (for it otherwise would not be a probability, but invariable and necessary;) and if this method of solution have been adopted, the judge supposes either that it does not amount to a probability, or at least that he ought not to decide, having been imposed upon in the way mentioned above;

8. Reasonings derived from four sources:
i. Probability.
ii. Example.
iii. Τεκμήριον.
iv. σημείον.

9. Solution of *εἰκός* sometimes fallacious:
10. and is of more service to defendant than plaintiff.

⁶ The orator must therefore show on which side the *greater* probability lies. "There are objections," said Dr. Johnson, "against a plenum, and objections against a vacuum; yet one of them must be right." Whately.

because [in fact] he is not bound to pronounce on positive proofs *alone*, but also on probabilities, which is the spirit of the oath, "that he will decide to the best of his judgment;" wherefore that will not be a satisfactory objection which rests merely on the absence of *proof positive*, but it is further incumbent on the objector to get rid of the *probability*; this, however, will be the case, if the objection be probable in a higher degree; (and it may be so in two ways, either on the score of time, or of the nature of the case; and pre-eminently so, if in both these particulars;) for if in the majority of instances it be as you state, then it is a greater probability.

11. Signs also, and the reasonings deduced from them, may be got rid of, even if they be facts, as was stated in the first Book; for it is clear to us from the *Analytics* that every sign is illogical.

12. Specific signs are refutable.
13. Solution of examples.
The same method of solution applies to reasonings grounded on example as to those on probabilities; for if we have a single instance in contravention, it has been answered⁷, [sufficiently to show] that it is not necessary; or that in the majority of instances, and those of more frequent occurrence, the case is otherwise. If, however, it be the case more frequently, and in the majority of instances, we must contend that the present is not the case in point, or that its application is not in point, or that it has some difference at all events.

14. *τεκμήρια* irrefutable, except by assailing the premises.
But proofs positive (*τεκμήρια*), and the reasonings grounded on them, we shall not be able to get rid of, at least not on the plea of inconclusiveness; this is clear to us from the *Analytics*: it remains for us to show that what is asserted is not the case⁸; if, however, it be clear both that it is true as a matter of fact, and that it is a proof positive of the point, from that moment it becomes irrefragable; for thenceforth it is plain from demonstration.

⁷ That is to say, by a *λύσις φαινομένη*.

⁸ As we cannot object to the *form* of the reasoning, our only resource is to attack the *matter*: to deny the premises.

CHAP. XXVI.

Of Amplification and Extenuation.

AMPLIFICATION and extenuation are not *elements* of enthymems, (by topic and element I mean the same thing,) since the element and the topic is that under which many enthymems fall; whereas amplification and extenuation are [themselves] enthymems for showing that a thing is great or little, like those for showing that it is good or bad, just or unjust, or falls under either of the other denominations. And these are all the questions about which syllogisms and enthymems are conversant; so that unless each of these be a topic of an enthymem, amplification and extenuation are not.

Neither, again, are the topics which are available to solution of enthymems, at all different in species from those employed in their construction: for it is evident that he effects solution who either proves [something contrary], or states an objection, and they establish a counter proof of the contrary; thus, "If one has argued that a fact has taken place, the other argues that it has not;" or "if one argues that it has not, the other insists that it has." So that this will not amount to a difference; for both employ the same vehicles of proof, inasmuch as they each allege enthymems to show that it is, or is not the case.

But the objection is not an enthymem, but is, as was stated in the Topics, the stating some opinion from which it will appear that no legitimate inference has been arrived at, or that [the opponent] has assumed some false proposition.

Thus much, then, on the subject of examples, and maxims, and enthymems¹, and, in a word, all the

1. Amplification and its opposite not τόποι, but enthymems.

2.

3. Enthymems of refutation and confirmation are the same in kind.

4. Objection is not an enthymem. Definition of *ὑποτάξις*.

5.

¹ In taking leave of a series of terms which have occurred hitherto so frequently, we may as well remark that examples, maxims, enthymems, etc. denote the particular modification of the proof, or the shape in which it is served up, *without refer-*

means of persuasion which address themselves to the understanding, both the sources whence we may furnish ourselves plentifully with them, and the means by which we may effect their solution². It remains for us to go over the subject of style and arrangement³.

ence to its degree of validity: while probability, signs, τεκμήρια, etc. refer to its degree of validity, *without regard to the shape or manner* in which the proof is conveyed.

² Having now despatched the first and most important of the three grand divisions of his work, viz. the subject of πίστις, it only remains to discuss the remaining two, λήξις and τάξις. In fact, having told the speaker *what* he is to say, he has now only to tell *how* he is to say it.

³ The subjects of πίστις, λήξις, and τάξις, it will be recollected, constitute the *widest* and *most general* arrangement of his work. See book iii. chap. i. § 1.

BOOK III.

CHAP. I.

Of the Parts of Rhetoric.

As there are three points which ought to be handled 1. Three
respecting a speech; one, as to the sources out of points in
which will arise means of persuasion; a second, re- a speech.
specting the *style*; a third, how we ought to *arrange* πίστις.
the *parts* of a speech. On the subject of the means λίξις.
of persuasion much has been said, as well as to how τάξις.
many the sources are out of which [they arise], name- The two
ly, that they are three; also, what is the nature of last to be
these sources, and why they are no more: for all treated.
those who decide, are persuaded either by being them-
selves impressed in a certain way, or from conceiving
the speakers to be men of a certain character, or from
the matter of fact having been proved¹.

It has been stated also with respect to enthymema,
whence we are to furnish ourselves with them; for
[of those sources], some are elementary propositions,
peculiar [to the several branches of rhetoric]; others
are places [of *universal* applicability]. It follows that 2.
we treat of the subject of style; for the mere being
in possession of what one ought to say is not enough;
but it is moreover necessary that we deliver it as we
ought; [and the doing this] contributes much to
your speech's appearing to be of a certain character.

Now that by which its nature is first, was, con- 3. ὑπόκρι-
formably to nature, investigated the first; viz. whence σις not
these things derive their persuasive efficacy: next to yet han-
this, was the disposition of them in the speaking: dled.
and thirdly, [arose an inquiry] of the greatest con-

¹ See book i. chap. ii. § 3.

sequence, but which never yet has been handled, on the subject of delivery; for it was introduced into tragedy and the public recitations at a *late* period, since at first² the poets used themselves to sustain the dialogue³ in their tragedies. It is therefore plain that some such power exists in relation to rhetoric, as well as to poetry; which [as connected with the latter art] Glauco the Teian, and some others, have treated of. And it depends on the voice, as to how we ought to manage it in reference to each several passion; when, for instance, we should employ a loud, when a low, and when a moderate pitch of voice; and on the manner in which we should employ its tones, viz. the acute, the grave, and the intermediate; and on certain rhythms in reference to each; for the points, in reference to which they conduct their inquiries, are three, viz. the loudness of the voice, the fitness of its tones, and its rhythm. Now these proficients bear away nearly all the prizes in the disputations; and as in the other contests⁴ the actors now produce a greater effect than the poets, so likewise do they in civil causes, owing to the depravity of states. There is not yet however any system compiled respecting these points, (since even the subject of style was brought forward at a late period,) and, if rightly conceived of, it appears an ornament adapted to vulgar tastes⁵; but as the whole subject of rhetoric

4. It consists in three things.
μέγεθος.
ἀρμονία.
ῥυθμός.

5. No art yet compiled on it.

² That the two departments of author and actor were united in the same person, is asserted also by Horace, *Art. Poet.* 277, and by Plutarch, *ἐθεάσαντο τὸν Θέσπιν αὐτὸν ὑποκρινόμενον, ὥσπερ ἔθος ἦν τοῖς παλαιοῖς.*

³ That *ὑποκριτής* came to designate an actor from the circumstance of his sustaining the dialogue with the chorus, may be evinced by reference to the etymology of the word. Its successive meanings have been clearly traced in the *Quarterly Review*: "*ὑποκριτής, Qui respondet*, ab *ὑποκρίνεσθαι*, respondere, Homer, Herodot. *Histrion*, quia primo *tragœdiæ* statu *histrion* Choro respondebat. Suidas, *ὁ ὑποκρινόμενος τῷ χορῷ. Simulator*, quia *histriones* fictas partes tuebantur." No. xlv. *Art* 2, p. 326.

⁴ Those for the prize in the tragic games.

⁵ *Φορτικόν*. It appears from Twining's excellent illustrations of the meaning of this word, that it is used to imply any thing *extravagant, violent, overcharged, outré*:—as applied to

has reference to opinion, we should pay attention to it, not as to a subject of absolute propriety, but as one of necessity; for as to mere matter of justice, we ought not to inquire further on the subject of speeches than so as to avoid giving pain, at the same time that we do not delight; for the rule of right is, that the contest be carried on by means of the facts themselves; so that, except the proof, all the rest is superfluous⁶; but it is notwithstanding, as has been stated, a point of great moment, in consequence of the weak judgment of the auditor. The subject of style, however, has some necessary though trifling claim on our attention in every system; for the expressing one's self in this or that way makes some difference with a view to exhibiting the subject clearly, not however to so great a degree [as is generally supposed]: all these points are however mere idea, and have a reference to the auditor; wherefore it is that no one teaches geometry in such a style.

Its influence is great.
8.

This art then, be it introduced when it may⁷, will produce the same effect as that of acting. And some to a small extent have already made an effort to treat of it; Thrasymachus, for instance, on the *excitement of compassion*. Again, the being qualified for delivery is a gift of nature, and rather without the province of art; the subject of style, however, is clearly reducible to an art. Wherefore rewards are bestowed in turn on those who are proficient in this, just as there are on those rhetoricians [who claim]

Delivery is a gift of nature.

persons, it means *troublesome, tiresome, etc.*, or *insolent, overbearing, etc.*, synonymously with ἀνελεύθερος, βάνανσος, πομπύλος, ὡς, vulgar, illiberal, etc. Athenæus, in speaking of the rejection of Hippoclides, one of the suitors of Agarista, daughter of Clisthenes, king of Sicyon, attributes it to the disgust conceived by her father at him, ΦΟΡΤΙΚΩΣ ὀρχησάμενον (see Herodot. vi. 129). Aristotle himself classes the φορτικοὶ with the βωμολόχοι, (Eth. Nich. iv. 8,) and with the οἱ πολλοὶ (ibid. i. 5). It is in fact, (to adopt an expression of Pope's,) any thing levelled to please the populace.

⁶ B. I. c. 1. § 10. οὐδὲν ἄλλο δεῖ, πλὴν ἀποδεῖξαι ὅτι οὕτως ἔχει.

⁷ Ὑπόκρισις: for he clearly foresees that from its obvious importance it must eventually become an adjunct of rhetoric, as it has already become of dramatic exhibitions.

on the ground of delivery; for written orations influence more by means of their style than through the sentiment.

8. Poets first used recitation and delivery with success.

9. Hence early rhetoricians adopted the florid poetical style.

But have gradually relinquished it, as the tragedians have also done.

Now the poets, as was natural, began to make a stir upon the subject at first; for words are imitations, and the voice, of all our parts, is the most imitative⁸; on which account also these arts were constructed, both that of recitation, and of acting, and of others too. But as the poets, though what they said was very frivolous, appeared to acquire their reputation by means of their style; on this account the first style [of rhetoric] was formed on that of poetry, witness the style of Gorgias; and even at the present time the majority of ignorant people fancy that such orators speak most delightfully: this however is not the case, but the style of poetry and that of prose is distinct, and the result shows it; for not even the writers of tragedy themselves any longer employ the same turn of diction, but just as they have passed from trochaic to iambic metre⁹, because the latter is most like prose of all the other metres; so have they also relinquished all those terms which are foreign to the style of conversation, with which however the early writers used to embellish [their works], and which even at the present day are employed by those who write in heroic metre; wherefore it is ridiculous to imitate the tragedians, who in their own case no longer employ that turn of diction.

10. So that it is evident that we need not discuss with minuteness all points soever which it is possible to treat of under the head of style, but so many only as belong to such an art as we are speaking of: the other part of the subject has been spoken of in my treatise on Poetry.

⁸ So that of course the poet, whose business was imitation, would immediately put in requisition these two most obvious sources of it.

⁹ The trochaic metre occurs frequently in the plays of Æschylus, the most ancient of the tragedians extant, particularly in the Persæ; as also in those of Euripides, especially in the Phœniassæ and Orestes; but in those of Sophocles, rarely, if ever.

CHAP. II.

On Excellence of Style as made up of single Words.

LET this then have been discussed: and let excellence of style be defined to consist in its being clear; (a sign of this is this, that the diction, unless it make the sentiment clear, will not effect its purpose¹;) and neither low, nor above the dignity of the subject, but in good taste; for the style of poetry indeed is not low, yet it is not becoming in prose.

1. Excellence of style defined to be the τὸ σαφές.

Of nouns and verbs² those which are in general use produce the effect of clearness: to prevent its being low, and to give it ornament, there are other nouns which have been mentioned in the Poetics, for a departure [from ordinary acceptations] causes it to appear more dignified; for men are affected in respect of style in the very same way as they are towards foreigners and citizens. On which account you should give your phrase a foreign³ air; for men are admirers of things out of the way, and what is an ob-

2. Words that are κύρια produce perspicuity.

3. To elevate style we must use ξίνα, etc.

¹ "Perspicuity consists in the using of proper terms for the ideas or thoughts which he would have pass from his own mind into that of another man. It is this that gives them an easy entrance; and it is with delight that men hearken to those whom they easily understand; whereas what is obscurely said, dying as it is spoken, is usually not only lost, but creates a prejudice in the hearer, as if he that spoke knew not what he said, or was afraid to have it understood." Locke, *Some Thoughts concerning Reading and Study*, vol. iv. p. 601.

² As Aristotle proceeds henceforth to a complete analysis of the subject of style, he first considers it in reference to the *single words* of which it is made up (ἐξ ὧν συνίστηται, § 5), which occupies him to the end of the fourth chapter. He then considers it as made up of *whole sentences*; the means of investing these with *dignity*, of *adapting* them to the subject, of constructing them to please the *ear*, and as addressed to the *intellect*; and concludes with enumerating their several *elegancies*. First, then, he considers the *beauties* of style as depending on *single words*.

³ Should the epithet *foreign*, as applied to a quality of style, not be immediately apprehended, it may be well to recollect that it means the excellence opposed to the fault which we designate *homeliness*.

ject of admiration is pleasant⁴. Now in the case of metrical compositions, there are many things which produce this effect, and *there* are very becoming, because both the subject and the person stand more apart [from ordinary life]; in prose, however, these helps are much fewer, for the subject is less exalted: since even in that art were a slave, or a mere youth, or [any one, in fact, in speaking] of mere trifles to express himself in terms of studied ornament, it would be rather unbecoming; but here too [as in poetry] the rule of good taste is, that your style be lowered or raised according to the subject. On which account we must escape observation in doing this, and not appear to speak in a studied manner, but naturally, for the one is of a tendency to persuade, the other is the very reverse⁵; because people put themselves on their guard, as though against one who has a design upon them, just as they would against adulterated wine. [Let your style then be such] as was the case with the voice of Theodorus as compared with that of the other actors⁶; for it appeared to be that of the character which was speaking, theirs however were foreign from the character. And the deceit is neatly passed off if one frame his nomenclature upon a selection from ordinary conversation; the thing which Euripides⁷ does, and first gave the hint of.

4. We must conceal our art.

Words to be but As however nouns and verbs are [the materials] of which the speech is made up, and as nouns admit

⁴ This was asserted book i. chap. 11, § 23, 24.

⁵ *Ubi cunque ars ostentatur, veritas abesse videtur.* Quintil. Instit. x. 3. *Artis est celare artem.*

⁶ Harris seems to have had this passage in view when he wrote the following: "'Tis in writing as in acting; the best writers are like our late admired Garrick. And how did that able genius employ his art? Not by a vain ostentation of any one of his powers, but by a latent use of them *all* in such an exhibition of nature, that, while we were present in a theatre, and only beholding an actor, we could not help thinking ourselves in Denmark with Hamlet, or in Bosworth Field with Richard.'" Philolog. Inq. P. ii. c. 4.

⁷ In this practice, Euripides stands remarkably opposed to his predecessor Æschylus.

so many species as have been examined in the Poetics, sparingly out of the number of these we must employ but sparingly, and in very few places, *exotic*⁸ and *compound* words, and those *newly coined*; where they may be employed I will state hereafter⁹: the reason [of the restriction] has been mentioned, viz. because they remove your style [from that of common life] more than is consistent with good taste. Words however of *ordinary* use, and in their *original acceptations*¹⁰, and *metaphors*, are alone available in the style of prose: a proof [that this is the fact, is] that these are the only words which *all* persons employ; for every body carries on conversation by means of *metaphors*, and words in their *primary sense*, and those of *ordinary use*. Thus it is plain that, if one should have constructed his style well, it will be both of a foreign character, and that [the art of the orator] may still elude observation, and [the style itself] will have the

sparingly
employ-
ed.

6. Words
κύρια, οικία, μεταφοραί,
proper for
prose.

⁸ Ἰλῶττα: "any word that belongs either to another language, or another dialect of the same language, and that is not naturalized by *common* and *popular use*." Twining.

⁹ In the seventh chapter he says, that they may be used with effect when you would assume the language of high excitement: see § 11.

¹⁰ Κύρια are words in *general use*, opposed to γλῶτται, outlandish expressions. Οικία, words in their *primary* and literal acceptations, opposed to μεταφοραί, words *transferred* from their *primary* meaning to some *analogous* meaning. Many words are κύρια which yet are not οικία. In fact, of the three divisions the οικία are *necessarily the fewest*; since the *proper* and original designations of *individual* objects cannot extend to a number sufficiently great to answer all the purposes of language; the resources of which must therefore be augmented by metaphorical transfer. Even these words in time become so naturalized by common use as no longer to have any thing "of the effect of metaphor upon the hearer. On the contrary, like *proper terms*" (οικία), "they suggest directly to his mind, *without the intervention of any image*, the ideas which the speaker proposed to convey by them." Philos. of Rhet. vol. i. p. 185, 186. From those sounds which we hear on small or on coarse occasions, we do not easily receive strong impressions, or delightful images; and words to which we are nearly strangers [terms of art, etc.], whenever they occur, draw that attention to themselves which they should transmit to things. Johnson's Life of Dryden, vol. vi. p. 395, edit. 1823. Vid. the whole passage.

7. Equivocal words suit the sophist, synonyms the poet.

advantage of clearness; this however was laid down to be the perfection of rhetorical language. But of all nouns, those which are *equivocal* suit the purposes of the sophist, for by their help he effects his fallacies, while *synonyms* are of use to the poet; I mean these which are both synonyms and of common usage, as *πορεύεσθαι* and *βαδίζειν*, for these two are both of common usage and synonymous to each other.

8. Metaphors. Rules for.

The nature then of each of these varieties, and how many species of metaphor there are, and also that this ornament is of the greatest effect, as well in poetry as prose, has been explained, (as I have observed above,) in the *Poetics*. In prose¹¹ however we should bestow the greater attention on them, in proportion as an oration has to be made up of fewer adjuncts than a metrical composition. Moreover the metaphor possesses in an especial manner [the beauties of] clearness and sweetness, with an air of being foreign¹²; and it is not possible to derive it from any other person¹³.

9. i. Must be κατ' ἀναλογίαν.

You must however apply, in the case both of epithets and metaphors, such as are appropriate; and this will depend on their being constructed on principles of analogy, otherwise they will be sure to appear in bad taste; because contraries show themselves to be such, particularly when set by each other. But you must consider, as a purple garment becomes a

¹¹ Πρώτα μὲν οὖν μεταφοραῖς χρηστίον· αὐταὶ γὰρ μάλιστα καὶ ἡδονὴν συμβάλλονται τοῖς λόγοις, καὶ μέγεθος, — μὴ μιν τοὶ πικρναῖς. Demetr.

¹² "As to metaphorical expression, that is a great excellence in style, when it is used with propriety, for it gives you two ideas for one;—conveys the meaning more luminously, and generally with a perception of delight." Boswell's Johnson, *Æt.* 68.

¹³ Aristotle seems to subjoin this as the crowning praise of metaphor; for he has already told us that, that is a good the principle of which centres in ourselves; so also, in the *Topica*, he lays down that ὁ μὴ ἵστί παρ' ἄλλου πορίσασθαι as a *greater good* ἢ ὁ ἵστί παρ' ἄλλου. In the third book of the *Nicomachean Ethics* he employs a similar topic of praise: ὁ παρ' ἐτέρου μὴ οἷόν τε λαβεῖν, μηδὲ μαθεῖν. See also book i. c. 7, § 33, of the present treatise.

youth, what is equally so to an old man; since the same garment does not become [both].

And if you wish to embellish your subject, see 10. you deduce your metaphor from such things coming ii. From under the same class as are better; and if to cry it a better class if to down, from such as are worse: I mean, as the cases embellish: from are opposed and come under the same genus, that the a lower if saying, for example, of a beggar, that "he *prays*," to debase. and of one who is praying, that "he *begs*," (both being species of asking,) is to do the thing which has been mentioned; just as Iphicrates called Callias "a mere *collector* to the goddess, and not a *bearer of the torch*." He however replied, "that he must needs be uninitiated himself, or he would not call him a *collector*, but a *bearer of the torch*." For these are both services connected with the goddess; the one however is respectable, while the other is held in no repute. And some one [speaks of the courtiers of Dionysius as] *Dionysian parasites*; they however call themselves *artificers*¹⁴. And these expressions are both metaphors; the one of persons who would depreciate, the other the contrary. Even robbers, now-a-day, call themselves *purveyors*¹⁵. On which principle we may say of a man who "has acted unjustly," that he "is in error;" and of one who "is in error," that he "has acted unjustly." Again, of one who has *stolen*, both that has *taken*, [in way of diminution,] and that has *ravaged* [in exaggera-

¹⁴ Διονυσιοκόλακας. This term, by which the tribe of flatterers seem to have been exposed to ridicule on the stage (κόλακας τοῦ Διονυσίου), was ingeniously enough borrowed from the name of the patron of the theatre, Διόνυσος; they however thought proper to exchange one theatrical appellation for another more respectable, and dignified themselves by the name τεχνίται. This, as well as the corresponding Latin term, *artifices*, seems to have been more commonly applied to actors, musicians, etc. See Keuchen, note on Corn. Nep. vita Chabriz, c. i. By the way, this sort of metaphorical embellishment appears not to be unusual in the present day, if it be true (as we are told) that the important personage who directs the culinary operations in great families be entitled *the artist*.

¹⁵ Compare Thucyd. b. i. *sub init.*

tion¹⁶. But the saying, as the *Telephus of Euripides* does, "that he *lords it o'er* the oars, and landing in Mysia," etc., is out of taste; for the expression, "lording it over," is above the dignity of the subject; [the rhetorical artifice] then, is not palmed off¹⁷. There will also be a fault in the syllables, unless they are significant of a grateful sound; for instance, Dionysius, surnamed Chalcous¹⁸, in his elegies, calls poetry, "*the clangor of Calliope*," because both are vocal sounds; the metaphor, however, is a paltry one, and couched in uncouth expressions¹⁹.

iii. The euphony must be attended to.

12. Again, our metaphors should *not be far-fetched*; but we should make the transfer, on the principle of assigning names out of the number of kindred objects, and such as are the same in species, to objects which are unnamed, of which however it is clear, simultaneously with their being uttered, that they are akin, as in that approved enigma,

iv. Must not be far-fetched.

"A man I once beheld, [and wondering view'd,
Who, on another, brass with fire had *glued* ²⁰."

TWINKING.

for the operation is undesignated by any name²¹, and both are species of attaching; wherefore the writer called the application of the cupping instrument, a gluing. And, generally speaking, it is possible out of neatly constructed *enigmas* to extract excellent *metaphors*: because it is on the principles of metaphor

¹⁶ See book i. chap. 13, § 9, 10.

¹⁷ Is too glaring, is seen through.

¹⁸ Were it not that Plutarch attributes this surname of Dionysius ("the Brazen") to a suggestion of his for employing brass currency at Athens, the specimen here quoted might lead us to suppose that he derived the appellation from some characteristic harshness of style.

¹⁹ Ἀσημεῖος φωνή, vox quæ vel formâ vel significatione turpis est. Ern. Lex. Tec.

²⁰ This enigma is ingenious, and means *the operation of cupping*, performed in ancient days by a machine of brass. Philolog. Inq. P. ii. c. 10.

²¹ Metaphor took its rise from the poverty of language. Men, not finding upon every occasion words ready made for their ideas, were compelled to have recourse to words *analogous*, and transfer them from their *original* meaning, to the meaning *then* required." Philolog. Inq. P. ii. c. 10.

that men construct enigmas; so that it is evident, that [if the enigma be a good one] the metaphor has been properly borrowed.

The transfer also should be made from objects 13. which are *beautiful*; beauty however of words consists, as Licymnius observes, in the sound or in the idea conveyed; as does also their inelegance. And there is moreover a third²², which does away the sophistical doctrine; since it is not the fact, as Bryso argues, "that no one speaks inelegantly, if indeed the using one expression instead of another, carries with it the same meaning:" for this is a fallacy; because some words are nearer in their ordinary acceptations, more assimilated, and have more peculiar force of setting the object before the eyes than others. And what is more, one word represents the object under different circumstances from another; so that we may even on this principle lay it down, that one word has more or less of beauty and inelegance than another: for although both words, [at the same time,] express [properties which are] beautiful, as well as such as are inelegant; yet they either express them not *qua* they are beautiful, or not *qua* they are inelegant; or granting they do, yet they express them, the one in a greater, the other in a less degree. But we are to deduce our metaphors from these sources;—from such as are beautiful either in sound, in meaning, or [in the image they present] to the sight, or any other sense. And there is a difference, in the saying, for instance, "the *rosy-fingered* Aurora;" rather than "the *purple-fingered*;" or, what is still worse, "the *crimson-fingered*."

Also in the case of *epithets*, it is very possible to derive one's epithets from a degrading or disgraceful view of the case; for instance, "the murderer of his mother²³:" and we may derive them from a view on

v. They must be borrowed from beautiful objects. Beauty of words consists in the sound. The idea. The application.

14. Epithets to be used in the same way.

²² We may perhaps term this third beauty of words, *delicacy* in their application.

²³ Nominibus mollire licet mala; *fuca* vocetur
Nigrior Illyrica cui *pice* sanguis erit, etc.

Ovid. Ar. Am. l. ii.

the better side; as, the avenger of his father." And Simonides²⁴, when the victor in a race by mules offered him a trifling present, was not disposed to write, as though feeling hurt at writing on *demi-asses*; when, however, he offered a sufficient present, he composed the poem—

Hail! *Daughters of the generous Horse,*
That skims, like wind, along the course, etc. HARRIS.

15. ὑπο-
κορισμός.

and yet they were daughters of asses as well. Again, it is possible to express the self-same thing diminutively. And it is the employment of diminutives which renders both good and evil less; just as Aristophanes jests in "The Babylonians;" using, instead of gold, "a tiny piece of gold;" instead of "a garment," "a little garment;" instead of "reproach," "puny reproach;" and instead of "sickness," "slight indisposition." We ought, however, to be careful, and always keep to the mean in both cases.

CHAP. III.

On Frigidity of Style.

1. Four
causes of
a frigid
style.
i. Com-
pound
words.

FRIGIDITY¹, as dependent on the style, consists in four points. In the use of compound words; like Lycophron², where he says, "the many-faced heaven," and "the mighty-topped earth," and "the narrow-pathed shore." And as Gorgias used the expression, "a beggarly-mused flatterer," and "the strictly-bound-by-oath and fully-sworn men." Or like Alcidas, [who talks of] "the soul replete with anger, and the visage waxing fire-coloured." Again,

²⁴ See Bentley on Phalaris, p. 156. Zancleans and Messenians.

¹ Having in the last chapter discussed the *beauties* of style as dependent on single words, he now proceeds to consider its *defects*, as they arise from the single words employed: see note on chap. ii. § 2.

² This Lycophron was a sophist, and is not to be confounded with the poet who flourished under Ptolemy Philadelphus.

"he supposed their zeal would be completion-working;" and "he settled a completion-working persuasiveness of speech;" and "the azure-hued level of the main." For all these expressions, by reason of their being compounded, appear poetical³.

This, then, is one cause: also the employment of foreign idioms is one; as when Lycophron calls Xerxes, "prodigious hero," and Sciron, "baneful man⁴;" or Alcidas, when he says, "gambollings in poetry," and "nature's improbity," and "whetted by unrestrained rage of soul."

2. ii. Use of foreign words.

A third description of frigidity consists in the employment of epithets either too long, out of place, or too frequent; for in poetry, indeed, it is becoming enough to say "white milk;" in prose, however, it is rather bad taste. Some also, should there be a superabundance of them, betray [the rhetorician's art], and make it evident that the whole is a mere made-up thing; this, however, you may occasionally avail yourself of, since it produces a departure from the ordinary style, and renders the diction foreign. Yet ought we to aim at the mean; for [the too free indulgence in the licence] does more harm than the speaking carelessly; for the one has no beauty, the other has [positive] fault. Hence it is that the writings of Alcidas appear frigid; for he employs epithets *not as the seasoning, but as the food*, with such profusion does he scatter them, and those both too long, and where the meaning is self-evident: thus, he does not say the sweat, but "the moist sweat⁵:" nor to the

3. iii. Epithets too long, too frequent, or out of place.

³ Take the following specimen: "To so vast a height did the *never-too-much-to-be-extolled* reputation of this eximious man," etc. Sir Thomas Urquhart's Jewel. See also "The Rejected Addresses;" Art. "Address of the Editors of the Morning Post."

⁴ The expression in the original alludes to Sinnis, a famous robber, whose peculiar method of torture it was to bind his victims to the boughs of trees forcibly bent together, and suddenly loosened, so that the violence of their reflex tore the limbs from their bodies. However a *Σιννις δρυς* was probably not more elegant in Greek, than the expression "a Turpin" is considered in English.

⁵ Victorius thinks that Boccaccio, in his Decameron, has

Isthmian games, but "to Isthmus' full assemblage:" nor does he speak of laws; but of "the laws, the sovereigns of states:" nor, of the race; but of "the soul's rapid impulse:" nor of a museum; but of "taking nature's museum with you:" and of "rueful care of the soul." Nor does he speak of favour; but of "the fabricator of a *whole people's* favour:" and of "a dispenser of the pleasure of his audience." [He would not tell you] of branches; but "amid the branches *of the wood* did he conceal it:" nor, that he covered his person; but "the *nakedness* of his person:" and of "desire the counter-rival of the soul:" (for this is at once a compound word and an epithet, so that it becomes poetry:) and of "such an ill-omen'd excess of improbity." Hence those who express themselves with this poetic air, produce by their want of taste both the ridiculous and the frigid, and from their loquacious prosing, become deficient in clearness; for whenever one unnecessarily obtrudes any thing on an auditor who already apprehends him, putting an end to all perspicuity, he produces obscurity.

Compound words suited to Dithyrambic poetry; exotic to epic; metaphors to the drama.
4. iv. Improper metaphors.

People, however, do employ compounds, when the subject is without a proper appellative, and the composition is easily effected: for instance "*pastime*;" but if it occur frequently, it is decidedly poetical. Wherefore a style characterized by compounds, is most available to the Dithyrambic poets; for such words are sonorous: exotic words are most useful to epic poets⁶; for they have something dignified and superb: metaphor however to iambic verse; for [dramatists] now employ it, as has been already stated.

Moreover, fourthly, frigidity originates in metaphor; for there are even metaphors which are unbecoming: some, from their being ridiculous⁷; for the writers of employed too profusely this poetical ornament. Comment. in Demet. Phal.

⁶ May we not instance Milton's *Hebraisms*?

⁷ A striking instance of this occurs in two well-known lines, in which Winter is said,

"To *glaze* the lakes, and *bridle* up the floods,
And *perriwig* with *wool* the *bald-pate* woods."

comedy employ metaphor : others, from their being too dignified, and having too great an air of tragedy⁸; and should they be far-fetched, they become indistinct; like Gorgias, [when he talks of] things as *wan*, and [again] as *ruddy*. "You have *sown* in shame, and *reaped* in ruin;" for this has too much the air of poetry. And as Alcidamas, [who calls] "philosophy the *rampart* of the laws;" and "the *Odyssey* a beautiful *mirror* of human life⁹." Again, "introducing no such gambolling in poetry:" since all these expressions, for the reasons above-mentioned, are destitute of persuasive efficacy. But what Gorgias said on a swallow, when in its flight it had alighted on him, was in the best style of tragedy; for he exclaimed, "Oh! fie *Philomela*;" for to a bird, indeed, the act was not unbecoming, to a young lady, however, it would have been. So that he reproached her neatly enough, speaking of her as what she *had* been, not as what she then *was*.

CHAP. IV.

Of Simile.

THE simile, too, is in fact metaphor; for the difference is trifling: for when [the poet] says of Achilles, "*Like* a lion he leaped on them," it is a simile; but when he says, "A very lion he leaped on them," it is a metaphor: for since both are brave, [the poet,]

1. Simile:
how it differs from
a metaphor.

⁸ Such was the language of the poet who, describing the footmen's flambeaux at the end of an opera, sung or said,

Now blazed a thousand flaming suns, and bade
Grim night retire.——

Harris, Philolog. Inq.

⁹ However correct Mr. Harris's taste may be in considering this an elegant metaphor, it seems extraordinary that he should quote the passage thus: "According to Aristotle, the *Odyssey* of Homer was elegantly called by Alcidamas, καλὸν ἀνθρωπίνου βίου κατόπτρον, etc." Philolog. Inq. P. ii. c. 10. Surely Aristotle does not consider this as an *elegant* metaphor.

2. Is useful in prose. making the transfer, has spoken of Achilles as a lion. The simile is useful too in prose, though seldom, since it carries with it the air of poetry. And you must introduce them just as you would metaphors; for they are metaphors differing in that particular which has been stated¹.

3. Instances of similes. The following are similes; viz. that which Andro- tion employed against Idrieus, that "he was like pup- pies loosed from their chain;" for they rushing at people bite them, and Idrieus, too, now that he was discharged, was a dangerous person. Again, as The- odamus, in a *simile*, compared Archidamus to Eux- enus, without his knowledge of geometry; on the principles of similar ratios: for [*conversely*] Euxenus would be Archidamus, had [the latter] a knowledge of geometry. Also the instance which occurs in the Politeia of Plato, that those who spoil the dead are like young dogs, "which bite the stone, without touching the person who throws it." Also the [*si- mile*] which he employed against the populace, "that it was like a pilot, strong indeed, but rather deaf." And of the metres of poets, "they are like those in the prime of youth who are without beauty;" for the latter having lost their freshness, and the former their numerical arrangement, are no longer like the same thing. Also the simile of Pericles against the Samians, [who said] "they were like young children, who indeed accept the sop, but still cry:" and against the Bœo- tians, that "they were like holm-oaks; for these holm-oaks are cut down by their own means², as were also the Bœotians, in their contests with each

¹ Viz. the insertion of the particle denoting similitude, ὅς λῆον, instead of λῆον ἐπόρουσεν.

² Victorius's conjecture as to the means whereby these trees destroy themselves appears rather forced. May there not be some allusion to the *original* of the lately discovered fable of Phædrus; in which the trees, having been made to dispute about providing a handle for the woodman's axe, after seeing the fatal use he makes of the present, acknowledge that they deserve that destruction which they had provided for them- selves? The Latin fabulist himself seems to think that his master, Æsop, had carried matters too far in making trees speak, since he deems it necessary to apologize:

other." And what Demosthenes used before the populace, that "it is like those who are sea-sick when on board." So, too, Democritus likened the orators to nurses, "who, swallowing the sop themselves, besmear the infants with spittle." And in the same way Antisthenes likened Cephisidotus the slim to frankincense, for "in its *consumption* it spreads universal delight."

[*Thus the simile is metaphor*], for it is free to you to enunciate all these both as metaphors and as similes. So that it is plain that as many as, when enunciated as metaphors, are approved, will also become similes; and [*vice versâ*] the similes, when without the note [of similitude], will become metaphors. But the metaphor, which is constructed on the principle of similar ratios, ought always to admit of paying back [the borrowed term³]; as also in other cases, and in that of [metaphor], from species to species: for instance, if a cup be called "the *shield* of Bacchus," it is also proper to call a shield "the *cup* of Mars." Of these materials, then, is a discourse made up.

4. Metaphors must admit of paying back the borrowed term.

CHAP. V.

On the Necessity of speaking the Language with Purity.

BUT purity in speaking your language¹ is the foundation of all style; and this depends on five particulars. First, on the connective particles², whether

1. Purity of style depends on five points.

"Calumniari si quis autem voluerit,
Quod arbores loquantur," etc. Phæd. Prol. lib. i.

² A metaphor is said *ἀντιπροσδιδοῦναι*, when it may be inverted: for instance, just as you would call a pilot, "the ruler of his vessel;" so may you call a ruler, "the pilot of the state." Ern. Lex.

¹ Aristotle having in the last three chapters given us the necessary information respecting the *materials* of style, its single words, proceeds now to treat of the *arrangement* of those materials in whole sentences.

² One is surprised to find another great critic of antiquity

2. i. On
the con-
nective
particles.

one pay them back or not, just as they are of a nature to precede or follow, and as each requires; thus, *although* and *on my part*, require *yet* and *on his part* [to follow them]. And it is necessary to make a return of the one to the other while it is yet recollected, and not to suspend them at too great intervals: neither should we [insert another] connective before making a return to the connective which already has a claim on us; for in very few instances is this appropriate. "But I, after he spoke to me, for Cleon came up beseeching me and putting it to me, went, taking them along with me:" for in these words many connectives are thrown in before the first connective has been paid back; and if the interval between the words "*I*" and "*went*" be great, a want of clearness takes place. One source then of correctness originates in the connectives. And a second, in the expressing yourself in the appropriate terms, and not in generals³. A third, in terms which are not ambiguous: this, however, only when you do not deliberately choose the opposite; the very thing which they do, who, whilst they have nothing to say, yet affect to say something marvellous; for such persons, in their invention of somewhat to say, give vent to these terms, just as Empedocles did. For the circumlocution by its length imposes on people, and the auditors are affected in the very self-same way as the populace in transactions with soothsayers; for when they utter their ambiguities, they yield assent as they go on; [as in the famous oracle], "Cræsus having crossed the Halys will overthrow a mighty empire." And it is because the chance of mistake is less, that soothsayers express themselves *in generals* on their subject: for in "even and odd"⁴ he will more frequently be right who cries [only *generally*]

3. ii. In
using
terms dis-
tinct, and
not vague.
4. iii. In
terms not
ambigu-
ous.

declaring it unnecessary to be very particular in this respect:—
χρή δὲ καὶ τοὺς συνδέσμονες μὴ μάλα ἀνταποδίδοσθαι ἀκριβῶς, οἷον τῷ μὲν, τὸ δέ. Demet. Phal. περὶ ἑρμηνείας, § 53.

³ By *τοῖς περιέχουσιν* is meant, not *circumlocutions*, but the use of a general instead of a particular term, as *ἐρυθρὸς* in the place of *φοῖνιξ*, which of course much weakens the idea.

⁴ *Ludere par impar.* Hor. Sat. lib. ii. 3, 248.

either "*even*" or "*odd*," than one who would [*specify*] the exact number; and so one who predicts simply that a thing will happen, than he who would subjoin *when*⁵. On which account the soothsayers never add the further distinction of "*when*." All these errors then are similar; so that, unless it be with a view to some such end, they are to be avoided.

The fourth essential is the preserving the distinction which Protagoras marked out between the genders of nouns, viz. masculine, feminine, and neuter; for it will be necessary to make these correspond correctly. Thus, "She, having come and having conversed, departed."

5. iv. In the proper genders.

The fifth consists in correctly quoting the plural, dual, and singular numbers. "They, coming up, commenced beating me."

6. v. In the proper numbers.

In a word, the written style ought to be easily read and understood; and in these requisites it is the same [as that of recitation]; the very qualities however these which numerous connectives do not possess: neither the compositions which it is not easy to point, as those of Heraclitus. For the pointing of Heraclitus' works is quite a task, from its being far from clear whether words refer to those which precede or those which follow them⁶. For example, in the beginning of his work, "Of reason existing always men are ignorant:" for it is not clear to which branch of the sentence we should point off the "always."

Four general rules.
i. Style ought to be easy to read and to understand.
ii. It must not depend on the punctuation.

This moreover produces a solecism; the failure in paying back the idea, if, [in the case of two words,] you do not bring each under an expression adapted to both⁷: for example, to the words "colour

iii. In an expression of more than one word we must

⁵ Hence the distinguishing superiority of the prophecies of our Saviour's coming; for in them not the simple fact alone, but the very period at which it should occur was specified.

⁶ We can nowhere find a more striking instance of the want of clearness to which a neglect of these cautions gives rise, than in book ii. chap. 18, of the worthy Stagyrte's own work.

⁷ Or, to take his own illustration, in speaking of the objects of different senses, be careful not to annex a verb which denotes the operation of one sense alone. This is well exposed

use a verb applicable to all.
iv. There must be no long parenthesis.

or sound," the expression "seeing" has not a common reference; whereas the expression "perceiving" has. Again, sentences become indistinct, if, delaying to thrust in many intermediate remarks, you do not put first and state [what naturally comes first]. For example, "For I intended, after I had conversed with him on this and that subject, and so on, to depart;" not, [stating it naturally thus,] "For I intended to depart;" and afterwards introducing, "after I had conversed on this and that, and so on."

CHAP. VI.

On Elevation of Style.

1. Elevation produced by seven expedients.

i. Using the definition in place of the noun. The reverse produces abruptness.

2. ii. Avoiding either, if out of taste.

3. iii. Illustration by metaphor and epithets.

4. iv. By using the plural for the singular.

5. v. As-

THE following expedients contribute to elevation of the style, viz.—the employing the definition instead of the noun; saying, for instance, not "a circle," but "a plane superficies, whose circumference is at all points equidistant from the centre." The reverse, however, viz. the use of the noun instead of the definition, contributes to abruptness.

Again, [the avoiding either,] if it be indelicate or unbecoming; i. e. using the noun, if the indelicacy be in the definition; or the definition, if it be in the noun.

Also, the illustration of the subject by metaphor and epithets, guarding, however, against what savours of poetry. And the putting what is but single as many, the thing which the poets do: though the haven be but one, yet they tell you of "Grecian havens;"—and, "the letters' many-opening folds¹."

Also, the not bringing all your words under a in the Spector:—"I have known a hero compared to a thunderbolt, a lion, and the sea; all and each of them proper metaphors for impetuosity, courage, or force. But by bad management it hath so happened, that the thunderbolt hath overflowed its banks; the lion hath been darted through the skies; and the billows have rolled out of the Libyan desert." No. 595.

¹ Eurip. Iph. in Taur. 727.

common particle, but assigning to each its own: "This woman, *this* my wife." And the expressing yourself with a connective; but if abruptly, without a connective indeed, though not unconnectedly; for instance, "Having departed and having spoken to him;" or, "having departed, I spoke to him."

The precept of Antimachus, too, is of service, viz. the drawing your expressions from absent qualities², which he does in celebrating the hill Teumessus, [commencing,] "There is a certain little hill visited by the winds³;" for thus the subject is carried on to infinity. And this expedient holds good alike in the case of qualities which are good, and such as are bad⁴, just as the subject has them not, in whichever way it may be of service. Hence the poets deduce their expressions⁵, the "stringless" and the "lyreless melody;" for they build their epithets on privatives. And this expedient is also approved in analogical metaphors; for instance, the saying of "a trumpet," that it is a "lyreless harmony."

² How much may be made of a mere summary of negations, will readily be acknowledged by those who have read Rochester's poem on *Nothing*; and another in Latin on the same subject (if subject it may be called), by Passerat, a poet and critic of the sixteenth century, in France. This last is usually subjoined to Johnson's Life of Rochester.

³ These words, it will be observed, do not in themselves afford an instance of the precept here recommended; but, as it appears that the work of Antimachus was well known, they were probably intended as a hint at a passage in which an illustration was to be found. Of Aristotle's quotations in general, it may be remarked that, however naturally we might expect to meet with beautiful passages, in illustration of the several beauties of style which he successively discusses, they present but a series of allusions (now obscure and scarcely intelligible), to passages which were easily accessible to his audience, but which have been lost to us amid the general wreck of ancient literature. See Victorius's remark, cap. iii. § 3.

⁴ Whether in praising or blaming.

⁵ It should be remembered that these *negative* epithets are very common to the Greek poets. Victorius points out many instances: as, *κῶμον ἀναυλότατον*, Eurip. Phœn. 818; *θίασον ἀβάκχιντον*, Orest. 319; *μηνυτῆρος ἀφθιγκτον*, Æsch. Eumen. 245; *ἀπτιροῖς πατήμασιν*, *ibid.* 250, etc. There is a fine instance of this *negative* mode of explaining a metaphor in Isaiah, li. 21.—"Thou drunken, *but not with wine*." Twining.

signing to each word a distinct particle.

6. vi. Using connectives, but

if abruptly without them.

7. vii. By negative qualities.

CHAP. VII.

Of the becoming in Style.

1. What constitutes good taste in style is, that it be *παθητική*, *ἡθική*: and both suitably to the subject-matter.
2. *παθητική* renders the audience sympathetic.
3. But [the style] expressive of feeling, supposing the case be one of assault, is the style of a man in a passion; if, however, it be one of loathsomeness and impiety, the expressing yourself with disgust and painful caution; if, however, the case demand praise, with exultation; if pity, with submission; and so on
4. in the other cases. And a style which is appropriate, moreover, invests the subject with persuasive efficacy. For the mind is cheated into a persuasion, that the orator is speaking with sincerity, because, under such circumstances, men stand affected in *that* manner. So that people suppose things to be even as the speaker states them, what though, in reality, they are
5. not: and the hearer has a kindred feeling with the orator, who expresses himself feelingly, even should he say nothing to the purpose; availing themselves of which, many bear down their hearers in the storm of passion.
6. *ἡθική* renders the speech appropriate to the audience.
- But moreover, this mode of showing by means of signs is expressive of character; because, on every condition and habit of life, is consequent a language suited to it. I use the expression condition, in reference to the stage of life; as youth, manhood, or age; and [to the sex], as man, or woman; and [to na-

¹ Might we borrow an expression from the language of the painter, we should say, "*in proper KEEPING with.*"

tion], as Lacedæmonian, or Thessalian. [I mean] 7. by habits, those conformably to which one is of a certain character in life; for it is not according to every habit that the life assumes a certain character: if then one express himself in the language appropriate to the habit, he will produce the effect of being characteristic; for a rustic and a man of education, will express themselves neither in the same words, nor in the same manner. And the auditors are affected, in some way, by that feeling of which the declaimers avail themselves, till it nauseates; [putting it to their audience thus], "who knows not?"—"all men know it." For the auditor acknowledges with a kind of confusion, that he participates [in that information] which all the rest of the world possess. The employment of them opportunely, or inopportunely, is, however, a consideration common to every species [of ornament]; but for every excess [in them], there is that corrective which is in the mouth of every body; for, of yourself, you should append a reproof on yourself; for it appears in reality [an ornament], at least since the use of it does not escape the notice of the speaker himself. Further, the speaker is not at once to employ every thing which is proportionate; for thus the hearer has the deceit passed off on him. I mean that, if the terms be harsh, he is not to employ a harsh tone and expression of countenance, and the other peculiarities [of harshness]: if this caution be not observed, [our artifices] severally appear what they really are. But if he employ some and not others, without observation he produces the same effect. Still, if expressions of softness be uttered harshly, and such as are harsh with softness, they become divested of efficacy to persuade. But compound words, and a plurality of epithets, and foreign idioms, are appropriate chiefly to one who speaks under the excitement of some passion;—for with one, [for instance,] who is affected by anger, we have a fellow-feeling in his calling his wrongs "heaven-measuring," or "prodigious:" they are so, too, when one is already master of his audience, and has

8. General rules.

9. We must correct ourselves as it were.

10. We must occasionally neglect the rules of art.

11. We must not use compound words except when excited.

wrought them up to enthusiasm, either by panegyric or invective, by [the excitement] of anger or friendly feeling; the which Isocrates does in "The Panegyric," near the conclusion;—"the record and remembrance;" and, "men who had the spirit—." For the speaker, in a transport of enthusiasm, gives utterance to expressions such as these; so that the audience also, being forsooth similarly affected themselves, readily welcome them. Wherefore they are adapted to poetry; for poetry is the language of enthusiasm.

It is, then, either in this way [that we are to employ poetical expressions], or *in irony*; as Gorgias was in the habit of doing; and [as Socrates does] in the Phædrus [of Plato].

CHAP. VIII.

Of Rhythm.

1. The style must have rhythm, but not metre.

- THE modelling of the diction should, however, be neither metrical nor without rhythm¹: for the first has no persuasive efficacy (since it appears to have been got up), and at the same time it also draws off [the attention]; for it causes one to fix his attention on the similarities of cadence, when they will recur again; just in the way that little children anticipate the crier; (for when he demands,—“Whom does this freedman choose as his patron?”—[they exclaim], “Cleon:”) that, however, which is without rhythm, has no measure. The diction ought, however, to be measured, yet without metre; for what is destitute of measure is displeasing and indistinct. But by number all things are measured; and in modelling the diction, the number is rhythm¹, of which

¹ In pursuance of that systematic plan which we have remarked that Aristotle has adopted in considering the subject of style, he proceeds here to treat of it as addressed to the ear.

² “*Rhythm* differs from *metre*, inasmuch as rhythm is pro-

the metres are certain divisions³. Hence the sentence 3. should possess rhythm, though not metre; for then it will become verse; and its very rhythm should be without preciseness. This, however, will be the case if, up to a certain point, it be preserved.

But of the rhythms, the heroic is stately, and not 4. adapted to conversation, and deficient in varied cadence; the iambic, however, is the very style of the multitude; whence it is that persons in conversation give utterance to iambic lines, most of all metres. But [in a speech] there should be a degree of stateliness and departure from [the ordinary phrase]. Yet the trochaic metre is too tripping⁴; and all tetrameters show it; for tetrameters are a kind of dancing rhythm⁵. But the pæan remains, which orators, commencing with Thrasymachus, began to employ; they were not, however, able to explain what it was. Yet the pæan is the third, and comes next to those [rhythms] which have been mentioned; for it is as *three to two*. But of the former [rhythms, the ratio is] of the one, [the heroic,] as *one to one*; of the others, [the iambic and trochaic,] as *two to one*⁶. But

portion applied to any motion whatever; metre is proportion, applied to the motion of *words spoken*." Harris. "The *rhythm* of a dactyl and anapæst is the same; the *metre* is different. The distinction is similar to that of permutations and combinations in arithmetic." Seale, *Analysis of Greek Metres*. Metre, in short, cannot exist independently of *articulate sounds*; while rhythm may be heard in any proportionate succession of sounds; as in the ringing of hammers on an anvil, or the flapping of the wings of a bird.

³ Metre is distinctly stated, in the Poetic, to be a species of rhythm. Harris also says, "All metre is rhythm, yet all rhythm is not metre." Philolog. Inq. P. ii. c. 2.

⁴ Twining illustrates it by the following line:—

"Jolly mortals, fill your glasses; noble deeds are done by wine."

⁵ Κορδακισμός—namby-pamby: κόρδαξ was a species of immodest, lascivious dance.

⁶ As the Greeks considered a *long* syllable as equivalent to two times, and a *short* only to one, two short syllables were of course equivalent to one long; so that, in either of the feet of which heroic metre is composed, a ratio of equality exists; (for instance, in the dactyl, — : — :: 2 : 1 and 1; or, in the spondee, — : — :: 2 : 2.) The same observation will explain the

5. The
pæan is to
be retain-
ed.

6. Two
sorts of
pæan.
The first

ing.
The se-
cond to
the con-
clusion.

next to these ratios ranks that of whole and half⁷; and this is the pæan. The others then are to be abandoned for the reasons stated, and because they are resolvable into verse: the pæan is, however, to be retained; since out of that only rhythm, of all which have been mentioned, it is not possible to construct any metre; so that [in employing it] most of all rhythms, an orator will elude detection⁸.

At present, indeed, the orators employ one pæan, [as well in concluding] as on opening; the conclusion, however, ought to differ from the opening [of a speech]. And there are two species of pæans, opposed to each other; whereof the one is adapted to the opening, (just, in fact, as they employ it;) this is that one of which the long syllable is first, and the three short ones at the end, [as in the word] Δαλδγένες, and Χρυσέοκομα. The other, however, contrariwise, is that whereof the three short syllables are first, and the long at the end, [as in the conclusion of the line]—

ratio of the iambus, (˘ : - : 1 : 2,) and the trochee (- : ˘ : 2 : 1). Now the pæan (— : - : 3 : 2) holds a mean ratio between that of the heroic metre on the one hand, and that of the iambic and trochaic respectively on the other; the ratio of the former being merely that of equality, while the ratio of the latter was too much in excess.

⁷ Ἡμιόλιος—sesquiduplex—a whole and half besides;—“Necesse—partem pedis aut æqualem esse alteri parti; aut altero tanto, aut sesqui esse majorem. Ita fit *æqualis*, dactylus; *duplex*, iambus; *sesquiple*x, pæon.”—Cicero, Orat. c. 56.

⁸ Though the illustrations already given have been perhaps too prolix, I cannot forbear transcribing the following passage from Harris, in illustration of the whole subject:—“The rhythm of the heroic foot is one to one, which constitutes, in music, what we call *common time*; and in musical vibration, what we call the *unison*. The rhythm of the iambic is one to two, which constitutes, in music, what we call *triple time*; and in musical vibration, what we call the *octave*. The rhythm next to these, is that of two to three, or else its equivalent, three to two; a rhythm compounded of the two former times united; and which constitutes, in musical vibration, what we call the *fifth*. ’Twas here then they discovered the *foot* they wanted; that *foot* which, being neither the heroic nor the iambic, was yet so far connected with them, as to contain virtually within itself the *rhythms* of them both.”—Philolog. Inq. P. ii. c. 2.

Μετά δὲ γαῖν ὕδατά τ' ὠκεανόν' ἠφάνισέ νύξ.

Afterwards night obscured both earth, and water, and ocean.

This [pæan] makes a good conclusion; whereas the short syllable, owing to its being incomplete, renders the sentence mutilated. But it is right to break off with a long syllable, for your conclusion to be clearly marked, not by means of the *amanuensis*, nor merely by annotations on the margin, but by means of the *rhythm*.

That, then, the diction should be conformable to rhythm, and not deficient in it, the particular rhythms too which will render it so conformable, and these under what arrangement, have been stated.

CHAP. IX.

*Of Style continuous and its opposite*¹.

THE style must needs be either *continuous*, and united by means of connectives, just like the protracted odes of the dithyrambic poets²; or *reflex*, and like the antistrophic odes of the old poets.

Now the *continuous* style is the old style, as, "This is the exposition of the historical research of Herodotus, of Thurium³," etc. For formerly indeed every

1. Style is of two sorts, *εἰρομένη*, *κατασπασμένη*.
2. i. *εἰρομένη*, or uninterrupted.

¹ Style is here considered as addressed to the intellect of the auditor.

² *Αἰεὶς εἰρομένη*, in which the sentence has no other unity than that which copulatives give it, nor any other measure than the completion of the sense, and the necessity of taking breath; or, as Cicero in few words so admirably describes it, "illa sine intervallis loquacitas perennis et profuens." This Aristotle compares to what he calls the *ἀναβολαὶ* in dithyrambic poetry; meaning, I think, evidently the long, irregular, protracted odes of the more modern dithyrambic poets: for the word *ἀναβολή*, here, does not, I believe, signify *exordium*, *proemium*, as usually understood, but was, probably, the name by which *ὠδαὶ μακραὶ καὶ πολυειδεῖς* were distinguished, etc.

—Twining, note 17.

³ Herodotus, though a native of Halicarnassus, went latterly as a colonist to Thurium.

Defini-
tion of it.

one employed it, but now very few. I call that continuous, which in itself has no termination, should not the circumstance under narration have been terminated. But it is unpleasant, from its being indefinite; for all like to descry the end. Wherefore it is that racers pant and faint away *just at the turn*; for before, while they have the goal in view before them, they do not tire. The continuous style, then, is this.

3. Reflex
style in
periods,

But the *reflex* is that which consists of periods. I call a period a form of words which has independently in itself a beginning and ending, and a length easily taken in at a glance. A diction of this description is pleasing, and easily conveys information: now it is *pleasing* from its being the opposite of that which is indefinite⁴; and because the hearer all along supposes that he is securing something, from the circumstance that something is constantly finished off for him; but the not foreseeing nor despatching any thing is unpleasant: and it *easily conveys information*, because it is easily remembered; this, however, is the case, because the diction which consists of periods has number, which of all things is most easily recollected. And hence every one remembers verse better than prose; for it has numbers by which it is measured. The period ought also to be terminated with the sense, and not to be interrupted like this verse of Sophocles,—

is pleas-
ing.

Easily re-
member-
ed.

4. The pe-
riod must
finish
with the
sense.

⁴ “—While other sentences are indefinite, and (like a geometrical right line) may be produced indefinitely, *the period* (like a circular line) is always circumscribed, returns and terminates at a given point. In other words, while other sentences, by the help of common copulatives, have a sort of boundless effusion, the constituent parts of a period have a sort of reflex union, in which union the sentence is so far complete, as neither to require, nor even to admit a further extension. Readers find a pleasure in this grateful circuit, which leads them so agreeably to an acquisition of knowledge.” Harris, *Philolog. Inq.* P. ii. c. 4. He quotes the commencement of his own *Hermes* and *Philosophical Arrangements*, with the opening of Cicero's *Offices*, Demosthenes' *Oration* concerning the Crown, and that of the *Panegyric* by Isocrates, (whom he calls the father of periods,) as instances of periodical style.

"This is Calydon, land of the territory of Pelops⁴."

For by dividing it is possible to understand the contrary [of the fact], as in the case of the instance cited, that Calydon is in Peloponnesus.

A period either *consists of clauses*, or is *simple*.⁵ A period is either in clauses or simple. But the period consisting of clauses is a mode of speech perfect and distinct, and easily pronounced at a breath; not, however, at the point of division, like the fore-mentioned period, but altogether. And a clause is one subdivision of it. By a *simple* period, I mean one consisting of a single clause.

But neither the clauses nor the periods ought to be either curtailed or prolix; for their brevity often causes the hearer to feel a hitch; since it needs must be, if while he is yet [in thought] hastening onward, that limit of termination which he conceives within himself happens to be thrown back by the speaker's ceasing, that a kind of hitch, as it were, occurs, owing to the impulse backward. Those, however, which are prolix cause the hearer to be left behind; just as they who make the turn too far on the outside of the goal, for they don't keep up with those walking with them⁶; and in a similar way, periods which are prolix grow into an oration, and are something like a desultory ode⁷. So that that occurs which Democritus, the Chian, joked Melanippides about, viz. that he produced desultory odes instead of antistrophes. "A man in framing a nuisance for others, frames one for himself; and long tedious odes are the greatest nuisance to him who produces them⁸;" for it is appropriate enough to hold such language as this respecting the framers of prolix clauses. But those which are brief in their clauses do not, in fact, become periods; therefore they draw on the hearer by fits and starts.

6. They must not be curtailed.

Nor prolix.

⁴ This line is found quoted by Lucian, as taken from a drama of Euripides, no longer extant, entitled *Meleager*.

⁵ Probably an English sergeant would have illustrated this by a column wheeling into line.

⁷ See the note on § 1 of this chapter.

⁸ A neat parody this on Hesiod, *Opp. et D.* v. 263.

7. Style
of periods
is either
διηρημένῃ
or ἀντι-
κειμένῃ.

Of style which consists of periods, one species is merely divided [by disjunctives], another has an antithesis. Simply *divided*, as, "I have often felt surprised at those who convened the general assemblies *and*⁹ established the gymnastic contests." The style, however, which *has antithesis*, is that in which, in each clause, either there is one contrary put in conjunction with another, or the same is linked in connexion with contraries: as, "They benefited both, as well those who *remained behind*, as those *who joined the expedition*; since they made acquisitions for the latter *more* than they possessed at home; while to the former they abandoned, in what remained at home, a full *competence*." The ideas set in opposition are,—staying behind,—joining the expedition; competence,—more. [And in this sentence]: "So that both to those who *wanted money*, and to those who *desired to enjoy it*," etc. Here *enjoyment* stands opposed to *acquisition*. And again: "It happens frequently in these cases, that while the *prudent fail*, the *simple succeed*."—"Forthwith, indeed, they claimed the prize of highest valour, and *not long after* they gained the sovereignty of the sea."—"That he *sailed*, indeed, through the *main land*, and *marched* across the *sea*; *joining with* a bridge the Hellespont, while *he channelled* through mount Athos." Again: "That, citizens though they were *by birth*, they were yet deprived by law of their franchise in the *city*."—"While some of them *miserably perished*, others were *gracefully preserved*." Again: "That *privately*, indeed, he employed barbarian slaves; while *in public* he allowed many of the allies to be in slavery:—

8. "Either they would *possess* it while alive, or *leave it behind* when dead." Again, the expression which some one made use of against Pitholaus and Lycophron in the court: "They *sold* you, indeed, when they were at home; but when they were come to us, they were themselves *bought*."—For all these [antitheses] produce the fore-mentioned effect.

⁹ "In hoc loco τὸ καὶ non tam *copulandi*, quam *discernendi* vim habet." Ernest. Lex. Tech.

And a style of this description is pleasing, because contraries are most easily apprehended, and, when set by each other's side, they become still more easy of apprehension : and because they bear a resemblance to a reasoning process ; for the elenchus is an inference of contraries. Such, then, is *antithesis* :—but an *equipoise* occurs if the clauses be equal ; and *alliteration*, if each of the clauses have its extremities similar : and [this similarity] it needs must have either at the beginning or ending ; and the beginning always has original words [similar¹⁰] ; but the ending, either last syllables [which are similar], or inflections of the same word, or the same word itself. [Instances of alliteration] at the beginning, are as follow¹¹ :

ἈΓΓῶν γὰρ ἔλαβεν ἈΓΓῶν παρ' αὐτοῦ,
For he received from him land untill'd.

Δωρητοὶ τ' ἔπλεοντο, παρόρητοί τ' ἔπλεσσιν,
By presents pleased, by words appeased.

And at the ending, thus :

Ὁόθησαν αὐτὸν παῖδιν τιτοΚΕΝΑΙ, δὲ αὐτοῦ αἴτιον γεγονΕΝΑΙ.

They thought that he was the father, but that there was a cause for it.

Ἐν πλείσταις φρονΤΙΣΙ, καὶ ἐν ἐλαχίσταις ἐλπΙΣΙ.
Anxiety at the highest, hope at the lowest.

Inflections of the same word,—“What ! give him a *brazen* statue who did not deserve a *brass* farthing ?”
The same word,—“In his life you spoke *ill* of him,

¹⁰ If you would produce alliteration at the *commencement* of a clause, you must employ words which, in *their original form and previously to any inflection*, are similar ; since in that situation, a similarity will fail of striking you which depends merely on one or two syllables at the *end* of the words, such as may be found to exist, in a greater or lesser degree, between *all* nouns of the same declension, etc. (e. g. Latin nouns of the third declension ending in *o*) ; at the *conclusion*, however, of a clause, a weaker and less striking similarity will suffice. Compare his *first* example with those following the words *ἐπὶ τελευτῇς*.

¹¹ As no English words occur to me which will at once exemplify the alliteration, and prove a literal translation of the Greek, I have set down the original words as I find them. They have been given in Latin thus,—*AGRum accepit AGRum ab ipso*.

9. *Equipoise*, *παρίσωσις*.
Alliteration, *παρομοίωσις*.

and now after his death you write *ill*." And on a single syllable,—“What ill would you have suffered, if you had witnessed an indolent man?”

Same words may have antithesis, equipoise, and rhyme at once.
10. False antitheses.

And it is possible for the same words to possess, at the same time, all these; and for the same example to be both an antithesis, equipoised, and having rhyme. But the heads of periods have nearly been enumerated in my *Rhetoric* to Theodectes. Also there are false antitheses, such as Epicharmus was in the habit of making: as, “Once was I in their [country]; once was I among them.”

CHAP. X.

Whence are quoted the Elegancies and approved Beauties of Style.

1. Elegancies and approved beauties of style.

BUT as a detail of these subjects has been given, we must state whence the elegancies and approved beauties [of style] are derived. Now the power of inventing them belongs, either to the man of high natural genius, or to one of talent chastened by discipline; but to exhibit the sources of them is the business of this system; wherefore, let us treat of, and fully enumerate them.

2. The fundamental principle is μάθησις.

Metaphor produces this,

And let this be our fundamental principle: for the receiving information with ease, is naturally pleasing to all¹; and nouns are significant of something; so that all those nouns whatsoever which produce knowledge in the mind, are most pleasing. Now, the foreign expressions are unintelligible; and words of common use we already understand. But the metaphor in the highest degree produces this effect [of giving pleasure]; for when the poet calls old age “stubble,” he produces in us a knowledge and in-

¹ See this principle of pleasure stated in book i. c. 11, § 23. Again, (book ii. c. 24, § 30,) refutative enthymems are preferred to confirmative on the same principle,—διὰ τὸ συναγωγὴν ἀναγνῶντι εἶναι ἐν ΜΙΚΡῳ.

formation by means of a common genus²; for both are past their prime. Now, the similes of the poets also produce the same effect; on which account, should they be neatly managed, an elegance strikes you. For the simile, as has been remarked before³, is metaphor with the difference of the addition [of a particle denoting similitude]; on which account it is less pleasing, because more at length: and it does not assert that "this is that;" the mind therefore does not at all require it⁴.

3. and
similes.

It cannot but be, then, both that the style and the arguments which render the act of information rapid, are elegant; on which account, neither are *superficial* arguments held in approbation; (for, by superficial, I mean such as are obvious to every one, and which require no search;) nor those which, when stated, are not understood⁵: but all those whatsoever which are apprehended, either simultaneously with their being uttered, (supposing even that no *previous* knowledge of them existed,) or by which the intellect is a little left behind; for there accrues, as it were, a piece of information; in the two former cases, however, none.

4. Words
which
produce
rapid μά-
θησις are
elegant.

As far, then, as respects *the meaning* of what is said, reasonings of this description are approved; but as to *the expression*, if they be worded (in figure) *antithetically*⁶; as, "deeming the common peace of

5. The ex-
pression
must be
antitheti-
cal.

² "By the genus; that is, where the common quality which constitutes the likeness immediately occurs," etc. Twining. This metaphor, according to the distinction of the Poetic, would be called ἀπ' εἰδούς ἐπὶ εἶδος—from *one species* of things decayed to *another*.

³ In the fourth chapter of this book.

⁴ For the mind, hurrying on to obtain further information respecting the object in question, without pausing to ascertain what it is *like* or *equal to*, desires only to know what it *really is*. See chap. 4, § 1.

⁵ The case with these two descriptions of argument is the same as with the γλῶτται and κῆρια δνόματα respectively. With this passage compare book ii. c. 24, § 30.

⁶ The consideration of *δραῖα* having been ranged under the heads of their *διάνοια* and *λέξις*, he proceeds here to subdivide his discussion of *λέξις*, in reference to its whole sentences,

- the rest, a very *war* to their individual interests :"
 6. here "war" is opposed to "peace;" and (in single words) if they possess metaphor, and this neither far-fetched, for it will be difficult to view it in connexion; nor superficial, for it produces no effect: and, moreover, if they place the object before your eyes; for it needs must be, that one sees more clearly what is actually in the course of being done, than what is *about* to be. We ought then to aim at three things, metaphor, antithesis, and personification⁷.

Three things to be aimed at: metaphor, antithesis, personification.

7. Metaphors are fourfold: analogical ones the best.

But of metaphor, which is fourfold,⁸ that species is in the highest degree approved which is constructed on similar ratios; just as Pericles said, "that the youth which had perished in the war, had so vanished from the city, as if one were to take *the spring from the year*."⁹ And Leptines, speaking of the Lacedæmonians, "that he would do all in his power to prevent Greece from being deprived of *an eye*." And Cephisodotus, when Chares was eager to present the accounts about the Olynthiac war, grew nettled, and said, "Now that he has got the populace *with their necks in a halter*, he is endeavouring to present his accounts." Again, when he once was exhorting the Athenians, as they were going for provisions, to go to Eubœa for them, he said, "the decree of Miltiades should *go forth to the expedition*." And Iphicrates, when the Athenians had made a league with Epidauros and the neighbourhood of the coast, was indignant, and exclaimed that, "of themselves they had

(i. e. its *figure*, σχῆμα,) or its single words, (i. e. what is usually called *trope*).

⁷ From the variety of words by which *ἐνέργεια* has been rendered, "personification" has been selected, as approaching the nearest to the correspondent expression, *πρὸς ὁμμάτων*. The effect is produced by representing inanimate objects as the agents in any thing: thus, "pontem *indignatus* Araxes." See the next chapter.

⁸ A metaphorical word is a word transferred from its proper sense, either from *genus* to *species*, or from *species* to *genus*, or from *one species* to *another*, or in the way of *analogy*. Poet. xxi. transl. by Twining. See chap. 2, § 14, seq.

⁹ See book i. 7, § 34. Herodotus puts a similar expression in the mouth of Gelon, book vii. 162.

cut off the very *provision* of the war." And Pitheolaus called [the state yacht] Paralus, "the *mace* of the populace;" and Sestus, "the *corn-chest* of the Piræus." And Pericles bade them away with Ægina, "the *eye-sore* of the Piræus." And Mærocles said, "that he was no more a knave than the other," naming some good sort of man; "since that person indeed played the rogue at the rate of *thirty per cent.*, himself however merely at *ten per cent. usury*¹⁰." And that iambic verse of Anaxandrides on his daughters, who were long in getting married: "The virgins have forfeited the nuptial *recognisance*¹¹." And that saying of Polyeuctus about one Speusippus, who was struck by apoplexy, "that he was unable to keep quiet, bound as he was by fortune in a complete *pillory* of a disease." Cephisodotus, too, used to call the triremes, "painted *corn-mills*:" as did the Cynic Diogenes the taverns, "the *public tables*¹² of Athens." Æsion, too, used the expression, "*pouring* out the city into Sicily," (for this is metaphorical, and sets the object before the eyes,) "so that all Greece *exclaimed*;" and this too is in a certain way a metaphor, and personifies. And as Cephisodotus bade them be

Various instances of approved metaphors.

¹⁰ The highest rate of interest (τόκος) permitted among the Greeks appears to have been one third of the principal (ἐντρίπιος); the lowest rate which was usual was one tenth merely of the principal (ἐνδίδικτος): so that Mærocles was less a villain than this ἐνναικός, in the same ratio in which *ten per cent.* was less usurious than *three and thirty*. The metaphor, however, is stated by some as resulting from the comparison of the ratio of character to the ratio of usury; and by others, from the application of the general word, πορνεία, to the transactions of usurers in particular. It will be observed, that in translating ἐντρίπιος, the round numbers have been taken.

¹¹ Addison, too, classes certain of his fair readers (though certainly differently circumstanced from the daughters of Anaxandrides) under the metaphorical appellation of "*demurres*," borrowed from the English legal nomenclature. See Spectator, No. 89.

¹² Φυδῖτια, the public tables of Lacedæmon, remarkable for their plainness and frugality: so that, in saying that the only φυδῖτια of Athens were its taverns, Diogenes conveyed a most bitter sarcasm against the manners of its citizens.

on their guard, "lest they rendered their very popular assemblies so many *rows*;" just as Isocrates, also, [used the expression] of persons "making a *row* in the general convention." And as in the funeral speech [of Lycias], "there was reason for Greece to shear her locks over the grave of those who fell at Salamis, since her liberty had been buried jointly with their valour:" for had he said that "there was reason she should weep, her liberty having been buried with them;" it would indeed have been a metaphor, and have given personification; but the words, "their valour," "her liberty," convey a kind of antithesis. And, as Iphicrates said, "The *path* of my arguments is through the midst of the actions of Chares:" the metaphor here is on similar ratios, and the expression, "through the midst," produces personification. Also the saying, "that he challenged dangers to be *his allies* against dangers," is both a personification and a metaphor. And Lycoleon, pleading for Chabrias, said, "[What, not pardon him] out of a respect for the *suppliancy*¹³ of his brazen statue:" for in the then crisis it was a metaphor, but not always; but the personification [was perpetual]; for pending his trial the statue acts as suppliant, the inanimate as an animated object,—“that memento of the exploits of the state.” Again, “*Making it their study*, by every means, to think meanly;” [this is metaphorical,] since study is with a view to advance [not to diminish]. And the expression that “God has kindled the intellect *as a light* in the soul;” for both in a certain sense illuminate.—“For we put no period to our wars, but put them off;” since both putting off, and a peace of

¹³ Chabrias seems to have been the first who ordered his troops to assume a kneeling position in receiving the charge of an enemy: at the time when he adopted this manœuvre, he headed some Athenian troops auxiliary to the Bœotians, and completely succeeded in repulsing the forces of Agesilaus. This improvement in tactics seems to have been so favourably received, that statues were decreed him to be erected in the attitude of kneeling. Ὁ δὲ Χαβρίας πολλῶν αὐτῷ πεπραγμένων κατὰ πόλεμον, ἐπὶ τούτῳ μάλιστα ἐσημνύετο τῷ στρατηγῆματι, καὶ τὰς ὑπὸ τοῦ δήμου δοθείσας αὐτῷ καθίστανεν ἔχουσας τοῦτο τὸ σχῆμα. Diodorus Siculus, 15.

this description, are alike things of the future. And again, the declaring "that a truce was a *trophy* more splendid than those won in war; since the latter was the result of a trivial occurrence or a single accident, the former were the result of the whole tenour of the war;" for both [agree in being] indications of victory. And, that "states pay a *heavy punishment* to the censure of mankind;" for *punishment* is a sort of hurt consonant to justice¹⁴.

Thus, then, it has been stated that the elegancies result from metaphor constructed on similar ratios, and from personification.

CHAP. XI.

Of Personification.

BUT it must be stated what we mean by the expression, "setting forth to the eyes," and in doing what this effect results. I mean, then, that those expressions which represent the object as in action, do all of them produce the setting before the eyes: for instance, the saying of "a good man," that he is "a cube¹," is a metaphor; for both are perfect; but this does not personify: whereas the speaking of one as "having his prime yet blooming," is a personification. And this, "—but you just as a thing let loose," is a personification. And [in the line] "Then the Greeks springing forth with their feet²;"—the expression, "springing," is both a personification and a metaphor, for it expresses rapidity. Again, as Homer has in

1. Personification represents the object as animated.
2.

¹⁴ We cannot forbear adding to this long catalogue the metaphor used by Herodotus, in speaking of the scheme for the defence of Peloponnesus, at the time of the Persian invasion, by throwing a wall across the Isthmus: his words are, that even many *cloaks* of walls would be insufficient;—*ἂν καὶ πολλὰι τεῖχων κισσῶν* KISSΩΝΕΣ ἦσαν ἰληλαμένοι, κ.τ.λ. Book vii. c. 139.

¹ See the expression, Eth. Nich. book i. c. 10.

² See Eurip. Iph. in Aul. 60.

3. Metaphors produce it.

many places employed it, the putting inanimate things as animate, by means of a metaphor; and in all from their producing personification, they are approved; as in these instances³:

"Back to the plain still roll'd the *shameless* stone."

Again,

"The arrow *flew*." And, "*Eager* to wing its way."

And,

"Deep fix'd in earth, *eager* their blood to drain."

And,

"Right through his breast th' *impetuous* weapon sped."

For in all these instances, the objects, from their being animated, appear personified; for the expressions, *shamelessness*, and *eagerness*, and the rest, are personifications. These, however, has he appended by means of the metaphor from analogy: for as the stone is to Sisypheus, so is he who is insensible of shame, to the object in regard to which he is so insensible. He does this, too, in his approved similes, in the case of inanimate objects; as,

4. And similes.

"The waves behind impel the waves before,
Wide rolling, foaming high, and tumbling to the shore⁴."

for he produces every thing in life and action. But personification is an imitation [of nature⁵].

5. Metaphors to produce it must be appropriate, yet not obvious.

But it is fitting to draw your metaphors, as has been stated, from terms which are appropriate and not obvious; just as in philosophy, also, it is the privilege of one who conjectures happily, to discern the point of similitude⁶; as when Archytas observes, "that an arbitrator and an altar are the same," since

³ These passages severally stand as follows: (1.) Od. xi. 597. (2.) Il. xiii. 587. (3.) Il. iv. 126. (4.) Il. xi. 573. (5.) Il. xv. 542.

⁴ Pope's translation, Il. xiii. (of the original), line 799.

⁵ And, if an imitation, necessarily pleasing. See this principle of pleasure stated, book i. c. 11, § 23.

⁶ In speaking of the *fable*, he attributed this faculty of catching such features of resemblance as, *without immediately striking, are yet appropriate* (οἰκεια μὴ φάνερα), to those of a philosophic turn of mind:—τὸ δμοιον ὁρᾶν, ὅπερ ῥᾶν ἴστω ἡ φιλοσοφίας. Lib. ii. cap. 20, § 7.

to both does the party who has been wronged fly for refuge. Or if one were to say, "that an anchor and a pot-hanger were the same;" for both are somewhat the same, but they differ in the circumstance of suspending from above and below. Again, the expression, "the states have been *levelled*," is the same in objects widely differing, equality both in power and in superficialities.

Also the greatest number of elegancies arise from metaphor, and from additionally deceiving the hearer⁷; for the point becomes more clear that he has learnt something, from the meaning being the opposite [of what it was supposed], and the mind seems to say, "How true is this! I however was wrong." And the elegancies of proverbial expressions arise from one's meaning not what he says; for instance, the words of Stesichorus, that "the grasshoppers shall chirp on the ground⁸." Also ideas neatly put enigmatically, are for the same reason pleasing; for there is an acquisition of knowledge, and a metaphor is introduced. Again, that embellishment which Theodorus calls, "saying out-of-the-way things;" this, however, occurs when the sentiment is paradoxical, and (as he has it) does not square with previous opinion⁹; just on the same principle as in jokes, words submitted to a slight change. An effect which those jests also produce, which depend on the change

6. They deceive the hearers agreeably.

Paradoxes.

Jests which are παρ' ὑπόνοιας.

⁷ Besides the ornament of metaphor, by leading the hearer, throughout the sentence, to expect something very different from what you really mean, and undeceiving him *only* by the last word; e. g. "Quid hinc abest nisi res—et *virtus*!" Cic. de Orat. ii. 70. Here you expect a panegyric; the last word converts the whole into reproach. Of this description, too, are the following lines of Pope:—

"Here thou, great Anna! whom three realms obey,
Dost sometimes counsel take, and sometimes—*tea*!"

Rape of the Lock, iii. 7.

The precept may be further illustrated by Porson's insidious commendation of Blackmore's poetry:—"He will be read when Homer and Milton are forgotten,—*but not till then*."

⁸ Already quoted, ii. 21, § 8.

⁹ Probably the English word *humour* would best designate this quaintness of Theodorus.

of a letter, for they deceive [the hearer's anticipation]: it happens also in metre; for it terminates not in the way in which the hearer supposed; thus,

ἴσταιχε δ' ἔχων ὑπὸ ποσσὶ χίμετρα!!

He proceeded wearing under his feet—*chilblains* ¹⁰.

Whereas the hearer was imagining that "*sandals*," (πέδιλα), would be the word ¹¹. This, however, as soon as it is uttered, ought to be clear. But these changes of a letter cause the speaker to say, not what the word expresses, but what its inversion signifies: as in the jest of Theodorus, on Nicon the lyrist, "Thee did a Thracian —" (Θράττη); for what he pretends to say is, "It annoys (Θράττει) you ¹²," and deceives the audience; wherefore to one who has caught it, the joke is pleasing; since if one is not aware that he is a Thracian, it will not appear to be a beauty. Again, the expression, you wish him *περσαι* [i. e. either *to side with Persia—to ruin him*]. Both meanings, however, should be in point, and so also in the case of the elegancies; thus the saying, "The *sovereignty* (ἀρχή) of the sea, was not the beginning (ἀρχή) of evils to the Athenians; since it was a gain to them." Or, as Isocrates says, "that its *sovereignty* (ἀρχή) was to the city a *beginning*

¹⁰ See note 1, at p. 88, of Carrington's translation of Aristophanes' Plutus; where a similar surprise arises from the use of ἔπινες instead of ἐκρίνης.

¹¹ This is sometimes aptly enough termed *παρά προσδοκίαν*, *baffling the expectation*.

¹² Nicon, it seems, was the son of a Thracian slave; and Theodorus, conveniently mistaking the word Θράττη for Θράττει, takes an opportunity of taunting him with his low birth. Θράττω, probably contracted from ταραττω. Vid. Blomfield in Æschyl. Prom. Vinct. 649. There are on record two excellent replies to taunts of this nature; one made by Mnestheus, son of Iphicrates, who declared that he esteemed his mother above his father,—“Nam Pater, quantum in se fuit, Thracem me genuit: contra ea, mater Atheniensem;” (Corn. Nep. Iphic. 3;) where it should be observed, that Rutgersius, for *contra ea mater*, proposes to read *cum Thraca mater*. The other is attributed to Timotheus, who having the condition of his mother as a Thracian slave thrown out against him as a reproach, replied, “But to her I owe it that I am Conon's son.” Athenæus, lib. xii.

(ἀρχή) of evils." For in either acceptation, that is stated which one did not imagine he would say; and that it is true, is acknowledged. For to assert that a *beginning* is a *beginning*, shows no great wisdom; but he repeats [the word ἀρχή], not in this sense, but differently; and he does not repeat the same ἀρχή which he first said, but in a different sense. And in all these cases, if one introduce the term 8. appropriately under an equivocation or metaphor, then there is wit; for instance, there is no *bearing Baring*¹³: here the speaker denies the correspondence of signification, but appropriately enough, if [the person alluded to] be disagreeable." Again, "You cannot become more a stranger [ξένος], than becomes you as a guest [ξένος]," or not in a greater degree than you ought, which is the same; and "it becomes not a stranger [ξένος] always to be a guest [ξένος]." For the meanings here also are different. The same, too, is that commended saying of Anaxandrides, "It is honourable to *die* before doing aught worthy *death*;" for it is the same as saying, "It is worthy a man to die when he is not worthy to suffer death;" or, "It is worthy a man to die when he is not worthy [the punishment] of death; *or*, when he has not committed acts worthy that punishment." Now the form of the diction of these sentences is the 9. same; but in proportion as [the idea] happens to be enunciated in fewer words and with antithesis, in the same proportion is it more approved. And the reason is, that the information becomes by means of the *antithesis*, fuller; by means of *brevity*, more rapid. Such sentiments ought always to have either some one of whom they are said, or happiness of expression (if what you say [would appear] earnest, and not mere idle remark); for it is possible to have one of those qualities without the other: for instance, "You ought to die without having committed an error;" [the *sentiment* is just enough], but [the *expression*] is not elegant: "A deserving man should

10. There should be some person to whom they must apply.

¹³ So, too, the Latins, *Lepidus non lepidus*.

marry a deserving woman;" but this is not elegant¹⁴; but if it possess both qualities at the same time, as "It is worthy a man to die while he is not worthy of suffering death." But in proportion as a sentence possesses the greater number of these ornaments, in the same proportion does it appear more elegant; if, for instance, the words be metaphors, and metaphors of such a species¹⁵, and if there be antithesis, and equipoise of clauses, and if it have personification.

11. Similes also, as has been uniformly stated in the foregoing, are in some way approved metaphors; for they always are expressed in two terms, like the analogical metaphor; thus, "the *shield*," we say, "is the *cup* of Mars;" the bow, "a stringless lyre." Thus, then, persons express the metaphor not unaccompanied; whereas the calling a bow, "a lyre;" or a shield "a cup," is without accompanying explanation¹⁶.

12. And on this principle men construct their similes; for instance, that of a flute-player to an ape, and of a near-sighted person to a sputtering lamp; for both contract themselves. But the excellence will exist when there is a metaphor; for you may represent by a simile the shield as "the cup of Mars," and a ruin as "the rags of a house;" and the saying of Niceratus, that, "he was himself a Philoctetes bitten by Pratys," as Thrasymachus drew the simile when he saw Niceratus, who had been beaten by Pratys in a contest of rhapsodists¹⁷, with his hair

¹⁴ As far as the *expression* is concerned, this instance seems to possess the necessary elegance; but it is deficient in the second requisite, viz. τὸ πρὸς οὗ λέγεται.

¹⁵ The metaphor constructed on similar ratios (κατ' ἀναλογίαν) is here alluded to: see chap. 10, § 7.

¹⁶ In the Poetic, he says that, in the case of the analogical metaphor, "sometimes the *proper* term is also introduced, besides its *relative* term;" and this, with a view to guard the metaphor from any incidental harshness or obscurity: with such an adjunct, the metaphor ceases to be ἀπλοῦς; e. g. φιάλη Ἀρείου—thus expressed, the metaphor is οὐχ ἀπλοῦς; but if stated simply φιάλη, it is ἀπλοῦς. See Twining, notes 184, 189, on the Poetic.

¹⁷ With a view to elucidate the simile of Thrasymachus, it

long and disordered, and his person still neglected. In which points, if they be not neatly managed, the poets most frequently get hissed off, even should they in other respects stand high. I mean when the poet replies [to his particle of similitude thus], "Like parsley he has crooked legs."—"Like Philammon on the bench, struggling with the ball" [or, with Corycus]. And all such expressions are similes; but that similes are metaphors has frequently been stated.

Proverbs also are metaphors from species to species: thus if any one, as though likely to experience a benefit, should himself introduce a measure and afterwards suffer loss from it, then one exclaims, "As the Carpathian fetched the hare¹⁸!" for both parties have experienced the thing in point. Now the sources whence these elegancies are deduced, and the cause why [they are pleasing], has nearly been told you.

14. And
proverbs
also.

Again, *hyperboles* which are recognised are metaphors; as that about a person with a black eye: "You would have thought him a basket of mulberries;" for the part beneath the eye is somewhat suffused with blood: but this is greatly forced. But the [simile with the expression of similitude] *just as, so and so*, is hyperbole, differing merely in the diction. "Like Philammon on the bench struggling with the ball," [becomes hyperbole thus;] "You would have thought he was Philammon struggling with the ball." "Like parsley he has crooked legs," [thus arranged becomes an hyperbole;] "I thought not that he had legs, but parsley stalks, so crooked were they." But hyperboles suit with the temper-
ament of the young, for they evince a vehemence of

15. So too
are hyper-
boles.

has been conjectured that the story of Philoctetes might have been the subject of this rhapsodical declamation.

¹⁸ The island of Carpathus being destitute of hares, one of the inhabitants brought over some of these animals, which proved so fatally prolific as to consume all the crops in the island; and the Carpathians became more anxious to extirpate them than they had ever been for their introduction.

temper ; (on which account the angry most frequently utter them ; [thus Achilles in his wrath exclaims,]

Though bribes were heap'd on bribes, in number more
Than dust in fields, or sands along the shore,

* * * * *
Atrides' daughter never shall be led,
An ill-match'd consort to Achilles' bed ;
Like golden Venus though she charm'd the heart,
Or vied with Pallas in the works of art.¹⁹ POPE.

The Attic rhetoricians, too, particularly employ this figure ;) on which account for a man in advanced life to utter them is bad taste.

CHAP. XII.

That a distinct Style is appropriate to each Species of Rhetoric.

1. Different styles are suitable to each sort of oratory.

2. The written style is most precise ; that of disputation most declamatory, and is of two kinds, ἡθικὴ, καὶ θρηνητικὴ.

NEITHER ought it to escape us, that to each kind of rhetoric is adapted a peculiar style ; for neither are the style which is adapted to writing and that of disputation the same, nor the style of deliberative and that of judicial rhetoric. But it is necessary to be acquainted with both [the first and the second] ; for the one consists in knowing the purity of language ; the other in the not being obliged to sit mute, if one wish to communicate any thing to others ; the very predicament in which they who know not how to write are placed. But the style of writing is the most precise : that of disputation partakes more of declamation ; and of it there are two species, the one conveys the impress of character, the other of feeling. And hence actors choose this description of drama, and the poets this sort [of actors]. But poets fit for perusal are carried about with us, like Choeremon, for he is as nicely finished as a rhetorician ; and, of the Dithyrambic poets, Licymnius.

Thus also, on comparing speeches together, those

¹⁹ Iliad, ix. 385—388.

adapted to writing appear jejune when delivered at disputations ; while those of the declaimers, excellent as they were when delivered, seem mere commonplace in the closet ; and the reason is, that in disputation [these things] are appropriate enough. On which account, compositions framed for declamation, inasmuch as, when abridged of their declamation, they do not produce their effect, appear ridiculous : thus, the omission of connectives, and frequent repetitions, in a written style are justly exploded ; yet in the style of disputation even the rhetoricians employ them, for they are adapted to declamation. Yet it is necessary 3. in repeating the same thing to vary the expression ; which indeed opens a way, as it were, to declamation : [e. g.] "This is he who robbed you ; this is he who defrauded you ; this is he who at last endeavoured to betray you." Just as Philemon the actor used to do in the "Gerontomania" of Anaxandrides, when Rhadamanthus and Palamedes speak ; and in the opening scene of the "Devotees" [in the recurrence of] the word *I*. For if one does not give these passages with declamation, it becomes [a case in point with the proverb] "Stiff as one carrying a beam." And so also 4. where connectives are wanting, "I came, I met, I besought him ;" for you needs must give it with declamation, and not, as though simply saying one thing, enunciate it with the same manner and tone. There is, moreover, a certain peculiarity which omissions of connectives possess ; for it strikes one that, in an equal length of time, many things have been stated ; for the connective makes many, one ; so that if it be taken away, it is evident that on the contrary one will be many. It possesses, then, amplification ; "I came, I conversed with, I besought," being many,— "he seems to overlook all I have said, all I now say." Homer is desirous of producing this effect in the lines :

Declamatory compositions when read appear ridiculous.

"Three ships with *Nireus* sought the Trojan shore,
Nireus, whom Aglæe to Charopus bore,
Nireus, in faultless shape¹," etc.

POPE.

¹ Iliad, ii. 671.

For of whom a great deal is said, that man must needs be spoken of *frequently*; and therefore if one be spoken of frequently, it appears that *a great deal* has been said of him. So that the poet mentioning him only once, by help of this sophism amplifies the character, and has excited a recollection of him, though he no where subsequently mentions him.

5. Deliberative style like sketching, and not accurate. Judicial style more precise.

Now the deliberative style is exactly like sketching; for in proportion as the crowd is larger, the view is taken from a greater distance; on which account, in the one as well as in the other, productions of an exquisite finish are superfluous, and look worse than others. But the judicial is a thing of greater nicety: and in a still higher degree where it is before a single judge; for least of all is this within the reach of rhetorical artifice; since the peculiar points of the case are more easily concentrated to the view, than what is merely external: and the heat of disputation is out of the question, so that the decision is fair and clear. And on this account the same speakers are not approved in all these kinds; but where there is most of declamation, there least of all is accuracy: this, however, is the case where power of voice is requisite, and particularly if a considerable power.

Epicuretic style more suited to writing. The judicial next. 6. Conclusion of the second division, scil. λέγειν.

The demonstrative style, however, is most adapted to writing; for its purpose is perusal: second to it [in this adaptation] is the judicial.

But to draw any further distinctions on the subject of style, that it ought to be pleasing and magnificent, is superfluous: for why should it be such rather than temperate and liberal, or if there be any other moral virtue? For that the foregoing rules will cause it to be pleasing is manifest, if indeed excellence of style has been correctly defined:—for with a view to what must it be, [according to our definition,] “*clear and not mean, but in good taste?*” For should it become prosing, it is no longer clear, neither if it should be too concise. But it is plain that the mean is appropriate. And the foregoing precepts will cause its being pleasing, should the

ordinary expressions have been judiciously blended with the foreign, and should rhythm [not be wanting], and the persuasive influence resulting from good taste.

The subject of *style* has then been treated², as well generally, respecting all the species of rhetoric, as particularly, respecting each. But it yet remains to treat of *arrangement*.

CHAP. XIII.

Of the Parts of a Speech.

THE parts of a speech are two; for it is necessary to *state* the case about which it is, and to *prove* it. Wherefore for one, after stating, not to prove it, or to proceed to prove it without a previous statement, is out of the question: for whoever proves, proves something; and he who makes a previous statement, makes such statement with a view to subsequently proving it. And of these parts, the one is the statement, the other the proof; just as though¹ one were to make a division into problem and demonstration. But the divisions which they now usually make are ridiculous; for narration is a kind of peculiarity to judicial speeches alone; for how can there, in demonstrative and deliberative speeches, be any narration such as they speak of, or any reply, confutation of an adversary, or any peroration of points selected for display of character?

But exordium, contrast of argument, and recapitulation², do then only occur in deliberative speeches

² Thus ends the second branch of the grand division of the work;—*πίστις*—*λέξις*—*τάξις*. See the last note on book ii.

¹ That is, to adopt the language of mathematicians, the statement corresponds to their *problem*, the proof to their *demonstration*. It will readily be observed that *πίστις* is here used in a sense different from that which it has hitherto preserved.

² Est et illud repetendi genus quod semel proposita iterat et dividit:—

1. Two parts of a speech.

2. Statement. Proof.

3. Divisions made by other writers censured.

Peroration
not
always
necessary.

when an altercation happens; for, considered as accusation and defence, they frequently [admit these branches], but not in their character of a piece of advice. But the peroration, moreover, is not an essential of every judicial; for instance, if the speech be a short one, or the case easy to be remembered. For it is usual to detract only from what is prolix. The *necessary* divisions, then, are the statement and the proof³.

4. Enumeration
of certain
of them.

The essential divisions then are these; but the greatest number are, exordium, statement, proof, peroration. The confutation of an adversary belongs to the proof; and the contrast of arguments is an amplification of one's own, so as to be a kind of branch of the proof; for one who does this proves something: but not so either exordium or peroration; but [the latter] refreshes the recollection.

5. No further
distinctions
to be
drawn.

But should one draw distinctions with regard to these, that will be the case which the followers of Theodorus used to do, there will be a narration distinct from post-narration, and præ-narration, together with refutation, and post-refutation. But the writer should affix a title only after marking out a distinct species and difference⁴, otherwise it becomes mere emptiness and trifling; just like Licymnius, who in his treatise gives the titles, irruption—digression—ramifications, etc.

Iphitus et Pelias mecum; quorum Iphitus ævo
Jam gravior, Pelias et vulnere tardus Ulixi.

Æneid, ii. 435.

ΕΠΙΛΟΓΟΣ dicitur Græcè, nostri *regressionem* vocant.
Quintil. ix. 3, 36—*apud* Ern. Lex. Techn.

³ It should be carefully borne in mind, that Aristotle admits only these two branches as *essential* to every speech. His reasons for superadding exordium and peroration will be developed in the sequel.

⁴ Without such a restraint, a rhetorician may go on *ad infinitum* drawing distinctions where no difference exists.

CHAP. XIV.

Of the Exordium.

Now the exordium is the commencement of the speech; which in poetry is the prologue, and in the performances on the pipe, the prelude: for these are all commencements, and, as it were, an opening of the way for what is to succeed.

The prelude, then, corresponds to the exordium of demonstrative speeches; for the performers on the pipe, using as a prelude any piece whatever which they are able to execute with skill, connect the whole by an inserted passage: and so in demonstrative speeches ought we to write; for the speaker ought, after stating whatever he lists¹, straightway to employ the insertion, and link it [to the body of the speech]. Which indeed all do, having as their model the exordium of the Helen of Isocrates: for there exists no very near connexion between Helen and the artifices of sophists². At the same time, if the exordium be out of the way of the subject, there is this advantage, that the whole speech is not of one uniform character. But the exordia of demonstrative speeches are derived from *praise*, or from *blame*, (like Gorgias in the Olympic oration,—“Men worthy, O Greeks, of admiration among many;” for he is *eulogizing* those who instituted the general assemblies: Isocrates, however, *blames* them, “because they distinguish by prizes the excellencies of person, while for those who are wise they propose no reward;”) and thirdly, from suggesting advice; for instance, “—because it is fitting to honour the good,” on that account [the orator] himself also speaks the praises of Aristides, or such characters as neither enjoy reputation, nor are worthless, but as many as, though they be excellent persons, are obscure; just

1. The exordium resembles the prologue and the prelude.

Prooemium of epideictic oratory resembles the prelude, and connected with the piece by the *ἐνδοσίμους*. As the Helen of Isocrates.

2. The exordium may be derived from either of the three sorts of oratory.

3.

¹ There is, in demonstrative rhetoric, no limitation as to the source whence the exordium is to be derived.

² In a reprehension of which this exordium is employed.

- as was Paris, the son of Priam : for thus the orator
 4. conveys advice. Again [we may borrow demonstrative exordia] from those proper to judicial rhetoric, i. e. from appeals to the auditor, in case the speech be respecting any thing revolting to opinion, or difficult, or already noised abroad among many, so as to obtain his pardon : as Chœrilus begins, "Now after every thing has become public."

The exordia, then, of demonstrative rhetoric arise from these sources,—from praise, blame, exhortation, dissuasion, and appeals to the hearers. The inserted connective clauses may be either foreign or appropriate to the subject.

5. The exordium of judicial oratory resembles the prologue of a play.
 6. It must therefore declare the object of the speech.

With regard to the exordia of judicial rhetoric, we must assume that they are equivalent to the opening scenes of dramas, and the exordia of epic poems ; for the commencement of dithyrambic poetry resembles demonstrative exordia,—“on account of thee, thy gifts, thy spoils.” But in the drama, and in epic poetry, the commencement is an intimation of the subject, that the hearer may foresee what the story is about, and that his mind may not be in suspense ; for whatever is indeterminate bewilders us. He then who puts, as it were, into the hand the beginning of the clue, causes him who holds it to follow on the story. On this account we have,—

“Sing, muse, the wrath,” etc.

“The man, O muse, resound,” etc.

“This too declare ; from Asia's coasts afar,
 How upon Europe burst the mighty war.”

And the tragedians give some insight into the plot of the drama, if not forthwith, as Euripides does, yet they give it some where at least in the opening scene ; just as also does Sophocles ;—“Polybus was my father³ !” And comedy in the same way. The most necessary business of the exordium, and this is peculiar to it, is to throw some light on the end for the sake of which the speech is made. For which very reason, if this be evident, and the case a brief one,

³ *Œdipus Tyr.* 774.

we need not employ an exordium. The other species which speakers employ are correctives, and general⁴: these are, however, deduced from 1. the speaker himself; 2. his hearer; 3. the subject; 4. and from the adversary. Every thing whatsoever which refers to the doing away or the casting an aspersion of character, has a relation to one's self or the adversary. But these things are not done exactly in the same way: for by one speaking on a defence, whatever tends to aspersion of character should be put first; but by one who is laying an accusation, in his peroration. And the reason why is not indistinct; for it is necessary that one who is making a defence, when he is about to introduce himself, should sweep away every stumbling-block; so that the prepossession against you must first be removed: by him, however, who raises the unfavourable impression, let it be raised in winding up, in order that the judges may the rather recollect it.

The correctives, however, which refer to the hearer, are drawn out of conciliating his good will, and inflaming him with anger, and occasionally from attracting his attention, or the reverse; for it is not at all times convenient to render him attentive, for which reason many endeavour to induce them to laughter. But all these will conduce to tractability [on the judge's part], if one wishes it, as does also the showing one's self a person of character; for to such do people the rather give heed. But men are attentive to objects of importance, of a peculiar description, or deserving admiration, or pleasing. Hence we ought to throw in a hint that the speech is concerning subjects of this nature. But if you would have them not attentive, hint that the matter is trifling, concerns them not, or is disgusting. But it ought not to escape our observation, that the whole of this is foreign to the subject; for they are addressed to a hearer of sorry

7. Other exordia are antidotes to weariness. i. *ἁρπύματα*. Refutation of calumny or its opposite relates to the speaker and adversary. Different use of it when plaintiff or defendant.

ii. *ἐκ τοῦ δκροατοῦ*, excitement of the hearer; attracting his attention, or the reverse.

8. All these points however

⁴ *ἁρπύματα*, a sort of antidotes to ennui and listlessness of the auditory, which are literally so general (*κοινά*) as not only to be unlimited to the exordia of either branch of rhetoric, but as to admit of being introduced at will into any part of the speech. See § 9.

are extraneous to the subject.

taste, and one who lends an ear to points foreign to the subject; for if the hearer be not of this character, there is no need of exordium, except so far as to state the matter summarily, that, like a body, it may have a head.

9. Awaken-
ing the
attention
is com-
mon to all
parts of
a speech.

Again, the business of exciting attention is common to all the divisions of a speech, wherever it may be necessary; for the audience relax their attention anywhere rather than at the beginning. For which reason it is ridiculous to range this head at the beginning, when more particularly every one is at the summit of attention. So that, whenever it is convenient, we may use the formulæ, "Lend me your whole attention, for the question does not affect me any more than yourselves;" and this one,—“for I will relate to you a thing so strange, so wonderful, as you never yet heard.” But this is just what Prodicus says he used to do,—“whenever the audience

10. happen to nod, to insert, by the bye, a display of his penteconta-drachmial demonstration⁵.” But that these things are referred to the hearer not in his proper capacity as such, is evident; for all create unfavourable impressions or do them away in their exordia: as, “O king, I confess indeed, that not with haste,” etc.⁶: and again, “Why such long preludes?”

Those
who have
the worst
side em-
ploy ex-
ordia.

They, too, employ exordia who have, or appear to have, the worse case; for it is better to pause anywhere than on the case itself. On which account servants tell not what is asked them, but all the circumstances, and make long preambles.

11. But the means out of which we must conciliate have been stated, and each other point of that nature⁸: and, as it is well remarked by the poet, “Grant that I may reach the Phœacians a friend and object of their compassion;” we ought, therefore, to aim at

⁵ Prodicus professed to teach a mode of reasoning with universal success in all descriptions of cases: the premium on initiation being fifty drachms, he called it Πεντηκοντάδραχμον. Plato in Cratyl.

⁶ Sophocles, Antig. 223.

⁷ Euripides, Iph. in Taur. 1162.

⁸ See book ii. chap. 1, § 5.

these two objects. And in demonstrative orations, you should cause the hearer to suppose that he is praised simultaneously with the subject, either in his own person or his family, or in his maxims of conduct, or at least somehow or other. For true it is, as Socrates remarks, that "To praise Athenians before an Athenian audience is no difficult thing, however it may be in the presence of Lacedæmonians⁹."

But the exordia of deliberative rhetoric are derived from those of judicial : but this species has them naturally least of all the three ; for indeed the audience are aware of the subject ; and the case needs no exordium except 1. on account of the speaker himself ; 2. or his opponent ; or 3. if the audience conceive of the importance of the matter otherwise than he could wish, thinking it either too serious or too trifling : with a view to which objects respectively there is a necessity for either exciting or doing away a prejudice, or for amplification or diminution. On account of these things there is need of exordium ; 4. or otherwise for the sake of ornament ; since without it a speech appears hastily got up. Of this sort was the panegyric of Gorgias on the Eleans ; for without any thing like the preluding display of gesture and attitude in the Gymnasium, he begins forthwith,—“ O Elis, city blest by fortune !”

A compliment to be paid to the audience.

Exordia of deliberative oratory wanted only in four cases.
i. On account of the speaker.
ii. On account of the adversary.
iii. To impress the hearer with the value of the case.
iv. For the sake of embellishment.

CHAP. XV.

Topics for removing Imputations to your Prejudice.

TOUCHING the subject of an imputation cast upon you, one means of removing it will be the recurring to those topics, by means of which one might do away

1. Topics to refute aspersions.

⁹ This sentiment has been already quoted, book i. chap. 9, § 30, in illustration of the rule *Exordia rap' eis ô λαός*. The remark of Socrates may be found in Plato's Menæxenus, but differently expressed.

i. Removing unfavourable impressions.

any surmises prejudicial to him; for it matters not whether they be entertained in consequence of the allegations of any one or not. So that this topic is universally applicable.

2. ii. Contradicting the point.

Another mode is, the confronting it like a point under litigation, [arguing] either that it is not the case, or is not hurtful, or not to the particular individual; or that it is not of such importance, or not unjust, or not considerable, or not disgraceful, or of no consequence; for in points of this description the question originates: just as Iphicrates argued against Nausicrates; for he pleaded, that he did what the prosecutor alleged, and indeed hurt him, but yet did not act unjustly. Or confessedly acting unjustly he may offer some equivalent: e. g. though hurtful, yet was it honourable; though painful, yet was it beneficial; by some other such expedient.

3. iii. By extenuation and excuse.

Another method is, the arguing that the action is merely a fault, or an error¹, or that it was necessary; such as the plea of Socrates, "that he trembled, not as the calumniator alleged, that he might *appear* an old man, but *of necessity*; since his eighty years of age did not overtake him of his own choice." And you may attempt a commutation of motives; e. g. "that he did not wish to hurt, but to do this or that, and not what the accuser insinuated; but that it so happened that hurt was sustained. But that it were fair enough to hate him, had he acted purposely with a view to this taking place."

4. iv. By recrimination of the accuser.

Another mode is, the considering whether the prosecutor has either now or formerly, in his own person, or in that of his connexions, been involved in the charge. Another, whether others, whom they

5. v. By comparison with others.

themselves acknowledge not liable to the imputation, be also comprehended; for instance, if he acknowledged an adulterer to be exempt from the charge,

6. vi. By ascertaining whether the

surely then also is this or that person. Another consists in ascertaining whether he has cast any false imputations on others; or whether, like the party in

¹ For the distinctions between *μαρτήματα* and *ἀτυχήματα*, see book i. chap. 15, § 16.

the present case, any other has calumniated persons, or whether, without direct imputation, any ever were suspected who have yet appeared innocent. Another, in raising a counter prejudice against the calumniator; for it is absurd, if, while the man is himself void of credit, his words obtain it. Another, in inquiring whether a decision has been already made; just as Euripides did in reply to Hygiænon, who, in an action of *Antidosis*, accused him as being an impious person, inasmuch as exhorting to perjury he wrote,—“The tongue hath sworn, but the mind is unsworn²,” for Euripides argued, “that by bringing into court the decisions of the Dionysiac contest he acted unjustly; for there he had given, or would give an account, should he wish to impeach him.” Another, in impeaching calumny itself, as to how great an evil it is; and this because it produces decisions foreign to the point, and that it relies not on the strength of its case.

But the citing presumptive signs is a topic common to both parties: thus, in the Teucer, Ulysses insinuates that “he is of kin to Priam; for [his mother] Hesione was Priam’s sister.” He, however, replies on the ground that, “Telamon, his father, was the enemy of Priam, and that he did not denounce the spies.”

Another, peculiar to an accuser, is, for one after bestowing short praise to censure at great length, putting forward great virtues briefly, or very many [which are not relevant], then to censure in one point which bears home upon the case. Such methods are the most crafty and malignant; for they attempt injury by means of one’s virtues, by blending them with a man’s failings.

But it is a resource common to the calumniator and one who meets a calumny, that, as it is possible for the same action to have been done from many motives, by the calumniator, indeed, facts should be taken in a bad sense, as he makes his selection of motives on the worse side; while by the respondent

accuser has been proved a calumniator before.
7. vii. By raising a counter prejudice.
8. viii. If the affair has been already decided.

9. ix. By declaiming against calumny itself.

x. Citing the presumptive signs: a topic useful to both.

10. xi. Praising a little to blame much. This suits the accuser.

xii. By assuming the motives which suit your purpose.

² Hippolytus, 612.

it should be made on the better. Take, for instance, the fact that Diomedes chose Ulysses: one will say it was, "because he conceived Ulysses to be the bravest;" the other, that "it was not, but because he alone could not become a rival, such a poltroon was he."

Thus much, then, on the subject of imputations.

CHAP. XVI.

Of the Narration.

1. The narration in epideictic oratory is not continuous but disjointed. In demonstrative speeches the narration is not given in continuity, but in scattered portions; for one must go over the actions out of which the speech arises: for a speech is a kind of compound, having one portion, indeed, independent of art, [since the speaker is not at all the cause of the actions themselves,] and another portion originating in art; and this last is either the showing that it is fact should it be incredible, or such either in character or degree, or in showing all these points at once. Owing to this, there are times when one ought not to narrate every fact successively; because this mode of exposition is difficult to remember. From some, then, establish the character for courage, from others for wisdom, and from others for justice. The one style of narration is too simple; the other has the grace of variety, and is not so void of elegance. But you have only to awaken the recollection of facts well known; on which account, many subjects will stand in no need of narration: supposing, for instance, you would praise Achilles, because all are acquainted with his actions; but you must employ them at once. But in praising Critias, an orator must narrate; for not many are acquainted with his exploits.
4. In judicial, the narration must But now people tell us, ridiculously enough, that the narration should be rapid. And yet I would say, as did one to a baker, who inquired "whether he

should knead his bread hard or soft," — "What," said he, "is it then impossible to knead it properly?" And so here [in rhetoric a mean is to be observed]. For one should not narrate at too great length, just as he should not make too long an exordium, nor state his proofs [too fully]. For neither in this case does propriety consist either in rapidity or conciseness, but in a mean betwixt both: and this is the stating just so much as will make the matter clear, or as will cause one to conceive that it has taken place, or that the party has inflicted hurt, or committed injustice, or that the case is of that importance which the speaker wishes to establish; and to the opposite party the opposite points will avail. And an orator should narrate, by the bye, such incidents as conduce to his own excellence: thus, "I all along used to instruct them in what was just, bidding them not to abandon their children," — or, to the villany of the other party; — "—but he replied to me, that wherever he might be he should have other children." Which, Herodotus says, was the reply of the Egyptians on their revolting¹. Or whatever is pleasing to the judges.

make the subject clear,

5. and bias the audience in favour of the orator.

In the case of a defendant, the matter will be more brief; the points for dispute being, either that it has not taken place, or is not hurtful, or not unjust, or not of such importance. So that on acknowledged points he need not pause, unless they conduce in some degree to the objects suggested; e. g. if the fact be acknowledged, but its injustice disputed. Moreover, you should mention as already done those things which, in the course of being done, failed of producing pity or horror. The story of Alcinous is an instance, which is despatched to Penelope in sixty verses. And as Phäyllus does in *the circle*, and the opening scene of the *Ceneus*. The narration should also convey a notion of the character: this will be secured, if we know what gives rise to the moral character. One source is the manifestation of deliberate choice; and of what kind is moral

6. The defendant's narration is brief;

7.

8. and conveys an impress of character.
i. By manifest-

¹ See Herodotus, ii. 30.

ing moral purpose.

ii. By narration of the concomitant circumstances.
iii. By speaking with feeling.

character we ascertain from knowing of what kind this is; and of what kind the deliberate choice is, from being acquainted with its proposed end. Hence the doctrines of mathematics have no display of character, for neither have they deliberate choice; and this for that they have not the influence of motive²: but the Socratic discourses [have this display], for they treat concerning subjects of this kind. But those things convey a notion of character, which is consequent upon the several characters³; e. g. "Whilst saying this he began to hasten off;" for this manifests a hardihood and rusticity of character. And be cautious not to speak coldly as from the understanding merely, as orators do now-a-days, but as though from the deliberate choice⁴. "I, for I wished and deliberately preferred this; and if I profit nothing by it, then it is the more honourable:" for the one is characteristic of a prudent⁵, the other of a good man: since [the proposed end] of the prudent consists in pursuing the expedient; of a good man, in pursuing what is honourable. And should any circumstance be incredible, you must subjoin the reason; as Sophocles does. He furnishes an example in the *Antigone*, that she mourned more for her brother than for a husband or children; for these, if lost, might again be hers.

"But father now and mother both being lost,
A brother's name can ne'er be hail'd again⁶."

² See the next chapter, § 8.

³ Using, in fact, the σημεῖον of the action as an evidence of the thought, or taking the result of the feeling for the feeling itself; as Pericles does when alluding to the morose looks of the Lacedæmonians, a process which, though ingenious, yet often leads to a fallacy.

⁴ Which is will regulated by the understanding. See Nich. Eth. book iii. chap. 2, 3, etc.

⁵ That is, the prudent speak from the dictates of the understanding solely, the good on the impulse of deliberate choice.

⁶ Sophocles, *Antigone*, 911. See the speech of the wife of Intaphernes to Darius, on asking the life of a brother in preference to those of her husband or children:—"Ὁ βασιλεῦ, ἀνὴρ μίς μοι ἂν ἄλλος γίνοιτο, εἰ δαίμων ἰθὺλοι, καὶ τέκνα ἄλλα, εἰ ταῦτα ἀποβάλοιμι· πατὴρ δὲ καὶ μητὴρ οὐκ ἔτι μὲν ζώντων, ἀδελφεὶς ἂν ἄλλος οὐδενὶ τρόπῳ γίνοιτο. Herodotus, *Thalia*,

But if you should have no reason to offer, then avow "that you are well aware that you speak what exceeds belief, but that such is your nature:" for the world discredit a man's doing any thing voluntarily, except what is expedient.

Again, draw your remarks out of those things which are indicative of the passions; narrating both their attendant circumstances, and those which the audience know, and which attach peculiarly either to the speaker himself or his adversary:—"He, having scowled at me, departed." And as Æschines said of Cratylus, "that whistling and snapping his fingers—" for they have a tendency to persuade: therefore these things which they know, become indices of that which they do not know. Such instances one may get in abundance out of Homer:—"Thus Penelope spoke, and the old woman covered her face with her hands⁷:" for those who are beginning to shed tears cover their eyes. And forthwith insinuate yourself as a person of a certain character, in order that they may look upon you as one of such a description, and your adversary [as the reverse]: but beware of observation as you do it. And that it is easy to effect this we may observe in those who report any thing to us; for respecting the communication (of which as yet we know nothing), we

10. Let the narration be παθητικῇ,

and παθητικῇ

cap. 119. See the reply of Robert Duke of Normandy to William Rufus, justifying himself for allowing him to get water during the siege at Mont St. Michael:—"How am I to blame? should I have suffered our brother to die of thirst, what other have we if we had lost him?" Lord Lyttleton, vol. i. p. 111. Compare the words of Edward I. on hearing at the same time of the death of his father and infant son, "that the death of a son was a loss which he might hope to repair; the death of a father was a loss irreparable." Hume. And the lines quoted in "the Antiquary," vol. iii. chap. 11:—

He turned him right and round again,
Said, Scorn na at my mither;
Light loves I may get mony a ane,
But minnie ne'er anither.

⁷ *Odyssey*, book xix. 361.

still catch a kind of guess⁸. But the narration must be carried on in different parts, and, in some instances, even at the commencement.

11. Narration least used in deliberative oratory.

But in deliberative speeches narration occurs least of all, because no one narrates respecting what is yet to be: if, however, there should be any narration, it will be respecting things which have already happened, that the recollection of them having been awakened, the judges may determine better on the future; the orator either reprehending or praising them: but he is not then performing the functions proper to him as an adviser. If, however, the thing narrated be incredible, see you promise to state a reason for it immediately⁹, and to submit it to whom they please: like the Jocasta of Carcinus in his *Œdipus*, who always keeps promising when he who was seeking out her son inquires of her: and the Hæmon of Sophocles¹⁰.

CHAP. XVII.

Of the Proof.

1. Proof in judicial oratory: four points.
i. The fact.
ii. The mischief.
iii. The degree.

PROOF should be demonstrative; and the points of dispute being four, you must demonstrate by producing proof respecting the particular point at issue: thus, if the adversary question *the fact*, you must at the trial produce proof of this point above the rest; should it be that he did *no harm*, then of that point; and so should he urge that the action is not of the *importance* supposed, or that it was done *justly*: [and it must be done in the latter cases] exactly in the same way as if the inquiry were respecting the mat-

⁸ See the *Trachiniæ* of Sophocles, verse 869, where part of the Chorus conjecture, from the dejected looks of the nurse as she approaches, that some calamity is about to be announced.

⁹ An instance of this occurs in the statement of finance which Pericles laid before the Athenians, to substantiate the hopes which he had held out to them. Thucyd. ii. 13.

¹⁰ See the *Antigone*, 635, etc.

ter of fact. And let it not escape us that in this single inquiry, it must needs be that one party is guilty¹: for it is not ignorance which is to blame, as though any were to dispute on a point of justice. So that, in this inquiry, the circumstance should be employed; but not in the other [three].

But, in demonstrative rhetoric, amplification, for the most part, will constitute the proof, because the facts are honourable and useful; for the actions should be taken on credit², since, even on these subjects, a speaker on very rare occasions does adduce proof, if either the action be passing belief, or if another have the credit of it³.

But, in deliberative speeches, the orator may either contend that the circumstances will not take place, or that what he directs will indeed take place, but that it is not just, or not beneficial, or not in such a degree. And it will be well for him to observe whether any falsehood appears in the extraneous observations of his adversary; for these appear as so many convincing proofs, that he is false in the case of the other more important statements.

And example is best adapted to deliberative rhetoric; while enthymem is more peculiar to judicial⁴. For the former is relative to the future; so that out of what has been heretofore, we needs must adduce examples: the latter respects what is or is not matter of fact, to which belong more especially demonstration and necessity; for the circumstances of the past involve a necessity. The speaker ought not, however, to bring forward his enthymems in a continued series, but to blend them by the way; should he not do this, they prove an injury one to the other,

2. iv. The moral character of the action.
3.

In epideictic the proof is made by amplification.

4. In deliberative we must observe the fallacies of the adversary, for these are a part of our proof.

5. Example best suited to it.

6. How enthymems are to be used. Not in a series.

¹ He states the same doctrine in the Nich. Eth. v. 2:—*ὅ γάρ ὅσπερ ἐν τοῖς συλλόγμασι περὶ τοῦ γιγνίσθαι ἀμφισβητοῦσιν ὡς ἀνάγκη τὸν ἑτέρου εἶναι μοχθηρὸν ἂν μὴ διὰ λήθης αὐτὸ δρῶσιν, κ. τ. λ.*

² "For the facts are taken for granted; so that it only remains to invest them with grandeur." Book i. chap. 9, § 40.

³ Victorinus notices the use of the phrase *αἰτίαν ἔχειν* in a good sense.

⁴ He asserts this, and assigns the reason, at the end of his consideration of demonstrative rhetoric, book i. c. 9, § 40.

- for there is some limit on the score of quantity too:—"Oh friend, since you have spoken *just so much* as a prudent man would⁵;" but the poet does not say, *of such a quality*. Neither should you seek after enthymems on every subject; otherwise you will be doing the very thing which some philosophers do, who infer syllogistically conclusions in themselves better known, and more readily commanding belief, than the premises out of which they deduce them.
7. Nor on all subjects. And when you would excite any passion, do not employ an enthymem; for either it will expel the passion, or the enthymem will be uttered to no purpose; for the emotions which happen at the same time expel each other, and either cancel or render one or the other feeble. Neither when one aims at speaking with the effect of character, ought he at all to aim at the same time at enthymem; for demonstration possesses neither an air of character, nor deliberate choice. But a speaker should employ maxims alike in narration and in proof; for it has an expression of character:—"Yes; I delivered it, even knowing that *one ought never to repose implicit confidence*." And if one speak with a view to excite passion:—"And injured though I be, yet I do not repent; for the gain, indeed, is on his side, but justice on mine."
8. Nor to excite any emotions or passions.
9. But maxims may be used in the proof and narration.
10. Reasons why deliberative is more difficult than judicial oratory.
- i. It is on the future.
- ii. Judicial and deliberative is more difficult than judicial rhetoric, and probably enough,—because it respects the future; whereas, in the latter, the question is respecting the past, which has already become matter of absolute science, even to diviners, as Epimenides the Cretan used to say; for he did not exercise his art of divination respecting things yet to be, but respecting those which had already happened indeed, but which were obscure: again, in judicial questions,

⁵ The words of Menelaus to Pisistratus, the son of Nestor. *Odyssey*, lib. iv. 204. The force of the illustration here seems to be this: the poet, no less than the philosopher, thought it no small praise *to know when to stop*; so that, without allusion to the prudence of what had been said, (to the category of *quality*, *ποιότης*), he commends him merely on the score of its due *quantity*.

there is the law as the basis of reasonings; but for one who has something wherewith to begin, it is easier to discover means of proof. Neither has [deliberative rhetoric] many opportunities of digression; none, for instance, in reference to an adversary, or respecting one's self, or in order to excite passion⁶; but it possesses these opportunities least of all the three branches, unless it depart from its proper province. If, then, you are at a loss, you should do what the rhetoricians at Athens do, and particularly Isocrates; for in the course of deliberative speaking he accuses the Lacedæmonians, for instance, in the panegyric, and Chares in the speech about the alliance. But in demonstrative speaking, you should insert praise in the speech by way of episode, as Isocrates does, for he all along keeps introducing something. And that saying of Gorgias, "That he never failed of something to say," is nothing more nor less than this: for if he be speaking of Achilles, he praises Peleus, then Æacus, then his goddess mother, and so, too, valour in the abstract; or he does something or another in this strain.

Now the language of one who possesses proof, should be both fraught with the impress of character, and fitted to convey the proof. But if you possess not enthymemes, let it convey an impression of your character; and the show of goodness more befits a virtuous man, than accuracy of speech.

But of enthymemes the *refutative* are more approved than the *confirmative*⁷: because in the case of as many as produce *reductio ad absurdum*, it is more plain that a conclusion has really been arrived at; for opposites, when set by each other, are more clearly recognised.

⁶ Now, according to the early part of this work, all this is done easily enough in judicial cases, since there the judge has no personal interest, and easily resigns himself to the speaker; but in deliberative rhetoric, every one addressed is supposed, more or less, to have an interest in the question at issue, and is therefore more jealous of the speaker's artifice. Book i. c. 1, § 10.

⁷ See book ii. chap. 23, § 30.

cial oratory has law for a basis.
iii. The deliberative orator cannot digress so easily.

12. If you have enthymemes speak *ἡθικῶς* and *ἀποδεικτικῶς*.

If not, only *ἡθικῶς*.

13. Refutative enthymemes better than confirmative

14. Mode of replying to our adversary.

The first speaker must give his proofs and anticipate objections.

15. The last speaker must refute the adversary's arguments, and draw opposite inferences. The reason why.

Touching reasonings directed against the adversary, they are not in any thing different in species; but it belongs to the province of proof to do away his arguments, some by starting an objection, others by contrary inference⁸. And the speaker who begins, ought, both in deliberative and judicial rhetoric, first to state his own proofs; and subsequently to meet objections by doing them away, or by treating them with contempt beforehand. But should the points objected to be many, first he must confront the objections, as did Callistratus in the Messeniac assembly; for previously having swept away what his adversaries would be likely to allege in this way, he then spoke on his own part. But the last speaker should speak first what makes against the adversary's speech, doing it away, and drawing opposite inferences; and particularly should his arguments have been well received. For just as one's mind does not cordially receive a person on whom a slur has been previously cast; in the same way neither does it favourably listen to a speech, if the opposite speaker appear to have spoken truly. It is necessary, then, to gain a footing in the hearer's mind for the intended speech; and it will be gained if you sweep away objections: wherefore a speaker, having combated either all, or the most important, or the most approved arguments of his adversary, or those which readily admit a contrary inference, is in this way to substantiate his own case:—

"The fame o' th' Goddesses I'll first defend,—

* * * * *

For Juno and ———."

In this she first lays hold of the most silly point.— Thus much, then, of proof.

16. Character of

But as to the effect of character, since the saying

⁸ Compare book ii. chap. 25, § 1, 2.

⁹ See the Troades of Euripides, 969, where Hecuba, replying to the defence made by Helen, lays hold of that part of it which seemed to insinuate that the three goddesses had been instrumental to her abandonment of her husband;—a point which, it will readily be perceived, was ΕΥΕΛΕΓΚΤΟΝ.

some things respecting one's self, either is invidious, the speaker best conveyed by introducing a third person. or involves prolixity, or a liability to contradiction; and respecting another, either slander or rusticity;—it behoves one to introduce another as speaking: the thing which Isocrates does in the speech respecting Philip, and in the *Antidosis*; and as Archilochus conveys reproof, for he introduces the father saying, in an iambic line respecting his daughter, "There is not any thing which may not be expected, nothing which may be affirmed impossible on oath;" and Charon, the mechanic, in that iambic whose beginning is, "I regard not the wealth of Gyges;" and as Sophocles introduces Hæmon pleading in behalf of Antigone to his father, as though another character were speaking.

But it is necessary sometimes to alter the *form* of our epithymema, and to make them into maxims¹⁰: for example, "It behoves men of sense to come to reconciliation while yet successful; for thus will they be the greatest gainers." But, in enthymematic *form*, it is thus: "If persons ought then to be reconciled when the reconciliation will be most to their advantage and profit, they should be reconciled while yet they are successful." 17. Enthymems are occasionally to be altered into maxims.

CHAP. XVIII.

Of Interrogation and Ridicule.

BUT respecting interrogation, it is the happiest time for employing it when an admission has been made in such a way, that a single further question being put, an absurdity occurs: thus Pericles asked Lampon respecting the initiation to the rites of [Ceres] the protectress; and on his saying, "That it was not possible for him, an uninitiated person, to hear it,"—he asked "Whether he knew himself?" when 1. Interrogation. When to be employed. 1. When an absurdity will result.

* See book ii. chap. 21, § 2.

he said he did, [Pericles subjoined,] "And how do you know who are uninitiated?"

2. Next to this is the crisis, when [of two points] one is clear, and it is manifest to the party putting the question, that his adversary will concede the other; for one ought, after having ascertained by inquiry the one proposition, not to interrogate further respecting the point which is clear, but state the conclusion. Just as Socrates, when Meletus denied that he believed in the gods, asked "Whether he asserted the being of any demon?" When he allowed that he had, Socrates asked, "Whether these demons were not either sons of the gods, or something of divine nature?" And when he allowed it, "Is there, then," said he, "one who thinks that sons of the gods exist, and not the gods themselves?"

3. Again, when one is likely to exhibit the adversary as speaking contradictions, or somewhat revolting to general opinion.

4. Fourthly, when he may not be able to rid himself of the question otherwise than by a sophistical answer: for if he answer in this way, *that it is, and is not, or partly is, and partly is not*,—or, *one way it is, another way is not*; the hearers hoot him off, being at a loss for his meaning.

Under any other circumstances do not attempt interrogation; for should the party interrogated start an objection to the question, you appear to have been overcome: since it is not possible to put many questions by reason of the imbecility of the hearer. On which account we ought, as much as possible, to compress even our enthymems.

5. How to answer an equivocal question.
i. By distinction.
ii. By anticipation.

But one must give his answers to equivocal questions with a distinction¹, and not concisely; and to what seems a contradiction, by directly offering an explanation in the reply, before the interrogator can put the next succeeding question, or draw the inference he aims at; for it is no difficult thing to

¹ See the answer of our Saviour to the captious question of the Pharisees,—“What thinkest thou? Is it lawful to give tribute unto Cæsar, or not?” Matt. xxii. 17—22.

foresee on what the speech turns. Be this, however, and the means of answering, clear to us from the *Topics*. And as to a party drawing his conclusion, if his question produce that conclusion, you are to assign the cause: as Sophocles, when questioned by Pisander, "Whether it had been his opinion, as it had of the other commissioners, to establish the four hundred," acknowledged that it had.—"But how," rejoined the other, "seemed it not to you to be wrong?" He said it did. "Did you not, then, do that which was wrong?" "Yes, forsooth," replied he, "for I had no better alternative." And as the Lacedæmonian, when called to an account respecting his ephorship, on having the question put, "Whether the rest appeared to him to have perished justly," said they did. "Then," retorted the other, "did you not enact the same things as they?" And when he acknowledged that he had, "Would not you also," asked the other, "justly perish?" "No, indeed," said he, "for they did this on a bribe; I did not, but merely from judgment." Wherefore one ought not after the conclusion to put a further question, nor to put, interrogatively, the conclusion itself, unless the truth lies abundantly on our side.

6. iii. By explanation.

No question to be put after the conclusion.

But with respect to *Ridicule*, inasmuch as it seems to possess a kind of use in disputation², and as "one ought," says Gorgias, "to mar the grave earnestness of our adversary by ridicule, and his ridicule by sober earnestness," making the remark justly enough,—it has been stated in the *Poetic*³ how many species of ridicule there are; whereof, some befit the gentleman, others do not: so that each must see to it that he take that which befits himself. But the playing a man off is more gentlemanly than buffoonery; for the former produces the ridicule for his own sake, the buffoon for that of another.

7. Ridicule, how to be used.

² "Ridiculum acri Fortius et melius plerumque secat res." *Hor. Sat. i. 10, 14.*

³ See book i. chap. 11, § 29.

CHAP. XIX.

Of the Peroration.

1. Peroration consists of four things.
- i. getting the hearer favourable to one's self, and ill-disposed towards the adversary; and of amplification and extenuation; and of placing the hearer under the influence of the passions; and of awakening his recollection.
 - ii.
 - iii.
 - iv. For after showing yourself to be on the right side, and your adversary on the wrong, it naturally follows to praise and blame, and to give the last finish. And one of two things the speaker ought to aim at, either to show that he is good relatively to them, [the audience,] or is so absolutely; and that the other party is bad, either relatively to them, or absolutely. And the elements, out of which one ought to get up persons as of such characters, have been stated; both whence one should establish them as bad, and whence as good. Next to this, these points having been already shown, it follows naturally to amplify or diminish: for the facts must needs be acknowledged, if one be about to state their quantity; for the increase of bodies is from substances previously existing. But the elements, out of which one must amplify and diminish, are above set forth.
2. ii. We must amplify and diminish.
3. iii. We must excite the hearers.
4. iv. We must awaken the memory.
- Next to this, the facts being clear both as to their nature and degree, it follows that we excite the hearer to passion; such as are, pity, terror, anger, hatred, envy, emulation, and contentiousness: the elements of these also have been stated above.
- So that it merely remains to awaken a recollection of what has been before stated. And this we are to do here, in the way in which some erroneous teachers say we should in the *exordium*: for in order that the facts may be readily perceived, they bid us state them frequently. Now there [in the *exordium*] indeed we ought to state the case at full, in order that it may not be unknown to the hearer upon what the

trial turns; here, however, [in the peroration,] merely the means by which it has been proved, and that summarily.

The commencement of the peroration will be, that one has made good what he undertook; so that it will be to be stated, as well what one has adduced, as for what reasons. And it is expressed either by means of a juxtaposition with the adversary's statements; and draw the comparison either between every point whatsoever, which both have stated relative to the same thing; or else not by a direct opposition. "He, indeed, on this subject said so and so; but I so and so, and for such reasons." Or, by a kind of bantering: thus, "He said so and so, and I so and so." And, "What would he do, had he proved this, and not the other point!" Or by interrogation:—"What has not been fully proved on my side?" or, "What has this man established?" Either in this way, then, must the speaker conclude, or he must, in natural order, so state his reasoning as it was originally stated; and, again, if he pleases, he may state distinctly that of the adversary's speech. And, for the close, the style without connectives is becoming, in order that it may be a peroration, not an oration¹: I have spoken,—you have heard,—the case is in your hands,—pronounce your decision².

5. The peroration must assert that the orator has proved his point. He must compare his arguments with those of his opponent, either ironically, or by interrogation.

6. The disjointed style is suitable to the peroration.

¹ See the conclusion of Lysias' oration against Eratosthenes.

² It cannot fail of being observed how neatly Aristotle employs this his concluding chapter, as at once an illustration of the subject and a farewell to the reader.

A BRIEF
OF THE
ART OF RHETORICK;

**CONTAINING IN SUBSTANCE ALL THAT ARISTOTLE HATH WRITTEN
IN HIS THREE BOOKS ON THAT SUBJECT.**

BY
THOMAS HOBBS,
OF MALMSBURY.

REPRINTED FROM THE EDITION PRINTED AT LONDON IN 1681.

A BRIEF
OF THE
ART OF RHETORICK.

BY
THOMAS HOBBS.

BOOK I.—CHAP. I.

*That Rhetorick is an Art consisting not only in moving
the Passions of the Judge; but chiefly in Proofs.
And that this Art is Profitable.*

WE see that all men naturally are able in some sort to *accuse* and *excuse*: some by *chance*; but some by *method*. This *method* may be discovered: and to discover *Method* is all one with teaching an *Art*. If this *Art* consisted in Criminations only, and the skill to stir up the Judges, *Anger*, *Envy*, *Fear*, *Pity*, or other *affections*; a *Rhetorician* in well ordered Commonwealths and States, where it is forbidden to digress from the cause in hearing, could have nothing at all to say. For all these perversions of the Judge are beside the question. And that which the pleader is to shew, and the Judge to give sentence on, is this only: 'Tis *so*: or *not so*. The rest hath been decided already by the Law-maker; who judging of universals, and future things, could not be corrupted. Besides, 'tis an absurd thing, for a man to make crooked the Ruler he means to use.

It consisteth therefore chiefly in *Proofs*; which are *Inferences*: and all *Inferences* being *Syllogismes*, a *Logician*, if he

would observe the difference between a plain *Syllogisme*, and an *Enthymeme*, (which is a *Rhetoricall Syllogisme*,) would make the best *Rhetorician*. For all *Syllogismes* and *Inferences* belong properly to *Logick*; whether they infer truth or probability: and because without this *Art* it would often come to pass, that evil men by the advantage of natural abilities, would carry an evil cause against a good; it brings with it at least this profit, that making the pleaders even in skill, it leaves the odds only in the merit of the cause. Besides, ordinarily those that are Judges, are neither patient, nor capable of long *Scientificall proofs*, drawn from the *principles* through many *Syllogismes*; and therefore had need to be instructed by the *Rhetoricall*, and shorter way. Lastly, it were ridiculous, to be ashamed of being vanquished in exercises of the body, and not to be ashamed of being inferior in the vertue of well expressing the mind.

CHAP. II.

The Definition of Rhetorick.

RHETORICK, is that Faculty, by which we understand what will serve our turn, concerning any Subject to win belief in the hearer.

Of those things that beget belief; some require not the help of Art; as *Witnesses*, *Evidences*, and the like, which we invent not, but make use of; and some require Art, and are invented by us.

The belief that proceeds from our Invention, comes partly from the *behaviour* of the *speaker*; partly from the *passions* of the *hearer*: but especially from the *proofs* of what we alledge.

Proofs are, in *Rhetorick*, either *Examples*, or *Enthymemes*, as in *Logick*, *Inductions*, or *Syllogismes*. For an *Example* is a short *Induction*, and an *Enthymeme* a short *Syllogisme*; out of which are left as superfluous, that which is supposed to be necessarily understood by the hearer; to avoid prolixity, and not to consume the time of publick business needlessly¹.

¹ And it might be added, in order to gratify the pride of the auditor by leaving it to him to supply the deficiency.

CHAP. III.

Of the several kinds of Orations : and of the Principles of Rhetorick.

IN all *Orations*, the Hearer does either hear only ; or judge also.

If he hear only, that's one kind of *Oration*, and is called *Demonstrative*.

If he judge, he must judge either of that which is to come ; or of that which is past.

If of that which is to come, there's another kind of *Oration*, and is called *Deliberative*.

If of that which is past ; then 'tis a third kind of *Oration*, called *Judicial*.

So there are three kinds of *Orations* ; *Demonstrative*, *Judicial*, *Deliberative*.

To which belong their proper times. To the *Demonstrative*, the *Present* ; To the *Judicial*, the *Past* ; and to the *Deliberative*, the *time to come*.

And their proper Offices. To the *Deliberative*, *Exhortation* and *Dehortation*. To the *Judicial*, *Accusation* and *Defence*. And to the *Demonstrative*, *Praising* and *Dispraising*.

And their proper ends. To the *Deliberative*, to Prove a thing *Profitable*, or *Unprofitable*. To the *Judicial*, *Just*, or *Unjust*. To the *Demonstrative*, *Honourable*, or *Dishonourable*.

The *Principles* of *Rhetorick* out of which *Enthymemes* are to be drawn ; are the *common Opinions* that men have concerning *Profitable*, and *Unprofitable* ; *Just*, and *Unjust* ; *Honourable*, and *Dishonourable* ; which are the points in the several kinds of *Orations* questionable. For as in *Logick*, where certain and infallible knowledge is the scope of our proof, the *Principles* must be all *infallible Truths* : so in *Rhetorick* the *Principles* must be *common Opinions*, such as the Judge is already possessed with : because the end of *Rhetorick* is victory ; which consists in having gotten *Belief*.

And because nothing is *Profitable*, *Unprofitable*, *Just*, *Unjust*, *Honourable*, or *Dishonourable*, but what has been *done*, or is *to be done* ; and nothing is *to be done*, that is not *possible* : and because there be degrees of *Profitable*, *Unprofitable*, *Just*, *Unjust*, *Honourable*, and *Dishonourable* ; an Orator must be ready in other *Principles* ; namely, of what is *done* and *not*

done ; possible and not possible ; to come and not to come ; and what is Greater, and what is Lesser ; both in general, and particularly applied to the thing in question ; as what is more and less, generally ; and what is more profitable, and less profitable, etc. particularly.

CHAP. IV.

Of the Subject of Deliberatives ; and the Abilities that are required of him that will deliberate of Business of State.

IN *Deliberatives* there are to be considered the *Subject*, wherein, and the *Ends* whereto the Orator exhorteth, or from which he dehortheth.

The *Subject* is always something in our own power, the knowledge whereof belongs not to *Rhetorick*, but for the most part to the *Politicks* ; and may be referred in a manner to these five heads.

1. *Of levying of Money.* To which point he that will speak as he ought to do, ought to know before-hand, the revenue of the State, how much it is, and wherein it consisteth ; and also how great are the necessary charges and expences of the same. This knowledge is gotten partly by a man's own experience, partly by relations, and accounts in writing.

2. *Of Peace and War.* Concerning which the Counsellor or Deliberator, ought to know the strength of the Commonwealth ; how much it both now is, and hereafter may be : and wherein that power consisteth. Which knowledge is gotten, partly by experience, and relations at home ; and partly by the sight of wars, and of their events abroad.

3. *Of the Safeguard of the Country.* Wherein he only is able to give counsell, that knows the forms, and number, and places of the Garrisons.

4. *Of Provision.* Wherein to speak well, it is necessary for a man to know what is sufficient to maintain the State ; what Commodities they have at home growing ; what they must fetch in through need ; and what they may carry out through abundance.

5. *Of making Laws.* To which is necessary so much *Political*, or *Civil Philosophy*, as to know what are the several kinds of Governments ; and by what means, either from with-

out or from within, each of those kinds is preserved, or destroyed. And this knowledge is gotten, partly by observing the several Governments in times past, by *History*; and partly by observing the Government of the times present in several Nations, by *Travel*.

So that to him that will speak in a Councell of State, there is necessary this; *History, Sight of Wars, Travel, Knowledge of the Revenue, Expences, Forces, Havens, Garrisons, Wares, and Provisions* in the State he lives in; and what is needful for that State, either to *export* or *import*.

CHAP. V.

Of the Ends which the Orator in Deliberatives, propoundeth, whereby to exhort, or dehort.

AN Orator in *Exhorting* always propoundeth *Felicity*, or some part of *Felicity* to be attained by the actions he exhorteth unto: and in *Dehortation* the contrary.

By *Felicity*, is meant commonly, *Prosperity with vertue*, or a continual content of the life with surety. And the parts of it are such things as we call *good*, in body, mind, or fortune; such as these that follow.

1. *Nobility*. Which to a State or Nation is, *to have been antient inhabitants; and to have had most antiently, and in most number, famous Generals in the Wars, or men famous for such things as fall under emulation*. And to a private man, *to have been descended lawfully of a Family, which hath yielded most antiently, and in most number, men known to the World for vertue, riches, or any thing in general estimation*.

2. *Many and good Children*. Which is also publick and private. *Publick*, when there is much youth in the State endued with vertue, (namely, of the body, stature, beauty, strength, and dexterity: Of the mind, valour, and temperance). *Private*, when a man hath many such Children, both Male and Female. The vertues commonly respected in Women, are of the body, Beauty, and Stature; Of the mind, Temperance, and Houswifery, without Sordidness.

3. *Riches*. Which is, *Money, Cattel, Lands, Houshold-stuffe; with the power to dispose of them*.

4. *Glory*. Which is, *the reputation of Vertue, or of the*

possession of such things as all, or most men, or wise men desire.

5. *Honour.* Which is, *the glory of benefiting, or being able to benefit others.* To benefit others, is to contribute somewhat, not easily had, to another man's safety, or riches. The parts of Honour are, *Sacrifices, Monuments, Rewards, Dedication of places, Precedence, Sepulchres, Statues, publick Pensions, Adorations, Presents.*

6. *Health.* Which is *the being free from Diseases, with strength to use the body.*

7. *Beauty.* Which is to different Ages different. To Youth, *strength of body, and sweetness of aspect.* To Full Men, *strength of body fit for the Wars, and Countenance sweet, with a mixture of Terror.* To Old Men, *strength enough for necessary labours, with a Countenance not displeasing.*

8. *Strength.* Which is *the ability to move any thing at pleasure of the Mover.* To move, is to pull, to put off, to lift, to thrust down, to press together.

9. *Stature.* Which is then *just, when a man in height, breadth, and thickness of body doth so exceed the most, as nevertheless it be no hindrance to the quickness of his motion.*

10. *Good old Age.* Which is, *that which comes late, and with the least trouble.*

11. *Many and good Friends.* Which is, *to have many that will do for his sake that which they think will be for his good.*

12. *Prosperity.* Which is, *to have all, or the most, or the greatest of those goods which we attribute to Fortune.*

13. *Vertue.* Which is then to be defined, when we speak of Praise.

These are the grounds from whence we *exhort.*

Dehortation is from the contraries of these.

CHAP. VI.

Of the Colours or common Opinions concerning Good and Evil.

In *Deliberatives*, the *Principles*, or *Elements* from whence we draw our *Proofs*, are *common Opinions* concerning Good and Evil. And these *Principles* are either *Absolute*, or *Comparative*. And those that are *Absolute*, are either *Disputable*, or *Indisputable*.

The *Indisputable Principles* are such as these :

Good, is that which we love for it self.

And that, for which we love somewhat else.

And that which all things desire.

And that to every man which his reason dictates.

And that, which when we have, we are well, or satisfied.

And that which satisfies.

And the Cause or Effect of any of these.

And that which preserves any of these.

And that which keeps off, or destroys the contrary of any of these.

Also to take the *Good*, and reject the *Evil*, is *Good*.

And to take the greater *Good*, rather than the less ; and the lesser *Evil*, rather than the greater.

Further, all Vertues are *Good*.

And Pleasure.

And all things Beautiful.

And Justice, Valour, Temperance, Magnanimity, Magnificence ; and other like Habits.

And Health, Beauty, Strength, etc.

And Riches.

And Friends.

And Honour, and Glory.

And Ability to say or do ; also Towardliness, Will, and the like.

And whatsoever Art, or Science.

And Life.

And whatsoever is Just.

The *Disputable Principles* are such as follow :

That is *Good*, whose contrary is *Evil*.

And whose contrary is *Good* for our Enemies.

And whose contrary our Enemies are glad of.

And of which there cannot be too much.

And upon which much labour and cost hath been bestowed.

And that which many desire.

And that which is praised.

And that which even our Enemies and evil men praise.

And what good we prefer.

And what we do advise.

And that which is possible, is *Good* (to undertake).

And that which is easie.

And that which depends on our own Will.
 And that which is proper for us to do.
 And what no man else can do.
 And whatsoever is Extraordinary.
 And what is suitable.
 And that which wants a little of being at an end.
 And what we hope to master.
 And what we are fit for.
 And what evil men do not.
 And what we love to do.

CHAP. VII.

*Of the Colours, or common Opinions concerning Good and Evil,
 comparatively.*

THE Colours of *Good comparatively* depend partly upon the following Definitions of *Comparatives*.

1. *More*, is *so much*, and *somewhat besides*.
2. *Less*, is *that*, *which* and *somewhat else* is *so much*.
3. *Greater* and *more in number* are laid only *Comparatively* to *Less*, and *Fewer in number*.
4. *Great* and *Little*, *Many* and *Few*, are taken *Comparatively* to the *Most of the same kind*. So that *Great* and *Many*, is that which *exceeds*; *Little* and *Few*, is that which is *exceeded by the Most of the same kind*.

Partly from the precedent Definitions of *Good absolutely*.

*Common Opinions concerning Good
 Comparatively, then, are these.*

Greater Good is *Many*, than fewer, or one of those many.
 And *Greater* is the kind, in which the greatest is greater than the greatest of another kind. And *greater* is that *Good* than another good, whose kind is *greater* than another's kind.
 And *Greater* is that from which another *Good follows*; than the *Good* which follows.

And of two which exceed a third, *Greater* is that which exceeds it most.

And that which causes the *greater Good*.

And that which proceeds from a *greater Good*.

And *Greater* is that which is chosen for it self, than that which is chosen from somewhat else.

And the end *Greater* than that which is not the end.

And that which less needs other things, than that which more.

And that which is independent, than that which is dependent of another.

And the Beginning, than not the Beginning.

[Seeing the Beginning is a *greater Good*, or *Evil*, than that which is not the Beginning; and the End, than that which is not the End; One may argue from this *Colour* both ways: as *Leodamas* against *Chabrias*, would have the Actor more to blame than the Advisor; and against *Callistratus*, the Advisor more than the Actor.]

And the Cause, than not the Cause.

And that which hath a *greater* Beginning or Cause.

And the Beginning, or Cause of a *greater Good* or *Evil*.

And that which is Scarce, *greater* than that which is Plentiful; because harder to get.

And that which is Plentiful, than that which is Scarce; because oftener in Use.

And that which is easie, than that which is hard.

And that whose Contrary is *greater*.

And that whose Want is *greater*.

And Vertue than not Vertue, a *greater Good*. Vice, than not Vice, a *greater Evil*.

And *greater Good*, or *Evil* is that, the effects whereof are more Honourable or more Shameful.

And the effects of *greater* Vertues, or Vices.

And the Excess whereof is more tolerable, a *greater Good*.

And those things which may with more honour be desired.

And the desire of better things.

And those things whereof the Knowledge is better.

And the Knowledge of better things.

And that which wise men prefer.

And that which is in better men.

And that which better men chuse.

And that which is more, than that which is less delightful.

And that which is more, than that which is less honourable.

And that which we would have for our selves and Friends, a *greater Good*; and the contrary a *greater Evil*.

And that which is Lasting, than that which is not Lasting.

And that which is Firm, than that which is not Firm.

And what many desire, than what few.

And what the Adversary, or Judge confesseth to be *greater*.
is *greater*.

And Common than not Common.

And not Common than Common.

And what is more Laudable.

And that which is more Honoured, a *greater Good*.

And that which is more Punished, a *greater Evil*.

And both *Good* and *Evil* divided than undivided, appear
greater.

And Compounded than Simple, appear *greater*.

And that which is done with Opportunity, Age, Place,
Time, Means disadvantageous, *greater* than otherwise.

And that which is natural, than that which is attained unto.

And the same part of that which is great, than of that
which is less.

And that which is nearest to the end designed.

And that which is *Good* or *Evil* to ones self, than that
which is simply so.

And possible, than not possible.

And that which comes toward the end of our Life.

And that which we do really, than that which we do for show.

And that which we would be, rather than what we would
seem to be.

And that which is good for more purposes, is the *greater*
Good.

And that which serves us in great necessity.

And that which is joyned with less trouble.

And that which is joyned with more delight.

And of the two, that which added to a third, makes the
whole the greater.

And that which having, we are more sensible of.

And in every thing, that which we most esteem.

CHAP. VIII.

Of the several Kinds of Governments.

BECAUSE *Hortation* and *Dehortation* concern the Common-
wealth, and are drawn from the *Elements* of *Good* and *Evil*;
as we have spoken of them already in the *Abstract*, so we

must speak of them also in the *Concrete*; that is, of what is *Good* or *Evil* to each sort of Commonwealth in special.

The *Government* of a Commonwealth, is either *Democracy*, or *Aristocracy*, or *Oligarchy*, or *Monarchy*.

Democracy is that, wherein all men with equal right, are preferred to the highest Magistracy by Lot.

Aristocracy is that, wherein the highest Magistrate is chosen out of those, that had the best education, according to what the Laws prescribe for best.

Oligarchy is that, where the highest Magistrate is chosen for wealth.

Monarchy is that, wherein one man hath the Government of all; which *Government*, if he limit by Law, is called *Kingdom*; if by his own will, *Tyranny*.

The end of *Democracy*, or the Peoples Government, is *Liberty*.

The end of *Oligarchy*, is the riches of those that govern.

The end of *Aristocracy* is good Laws, and good ordering of the City.

The end of *Monarchy*, or *Kings*, is the safety of the People, and conservation of his own Authority.

Good therefore, in each sort of *Government* is that which conduceth to these their ends.

And because *belief* is not gotten only by *proofs*, but also from *manners*; the *manners* of each sort of Commonwealth ought to be well understood by him that undertaketh to persuade or disswade in matter of State. Their *manners* may be known by their *designs*; and their *designs* by their *ends*; and their *ends* by what we see them take *pleasure* in. But of this more accurately in the *Politicks*.

CHAP. IX.

Of the Colours of Honourable and Dishonourable.

In a *Demonstrative Oration*, the subject whereof is *Praise*, or *Dispraise*; the *proofs* are to be drawn from the *Elements of Honourable* and *Dishonourable*.

In this place we anticipate the second way of getting *belief*; which is from the *manners* of the Speaker. For *Praise*, whether it come in as the principal business, or upon the by, depends still upon the same *Principles*. Which are these :

Honourable, is that, which we love for itself, and is withal laudable.

And that Good, which pleaseth us only because 'tis Good.
And Vertue.

Vertue is the faculty of getting and preserving that which is Good; and the faculty of doing many, and great things well.

The kinds of it are these;

1. *Justice*; which is a *Vertue* whereby every man obtains what by Law is his.

2. *Fortitude*; which is a *Vertue* by which a man carries himself *Honourably*, and according to the Laws, in time of danger.

3. *Temperance*; which is a *Vertue* whereby a man Governs himself in matter of pleasure according to the Law.

4. *Liberality*; which is a *Vertue*, by which we benefit others in matter of money.

5. *Magnanimity*; which is a *Vertue*, by which a man is apt to do great benefits.

6. *Magnificence*; which is a *Vertue*, by which a man is apt to be at great cost.

7. *Prudence*; which is an *Intellectual Vertue*, by which a man is able to deliberate well concerning any *Good* leading to *Felicity*.

And *Honourable*, are the Causes, and effects of things *Honourable*.

And the Works of Vertue.

And the signs of Vertue.

And those actions, the reward whereof is *Honour*.

And the reward whereof is rather *Honour*, than *Money*.

And that which we do not for our own sakes.

And what we do for our Countries good, neglecting our own.

And those things are *Honourable*, which good of themselves, are not so to the Owner.

And those things which happen to the dead, rather than to the living.

And what we do for other men, especially for Benefactors.

And bestowing of Benefits.

And the contrary of those things we are ashamed of.

And those things which men strive for earnestly, but without fear of Adversary.

And of the more *Honourable* and better men, the Vertues are more *Honourable*.

And more *Honourable* are the vertues that tend to other mens benefit, than those which tend to ones own.

And *Honourable* are those things which are Just.

And Revenge is *Honourable*.

And Victory.

And *Honour*.

And Monuments.

And those things which happen not to the living.

And things that excel.

And what none can do but we.

And possessions we reap no profit by.

And those things which are had in honour particularly in several places.

And the signs of praise.

And to have nothing of the servile, mercenary, or mechanick.

And that which seems *Honourable*; Namely such as follow.

Vices confining upon Vertue.

And the extreams of Vertues.

And what the Auditors think *Honourable*.

And that which is in estimation.

And that which is done according to custom.

Besides, in a *Demonstrative Oration*, the Orator must shew, that he whom he praiseth, did what he praiseth unconstrainedly, and willingly.

And he does so, who does the same often.

Praise, is speech, declaring the magnitude of a *Vertue*, *Action*, or *Work*.

But to praise the Work from the Vertue of the Worker, is a circular proof.

To *Magnify* and to *Praise*, differ in themselves, as *Felicity* and *Vertue*. For *Praise* declares a mans *Vertue*; and *Magnifying* declares his *Felicity*.

Praise is a kind of inverted *Precept*. For to say, *Do it because 'tis good*, is a *Precept*. But to say, *He is good because he did it*, is *Praise*.

An Orator in *Praising* must also use the forms of *Amplification*; such as these:

He was the first that did it.

The only man that did it.

The special man that did it.

He did it with disadvantage of time.

He did it with little help.

He was the cause, that the Law ordained Rewards and Honours for such Actions.

Further, he that will *praise* a Man, must compare him with others; and his actions with the actions of others; especially with such as are renowned.

And *Amplification* is more proper to a *Demonstrative Oration*, than to any other. For here the Actions are confessed; and the Orators part is only this, to contribute unto them Magnitude and Luster.

CHAP. X.

Of Accusation and Defence, with the Definition of Injury.

In a *Judicial Oration*, which consists in *Accusation* and *Defence*, the thing to be proved is, that *Injury* has been done: and the heads from whence the proofs are to be drawn, are these three:

1. The causes that move to *Injury*.
2. The Persons apt to do *Injury*.
3. The Persons obnoxious, or apt to suffer *Injury*.

An *Injury* is a voluntary offending of another man contrary to the Law.

Voluntary is that which a man does with knowledge, and without compulsion.

The causes of *Voluntary* Actions are Intemperance, and a Vicious disposition concerning things Desirable. As the Covetous man does against the Law, out of an intemperate desire of Money.

All Actions proceed either from the doers disposition, or not.

Those that proceed not from the Doers disposition are such as he does by *Chance*, by *Compulsion*, or by *Natural necessity*.

Those that proceed from the Doers disposition, are such as he does by *Custom*, or *upon Premeditation*, or in *Anger*, or out of *Intemperance*.

By *Chance* are said to be done those things whereof neither the Cause, nor the Scope is evident; and which are done nei-

ther orderly, nor always, nor most commonly after the same manner.

By Nature are said to be done those things, the Causes whereof are in the Doer; and are done orderly, and always, or for the most part after the same manner.

By Compulsion are done those things, which are against the Appetite, and Ordination of the Doer.

By Custom those Actions are said to be done, the Cause whereof is this, that the Doer has done them often.

Upon Premeditation are said to be done those things which are done for profit, as the End, or the way to the End.

In Anger are said to be done those things which are done with a purpose to Revenge.

Out of Intemperance are said to be done those things which are delightful.

In sum, every *Voluntary* Action tends either to *Profit* or *Pleasure*.

The *Colours* of *Profitable* are already set down.

The *Colours* of that which is *Pleasing* follow next.

CHAP. XI.

Of the Colours, or Common Opinions concerning Pleasure.

PLEASURE is a sudden and sensible motion of the Soul, towards that which is Natural.

Grief is the Contrary.

Pleasant therefore is that, which is the cause of such motion.

And to return to ones own Nature.

And Customes.

And those things that are not violent.

Unpleasant are those things, which proceed from Necessity, as Cares, Study, Contentions. The contrary whereof, Ease, Remission from Labour and Care: also, Play, Rest, Sleep, are *Pleasant*.

Pleasant also is that, to which we have an appetite.

Also the appetites themselves, if they be sensual; as Thirst, Hunger, and Lust.

Also those things to which we have an appetite upon persuasion and Reason.

And those things we remember, whether they pleased, or displeased, then when they were present.

And the things we hope for.

And Anger.

And to be in Love.

And Revenge.

And Victory. Therefore,

Also contentious Games ; as Tables, Chess, Dice, Tennis, etc.

And Hunting.

And Suits in Law.

And Honour and Reputation amongst men in Honour and Reputation.

And to Love.

And to be Beloved and Respected.

And to be Admired.

And to be Flattered.

And a Flatterer : (for he seems both to love and admire).

And the same thing often.

And Change, or Variety.

And what we return to afresh.

And to learn.

And to admire.

And to do Good.

And to receive Good.

And to help up again one that's fallen.

And to finish that which is unperfect.

And Imitation.

And therefore the Art of Painting.

And the Art of Carving Images.

And the Art of Poetry.

And Pictures and Statues.

And other Mens Dangers, so they be near.

And to have escaped hardly.

And things of a kind *please* one another.

And every one himself.

And one's own *pleases* him.

And to bear Sway.

And to be thought Wise.

And to dwell upon that which he is good at.

And ridiculous Actions, Sayings, and Persons.

CHAP. XII.

*Presumptions of Injury drawn from the Persons that do it : or
Common Opinions concerning the Aptitude of Persons
to do Injury.*

Of the Causes which move to *Injury*, namely, *Profit* and *Pleasure*, has been already spoken, *Chap. 6, 7, 11.*

It follows next to speak of the *Persons*, that are apt to *do Injury*.

The *Doers of Injury* are,

Such as think they can do it.

And such as think to be undiscovered when they have done it.

And such as think, though they be discovered, they shall not be called in question for it.

And such as think, though they be called in question for it, that their *Mulct* will be less than their *Gain*, which either themselves or their *Friends* receive by the *Injury*.

Able to do Injury are,

Such as are *Eloquent*.

And such as are practised in *Business*.

And such as have skill in *Process*.

And such as have many *Friends*.

And *Rich Men*.

And such as have *Rich Friends*; or *Rich Servants*; or *Rich Partners*.

Undiscovered when they have done it, are,

Such as are not apt to commit the crimes whereof they are accused : as *Feeble Men*, *Slaughter* : *Poor*, and not *Beautiful Men*, *Adultery*.

And such as one would think could not chuse but be discovered.

And such as do *Injuries*, whereof there hath been no *Example*.

And such as have none, or many *enemies*.

And such as can easily conceal what they do.

And such as have some body to transfer the fault upon.

They that do *Injury openly*, are,

Such whose friends have been *Injured*.

And such as have the Judges for friends.
 And such as can escape their Tryal at Law.
 And such as can put off their Tryal.
 And such as can corrupt the Judges.
 And such as can avoid the payment of their Fine.
 And such as can defer the payment.
 And such as cannot pay at all.
 And such as by the *Injury* get manifestly, much, and presently; when the Fine is uncertain, little, and to come.
 And such as get by the *Injury*, money; by the penalty, shame only.
 And such on the Contrary, as get honour by the *Injury*, and suffer the mulct of money, only, or banishment, or the like.
 And such as have often escaped, or been undiscovered.
 And such as have often attempted in vain.
 And such as consider present pleasure, more than pain to come; and so intemperate men are apt to do *Injury*.
 And such as consider pleasure to come, more than present pain; and so temperate men are apt to do *Injury*.
 And such as may seem to have done it by Fortune, Nature, Necessity, or Custom; and by Error, rather than by Injustice.
 And such as have means to get pardon.
 And such as want Necessaries, as poor men: or Unnecessaries, as rich men.
 And such as are of very good, or very bad Reputation.

CHAP. XIII.

Presumptions of Injury drawn from the Persons that suffer, and from the Matter of the Injury.

Of those that do *Injury*, and why they do it, it hath been already spoken.

Now of the persons that suffer, and of the *Matter* wherein they suffer, the *common Opinions* are these:

Persons obnoxious to *Injury* are,

Such as have the things that we want, either as necessary, or as delightful.

And such as are far from us.

And such as are at hand.

And such as are unwary, and credulous.

And such as are lazy.

And such as are modest.

And such as have swallowed many *Injuries*.

And such as have *Injured* often before.

And such as never before.

And such as are in our danger.

And such as are ill beloved generally.

And such as are envied.

And our Friends.

And our Enemies.

And such as, wanting friends, have no great ability either in speech or action.

And such as shall be losers by going to Law : as, Strangers, and Workmen.

And such as have done the *Injuries* they suffer.

And such as have committed a crime, or would have done, or are about to do.

And such as, by doing them an *Injury*, we shall gratifie our friends or superiours.

And such, whose friendship we have newly left, and accuse.

And such as another would do the *Injury* to, if we should not.

And such as by *Injuring*, we get greater means of doing good.

The *Matters* wherein men are obnoxious to *Injury* are,

Those things wherein all, or most men use to deal unjustly.

And those things which are easily hid, and put off into other hands, or altered.

And those things which a man is ashamed to have suffered.

And those things wherein prosecution of *Injury*, may be thought a love of contention.

CHAP. XIV.

Of those Things which are necessary to be known for the Definition of Just and Unjust.

WHEN the fact is evident, the next Inquiry is, whether it be *Just*, or *Unjust*.

For the Definition of *Just* and *Unjust*, we must know what *Law* is : that is, what the *Law of Nature*, what the *Law of*

Nations; what the *Law Civil*, what *written Law*, and what *unwritten Law* is: and what *Persons*, that is, what a *publick Person*, or the *City* is; and what a *private Person*, or *Citizen* is.

Unjust in the opinion of all men, is that which is contrary to the *Law of Nature*.

Unjust in the opinion of all men of those *Nations* which traffick and come together, is that which is contrary to the *Law common to those Nations*.

Unjust only in one *Common-wealth*, is that which is contrary to the *Law Civil*, or *Law of that Common-wealth*.

He that is accused to have done any thing against the *Publick*, or a *private Person*, is accused to do it either *ignorantly*, or *unwillingly*, or *in anger*, or *upon premeditation*.

And because the Defendant does many times confess the *fact*, but deny the *unjustice*; as that he *took*, but did not *steal*; and *did*, but not *adultery*; it is necessary to know the *Definitions of Theft, Adultery*, and all other crimes.

What facts are contrary to the *written Laws*, may be known by the *Laws themselves*.

Besides *written Laws*, whatsoever is *Just*, proceeds from *Equity* or *Goodness*.

From *Goodness* proceeds that which we are praised, or honoured for.

From *Equity* proceed those actions, which though the *written Law* command not, yet being interpreted reasonably, and supplied, seems to require at our hands.

Actions of *Equity* are such as these,

Not too rigorously to punish *Errors, Mischances, or Injuries*.

To pardon the faults that adhere to *Mankind*.

And not to consider the *Law* so much, as the *Law-makers mind*; and not the *Words* so much, as the *meaning of the Law*¹.

And not to regard so much the *Fact*, as the intention of the Doer; nor part of the *Fact*, but the *Whole*; nor what the Doer *is*, but what he *has been* always, or for the most part.

¹ For, as the Quarterly Reviewer but too justly remarks, "To violate the spirit by obeying the letter, is often the painful duty of the judge; to make the letter conform to the spirit, is the privilege of the legislator;" and (he might have added) of the *arbitrator*, whose standard is equity. See Quarterly Review, vol. xxvii. p. 133.

And to remember better the Good received, than the Ill.
And to endure injuries patiently.
And to submit rather to the sentence of a Judge, than of
the Sword.
And to the sentence of an Arbitrator, rather than of a Judge.

CHAP. XV.

*Of the Colours or Common Opinions concerning Injuries
comparatively.*

COMMON Opinions concerning Injuries comparatively, are
such as these :

Greater is the *Injury* which proceed from greater Iniquity.
And from which proceedeth greater damage.
And of which there is no revenge.
And for which there is no remedy.
And by occasion of which, he that hath received the *Injury*,
hath done some mischief to himself.
He does the greater *Injury*, that does it first, or alone, or
with few.
And he that does it often.
Greater *Injury* is that, against which Laws and Penalties
were first made.
And that which is more brutal, or more approaching to the
actions of beasts.
And that which is done upon more premeditation.
And by which more Laws are broken.
And which is done in the place of Execution.
And which is of greatest shame to him that receives the
Injury.
And which is committed against well deservers.
And which is committed against the *unwritten Law* ; be-
cause good men should observe the Law for Justice, and not
for fear of punishment.
And which is committed against the *written Law* ; because
he that will do *Injury*, neglecting the penalty set down in the
written Law, is much more likely to transgress the *unwritten
Law*, where there is no penalty at all.

CHAP. XVI.

Of Proofs Inartificial.

OF *Artificial Proofs* we have already spoken.

Inartificial Proofs, which we invent not, but make use of, are of five sorts.

1. *Laws*. And those are *Civil*, or *written Law*: the *Law* or *Custom of Nations*: and the *universal Law of Nature*.

2. *Witness*. And those are such as concern *Matter*; and such as concern *Manners*. Also, they be *ancient*, or *present*.

3. *Evidences*, or *Writings*.

4. *Question*, or *Torture*.

5. *Oaths*. And those be either *given*, or *taken*, or both, or neither.

For *Laws*, we use them thus:

When the *written Law* makes against us, we appeal to the *Law of Nature*, alledging,

That to be greatest Justice, which is greatest Equity.

That the *Law of Nature* is immutable; the *written Law* mutable.

That the *written Law* is but seeming justice; the *Law of Nature* very Justice. And Justice is among those things which are, and not which seem to be.

That the Judge ought to discern between true and adulterate Justice.

That they are better men that obey *unwritten*, than *written Laws*.

That the *Law* against us does contradict some other *Law*. And when the *Law* has a double interpretation, that is the true one, which makes for us.

And that the cause of the *Law* being abolished, the *Law* is no more of Validity.

But when the *written Law* makes for us, and *Equity* for the Adversary, we must alledge,

That a man may use *Equity*, not as a liberty to judge against the *Law*; but only as a security against being forsworn, when he knows not the *Law*.

That men seek not *Equity* because 'tis good simply, but because good for them.

That it is the same thing not to make, and not to use the *Law*.

That as in other Arts, and namely in *Physick*, fallacies are pernicious; so in a Common-wealth 'tis pernicious to use pretexts against the *Law*.

And that in Common-wealths well instituted, to seem wiser than the *Laws*, is prohibited.

For *Witnesses*, we must use them thus:

When we have them not, we must stand for *Presumptions*, and say,

That in *Equity* sentence ought to be given according to the most probability.

That *Presumptions* are the testimony of the things themselves, and cannot be bribed.

That they cannot lye.

When we have *Witnesses*, against him that has them not, we must say,

That *Presumptions*, if they be false, cannot be punished.

That if *Presumptions* were enough, *Witnesses* were superfluous.

For Writings, when they favour us, we must say,

That *Writings* are private and particular *Laws*; and he that takes away the use of *Evidences*, abolisheth the *Law*.

That since Contracts and Negotiations pass by *Writings*, he that bars their use, dissolves humane Society.

Against them, if they favour the Adversary, we may say,

That since *Laws* do not bind, that are fraudulently made to pass, much less *Writings*.

And that the Judge being to dispense Justice, ought rather to consider what is *just*, than what is in the *Writing*.

That *Writings* may be gotten by fraud or force; but Justice by neither.

That the *Writing* is repugnant to some *Law*, *Civil*, or *Natural*; or to *Justice*; or to *Honesty*.

That 'tis repugnant to some other *Writing* before, or after.

That it crosses some commodity of the Judge (which must not be said directly, but implied cunningly).

For the *Torture*, if the giving of it make for us, we must say,

That 'tis the only testimony that is certain.

But if it make for the Adversary, we may say,

That men enforced by *Torture*, speak as well that which is false, as that which is true.

That they who can endure, conceal the truth; and they who cannot, say that which is false to be delivered from pain.

For *Oaths*; he that will not put his Adversary to his *Oath*, may alledge,

That he makes no scruple to be *forsworn*.

That by *swearing*, he will carry the cause; which *not swearing*, he must lose.

That he had rather trust his cause in the hand of the Judge, than of the Adversary.

He that refuseth to *take the Oath*, may say,

That the matter is not worth so much.

That if he had been an evil man, he had *sworn*, and carryed his cause.

That to try it by *swearing* for a religious man against an irreligious, is as hard a match, as to set a weak man against a strong in combate.

He that is willing to *take the Oath*, may pretend,

That he had rather trust himself, than his Adversary; and that 'tis equal dealing for an irreligious man to *give*, and for a religious man to *take the Oath*.

That 'tis his duty to *take the Oath*, since he has required to have *sworn Judges*.

He that *offers the Oath* may pretend,

That he does piously commit his cause to the Gods.

That he makes his Adversary himself Judge.

That 'twere absurd for him *not to swear*, that has required the Judges *to be sworn*.

And of these are to be compounded the Forms we are to use, when we would *give*, and *not take the Oath*; or *take*, and *not give*; or *both give and take*; or *neither give nor take*.

But if one have *sworn* contrary to a former *Oath*, he may pretend,

That he was forced.

That he was deceived, and that neither of these is *Perjury*, since *Perjury* is voluntary.

But if the Adversary do so, he may say,

That he that stands not to what he hath *sworn*, subverteth humane Society.

And (turning to the Judge) What reason have we to require, that you should be *sworn*, that judge our cause; when we will not stand to that we *swear* ourselves.

And so much for *Proofs inartificial*.

BOOK II.

CHAP. I.

The Introduction.

OF *Belief* proceeding from our *Invention*, that part which consisteth in *Proof*, is already spoken of.

The other two parts follow ; whereof one ariseth from the *manners* of the *Speaker* ; the other from the *passions* of the *Hearer*.

The *Principles, Colours, or Common Opinions* upon which a mans *belief* is grounded concerning the *manners* of him that *speaks*, are to be had partly out of that which hath been said before concerning *Vertue*, book i. chap. 9, partly out of those things which shall be said by and by, concerning the *Passions*. For a man is *believed* either for his *Prudence*, or for his *Probity*, which are Vertues ; or for *Good Will* : of which among the *Passions*.

The *Principles concerning Belief*, arising from the *Passion* of the *Hearer*, are to be gathered from that which shall now be said of the several *Passions* in order.

In every one of which three things are to be considered :

1. First, *how* men are affected.
2. Secondly, *towards whom*.
3. Thirdly, *for what*.

CHAP. II.

Of Anger.

ANGER is desire of Revenge, joyned with grief for that he, or some of his, is, or seems to be *neglected*.

The object of *Anger* is always some particular, or individual thing.

In *Anger* there is also pleasure proceeding from the imagination of revenge to come.

To *Neglect*, is to esteem little or nothing : and of three kinds.

1. *Contempt*.

2. *Crossing*.

3. *Contumely*.

Contempt, is when a man thinks another of little worth in comparison to himself.

Crossing, is the hinderance of another mans will without design to profit himself.

Contumely, is the disgracing of another for his own pastime.

The *common Opinions* concerning *Anger* are therefore such as follow :

They are easily *Angry* that think they are neglected.

That think they excell others ; as the Rich with the Poor ; the Noble with the Obscure, etc.

And such as think they deserve well.

And such as grieve to be hindered, opposed, or not assisted. And therefore sick men, poor men, lovers, and generally all that desire and attain not, are *angry* with those that standing by, are not moved with their wants.

And such as having expected good, find evil.

Those that men are *angry* with, are,

Such as mock, deride, or jest at them.

And such as shew any kind of *Contumely*, towards them.

And such as despise those things which we spend most labour and study upon : and the more, by how much we seem the less advanced therein.

And our friends, rather than those that are not our friends.

And such as have honoured us, if they continue not.

And such as requite not our courtesie.

And such as follow contrary courses, if they be our inferiours.

And our friends, if they have said, or done us evil, or not good.

And such as give not eare to our intreaty.

And such as are joyful, or calm in our distress.

And such as troubling us, are not themselves troubled.

And such as willingly hear or see our disgraces.

And such as neglect us in the presence of our Competitors ; of those we admire ; of those we would have admire us ; of those we reverence ; and of those that reverence us.

And such as should help us, and neglect it.

And such as are in jest, when we are in earnest.

And such as forget us, or our Names.

An *Orator* therefore must so frame his *Judge* or *Auditor* by his *Oration*; as to make him apt to *Anger*: and then make his *Adversary* appear such as men use to be *angry withal*.

CHAP. III.

Of Reconciling, or Pacifying Anger.

RECONCILIATION is the appeasing of Anger.

Those to whom men are easily reconciled, are,

Such as have not offended out of neglect.

And such as have done it against their will.

And such as wish done the contrary of what they have done.

And such as have done as much to themselves.

And such as confess and repent.

And such as are humbled.

And such as do seriously the same things, that they do seriously.

And such as have done them more good heretofore, than now hurt.

And such as sue to them for any thing.

And such as are not insolent, nor mockers, nor slighsters of others in their own disposition.

And generally such as are of a contrary disposition to those, whom men are usually angry withal.

And such as they fear or reverence.

And such as reverence them.

And such as have offended their Anger.

Reconcilable are,

Such as are contrarily affected to those whom we have said before to be easily angry.

And such as play, laugh, make merry, prosper, live in plenty; and in sum, all that have no cause of grief.

And such as have given their anger time.

Men lay down their Anger for these Causes.

Because they have gotten the Victory.

Because the Offender has suffered more than they meant to inflict.

Because they have been revenged of another.

Because they think they suffer justly.

And because they think the revenge will not be felt, or not known that the revenge was theirs, and for such an injury.

And because the Offender is dead.

Whosoever therefore would *assuage* the anger of his *Auditor*, must make himself appear such, as men use to be *reconciled* unto: and beget in his *Auditor* such opinions, as make him *reconcilable*.

CHAP. IV.

Of Love and Friends.

To *Love*, is to will well to another, and that for others, not for our own sake.

A *Friend* is he that *loves*, and he that is *beloved*.

Friends one to another, are they that naturally *love* one another.

A *Friend* therefore is he,
That rejoyceth at anothers Good.

And that grieves at his hurt.

And that wishes the same with us to a third, whether good, or hurt.

And that is *Enemy* or *Friend* to the same man.

We *love* them,

That have done good to us, or ours; especially if much, readily, or in season.

That are our Friends *Friends*.

That are our Enemies *Enemies*.

That are Liberal.

That are Valiant.

That are Just.

And that we would have *love* us.

And good Companions.

And such as can abide Jests.

And such as break Jests.

And such as praise us, especially for somewhat that we doubt of in our selves.

And such as are neat.

And such as upbraid us not with our vices, or with their own benefits.

And such as quickly forget injuries.

And such as least observe our Errors.

And such as are not of ill Tongue.

And those that are ignorant of our Vices.

And such as cross us not when we are busie, or angry.

And such as are officious towards us.

And those that are like us.

And such as follow the same course or trade of life, where they impeach not one another.

And such as labour for the same thing, when both may be satisfied.

And such as are not ashamed to tell us freely their faults, so it be not in contempt of us, and the faults such, as the World, rather than their own Consciences condemns.

And such as are ashamed to tell us of their very faults.

And such as we would have honour us, and not envie, but imitate us.

And such as we would do good to, except with greater hurt to our selves.

And such as continue their *Friendship* to the dead.

And such as speak their mind.

And such as are not terrible.

And such as we may rely on.

The several kinds of *Friendship*, are *Society*, *Familiarity*, *Consanguinity*, *Affinity*, etc.

The things that beget *Love*, are,

The bestowing	{	<i>Gratis.</i>
of <i>Benefits</i> ,		<i>Unasked.</i>
		<i>Privately.</i>

CHAP. V.

Of Enmity and Hatred.

THE *Colours*, or *Common Opinions* concerning *Hatred* are to be taken from the *contrary* of those, which concern *Love* and *Friendship*.

Hatred differs from *Anger* in this,

That *Anger* regards only what is done to ones self; but *Hatred* not.

And in this, that *Anger* regards particulars only; the other universals also.

And in this, that Anger is curable, *Hatred* not.

And in this, that Anger seeks the vexation, *Hatred* the damage of ones Adversary.

That with Anger there is always joined Grief ; with *Hatred* not always.

That Anger may at length be satiated, but *Hatred* never.

Hence it *appears* how the Judge or Auditor may be made *Friend* or *Enemy* to us ; and how our Adversary may be made appear *Friend* or *Enemy* to the Judge ; and how we may answer to our Adversary, that would make us appear *Enemies* to him.

CHAP. VI.

Of Fear.

FEAR is a trouble, or vexation of the mind, arising from the apprehension of an evil at hand, which may hurt or destroy.

Danger is the nearness of the evil feared.

The things to be *feared*, are,

Such as have power to hurt.

And the signs of will to do us hurt, as Anger and Hatred of powerful men.

And Injustice joyned with Power.

And Valour provoked, joyned with Power.

And the fear of powerful men.

The men that are to be *feared*, are,

Such as know our Faults.

And such as can do us Injury.

And such as think they are injured by us.

And such as have done us Injury.

And our Competitors in such things as cannot satisfie both.

And such as are feared by more powerful men than we are.

And such as have destroyed greater men than we are.

And such as use to invade their inferiours.

And men not passionate, but dissemblers, and crafty, are more to be *feared* than those that are hasty and free.

The things especially to be *feared*, are,

Such, wherein if we err, the error cannot be repaired ; at least, not according to ours, but our Adversaries pleasure.

And such as admit either none, or not easie help.

And such as being done, or about to be done to others, make us pity them.

They that *fear not*, are,

Such as expect not evil; or not now; or not this; or not from these.

And therefore men *fear* little in prosperity.

And men *fear* little that think they have suffered already.

An Orator therefore that would put *Fear* into the Auditor, must let him see that he is obnoxious; and that greater than he do suffer, and have suffered from those, and at those times they least thought.

CHAP. VII.

Of Assurance.

ASSURANCE is hope, arising from an imagination that the help is near, or the evil afar off.

The things therefore that beget *Assurance* are,

The remoteness of those things that are to be feared, and the nearness of their contraries.

And the facility of great, or many helps or remedies.

And neither to have done, nor received Injury.

And to have no Competitors, or not great ones, or if great ones, at least friends; such as we have obliged, or are obliged to.

And that the danger is extended to more, or greater than us.

Assured, or *Confident*, are,

They that have oft escaped danger.

And they to whom most things have succeeded well.

And they that see their Equals, or inferiours not afraid.

And they that have wherewith to make themselves feared, as wealth, strength, etc.

And such as have done others no wrong.

And such as think themselves in good terms with God Almighty.

And such as think they will speed well that are gone before.

CHAP. VIII.

Of Shame.

SHAME is a perturbation of the Mind arising from the apprehension of Evil, past, present, or to come, to the prejudice of a mans own, or his friends reputation.

The things therefore which men are *ashamed* of are those Actions which proceed from Vice, as,

To throw away ones Arms; to run away; signs of Cowardliness.

To deny that which is committed to ones trust, a sign of Injustice.

To have lyen with whom, where, and when we ought not, signs of Intemperance.

To make gain of small and base things; not to help with money whom and how much we ought; to receive help from meaner men; to ask money at use from such as one thinks will borrow of him; to borrow of him that expects payment of somewhat before lent; and to redemand what one has lent, of him that one thinks will borrow more; and so to praise, as one may be thought to ask; signs of Wretchedness.

To praise one to his face; to praise his vertues too much, and colour his vices; signs of Flattery.

To be unable to indure such labours as men indure that are elder, tenderer, greater in quality, and of less strength than he; signs of Effeminacy.

To be beholden often to another; and to upbraid those that are beholding to him; signs of Pusillanimity.

To speak and promise much of ones self more than is due; signs of Arrogance.

To want those things which ones Equals, all, or most of them have attained to, is also a thing to be *ashamed* of.

And to suffer things ignominious, as to serve about anothers person; or to be employed in his base Actions.

In Actions of Intemperance, whether willingly, or unwillingly committed; there is *shame* in Actions of Force, only when they are done unwillingly.

The men before whom we are *ashamed*, are such as we respect; namely,

Those that admire us.

And those whom we desire should admire us.

And those whom we admire.

Those that contend with us for Honour.

Those whose opinion we condemn not.

And therefore men are most *ashamed* in the presence,
Of old and well bred men.

Of those we are always to live with.

Of those that are not guilty of the same fault.

Of those that do not easily pardon.

And of those that are apt to reveal our faults ; such as are
men injured, Backbiters, Scoffers, Comick Poets.

And of those before whom we have had always good success.

And of those who never asked any thing of us before.

And of such as desire our Friendship.

And of our familiars, that know none of our crimes.

And of such as will reveal our faults to any of those that
are named before.

But in the presence of such whose judgment most men
despise, men are *not ashamed*.

Therefore we are *ashamed* also in the presence,

Of those whom we reverence.

And of those who are concerned in our own, or Ancestors,
or Kinsfolks actions or misfortunes, if they be shameful.

And of their Rivals.

And of those that are to live with them that know their
disgrace.

The *Common Opinions* concerning *Impudence* are taken
from the contrary of these.

CHAP. IX.

Of Grace, or Favour.

GRACE is that Vertue, by which a man is said to do a good
turn, or to do service to a man in need ; not for his own but
for his cause to whom he does it.

Great *Grace* is when the need is great ; or when they are
hard or difficult things that are conferred, or when the time
is seasonable, or when he that confers the *favour* is the only,
or the first man that did it.

Need, is a desire joyned with grief for the absence of the thing desired.

Grace therefore it is not, if it be not done to one that needs.

Whosoever therefore would prove that he has done a *Grace*, or *Favour*, must shew that he needeth it to whom it was done.

Grace it is not,

Which is done by Chance.

Nor which is done by Necessity.

Nor which has been Requited.

Nor that which is done to ones Enemy.

Nor that which is a Trifle.

Nor that which is Nought, if the Giver know the fault.

And in this manner a man may go over the Prædicaments, and examine a benefit, whether it be a *Grace* for being *This*, or for being *so Much*, or for being *Such*, or for being *Now*, etc.

CHAP. X.

Of Pity, or Compassion.

PITY is a perturbation of the mind, arising from the apprehension of hurt or trouble to another that doth not deserve it. and which he thinks may happen to himself, or his.

And because it appertains to *Pity*, to think that he, or his may fall into the misery he pities in others, it follows that they be most *compassionate*,

Who have passed through Misery.

And old Men.

And weak Men.

And timorous Men.

And learned Men.

And such as have Parents, Wife, and Children.

And such as think there be honest Men.

And that they are less *compassionate*,

Who are in great despair.

Who are in great prosperity.

And they that are angry; for they consider not.

And they that are very confident; for they also consider not.

And they that are in the Act of contumely; for neither do these consider.

And they that are astonished with fear.

And they that think no Man honest.

The things to be *pitied* are,
Such as grieve, and withal hurt.
Such as destroy.

And Calamities of fortune, if they be great ; as none or few friends, deformity, weakness, lameness, etc.

And evil that arrives where good is expected.

And after extream evil, a little good.

And through a Mans life to have no good offer it self ; or being offered, not to have been able to enjoy it.

Men to be *pitied* are,

Such as are known to us, unless they be so near to us, as their hurt be our own.

And such as be of our own years.

Such as are like us in manners.

Such as are of the same, or like stock.

And our equals in dignity.

Those that have lately suffered, or are shortly to suffer injury : and those that have the marks of injury past.

And those that have the words or actions of them in the present misery.

CHAP XI.

Of Indignation.

OPPOSITE in a manner to *Pity* in good Men, is *Indignation*, which is grief for the prosperity of a Man unworthy.

With *Indignation* there is always joyned a joy for the prosperity of a Man worthy, as *Pity* is always with contentment in the adversity of them that deserve it.

In wicked Men the opposite of *Pity* is,

Envy ; as also the companions thereof *delight in the harm of others*, which the Greeks in one word have called *ἐνυκαίρεκακία*. But of these in the next Chapter.

Men conceive *Indignation* against others, not for their virtues, as Justice, etc.

For these make Men worthy ; and in *Indignation* we think Men unworthy.

But for those goods which men indued with vertue, and noble Men, and handsome Men are worthy of.

And for newly gotten power and riches, rather than for antient, and especially if by these he has gotten other goods, as by Riches, Command. The reason why we conceive greater *Indignation* against new than antient Riches, is, that the former seem to possess that which is none of theirs. But the antient seem to have but their own. For with common people, to have been so long, is to be so by Right.

And for the bestowing of goods incongruously: as when the arms of the most valiant *Achilles* were bestowed on the most eloquent *Ulysses*.

And for the comparison of the inferiour is the same thing, as when one valiant is compared with a more valiant; or whether absolutely superiour, as when a good Scholer is compared with a good Man.

Apt to *Indignation* are,

They that think themselves worthy of the greatest goods, and do possess them.

And they that are good.

And they that are ambitious.

And such as think themselves deserve better what another possesseth, than he that hath it.

Least apt to *Indignation* are,

Such as are of a poor, servile, and not ambitious Nature.

Who they are that Rejoyce, or Grieve not, at the adversity of him that suffers worthily, and in what occasions may be gathered from the contrary of what has been already said.

Whosoever therefore would turn away the *Compassion* of the Judge, he must make him apt to *Indignation*; and shew that his Adversary is unworthy of the Good, and worthy of the Evil which happens to him.

CHAP. XII.

Of Envy.

ENVY is grief, for the prosperity of such as our selves, arising not from any hurt that we, but from the good that they receive.

Such as our selves, I call those that are equal to us in blood, in age, in abilities, in glory, or in means.

They are apt to *Envy*,

That are within a little of the highest.

And those that are extraordinarily honoured for some quality that is singular in them, especially Wisdom or good Fortune.

And such as would be thought wise.

And such as catch at glory in every action.

And Men of poor spirits: for every thing appears great to them.

The things which Men *Envy* in others are,

Such as bring Glory.

And goods of Fortune.

And such things as we desire for our selves.

And things in the possession whereof we exceed others, or they us a little.

Obnoxious to *Envy* are,

Men of our own time, of our own Countrey, of our own age, and competitors of our Glory.

And therefore,

Those whom we strive with for honour.

And those that covet the same things that we do.

And those that get quickly, what we hardly obtain, or not at all.

And those that attain unto, or do the things that turn to our reproach, not being done by us.

And those that possess what we have possessed heretofore. So old and decayed Men *envy* the young and lusty.

And those that have bestowed little, are subject to be *envied* by such as have bestowed much upon the same thing.

From the contraries of these may be derived the Principles concerning Joy for other Mens hurt.

He therefore that would not have his Enemy prevail, when he craves *Pity*, or other favour; must dispose the Judge to *Envy*; and make his Adversary appear such, as above described, to be subject to the *Envy* of others.

CHAP. XIII.

Of Emulation.

EMULATION is grief arising from that our Equals possess such goods as are had in honour, and whereof we are capable, but have them not; not because they have them, but because not we also.

No Man therefore *Emulates* another in things whereof himself is not capable.

Apt to *Emulate* are,

Such as esteem themselves worthy of more than they have.
And Young and Magnanimous Men.

And such as already possess the goods for which Men are honoured: for they measure their worth by their having.

And those that are esteemed worthy by others.

And those whose Ancestors, Kindred, Familiars, Nation, City, have been eminent for some good, do *Emulate* others for that good.

Objects of *Emulation* are, for things; Vertues.

And things whereby we may profit others.

And things whereby we may please others.

For Persons,

They that possess such things.

And such as many desire to be friends or acquainted with, or like unto.

And they whose praises flie abroad.

The contrary of *Emulation* is *Contempt*.

And they that *Emulate* such as have the goods aforementioned, *Contemn* such as have them not: and thence it is, that Men who live happily enough, unless they have the goods which Men honour, are nevertheless *Contemned*.

CHAP. XIV.

Of the Manners of Youth.

OF *Passions* we have already spoken.

We are next to speak of *Manners*.

Manners are distinguished by *Passions*, *Habits*, *Ages*, and *Fortunes*.

What kind of *Manners* proceed from *Passions*, and from *Vertues* and *Vices* (which are *Habits*), hath been already shewed.

There remains to be spoken of the *Manners*, that are peculiar to several *Ages* and *Fortunes*.

The *Ages* are *Youth*, *Middle-Age*, *Old-Age*.

And first of *Youth*.

Young Men are,

Violent in their desires.

Prompt to execute their desires.

Incontinent.

Inconstant, easily forsaking what they desired before.

Longing mightily, and soon satisfied.

Apt to anger, and in their anger violent: and ready to execute their anger with their hands.

Lovers of Honour and of Victory more than Money, as having not been yet in Want.

Well natured, as having not been acquainted with much malice.

Full of hope, both because they have not yet been often frustrated, and because they have by natural heat that disposition that other *Ages* have by Wine; *Youth* being a kind of natural drunkenness. Besides, hope is of the time to come, whereof *Youth* hath much, but of the time past little.

Credulous, because not yet often deceived.

Easily deceived, because full of hope.

Valiant, because apt to Anger and full of hope; whereof this begets confidence, the other keeps off Fear.

Bashful, because they estimate the Honour of Action by the precepts of the Law.

Magnanimous, because not yet dejected by the misfortunes of human life.

And lovers of Honour more than Profit, because they live more by Custom than by Reason; and by Reason we acquire Profit, but Vertue by Custom.

Lovers of their Friends and Companions.

Apt to err in the excess, rather than the defect, contrary to that precept of *Chilon*, *Ne quid nimis*; for they overdo every thing: they Love too much, and Hate too much, because thinking themselves wise, they are obstinate in the opinion they have once delivered.

Doers of Injury rather for contumely than for Dammage.

Mercifull, because measuring others by their own innocence, they think them better than they be, and therefore less to merit what they suffer; which is a cause of Pity.

And lovers of Mirth, and by consequence such as love to jest at others.

Jesting is witty Contumely.

CHAP. XV.

Of the Manners of Old Men.

THE *Manners of Old Men* are in a manner the contraries of those of *Youth*.

They determine nothing: they do every thing less vehemently than is fit: they never say they know; but to every thing they say, perhaps, and peradventure; which comes to pass from that having lived long, they have often mistaken and been deceived.

They are peevish because they interpret every thing to the worst.

And suspicious through Incredulity, and incredulous by reason of their Experience.

They love and hate, as if they meant to continue in neither. Are of poor spirits, as having been humbled by the chances of life.

And covetous, as knowing how easie 'tis to lose, and hard to get.

And timorous, as having been cooled by years.

And greedy of life: for good things seem greater by the want of them.

And lovers of themselves out of Pusillanimity.

And seek Profit more than Honour, because they love themselves; and Profit is among the goods that are not simply good, but good for ones self.

And without bashfulness, because they despise seeming.

And hope little; knowing by Experience that many times good Counsel has been followed with ill event, and because also they be timorous.

And live by Memory rather than Hope; for Memory is of the time past, whereof *Old Men* have good store.

And are full of Talk, because they delight in their Memory.

And Vehement in their anger: but not stout enough to execute it.

They have weak, or no desires; and thence seem Temperate.

They are slaves to Gain.

• And live more by reason than Custom; because reason leads to Profit, as Custom to that which is Honourable.

And do Injury to indammage, and not in Contumely.

And are mercifull by Compassion, or imagination of the same evils in themselves, which is a kind of Infirmary, and not Humanity, as in *Young Men*, proceeding from a good opinion of those that suffer Evil.

And full of complaint, as thinking themselves not far from Evil, because of their Infirmary.

Seeing then that every Man loves such Men, and their discourses, which are most agreeable to their own *Manners*; 'tis not hard to collect, how the Orator, and his Oration may be made acceptable to the Hearer, whether *Young* or *Old*.

CHAP. XVI.

Of the Manners of Middle-aged Men.

THE *Manners* of *Middle-aged Men*, are between those of *Youth*, and *Old Men*, and therefore,

They neither dare, nor fear too much: but both as is fit.

They neither believe all; nor reject all; but judge.

They seek not only what is Honourable, nor only what is Profitable; but both.

They are neither Covetous, nor Prodigal; but in the mean.

They are neither easily Angry; nor yet Stupid: but between both.

They are Valiant, and withal Temperate.

And in general, whatsoever is divided in *Youth*, and *Old Men*, is compounded in *Middle-age*.

And whereof the Excess, or Defect is in *Youth* or *Old Men*; the Mediocrity is in those of the *Middle-age*.

Middle-age for the Body, I call the time from thirty to five and thirty years: for the Mind, the nine and fortieth, or thereabouts.

CHAP. XVII.

Of the Manners of the Nobility.

OF *Manners* that proceed from the several *Ages* we have already spoken.

We are next to speak of those that rise from several *Fortunes*.

The *Manners* of the *Nobility* are,

To be Ambitious.

To undervalue their Ancestors Equals. For the goods of Fortune seem the more precious for their Antiquity.

Nobility is the vertue of a Stock.

And *Generosity*, is not to dégenerate from the vertue of his stock.

For as in Plants, so in the Races of Men, there is a certain progress; and they grow better and better to a certain point: and change, *viz.* Subtil wits into madness; and staid wits into stupidity and blockishness.

CHAP. XVIII.

Of the Manners of the Rich.

RICH Men are Contumelious and Proud. This they have from their *Riches*. For seeing every thing may be had for Money, having Money, they think they have all that is good.

And Effeminate; because they have wherewithal to subminister to their Lust.

And Boasters of their Wealth: and speak in high terms foolishly. For Men willingly talk of what they love and admire; and think others affect the same that they do: and the truth is, all sorts of Men submit to the *Rich*.

And think themselves worthy to command, having that by which Men attain command.

And in general, they have the *Manners* of Fortunate Fools.

They do Injury, with intentions not to hurt, but to disgrace; and partly also through Incontinence.

There is a difference between *New* and *Antient Riches*: for they that are *newly* come to Wealth have the same faults in a greater degree: for *New Riches* are a kind of rudeness and apprenticeship of *Riches*.

CHAP. XIX.

Of the Manners of Men in Power, and of such as prosper.

THE *Manners* of Men in *Power*, are the same, or better than those of the *Rich*.

They have a greater sense of Honour than the Rich ; and their *Manners* are more Manly.

They are more Industrious than the Rich : for *Power* is sustained by Industry.

They are Grave, but without Austereness : for being in place conspicuous, they carry themselves the more modestly ; and have a kind of gentle and comely Gravity, which the *Greeks* call *σεμνότης*.

When they do Injuries, they do great ones.

The *Manners of Men that prosper*, are compounded of the *Manners* of the *Nobility*, the *Rich* and those that are in *Power*, for to some of these all *Prosperity* appertains.

Prosperity in Children, and goods of the Body, make Men desire to exceed others in the goods of Fortune.

Men that *Prosper* have this ill, to be more proud and inconsiderate than others.

And this good ; that they worship God, trusting in him, for that they find themselves to receive more good than proceeds from their Industry.

The *Manners of Poor Men, Obscure Men, Men without Power*, and *Men in Adversity*, may be collected from the Contrary of what has been said.

CHAP. XX.

Common Places or Principles concerning what May be Done, what Has been Done, and what Shall be Done ; or of Fact Possible, Past, and Future. Also of Great and Little.

WE have hitherto set down such *Principles* as are peculiar to several kinds of *Oration*s.

Now we are to speak of such *Places* as are *Common* to them all ; as these, *Possible, Done, or Past, Future, Great, Small.*

Possible is that,

The Contrary whereof is Possible.

And the like whereof is Possible.

And than which some harder thing is Possible.

And the beginning whereof is Possible.

And the end whereof is Possible.

And the usual consequent whereof is Possible.

And whatsoever we desire.

And the beginning whereof is in the power of those whom we can either compell or perswade.

And part whereof is Possible.

And part of the whole that is Possible.

And the General if a Particular.

And a Particular if the General.

And of Relatives, if one, the other.

And that which without Art and Industry is *Possible*, is much more so with Art and Industry.

And that which is *Possible* to worse, weaker, and unskilfuller Men, is much more so to better, stronger, and more skilful.

The *Principles* concerning *Impossible* are the Contraries of these.

That *Has been done*,

Than which a harder thing has been done.

And the consequent whereof has been done.

And that which being Possible, he had a will to, and nothing hindered.

And that which was Possible to him in his Anger.

And that which he longed to do.

And that which was before upon the point of doing.

And whose antecedent has been done; or that, for which it uses to be done.

And if that, for whose cause we do this, then this.

The *Principles* concerning *Not done* are the Contraries of these.

That *Shall be done*,

Which some Man can, and means to do.

And which some Man can, and desires to do.

And which is in the way, and upon the point to be done.

And the antecedents whereof are past.

And the Motive whereof is past.

Of *Great* and *Small*, *More* and *Less*, see chap. vii. book I.

CHAP. XXI.

Of Example, Similitude, and Fables.

Of the *Principles* both general and special from whence *Proofs* are to be drawn, has been already spoken.

Now follow the *Proofs* themselves which are *Examples* or *Enthymemes*.

An *Example* is either an Example properly so called (as some Action past): or a *Similitude* (which is called a Parable): or a *Fable* (which contains some Action feigned).

An *Example* properly so called, is this; *Darius came not into Greece, till he had first subdued Egypt. Xerxes also conquered Egypt first; then afterwards crossed the Hellespont. We ought therefore to hinder the King of Persia from conquering Egypt.*

A *Similitude*, or *Parable*, is such as followeth: *They who choose their Magistrates by Lot, are like them that choose for their Champions those on whom the Lot shall fall, rather than those who have the greatest strength; and for their Pilot, not him that hath skill; but him whose name is drawn out of the Urne.*

A *Fable* is in this manner. *The Horse desiring to drive out the Stag from his common pasture, took a Man to assist him, and having received into his mouth a Bridle, and a Rider upon his Back, obtained his intent, but became subject to the Man. So you of Himera, having (in hope to be revenged of your Enemies) given unto Phalaris Sovereign Authority, that is to say, taken a Bridle into your Mouths; if you shall also give him a Guard to his Person, that is, let him get up upon your Backs, you become his slaves presently past recovery.*

To find out *Examples*, that is, Actions done that may serve our purpose, is therefore hard, because not in our power.

But to find *Fables* and *Similitudes*, is easier; because by conversing in *Philosophy*, a Man may feign somewhat in nature like to the case in hand.

Examples, *Similitudes*, and *Fables*, where *Enthymemes* are wanting, may serve us in the beginning of an *Oration* for *Inductions*; otherwise are to be alledged after *Enthymemes* for *Testimonies*.

CHAP. XXII.

Of a Sentence.

A *SENTENCE* is an universal Proposition concerning those things which are to be desired or avoided, in the Actions or Passions of the common life. As,

A wise Man will not suffer his Children to be over-learned.

And is to an *Enthymeme* in *Rhetorick*, as any *Proposition* is to a *Syllogisme* in *Logick*.

And therefore a *Sentence*, if the reason be rendered, becomes a *Conclusion*, and both together make an *Enthymeme*.

As for Example,

To be over-learned, besides that it begets effeminacy, procures envy. Therefore he that's wise will not suffer his Children to be over-learned.

Of *Sentences* there be four sorts.

For they either require *Proofs*, or not: that is, are manifest, or not.

Such as are manifest, are either so, as soon as they are uttered; as,

Health is a great good.

Or as soon as they are considered; as,

Men used to hate whom they have hurt.

Such as are not manifest, are either *Conclusions* of *Enthymemes*; as,

He that's wise will not suffer his Children, etc.

Or else are *Enthymematical*; that is, have in themselves the force of an *Enthymeme*; as,

Mortal Men ought not to carry Immortal Anger.

A *Sentence* not Manifest, ought to be either *Inferred* or *Confirmed*.

Inferred thus:

'Tis not good to be effeminately minded, nor to be envied by ones fellow Citizens. A wise Man therefore will not have his Children over-learned.

Confirmed thus:

A wise Man will not have his Children over-learned, seeing too much Learning both softens a Mans mind, and procures him envy among his fellow Citizens.

If a reason be added to a manifest *Sentence* let it be short.

Sentences become not every Man; but only old Men, and such as be well versed in business. For to hear a young Man speak *Sentences*, is ridiculous; and to hear an ignorant Man speak *Sentences*, is absurd.

Sentences generally received, when they are for our purpose, ought not to be neglected, because they pass for truths. And yet they may be denyed, when any laudable custom, or humour may thereby be made appear in the Denyer.

The commodities of *Sentences*, are two.

One proceeding from the Vanity of the Hearer, who takes for true universally affirmed, that which he has found for true only in some particular; and therefore a Man ought to consider in every thing what opinion the Hearer holds.

Another is, that *Sentences* do discover the manners and disposition of the speaker; so that if they be esteemed good *Sentences*, he shall be esteemed a good Man; and if evil, an evil Man.

Thus much of *Sentences*, what they be; of how many sorts; how to be used; whom they become; and what is their profit.

CHAP. XXIII.

Of the Invention of Enthymemes.

SEEING an *Enthymeme* differs from a *Logical Syllogisme*, in that it neither concludes out of every thing, nor out of remote *Principles*; the *Places* of it, from whence a Man may argue, ought to be certain, and determinate.

And because whosoever makes a *Syllogisme Rhetorical*, or other, should know all, or the most part of that which is in question; as, whosoever is to advise the *Athenians* in the question, whether they are to make War or no, must know what their Revenues be; what, and what kind of power they have: and he that will praise them, must know their acts at *Salamis*, *Marathon*, etc. It will be necessary for a good speaker to have in readiness the choicest particulars of whatsoever he foresees he may speak of.

He that is to speak *ex tempore*, must comprehend in his speech as much as he can of what is most proper in the matter in hand.

Proper, I call those things which are least common to others; as, he that will praise *Achilles*, is not to declare such things as are common both to him, and *Diomedes*; as that he was a Prince, and warred against the *Trojans*; but such things as are proper only to *Achilles*; as that he killed *Hector* and *Cygnus*; went to the War young, and voluntary.

Let this therefore be one general *Place*, from that which is *proper*.

CHAP. XXIV.

Of the Places of Enthymemes Ostensive.

FORASMUCH as *Enthymemes* either infer truly, or seem only so to do; and they which do infer indeed, be either *Ostensive*; or such as bring a man to some *impossibility*; we will first set down the *Places of Enthymemes Ostensive*.

An *Ostensive Enthymeme* is, wherein a man concludes the question from somewhat granted.

That *Enthymeme* which brings a Man to an *impossibility*, is an *Enthymeme* wherein from that which the Adversary maintaineth, we conclude that which is manifestly *impossible*.

All *Places* have been already set down in a manner in the precedent Propositions of *Good, Evil, Just, Unjust, Honourable, and Dishonourable*: namely, they have been set down as applied to *Particular Subjects*, or in *Concrete*.

Here they are to be set down in another manner; namely in the *Abstract* or *Universal*.

The first *Place* then let be from *Contraries*, which in the *Concrete* or *Particulars* is exemplified thus. *If Intemperance be hurtful, Temperance is profitable: and if Intemperance be not hurtful, neither is Temperance profitable.*

Another *Place* may be from *Cognomination* or affinity of words: as in this Particular. *If what is Just be Good; then what is justly is well: but justly to die is not well: therefore not all that is Just is Good.*

A third from *Relatives*; as, *This Man has justly done, therefore the other has justly suffered.* But this *Place* sometimes deceives, for a man may suffer *justly*, yet not from *him*.

A fourth from *Comparison*, three ways.

From the *Great to the Less*: as, *He has stricken his Father; and therefore this Man.*

From the *Less to the Greater*: as, *The Gods know not all things; much less Man.*

From *Equality*: as, *If Captains be not always the worse esteemed for losing a Victory; why should Sophisters?*

Another from the *Time*: as *Philip to the Thebans: If I had required to pass through your Country with my Army, before I had ayded you against the Phocæans, there is no*

doubt but you would have promised it me. It is absurd therefore to deny it me now, after I have trusted you.

A sixth from *what the Adversary says of himself*: as, *Iphicrates asked Aristophon, whether he would take a Bribe to betray the Army; and he answering no; What (say he) is it likely that Iphicrates would betray the Army; and Aristophon not?*

This *Place* would be ridiculous, where the *Defendant* were not in much more estimation than the *Accuser*.

A seventh from the *Definition*; as that of *Socrates*; a *Spirit is either God, or the Creature of God: and therefore he denies not that there is a God, that confesses there are Spirits.*

An eighth from the *distinction of an ambiguous word.*

A ninth from *Division*: as, *If all Men do what they do for one of three causes, whereof two are impossible; and the Accuser charge not the Defendant with the third; it follows that he has not done it.*

A tenth from *Induction*: as, *At Athens, at Thebes, at Sparta, etc. And therefore every where.*

An eleventh from *Authority*, or precedent sentence; as that of *Sappho*, that *Death is evil, for that the Gods have judged it so, in exempting themselves from mortality.*

A twelfth from the *Consequence*: as, *'Tis not good to be envied; therefore neither to be learned. 'Tis good to be wise, therefore also to be instructed.*

A thirteenth from *two contrary Consequences*; as, *'Tis not good to be an Orator, because if he speak the truth, he shall displease Men: If he speak falsely, he shall displease God.*

Here is to be noted, that sometimes this argument may be retorted: as thus, *If you speak truth, you shall please God; if you speak untruth, you shall please men: therefore by all means be an Orator.*

A Fourteenth from the *quality that Men have to praise one thing, and approve another*: as, *We ought not to war against the Athenians upon no precedent injury; for all Men discommend injustice. Again, We ought to war against the Athenians; for otherwise our Liberty is at their mercy, that is, is no Liberty; but the preservation of Liberty is a thing that all Men will approve.*

A Fifteenth from *Proportion*: as, *seeing we naturalize*

strangers for their vertues, why should we not banish this stranger for his vices?

A Sixteenth from the similitude of Consequents: as, *He that denies the immortality of the Gods, is no worse than he that has written the generation of the Gods. For the same Consequence follows of both, that sometimes there are none.*

A Seventeenth from that, *that Men change their mind: as, If when we were in Banishment, we fought to recover our Country, why should we not fight now to retain it?*

An Eighteenth from a fained end: as, *that Diomedes chose Ulysses to go with him, not as more valiant than another; but as one that would partake less of the Glory.*

A Nineteenth from the Cause; as if he would infer he did it from this, *that he had Cause to do it.*

A Twentieth from that which is Incredible, but True: as, *that Laws may need a Law to mend them; as well as Fish bred in the salt Water, may need salting.*

CHAP. XXV.

Of the Places of Enthymemes that lead to Impossibility.

LET the first Place be from inspection of Times, Actions, or Words, either of the Adversary, or of the Speaker, or both. Of the Adversary; as, *He says, he loves the People, and yet he was in the Conspiracy of the Thirty.* Of the Speaker; as, *He says, I am contentious, and yet I never began Suit.* Of both; as, *He never conferred any thing to the benefit of the Commonwealth, whereas I have ransomed divers Citizens with mine own Money.*

A Second, from shewing the cause of that which seemed amiss, and serves for Men of good reputation that are accused; as, *The Mother that was accused of Incest for being seen embracing her Son, was absolved as soon as she made appear, that she embraced him upon his arrival from far, by way of Salutation.*

A Third, from rendring of the cause; as, *Leodamas, to whom it was objected, that he had, under the Thirty Tyrants, defaced the Inscription (which the People had set up in a Pillar) of his Igñominy; answered, He had not done it; because it would have been more to his commodity to let it stand;*

thereby to indear himself to the Tyrants, by the Testimony of the Peoples hatred.

A Fourth, from *better Counsel*; as, *He might have done better for himself; therefore he did not this.* But this Place deceives, when the *better Counsel* comes to mind after the Fact.

A Fifth, from *Incompatibility of the things to be done*; as, They that did deliberate whether they should both mourn and sacrifice at the Funeral of *Leucothea*, were told, that *if they thought her a Goddess, they ought not to Mourn; and if they thought her a Mortal, they ought not to Sacrifice.*

A Sixth, (which is proper to *Judicial Orations*,) from an *Inference of Error*; as, *If he did it not, he was not wise, therefore he did it*¹.

Enthymemes that lead to *Impossibility*, please more than *Extensive*: for they compare, and put contraries together, whereby they are the better set off, and more conspicuous to the Auditor.

Of all *Enthymemes*, they be best, which we assent to as soon as hear. For such consent pleaseth us; and makes us favourable to the Speaker.

CHAP. XXVI.

Of the Places of seeming Enthymemes.

Of *seeming Enthymemes*, one Place may be from the *Form of speaking*; as when a Man has repeated divers Sentences, he brings in his Conclusion, as if it followed necessarily, though it do not.

A Second from an *ambiguous word*.

A Third from *that which is true divided, to that which is false joyned*; as that of *Orestes*, *It was justice that I should revenge my Fathers death, and it was justice my Mother should die for killing my Father, therefore I justly killed my Mother.* Or from *that which is true joyned, to that which is false*

¹ Aristotle mentions a *seventh* element, derivable from puns upon words. This however our analyst entirely overlooks; from the consideration probably that it could contribute but little to the argumentative strength of an oration; or because it may be applied no less to *confirmation* than to *refutation*.

divided; as, one cup of Wine, and one cup of Wine, are hurtful; therefore one cup of Wine is hurtful.

A Fourth from *Amplification of the Crime*. For neither is the *Defendant* likely to have committed the *Crime* he *amplifies*; nor does the *Accuser* seem, when he is passionate, to want ground for his *Accusation*.

A Fifth from *signs*; as, when a *Man* concludes the doing of the *Fact* from the manner of his life.

A Sixth from *that which comes by chance*, as if from this, that the Tyranny of *Hipparchus* came to be overthrown from the love of *Aristogeiton* to *Harmodius*, a *Man* should conclude, that in a free Common-wealth loving of Boys were profitable.

A Seventh from *the Consequence*, as *Banishment is to be desired, because a banished Man has choice of places to dwell in.*

An Eighth from *making that the cause which is not*; as, *In Demosthenes his Government, the War began; therefore Demosthenes governed well. With the Pelponnesian War began the Plague, therefore Pericles that perswaded that War, did ill.*

A Ninth from *the Omission of some circumstance*, as, *Helen did what was lawful, when she ran away with Paris, because she had her Father's consent to choose her own Husband*; which was true only during the time that she had not chosen.

A Tenth, from *that which is probable in some case, to that which is probable simply*; as, *'Tis probable, he foresaw, that if he did it, he should be suspected; therefore 'tis probable he did it not.*

From this *Place* one may infer both ways that *he did it not*. For if he be not likely to do it, it may be thought *he did it not*, again, if he were likely to do it, it may be thought *he did it not*, for this, that *he knew he should be suspected.*

Upon this *Place* was grounded the *Art*, which was so much detested in *Protagoras*, of making the better cause seem the worse; and the worse the better.

CHAP. XXVII.

Of the Ways to answer the Arguments of the Adversary.

AN Argument is answered by an opposite *Syllogisme*, or by an *Objection*.

The *Places* of opposite *Syllogismes* are the same with the *Places* of *Syllogismes*, or *Enthymemes*: for a *Rhetorical Syllogisme* is an *Enthymeme*.

The *Places* of *Objections* are four.

First, from *the same*, as, To the *Adversary* that proves love to be good by an *Enthymeme*, may be *objected*, that *no want is good, and yet Love is want*; or particularly thus: *The Love of Myrrha to her Father was not good*.

The Second from *Contraries*: as, if the *Adversary* say, *A good Man does good to his friends*, an *Objection* might be made, that then *an evil Man will do also evil to his friends*.

The Third from *Similitude*: as thus, if the *Adversary* say, all Men that are injured, do hate those that have injured them, it may be *objected*, that then, *all Men that had received Benefits should love their Benefactors*, that is to say, be grateful.

The Fourth from the *authority of famous men*; as when a Man shall say, that drunken Men ought to be pardoned those Acts they do in their drunkenness, because they know not what they do; the *Objection* may be, that Pittacus *was of another mind, that appointed for such Acts a double punishment; one for the Act, another for the Drunkenness*.

And forasmuch as all *Enthymemes* are drawn from *Probability*, or *Example*, or from a *Sign Fallible*, or from a *Sign Infallible*: an *Enthymeme* from *Probability* may be confuted *really*, by shewing that for the most part it falls out otherwise; but *apparently* or *sophistically*, by shewing only that it does not fall out so alwayes; whereupon the Judge thinks the *Probability* not sufficient to ground his Sentence upon.

[The Reason whereof is this, That the Judge, while he hears the Fact proved *probable*, conceives it as *true*. For the Understanding has no Object but *Truth*. And therefore by and by, when he shall hear an *Instance* to the contrary; and thereby find that he had no necessity to think it *true*, presently changes his opinion, and thinks it *false*, and consequently not so much as *probable*. For

he cannot at one time think the same thing both *probable* and *false*: and he that says a thing is *probable*, the meaning is, he thinks it *true*, but finds not arguments enough to prove it.]

An *Enthymeme* from a *fallible sign*, is answered, by shewing the *sign to be fallible*.

An *Enthymeme* from an *Example*, is answered, as an *Enthymeme* from *Probability*; really, by shewing more *Examples* to the contrary; *apparently*, if he bring *Examples* enough to make it seem *not necessary*.

If the *Adversary* have more *Examples* than we, we must make appear that they are not applicable to the Case.

An *Enthymeme* from an *infallible sign*, if the Proposition be *true*, is unanswerable.

CHAP. XXVIII.

Amplification and Extenuation are not Common Places. Enthymemes by which Arguments are answered, are the same with those by which the Matter in question is proved, or disproved. Objections are not Enthymemes.

THE first, that *Amplification* and *Extenuation* are not *Common Places*, appears by this, that *Amplification* and *Extenuation* do prove a fact to be *great*, or *little*; and are therefore *Enthymemes*, to be drawn from *Common Places*, and therefore are not the *Places* themselves.

The second, that *Enthymemes*, by which Arguments are answered, are of the same kind with those by which the matter in question is proved, is manifest by this, that these infer the opposite of what was proved by the other.

The third, that an *Objection* is no *Enthymeme*, is apparent by this, that an *Objection* is no more but an *Opinion*, *Example*, or other *Instance*, produced to make appear, that the *Adversaries* Argument does not conclude.

Thus much of *Examples*, *Sentences*, *Enthymemes*, and generally of all things that belong to *Argumentation*; from what *Places* they may be drawn, or answered.

There remains *Elocution* and *Disposition* to be spoken of in the next Book.

BOOK III.

CHAP. I.

Of the Original of Elocution and Pronuntiatio.

THREE things being necessary to an *Oration*, namely, *Proof*, *Elocution*, and *Disposition*; we have done with the first, and shall speak of the other two in that which follows.

As for *Action*, or *Pronuntiatio*, so much as is necessary for an *Orator*, may be fetcht out of the *Book* of the *Art of Poetry*, in which we have treated of the *Action* of the *Stage*.

For *Tragedians* were the first that invented such *Action*, and that but of late; and it consisteth in governing well the *magnitude*, *tone*, and *measure* of the *Voice*; a thing less subject to *Art*, than is either *Proof*, or *Elocution*.

And yet there have been Rules delivered concerning it, as far forth as serve for *Poetry*.

But *Oratorical Action* has not been hitherto reduced to *Art*.

And *Orators* in the beginning, when they saw that the *Poets* in barren and feigned Arguments, nevertheless attained great Reputation; supposing it had proceeded from the choice, or connexion of words, fell into a *Stile*, by imitation of them, approaching to *Verse*, and made choice of words.

But when the *Poets* changed their *Stile*, and laid by all words that were not in common use, the *Orators* did the same, and lighted at last upon words, and a Government of the *Voice* and Measures proper to themselves.

Seeing therefore *Pronuntiatio*, or *Action* are in some degree necessary also for an *Orator*, the Precepts thereof are to be fetcht from the *Art of Poetry*.

[In the mean time this may be one general rule. If the *Words*, *Tone*, *Greatness* of the *Voice*, *Gesture* of the *Body* and *Countenance*, seem to proceed all from one *Passion*, then 'tis well pronounced. Otherwise not.

For when there appear more passions than one at once, the mind of the Speaker appears unnatural and distracted. Otherwise, as the mind of the Speaker, so the mind of the Hearer always.]

CHAP. II.

Of the Choice of Words and Epithets.

THE Vertues of a *Word* are two ; the first, that it be *perspicuous* ; the second, that it be *decent* ; that is, neither *above*, nor *below* the thing signified ; or, neither too humble, nor too fine.

Perspicuous are all *Words* that be *Proper*.

Fine Words are those, that are *borrowed*, or *Translated* from other significations ; of which in the *Art of Poetry*.

The reason why *borrowed Words* please, is this. Men are affected with *Words*, as they are with *Men*, admiring in both that which is *Forraign* and *New*.

To make a *Poem* graceful, many things help ; but few an *Oration*.

For to a *Poet* it sufficeth with what *Words* he can set out his *Poem* : but an *Orator* must not only do that ; but also seem not to do it : for else he will be thought to speak unnaturally, and not as he thinks ; and thereby be the less believed ; whereas *belief* is the scope of his *Oration*.

The *Words* that an *Orator* ought to use are of three sorts. *Proper* ; such as are *Received* ; and *Metaphors*.

Words taken from *Forraign Languages*, *Words* compounded, and *Words* new coyned, are seldom to be used.

Synonimaes belong to *Poets*, and *Equivocal Words* to *Sophisters*.

An *Orator*, if he use *Proper Words*, and *Received*, and good *Metaphors*, shall both make his *Oration beautiful*, and not seem to intend it ; and shall speak *perspicuously*. For in a *Metaphor* alone there is *Perspicuity*, *Novity*, and *Sweetness*.

Concerning *Metaphors* the Rules are these.

1. He that will make the best of a thing, let him draw his *Metaphor* from somewhat that is better. As for Example, let him call a *Crime*, an *Error*. On the other side, when he would make the worst of it, let him draw his *Metaphor* from somewhat worse, as, calling *Error*, *Crime*.

2. A *Metaphor* ought not to be so far fetcht, as that the *Similitude* may not easily appear.

3. A *Metaphor* ought to be drawn from the noblest things, as the *Poets* do that choose rather to say, *Rosy-fingered*, than *Red-fingered Aurora*.

In like manner the Rule of *Epithets* is,

That he that will adorn, should use those of the better sort; and he that will disgrace, should use those of the worse: as *Simonides* being to Write an *Ode* in honour of the Victory gotten in a Course by certain *Mules*, being not well paid, called them by their name [*Ἡμιόρους*] that signifies their propinquity to *Asses*: but having received a greater reward, stiles them *the Sons of swift-footed Coursers*.

CHAP. III.

Of the Things that make an Oration Flat.

THE things that make an *Oration flat* or *insipide*, are four.

1. *Words Compounded*; [and yet a Man may Compound a word, when the Composition is necessary, for want of a simple word; and easie, and seldom used.]

2. *Forraign Words*. As for Example, such as are newly derived from the Latine; which though they were proper among them whose tongue it is, are Forraign in another Language: and yet these may be used, so it be moderately.

3. *Long, impertinent, and often Epithets*.

4. *Metaphors, indecent, and obscure*. *Obscure* they are, when they are far fetcht. *Indecent* when they are *ridiculous*, as in *Comedies*; or *too grave*, as in *Tragedies*.

CHAP. IV.

Of a Similitude.

A *SIMILITUDE* differs from a *Metaphor* only by such *Particles* of *Comparison* as these, *As*; *Even as*; *So*; *Even so*, etc.

A *Similitude* therefore is a *Metaphor dilated*; and a *Metaphor* is a *Similitude Contracted* into one Word.

A *Similitude* does well in an *Oration*, so it be not too frequent; for 'tis *Poetical*.

An Example of a *Similitude*, is this of *Pericles*; that said in his Oration, *that the Bæotians were like to so many Oaks in a Wood, that did nothing but beat one another.*

CHAP. V.

Of the Purity of Language.

FOUR things are necessary to make Language Pure.

1. The *right rendring* of those *Particles* which some antecedent *Particle* does require: as to a *Not only*, a *Not also*; and then they are rendered right, when they are not suspended too long.

2. *The use of proper Words*, rather than *Circumlocutions*, unless there be motive to make one do it of purpose.

3. That there be nothing of *double construction*, unless there be cause to do it of purpose. As the *Prophets* (of the Heathen) who speak in general terms, to the end they may the better maintain the truth of their *Prophecies*; which is easier maintained in *generals*, than in *particulars*. For 'tis easier to divine, whether a number be *even* or *odd*, than *how many*; and that a thing *will be*, than *what it will be*.

4. Concordance of Gender, Number, and Person; as not to say Him for Her; Man for Men; Hath for Have.

In Summ; a Man's Language ought to be easie for another to read, pronounce, and point.

Besides, to divers *Antecedents*, let divers *Relatives*, or one common to them all, be correspondent: as, *He saw the Colour*; *He heard the Sound*; or *He perceived both Colour and Sound*; but by no means, *He heard or saw both*.

Lastly, that which is to be interposed by *Parenthesis*, let it be done quickly: as, *I purposed, having spoken to him (to this, and this purpose) afterward to be gone*. For to put it off thus: *I resolved, after I had spoken to him, to be gone*; but *the subject of my speech was to this and this purpose*, is vitious.

CHAP. VI.

Of the Amplitude and Tenuity of Language.

A MAN shall add *Amplitude*, or *Dignity* to his Language, but by such means as these.

1. By changing the *Name* with the *Definition*, as occasion

shall serve. As when the *Name* shall be indecent, by using the *Definition*; or *Contrary*.

2. By *Metaphors*.

3. By using the *plural* number for the *singular*.

4. By *privative Epithets*.

CHAP. VII.

Of the Convenience or Decency of Elocution.

ELOCUTIONS are made *Decent*,

1. By speaking *feelingly*; that is, with such *Passion* as is fit for the matter he is in; as *Angerly* in matter of *Injury*.

2. By speaking as becomes the *Person* of the *Speaker*; as for a *Gentleman* to speak *eruditely*.

3. By speaking *proportionably* to the matter; as of *great affairs* to speak in a *high*; and of *mean*, in a *low* *Stile*.

4. By abstaining from *Compounded*, and from *Outlandish words*; unless a Man speak *passionately*, and have already moved, and, as it were, inebriated his Hearers. Or *Ironically*.

It confers also to perswasion very much, to use these ordinary Forms of speaking, *All men know*; *'Tis confessed by all*; *No Man will deny*, and the like. For the Hearer consents, surprized with the fear to be esteemed the only Ignorant Man.

'Tis good also, having used a word that signifies more than the matter requires, to abstain from the *Pronunciation* and *Countenance* that to such a word belongs: that the *Disproportion* between it and the matter may the less appear. And when a Man has said too much, it will shew well to correct himself: for he will get belief by seeming to consider what he says.

[But in this a Man must have a care not to be too precise in shewing of this Consideration. For the ostentation of Carefulness is an argument oftentimes of lying; as may be observed in such as tell particularities not easily observed, when they would be thought to speak more precise truth than is required.]

CHAP. VIII¹.*Of two Sorts of Stiles.*

THERE be two sorts of Stiles.

The one *continued* or to be *comprehended at once*; the other *divided*, or *distinguished* by Periods.

The first sort was in use with antient Writers: but is now out of date.

An Example of this *Stile* is in the History of *Herodotus*; wherein there is no Period till the end of the whole History.

In the other kind of *Stile*, that is distinguished by Periods; a *Period* is such a part as is perfect in it self, and has such length as may easily be comprehended by the understanding.

This later kind is pleasant; the former unpleasant, because this appears finite, the other infinite: in this the Hearer has always somewhat set out, and terminated to him; in the other he fore-sees no end, and has nothing finished to him; this may easily be committed to memory, because of the measure and cadence (which is the cause that Verses be easily remembered); the other not.

Every Sentence ought to end with the *period*, and nothing to be interposed.

Period is either *simple*, or *divided* into Parts.

Simple is that which is *Indivisible*; as, *I wonder you fear not their ends, whose actions you imitate.*

A *Period divided*, is that which not only has perfection and length convenient, for respiration, but also *Parts*. As, *I wonder you are not afraid of their ends, seeing you imitate their actions*: where in these words, *I wonder you are not afraid of their ends*, is one *Colon*, or *Part*; and in these, *Seeing you imitate their actions*, another: and both together make the *Period*.

The *parts*, or *members*, and *periods* of speech ought neither to be *too long*, nor *too short*.

Too long are they, which are produced beyond the expectation of the Hearer.

Too short are they, that end before he expects it.

¹ Hobbes has overlooked Aristotle's 8th chapter "on Rhythm."

Those that be *too long*, leave the Hearer behind, like him that walking, goes beyond the usual end of the Walk, and thereby out-goes him that walks with him.

They that be *too short*, make the Hearer stumble; for when he looks far before him, the end stops him before he be aware.

A *period* that is *divided* into parts, is either *divided only*; or has also an *Opposition* of the *Parts* one to another.

Divided only is such as this: *This the Senate knows; the Consul sees; and yet the Man lives.*

A *Period* with *Opposition of Parts*, called also *Antithesis*, and the parts *Antitheta*, is when *contrary parts* are put together; or also joyned by a third.

Contrary parts are put together, as here, *The one has obtained Glory, the other Riches; both by my benefit.*

Antitheta are therefore acceptable; because not only the *parts* appear the better for the *opposition*; but also for that they carry with them a certain appearance of that kind of *Enthymeme*, which leads to *Impossibility*.

Parts, or *Members* of a *Period*, are said to be *equal*, when they have altogether, or almost equal Number of Syllables.

Parts, or *Members* of a *Period*, are said to be *like*, when they *begin*, or *end* alike: and the more *Similitudes*, and the greater *equality* there is of Syllables, the more graceful is the *Period*.

CHAP. IX.

Of those Things that grace an Oration, and make it delightful.

FORASMUCH as there is nothing more delightful to a Man, than to find that he apprehends and learns easily; it necessarily follows, that those *Words* are most *grateful* to the Ear, that make a Man seem to see before his Eyes the things signified.

And therefore *Forraign Words* are unpleasant, because *Obscure*; and *Plain Words*, because *too Manifest*, making us learn nothing new: but *Metaphors* please; for they beget in us by the *Genus*, or some *common* thing to that with another, a kind of *Science*: as when an *Old Man* is called *Stubble*; a Man suddenly learns that he grows up, flourisheth, and

withers like Grass, being put in mind of it by the qualities common to *Stubble*, and to *Old Men*.

That which a *Metaphor* does, a *Similitude* does the same; but with less *grace*, because with more *prolixity*.

Such *Enthymemes* are the most *graceful*, which neither are presently very Manifest, nor yet very hard to be understood¹, but are comprehended, while they are uttering, or presently after, though not understood before.

The things that make a speech *graceful*, are these; *Antitheta*, *Metaphors*, and *Animation*.

Of *Antitheta* and *Antithesis* hath been spoken in the precedent Chapter.

Of *Metaphors* the most *graceful* is that which is drawn from *Proportion*.

[*Aristotle* (in the 12 Chapter of his *Poetry*) defines a *Metaphor* to be the translation of a name from one signification to another; whereof he makes four kinds: 1. From the *General* to the *Particular*. 2. From the *Particular* to the *General*. 3. From one *Particular* to another. 4. From *Proportion*.]

A *Metaphor* from *Proportion* is such as this, *A State without Youth, is a Year without a Spring*.

Animation is that expression which makes us seem to see the thing before our eyes; as he that said, *The Athenians poured out their City into Sicily*, meaning, they sent thither the greatest Army they could make; and this is the greatest *grace* of an *Oration*.

If therefore in the same Sentence there concur both *Metaphor*, and this *Animation*, and also *Antithesis*, it cannot choose but be very *graceful*.

That an *Oration* is *graced* by *Metaphor*, *Animation*, and *Antithesis*, hath been said: but how 'tis *graced*, is to be said in the next Chapter.

CHAP. X.

In what Manner an Oration is graced by the Things aforesaid.

'Tis *graced* by *Animation*, when the actions of living Creatures are attributed to things without life; as when the Sword is said to *devour*.

¹ ἐπιπόλαια and ἀγνούμενα.

Such *Metaphors* as these come into a Mans mind by the observation of things that have similitude and proportion one to another. And the more unlike and unproportionable the things be otherwise, the more *grace* hath the *Metaphor*.

A *Metaphor* without *Animation*, adds *grace* then, when the Hearer finds he learns somewhat by such use of the word.

Also *Paradoxes* are *graceful*, so Men inwardly do believe them: for they have in them somewhat like to those jests that are grounded upon the similitude of words, which have usually one sense, and in the present another; and somewhat like to those jests which are grounded upon the deceiving of a Mans expectation.

And *Paragrams*; that is, allusions of words are graceful, if they be well placed; and in Periods not too long; and with *Antithesis*; for by these means the ambiguity is taken away.

And the more of these; namely, *Metaphor*, *Animation*, *Antithesis*, *Equality of Members*, a Period hath, the more graceful it is.

Similitudes *grace* an *Oration*, when they contain also a *Metaphor*.

And *Proverbs* are graceful, because they are *Metaphors*, or Translations of words from one *species* to another.

And *Hyperboles*, because they also are *Metaphors*: but they are youthful, and bewray vehemence; and are used with most grace by them that are angry; and for that cause are not comely in Old Men.

CHAP. XI.

Of the Difference between the Stile to be used in Writing, and the Stile to be used in Pleading.

THE *Stile* that should be *Read* ought to be more exact and accurate.

But the *Stile* of a *Pleader* ought to be suited to Action and Pronunciation.

Orations of them that *Plead*, pass away with the hearing.

But those that are *Written*, Men carry about them, and are considered at leisure; and consequently must endure to be sifted and examined.

Written Orations appear flat in *Pleading*.

And *Oration*s made for the *Barr*, when the Action is away, appear in *Reading* insipide.

In *Written Oration*s Repetition is justly condemned.

But in *Pleadings*, 'by the help of Action, and by some change in the *Pleader*, Repetition becomes Amplification.

In *Written Oration*s Disjunctives do ill; as, *I came, I found him, I asked him*: for they seem superfluous, and but one thing, because they are not distinguished by Action.

But in *Pleadings* 'tis Amplification; because that which is but one thing, is made to seem many.

Of *Pleadings*, that which is *Judicial* ought to be more accurate, than that which is *before the people*.

And an *Oration* to the people ought to be more accommodate to Action, than a *Judicial*.

And of *Judicial Oration*s, that ought to be more accurate, which is uttered to *few Judges*; and that ought to be more accommodate to Action, which is uttered to *many*. As in a *Picture*, the farther he stands off that beholds it, the less need there is that the Colours be fine: so in *Oration*s, the farther the Hearer stands off, the less need there is for his *Oration* to be elegant.

Therefore *Demonstrative Oration*s are most proper for *Writing*, the end whereof is to *Read*.

CHAP. XII.

Of the Parts of an Oration, and their Order.

THE necessary *Parts* of an *Oration* are but two; *Proposition*s, and *Proof*; which are as it were the *Probleme*, and *Demonstration*.

The *Proposition* is the explication, or opening of the Matter to be *proved*.

And *Proof* is the *Demonstration* of the Matter *propounded*.

To these necessary *parts*, are sometimes added two other, the *Proeme* and the *Epilogue*, neither of which are any *Proof*.

So that in some there be four *parts* of an *Oration*; the *Proeme*, the *Proposition*, or (as the others call it) the *Narration*, the *Proofs*, (which contain *Confirmation*, *Confutation*, *Amplification*, and *Diminution*,) and the *Epilogue*.

CHAP. XIII.

Of the Proeme.

THE *Proeme* is the beginning of an *Oration*, and, as it were, the preparing of the way before one enter into it.

In some kinds of *Oration*s it resembles the *Prelude* of *Musicians*, who first play what they list, and afterwards the Tune they intended.

In other kinds it resembles the *Prologue* of a *Play*, that contains the Argument.

Proemes of the first sort, are most proper for *Demonstrative Oration*s; in which a Man is free to foretell, or not, what points he will insist upon; and for the most part 'tis better not: because when a Man has not obliged himself to a certain matter, *Digression* will seem *Variety*: but if he have engaged himself, *Variety* will be accounted *Digression*.

In *Demonstratives* the matter of the *Proeme* consisteth in the *Praise* or *Dispraise* of some *Law* or *Custom*, or in *Exhortation*, or *Dehortation*; or something that serves to incline the Hearer to the purpose.

Proemes of the second kind are most proper for *Judicial Oration*s. For as the *Prologue* in a *Dramatick*, and the *Exordium* in an *Epique* Poem, setteth first in few words the Argument of the Poem: so in a *Judicial Oration* the *Orator* ought to exhibit a Model of his *Oration*, that the mind of the Hearer may not be suspended, and for want of fore-sight, err or wander.

Whatsoever else belongs to a *Proeme*, is drawn from one of these four; From the *Speaker*, From the *Adversary*, From the *Hearer*, or from the *Matter*.

From the *Speaker* and *Adversary* are drawn into *Proemes* such Criminations and Purgations as belong not to the cause.

To the *Defendant* 'tis necessary in the *Proeme* to answer to the accusations of his *Adversary*; that those being cleared, he may have a more favourable entrance to the rest of his *Oration*.

But to the *Plaintife* 'tis better to cast his Criminations all into the *Epilogue*, that the Judge may the more easily remember them.

From the *Hearer* and from the *Matter* are drawn into the *Proeme* such things as serve to make the *Hearer* favourable, or angry; attentive, or not attentive, as need shall require.

And *Hearers* use to be attentive to *persons* that are reputed *good*; to things that are of *great Consequence*, or that *concern themselves*, or that are *strange*, or that *delight*.

But to make the *Hearer* attentive, is not the part of the *Proeme* only, but of any other part of the *Oration*, and rather of any other part, than of the *Proeme*. For the *Hearer* is every where more remiss than in the beginning. And therefore wheresoever there is need, the *Orator* must make appear both the *probity* of his own *person*, and that the *matter* in hand is of *great Consequence*; or that it concerns the *Hearer*; or that it is *new*; or that it is *delightful*.

He that will have the *Hearer* attentive to him, but not to the *Cause*, must on the other side make it seem that the *matter* is a *trifle*, without relation to the *Hearer*, *common*, and *tedious*.

That the *Hearer* may be favourable to the *Speaker*, one of two things is required; that he *love* him, or that he *pity* him.

In *Demonstrative Orations*, he that *praises* shall have the *Hearer* favourable if he think himself, or his own manners, or course of life, or any thing he loves, comprehended in the same *praise*.

On the contrary, he that *dispraises*, shall be heard favourably, if the *Hearer* find his *Enemies*, or *their courses*, or any thing he *hates*, involved in the same *dispraise*.

The *Proeme* of a *Deliberative Oration* is taken from the same things, from which are taken the *Proemes* of *Judicial Orations*. For the matter of a *Deliberative Oration* needeth not that natural *Proeme*, by which is shewn what we are to speak of; for that is already known: the *Proeme* in these, being made only for the *Speakers*, or *Adversaries* sake; or to make the *Matter* appear *great*, or *little*, as one would have it, and is therefore to be taken from the *persons* of the *Plaintif* or *Defendant*; or from the *Hearer*, or from the *Matter*, as in *Orations Judicial*.

CHAP. XIV.

Places of Crimination, and Purgation.

1. ONE is from the *removal* of *ill Opinion* in the *Hearer*, imprinted in him by the *Adversary*, or otherwise.
2. Another from this, That the thing done is *not hurtful*,

or not to him, or not so much, or not unjust, or not great, or not dishonourable.

3. A third from the *Recompence*, as, *I did him harm, but withal I did him honour.*

4. A fourth from the *Excuse*; as, *It was Errour, Mis-chance, or Constraint.*

5. A fifth from the *Intention*; as, *One thing was done, another meant.*

6. A sixth from the *Comprehension of the Accuser*; as, *What I have done, the Accuser has done the same; or his Father, Kinsman, or Friend.*

7. From the *Comprehension of those that are in Reputation*; as, *What I did, such and such have done the same, who nevertheless are good Men.*

8. From *Comparison* with such as have been *falsely accused, or wrongfully suspected, and nevertheless found upright.*

9. From *Recrimination*; as, *The Accuser is a man of ill life, and therefore not to be believed.*

10. From that the *Judgment belongs to another Place, or Time*; as, *I have already answered, or am to answer elsewhere to this Matter.*

11. From *Crimination of the Crimination*; as, *It serves only to pervert Judgment.*

12. A twelfth, which is common both to *Crimination* and *Purgation*, and is taken from *some sign*; as *Teucer is not to be believed, because his Mother was Priam's Sister.* On the other side, *Teucer is to be believed, because his Father was Priam's Enemy.*

13. A thirteenth, proper to *Crimination* only, from *praise and dispraise mixt*: as, *To praise small things, and blame great ones; or to praise in many words, and blame with effectual ones; or to praise many things that are good, and then add one evil, but a great one.*

14. A fourteenth, coming both to *Crimination* and *Purgation*, is taken from the *interpretation of the fact*: for he that *purgeth* himself *interpreteth the fact* always in the best sense; and he that *Criminates*, always in the worst; as when *Ulysses* said, *Diomedes chose him for his Companion, as the most able of the Grecians, to aid him in his exploit*: but his *Adversary* said, *He chose him for his cowardice, as the most unlikely to share with him in the Honour.*

CHAP. XV.

Of the Narration.

THE *Narration* is not always continued and of one Piece ; but sometimes, as in *Demonstratives*, interrupted, and dispersed through the whole *Oration*.

For there being in a *Narration* something that falls not under Art ; as namely, the Actions themselves, which the *Orator* inventeth not ; he must therefore bring in the *Narration* of them where he best may. As for Example, if being to praise a Man, you would make a *Narration* of all his Acts immediately from the beginning, and without interruption, you will find it necessary afterwards to repeat the same Acts again, while from some of them you praise his Valour, and from others his Wisdom : whereby your *Oration* shall have less variety, and shall less please.

'Tis not necessary always that the *Narration* be short. The true *measure* of it must be taken from the *matter* that is to be laid open.

In the *Narration*, as oft as may be, 'tis good to insert somewhat commendable in ones self, and blameable in ones Adversary : As, *I advised him but he would take no Counsel*.

In *Narrations*, a Man is to leave out whatsoever breeds compassion, indignation in the Hearer besides the purpose ; as *Ulysses* in *Homer*, relating his Travels to *Alcinous*, to move compassion in him, is so long in it, that it consists of divers Books : but when he comes home, tells the same to his Wife in thirty Verses, leaving out what might make her sad.

The *Narration* ought also to be in such words as argue the *Manners* ; that is, some virtuous or vicious habit in him of whom we speak, although it be not exprest ; As, *setting his Arms a kenbold, he answered*, etc. by which is insinuated the pride of him that so answered.

In an *Oration* a Man does better to shew his affection than his Judgment : that is, 'Tis better to say, *I like this* ; than to say, *This is better*. For by the one you would seem *wise*, by the other *good*. But *Favour* follows *Goodness* ; whereas *Wisdom* procures *Envy*.

But if this Affection seem incredible, then either a reason

must be rendered, as did *Antigone*. For when she had said, *She loved her brother better than her Husband or Children*; she added, *for Husband and Children I may have more; but another Brother I cannot, my Parents being both dead*. Or else a man must use this form of speaking; *I know this affection of mine seems strange to you; but nevertheless it is such*. For 'tis not easily believed, that any Man has a mind to do any thing that is not for his own good.

Besides in a *Narration*, not only the Actions themselves; but the Passions, and signs that accompany them, are to be discovered.

And in his *Narration* a Man should make himself and his Adversary be considered for such, and such, as soon, and as covertly as he can.

A *Narration* may have need sometimes not to be in the beginning.

In *Deliberative Orations*; that is, where soever the question is of things to come; a *Narration*, which is always of things past, has no place: and yet things past may be recounted, that Men may *deliberate* better of the future: But that is not as *Narration*, but *Proof*; for 'tis *Example*.

There may also be *Narration* in *Deliberatives* in that part where *Crimination* and *Praise* come in: But that part is not *Deliberative*, but *Demonstrative*.

CHAP. XVI.

Of Proof, or Confirmation, and Refutation.

PROOFS are to be applyed to something controverted.

The Controversie in *Judicial Oration* is, *Whether it has been done; whether it has been hurtful; whether the matter be so great, and whether it be Just, or no*.

In a question of *Fact*, one of the Parties of necessity is faulty, (for ignorance of the *Fact* is no excuse,) and therefore the *Fact* is chiefly to be insisted on.

In *Demonstratives*, the *Fact* for the most part is supposed: but the *honour* and *profit* of the *Fact* are to be *proved*.

In *Deliberatives*, the question is, *Whether the thing be like to be, or likely to be so great: or whether it be just; or whether it be profitable*.

Besides the application of the *Proof* to the question, a Man

ought to observe, whether his Adversary have lyed in any point without the Cause. For 'tis a sign he does the same in the Cause.

The *Proofs* themselves are either *Examples*, or *Enthymemes*.

A *Deliberative Oration*, because 'tis of things to come, requireth rather *Examples*, than *Enthymemes*.

But a *Judicial Oration*, being of things past, which have a necessity in them, and may be concluded *sylogistically*, requireth rather *Enthymemes*.

Enthymemes ought not to come too thick together, for they hinder one anothers force by confounding the Hearer.

Nor ought a Man to endeavour to *prove* every thing by *Enthymeme*, least like some *Philosophers*, he collect what is *known*, from what is *less known*.

Nor ought a Man to use *Enthymemes*, when he would move the Hearer to some affection: For seeing divers Motions do mutually destroy or weaken one another, he will lose either the *Enthymeme*, or the *affection* that he would move.

For the same reason, a Man ought not to use *Enthymemes* when he would express *Manners*.

But whether he would move *affection*, or insinuate his *Manners*, he may withal use *Sentences*.

A *Deliberative Oration* is more difficult than a *Judicial*, because 'tis of the *future*, whereas a *Judicial* is of that which is *past*, and that consequently may be known; and because it has *principles*, namely the *Law*; and it is easier to *prove* from *principles*, than without.

Besides, a *Deliberative Oration* wants those helps of *turning to the Adversary*; of *speaking of himself*; of *raising passion*.

He therefore that wants matter in a *Deliberative Oration*, let him bring in some *person to praise or dispraise*.

And in *Demonstratives* he that has nothing to say in *commendation* or *discommendation* of the *principal party*, let him *praise* or *dispraise* some body else, as his *Father*, or *Kinsman*, or the very *virtues* or *vices* themselves.

He that wants not *Proofs*, let him not only *prove* strongly, but also insinuate his *Manners*: but he that has no *Proof*, let him nevertheless insinuate his *Manners*. For a *good Man* is as acceptable, as an exact *Oration*.

Of *Proofs*, those that *lead to an absurdity*, please better than those that are *direct* or *ostensive*; because from the com-

parison of Contraries, namely, *Truth* and *Falsity*, the force of the *Syllogisme* does the better appear.

Confutation is also a part of *Proof*.

And he that speaks first, puts it after his own *Proofs*, unless the Controversie contain many and different matters. And he that speaks last, puts it before.

For 'tis necessary to make way for his own *Oration*, by removing the Objections of him that spake before. For the mind abhors both the *Man*, and his *Oration*, that is damned before hand.

If a Man desire his *Manners* should appear well, (least speaking of himself he become odious, or troublesome, or obnoxious to obtreaction; or speaking of another, he seem contumelious, or scurrilous,) let him introduce another person.

Last of all, least he cloy his Hearer with *Enthymemes*, let him vary them sometimes with *Sentences*; but such as have the same force. As here is an *Enthymeme*. *If it be then the best time to make peace when the best conditions of peace may be had, then the time is now, while our Fortune is entire.* And this is a *Sentence* of equal force to it. *Wise Men make peace, while their Fortune is entire.*

CHAP. XVII.

Of Interrogations, Answers, and Jest.

THE times wherein 'tis fit to ask ones Adversary a *question* are chiefly four.

1. The first is, when of two Propositions that conclude an Absurdity, he has already uttered one; and we would by *Interrogation* draw him to confess the other.

2. The second, when of two Propositions that conclude an Absurdity, one is manifest of it self, and the other likely to be fetched out by a *question*; then the *Interrogation* will be seasonable; and the absurd Conclusion is presently to be inferred, without adding that Proposition which is manifest.

3. The third, when a Man would make appear that his Adversary does contradict himself.

4. The fourth, when a Man would take from his Adversary such shifts as these, *In some sort 'tis so; In some sort 'tis not so.*

Out of these Cases 'tis not fit to *interrogate*. For he whose *question* succeeds not, is thought vanquished.

To equivocal *questions* a Man ought to *answer* fully, and not to be too brief.

To *Interrogations* which we fore-see tend to draw from us an *Answer*, contrary to our purpose, we must, together with our *Answer*, presently give an *Answer* to the objection which is implied in the *Question*.

And where the *Question* exacteth an *Answer* that concludeth against us, we must together with our *Answer* presently *distinguish*.

Jests are dissolved by serious and grave discourse: and grave discourse is deluded by *Jests*.

The several kinds of *Jests* are set down in the *Art of Poetry*.

Whereof one kind is *Ironia*, and tends to please ones self.

The other is *Scurrility*, and tends to please others.

The latter of these has in it a kind of baseness; the former may become a Man of good breeding.

CHAP. XVIII.

Of the Peroration.

THE *Peroration* must consist of one of these four things.

Inclining the Judge to *favour* yourself, or to *disfavour* your Adversary. For then, when all has been said respecting the cause, is the best season to *praise*, or *dispraise* the Parties.

Of *Amplification* or *Diminution*. For when it appears what is good or evil, then is the time to shew *how great*, or *how little* that good or evil is.

Or in *moving* the Judge to *Anger*, *Love*, or other *Passion*. For when it is manifest of what kind, and how great the good or evil is, then it will be opportune to *excite* the Judge.

Or of *Repetition*, that the Judge may remember what has been said.

Repetition consisteth in the *matter*, and the *manner*. For the *Orator* must shew, that he has performed *what* he promised in the beginning of his *Oration*, and *how*: namely, by comparing his Arguments one by one with his Adversaries, repeating them in the same order they were spoken.

ANALYTICAL QUESTIONS

ON

ARISTOTLE'S RHETORIC.

BOOK I.

CHAP. I. & II.

How many parts of Rhetoric are there ?

On which of these parts, *Πίστις*, *λέξις*, or *τὰ μέρη τοῦ λόγου*, does Aristotle lay the greatest stress ?

Of which of these parts do the first two books treat ?

Has each species of oration *προτάσεις* peculiar to itself ?

Give the Greek specific term for the *ἰδία προτάσεις*.

Are there *προτάσεις* common to all the species of oration ?

Give the specific word in Greek for the *προτάσεις κοίνας*.

Does the first book treat of the *εἶδη* or *τόποι* ?

In which book does he treat of the *τόποι* ?

With what view is the *πίστις ἡθικὴ* and *διὰ τῶν ἀκροατῶν* previously introduced ?

Do you consider that these belong peculiarly to the species *δικανικὸν* and *συμβουλευτικὸν* of orations ?

With what view has Aristotle previously introduced the *τὰς ἡλικίας* and *τάχας* of men ?

Has he treated of these in reference to all the species of oration ?

How many subaltern genera of the *πίστις διὰ τοῦ λόγου* are there ?

Into how many species is the artificial genus subdivided ?

When is persuasion effected by *τῷ ἡθεὶ τοῦ λέγοντος* ?

Should the persuasion effected by this species arise from any previous opinion entertained of the speaker ?

When is persuasion effected διὰ τῶν ἀκροατῶν?

When is it effected ἐν αὐτῷ τῷ λόγῳ?

Of the πίστεις διὰ τοῦ δεικνύναι, (or the argument,) how many species are there?

Which is most persuasive, the παράδειγμα or ἐνθύμημα?

Does Rhetoric furnish any instrument of persuasion, διὰ τοῦ δεικνύναι, besides these?

From what matter necessary, contingent, or impossible, are enthymemes drawn?

Am I to understand that the enthymem is drawn from the εἰκός and σημείον?

Can an orator syllogize from premises previously inferred?

Is there any objection to this process?

What is the objection to premises not previously inferred?

If a particular proposition is inferred from an universal, is it an εἰκός or σημείον?

Of the σημείον how many kinds are there?

You say that one is anonymous, because it has no logical difference to fix the species; mention the logical difference, which, when added to the other σημείον fixes the species τεκμήριον?

Are both these species equally forcible?

What is a παράδειγμα?

Which is of most service in induction, the τεκμήριον or παράδειγμα?

Is the τεκμήριον used in induction?

CHAP. III.

How many species of orations are there?

From what premises does Aristotle infer the three species of oration?

Is the judge of things past a judicial orator or public speaker?

Does the Θεωρὸς judge merely of the power of an oration, or exercise the functions of a judicial orator?

Which species of oration is inferred from the ἐκκλησιαστής?

Which is inferred from the δικάστης and Θεωρὸς?

Is it the business of the judicial orator to dissuade and praise?

What are the τὰ τέλη of the three species of oration?

Must a deliberative, judicial, and demonstrative orator be

in possession of *προτάσεις* on the subjects of each of these species?

If an orator wished to prove the injustice of Alcibiades's banishment in a judicial court, would the premises of his syllogism be *εἶδη* of the judicial species, if drawn from the *τὰ τέλη* honour and turpitude?

Must a syllogism in the judicial species always be composed of *εἶδη*, or will it ever admit of *τόποι*?

When the orator is arguing on the possibility of a fact, are his *προτάσεις* the *εἶδη* or *τόποι*?

CHAP. IV.

How many chapters are devoted to the *εἶδος συμβουλευτικὸν*?

Does Aristotle make any distinction between the subjects of deliberation, and the things from which we deliberate, viz. *στοιχεῖα* and *εἶδη*?

Throughout the following treatise does not Aristotle premise *στοιχεῖα* (vide chap. vi. 1) from which the *εἶδη* and *τόποι*, &c. are deduced?

In the *εἶδος συμβουλευτικὸν* are not some the *στοιχεῖα* and *εἶδη* of happiness and its divisions? (chap. v.)

Are not others the *στοιχεῖα* and *εἶδη* of the *τοῦ ἀγαθοῦ* and *συμφέροντος* simply affirmed concerning a subject of deliberation? (chap. vi.)

Are the *στοιχεῖα* and *εἶδη* ever comparatively affirmed concerning a measure, whether it be better and more useful? (chap. vii.)

With what view does Aristotle treat of different forms of government and their *τὰ τέλη* in this treatise?

Could the orator be possessed of *προτάσεις* on a deliberative subject without a knowledge of different forms of government and the institutions of the same?

Are the things concerning which orators deliberate in necessary, impossible, or contingent matter?

To what kind of things is deliberation principally confined?

Am I then to understand, that men deliberate on such things as it is possible for them to accomplish, and which depend not on chance for existence?

How many subjects of deliberation does Aristotle enumerate?

In debates on finance, war and peace, internal defence, ex-

ports and imports, what should the orator be accurately acquainted with?

Is the knowledge of legislation of importance to a deliberative orator?

In what does Aristotle place the safety of a state?

CHAP. V.

What is the great object of human pursuit?

How many definitions of happiness does Aristotle give?

Which definition was adopted by the Stoics?

Which by the Epicurean and Peripatetic schools?

Can you enumerate any of the *τὰ μέρη* of happiness?

Distinguish the *τὰ μέρη* into the *τὰ ἐν αὐτῷ*, or internal goods, and into the *ἐκτός ἀγαθά*, or external goods?

Can you confirm the enumeration of the internal goods by the second definition of happiness, and that of the external goods in a measure, by the third definition?

Define numerous and worthy progeny, nobility, and good old age.

Does honour arise ever from the reputation of conferring benefits?

Why does Aristotle omit to treat of the virtues under the deliberative species of orations?

CHAP. VI.

What is the object proposed to the deliberative orator?

Does he deliberate on the means conducive to the end, or the end itself?

How many definitions of good does Aristotle enumerate as *στοιχεῖα*?

How many *εἶδη* are there in this chapter deduced from the *στοιχεῖα*?

Are the *στοιχεῖα* of good ever definitions of good?

Give definitions of good assumed by the reasons of choice, appetite, intellect, and disposition to contentment.

Can you infer from the above premises that the acquisition of good, and the exemption from evil, are goods?

Prove them to be goods by some of the definitions of good.

Goods *τὰ ὁμολογούμενα* can be proved by the above defini-

tions, but in disputed cases, (*ἐν ἀμφισβητησίμοις*;) what is the easiest method of proving a thing to be a good?

Can you prove legislation to be a good because anarchy is an evil?

Can you prove happiness to be a good by the reason of choice?

Can you prove pleasure and social intercourse to be goods by the reason of appetite?

Can you prove the moral virtues to be goods by the reason of intellect?

Are the consequences to the exemption from evil and acquisition of good, immediate or remote?

Does Aristotle imply the utility of the virtues when he says that they are effective of good?

How does he prove such specific virtues as temperance, fortitude, &c., to be goods?

Do you consider, on reviewing this chapter, that persuasion can be effected by other *προτάσεις* than simple *προτάσεις* assumed from the end of the *εἶδος συμβουλευτικόν*?

CHAP. VII.

How many definitions of good did you enumerate in the preceding chapter?

Repeat these four definitions.

Mention the *στοιχεῖα* premised by Aristotle in this chapter, from which he deduces the *εἶδη περὶ τοῦ μείζονος ἀγαθοῦ, καὶ συμφέροντος*.

Do I understand you to say that the definition of "excess, and the thing exceeded," is premised as the *στοιχείον*?

Define the *τὸ τέλος*.

Is a plurality of goods greater than one, or a fewer goods, by the reason of numerical excess?

Would this *εἶδος* be fallacious, if the one, or the fewer, were not co-enumerated with the plurality? Vide Annotations, vii. 3.

If an orator were to say, that beauty, strength, and riches, were a greater good than virtue, would his assumption, according to Aristotle, be correct?

¹ The first four may be considered as definitions of the *τοῦ ἀγαθοῦ*, the others descriptions of the *τοῦ συμφέροντος*.

Why would it not?

Have the excesses of genera and species any analogy?

Could an orator prove *ἐὰν τὸ μέγιστον τοῦ μεγιστοῦ ὑπερέχη, καὶ αὐτὰ αὐτῶν*, that if justice is a greater good than bravery, Aristides excelled Themistocles?

How many *εἶδη* does Aristotle enumerate in this chapter?

Can an orator prove one thing to be a greater good than another by the reason of its being the *τὸ τέλος*?

Is happiness, therefore, a greater good than virtue?

Could he prove from the definition of the *τοῦ ἀγαθοῦ* and *συμφέροντος*, that virtue is a greater good than happiness, *διὰ τὸ μείζονος ἀγαθου ποιητικὴν εἶναι*?

How would he prove one principle (*ἀρχή*) to be greater than another?²

CHAP. VIII.

With what view has Aristotle treated in the former chapters of *Εὐδαιμονία* and the *ἀγαθὸν* and *συμφέρον*?

Why was it essential that he should treat of the *εὐδαιμονία* first? (vide chap. v. 2.)

Is it by *προτάσεις* on the *ἀγαθὸν* and *συμφέρον* that the *ἐκκλησιαστής* persuades his audience?

Can you give a reason why the *ἀγαθὸν* and *συμφέρον* have a peculiar relation to *εὐδαιμονία* as the *σκόπος* of human pursuit? (chap. viii. 2.)

Why does Aristotle assign so much importance to a knowledge of the *τὰ τέλη τῶν πολιτειῶν*? (chap. viii. 5.)

Why does he consider a knowledge of the *ἥθη* of each *πολιτεία* essential? (chap. viii. 6.)

Explain how the speaker will become invested with moral character, by a perfect knowledge of the *ἥθη* without any previous opinion having been entertained of him. (chap. viii. 6.)

Enumerate the *τὰ τέλη πολιτειῶν*.

Are the *τὰ τέλη* the *subjects* of deliberation, or measures which have a reference to the *τὰ τέλη*?

² The reader is referred to Hobbes' Brief of the Art of Rhetoric, for a distinct enumeration of the *τόποι* throughout this treatise.

CHAP. IX.

Give the definitions of the *τὸ καλὸν* and *τὸ αἰσχρὸν*, honour and turpitude.

Are these definitions premised as the *στοιχεῖα* from which the *εἶδη* of demonstrative oratory are deduced?

If the *τὸ καλὸν* be that which you have defined, does it follow that virtue and its species are honourable?

Give the definitions of virtue.

If virtue is a *δύναμις ἐνεργητικὴ*, which of the species of virtue do you consider the greatest?

Would you consider *δικαιοσύνη* a greater virtue than *πρόφρων*?

Can you prove this assumption by the *τόπος, τὰ μείζονος ἀγαθοῦ καὶ συμφέροντος ποιητικὰ, μείζω*? (vide chap. vii. 7.)

Give the definitions of the species of virtue, as these are *στοιχεῖα* from which *εἶδη* in demonstrative oratory are deduced.

Have demonstrative and deliberative oratory any points in common? (vide chap. ix. 35.)

Have the demonstrative and judicial any points in common? (chap. ix. 38.)

What is the difference between *ἐπαινος* and *ἐγκώμιον*?

On what principle must we show a man to have acted to be worthy of praise? (vide chap. viii. 32.)

Is coincidence of circumstances admissible as an indication of the *προαίρεσις*?

Which are the best indications of a man's habits?

To which of the species of oration are amplification and extenuation peculiarly adapted?

Is the *παράδειγμα* adapted to one species more than another?

Why do you consider it more adapted to the deliberative?

To which species is the enthymem most adapted?

CHAP. X.

In considering the nature of the sources from which the *εἶδη* of judicial orations are deduced, what are the three questions which Aristotle proposes to consider?

Define the *τὸ ἀδικεῖν*.

Do you conceive, generally speaking, that whatever men do *εἰδότες* they do *ἐκόντες*?

Does the *προαίρεσις* characterize all actions which men do *ἐκόντες*?

Does the *προαίρεσις* characterize all actions which men do *εἰδότες*?

Mention the causes of actions which men do *προαιρουμένοι* and *παρὰ τὸν νόμον*.

Must the accuser consider the *τίνων*, καὶ πόσων *ἕνεκα*, or the inducement, to exist in his adversary?

What are the efficient causes of those actions which men do not δι' αὐτοὺς?

Of this class of actions which men do not δι' αὐτοὺς, but ἐξ ἀνάγκης, what are the specific causes which Aristotle mentions?

What are the efficient causes of those actions which men do δι' αὐτοὺς?

Into how many species does Aristotle divide the *δρεξις*?

Mention the logical differences, which, when added to the genus *δρεξις*, give the species *βούλησις*, *ὀργή*, and *ἐπιθυμία*?

Enumerate the seven causes of actions.

Can the *ἡλικίαι* and *ἕξεις* be called the true causes of human actions?

Have they their consequences which when added to the true causes give additional weight to the argument?

Why does Aristotle omit to treat of the *ἡλικίαι* and *ἕξεις* under the judicial species?

Does Aristotle infer, from the definitions of the seven causes of human actions, the ends of the agents? (chap. x. 12, 13, 14, et seq.)

From which of the seven causes of actions does he infer the ends of those actions which men do δι' αὐτοὺς?

When Aristotle says, that all such things as men do δι' αὐτοὺς are real or apparent goods, why does he make the distinction of "real" and "apparent"?

Am I then to understand that all things which men do willingly, and consequently all things which they do unjustly, are really or apparently good, and really or apparently pleasant, and that these are the ὧν ἕνεκα ἀδικοῦσι?

CHAP. XI.

With what view has Aristotle introduced the *συμφέρον* in the judicial species of oration, when he had previously con-

sidered it as the *τὸ τέλος* of the deliberative? (chap. x. 19.)

Do I understand you to say, that he introduces it because it is the end of human action?

You have before stated that the *εὐδαιμονία* was the *σκόπος* of human pursuit, and now state that the *συμφέρον* and *ἀγαθόν* are the *τὸ τέλος* of actions; explain the meaning of the words *σκόπος* and *τέλος*.

Give the definition of *ἡδονή* and *λύπη*.

How would you infer the definition of the *ἡδύ* and *λυπηρόν*?

Are these definitions the *στοιχεῖα* from which Aristotle deduces the *εἶδη* in this chapter¹?

CHAP. XII.

What division does Aristotle make and premise of the *πῶς ἔχοντες ἀδικοῦσι*?

What are the three subdivisions of the *ὅταν οἴωνται ἑαυτοῖς δυνατόν*?

Why does Aristotle refer the discussion of the *δυνατόν πραχθῆναι* to the second book of Rhetoric?

Explain why the second part of the division, viz. *ἑαυτοῖς δυνατόν*, should belong more especially to the judicial species, when the *δυνατόν πραχθῆναι* is considered as a *τύπος*.

Enumerate the threefold subdivision of the *ὅταν οἴωνται ἑαυτοῖς δυνατόν*.

To what things do those persons trust who rely on the punishment being less than the gain, if detected? (third member of the subdivision.)

Enumerate the things to which those persons trust who hope to escape punishment if detected: (second member of the subdivision.)

CHAP. XIII.

Why should right and wrong be defined in reference to two kinds of law?

Why is the twofold distinction of persons (*πρὸς οὓς*) in reference to whom right and wrong is defined, necessary? (3.)

¹ The reader is referred to Hobbes' Brief of the Art of Rhetoric, for an enumeration of the *τόποι* throughout this treatise.

How many species of law does Aristotle enumerate?

What is the subdivision of the νόμος ἴδιος? (2.)

What do you understand by the νόμος κοινός?

Give the definition of το ἀδικεῖσθαι.

From whence does Aristotle infer this definition? (chap. x. 3.)

What is the threefold division which Aristotle makes of ἐγκλήματα, or accusation?

Why does Aristotle decline treating of the ἐγκλήματα διὰ πάθος in this chapter?

In what kind of cases do men, *generally* and *specifically* speaking, manifest the προαίρεσις in action? (chap. x. 4.)

Is it necessary for an accuser to lay great stress on the προαίρεσις?

Under what circumstances, or with what dispositions, do men act by deliberative choice? (chap. xii. 1.)

Do you consider that the depravity and injustice of an act is manifested by the προαίρεσις of the agent?

Are they a σημεῖον or τεκμήριον of deliberate choice?

Is the προαίρεσις a σημεῖον or τεκμήριον of depravity and injustice?

How many distinctions of right and wrong (δικαία καὶ ἀγαθὰ) are there?

Why is this twofold distinction made?

Into how many species does Aristotle divide the subaltern genus ἄγραφα?

Can you give a reason why the species "remarkably virtuous and vicious," (τὰ μὲν καθ' ὑπερβολήν, &c.,) is not included in the written law?

When Solon was asked why he had not enacted a special law against parricide, what was his answer?

Does not this answer give the reason why ἄδικα of this species are not included in the written law ἐκόντων τῶν νομοθετῶν?

Mention some virtues, which as falling under the species καθ' ὑπερβολήν, &c., are not noticed in written laws?

Is it because they are so universally acknowledged and required, that they are not noticed in written laws?

What is the second species of τὰ δικάια and ἄδικα?

What is the cause of this defect in the written law of states?

Give the definition of equity.

CHAP. XIV.

What is the standard by which the degrees in criminality may be ascertained?

With what view does Aristotle infer εἶδη, ὅσα ἂν ᾗ ἀπὸ μείζονος ἀδικίας? (vide chap. ix. 39, with respect to the αὐξήσεις, and Book ii. 26.)

What kind of injuries are comparatively the more severely felt?

You stated in reply to questions in the first book, (chap. x.) that *κατὰ* generally, and *ἀκρασία* specifically, were the causes of acts of injustice characterized by the *προαίρεσις*, how then would you ascertain the comparative enormity of *ἀδικήματα*? (vide *Annotationes* Schrader.)

Are *ἀδικήματα* of this description estimated by the hurt done, or the *προαίρεσις* of the agent? (xii. 5.)

If the hurt done be irremediable, is the act of injustice capable of being amplified?

Will the definition of *ἀδικήματα* depend on the *πρόνοια* of the agent? (vide *Annotationes* xiv. 5.)

Am I then to understand that *ἀδικήματα* which are irremediable, incapable of being adequately punished, of being revenged, which are done frequently, and ἐκ *προνοίας*, may be considered *μείζονα*?

CHAP. XV.

How many distinctions of the *πίστεις ἀρεχται* are there?

Into how many species is the distinction *νόμοι* subdivided?

Into how many subaltern genera is the distinction *μάρτυρες* (chap. xv. 13) divided?

Into how many subaltern species is the subaltern genus *παλαιοὶ μάρτυρες* subdivided?

What kind of persons and things constitute the lowest species to the subaltern species, (*περὶ μὲν οὖν τῶν γενομένων*) of the *μάρτυρες παλαιοὶ*? (vide chap. xv. 13, 14.)

What kind of things and persons constitute the lowest species to the subaltern species (*περὶ δὲ τῶν ἰσομένων*) of the *μάρτυρες παλαιοὶ*? (chap. xv. 14.)

Is the lowest species to the subaltern species, (*περὶ μὲν τῶν*

γενομένων,) viz. poets and illustrious men, most adapted to the judicial species of oration?

Is the lowest species the subaltern species, (περὶ μὲν οὖν τῶν ἱσομένων,) viz. soothsayers, oracles, and proverbs, equally serviceable in the deliberative as in the judicial species of oration?

Into how many subaltern species is the subaltern genus μάρτυρες πρόσφατοι divided? (chap. xv. 13.)

What kind of things and persons constitute the lowest species to the subaltern species (οἱ μὲν μετέχοντες τοῦ κινδύνου) of the μάρτυρες πρόσφατοι? (chap. xv. 15, last line.)

What kind of persons constitute the lowest species to the subaltern species (οἱ δὲ ἐκτὸς κινδύνου) of the μάρτυρες πρόσφατοι? (chap. xv. 15, first line.)

Which of the two lowest species (viz. the οἱ γνώριμοι, and οἱ ἂν δόξωσι ψεύδεσθαι, or viva voce evidence,) is most entitled to credit?

Aristotle has hitherto treated of the different kinds of μάρτυρες, and he then proceeds to consider the manner in which their credit is to be amplified and extenuated by the orator; if the orator then has no witnesses to support his case, by what arguments must he diminish the credit of testimony? (chap. xv. 17.)

To what circumstances does testimony speak? (18.)

Is the impeachment of the veracity of a witness by an enthymem (ἐξ εἰκόρων) a solid objection to his testimony?

Am I then to understand, that if the orator has no testimony to adduce, he must,

1st. Insist on the propriety of the judge deciding, γνώμη τῇ ἀρίστῃ. (vide Book I. chap. xv. 5, 12, 17. Book II. chap. xxv. 10.)

2nd. That εἰκὼρα are better than witnesses, as they are never open to corruption.

3rd. That εἰκὼρα are never convicted of falsehood?

If the orator has witnesses to support his case, by what arguments should he corroborate their testimony, and extenuate the εἰκὼρα?

What two precepts does Aristotle give with respect to the extenuation and amplification of the συνθήκαι and βάσαντοι?

What is the fourfold division with respect to oaths?

GENERAL QUESTIONS

ON THE

JUDICIAL SPECIES OF ORATION.

IN treating of the judicial species of oration, what does Aristotle propose that the orator should first consider in his accusation?

If the question be simply whether his adversary has committed an injury, the orator must prove,—what? (chap. x. 2.)

If an act of injustice has been committed, but that act of injustice has not been defined by the written law, under which species of law must he prove his case? (chap. xiii. 14; xv. 4.)

Am I then to understand, that in inquiring whether his adversary has committed an act of injustice, the orator's first business is to prove that he has acted for some end; secondly, that he was a likely person to commit it; and thirdly, that the object injured was a person likely to be injured?

Are these the three general points which he must prove against his adversary?

What is the specific point he must prove against his adversary?

Why is the general question, Whether the adversary has committed an act of injustice, (chap. x. xi. xii.) and the specific question, Whether he has acted unjustly, (chap. xiii.) distinguished? (vide chap. x. 7.)

To prove that his adversary has acted unjustly against the state, or a private individual, what must the orator urge against his adversary? (chap. xiii. 7.)

If the act is clearly done by a voluntary agent, on what principle must the orator prove his adversary to have acted? (chap. xiii. 7.)

If the act is clearly done by deliberative choice, what is the next question an orator must prove against his adversary? (chap. xiii. 9.)

To prove simply that his adversary has acted unjustly, how many specific questions arise for the orator's consideration?

Are they not three?

1st. Whether he has violated the written law? (chap. xiii. 9.)

2nd. If he has not violated the written law, whether he has acted with depravity so excessive as not to be defined by the written law? (chap. xiii. 12.)

3rd. Whether he has acted in violation of equity? (chap. xiii. 12, 13.)

ANALYTICAL QUESTIONS

ON

ARISTOTLE'S RHETORIC.

BOOK II.—CHAP. I.

YOU stated in reply to questions in the first book, that Aristotle had made three distinctions of *πίστεις*, viz. *διὰ τοῦ ἥθους*, *διὰ τῶν ἀρετῶν*, *διὰ τῶν λόγων*: which of these three distinctions has he already treated of, and which is he now proceeding to discuss?

What is the end of Rhetoric, or the object which an orator in speaking has always in view? (vide Annotations, chap. i. 2.)

How does the investment of one's self with moral character effect persuasion in the auditor? (vide Schrader's note, 1, 3.)

Must the qualifications by which the speaker invests himself with moral character, be perceived from the speech as existing in him, (vide Book I. chap. ii. 4,) or known to have existed in him before?

From the three distinctions of *πίστεις*, what do you infer to be the three great accomplishments of a perfect orator?

Do I understand you to say, proof by enthymem, investment of himself with moral character, and the excitement of the passions in his auditors?

What are the three causes of a speaker's effecting persuasion through moral character?

If a speaker appears to be a man capable of imparting benefits to the state, does he effect persuasion through moral character, by his virtue? (vide chap. ix. 4, definition of virtue.)

When Demosthenes in the oration for the crown makes use of the following words,—

'Αλλ' ὥς ἔοικεν, ἐκείνος ὁ καιρὸς καὶ ἡ ἡμέρα ἐκείνη οὐ μόνον εὐνοῦν καὶ πλούσιον ἄνδρα ἐκάλει, ἀλλὰ καὶ παρηκολουθηκότα τοῖς πράγμασιν ἐξ ἀρχῆς, καὶ συλλελογισμένον ὀρθῶς τίνος ἕνεκα ταυτ' ἐπραττεν ὁ Φίλιππος καὶ τί βουλόμενος· ὁ γὰρ μὴ ταυτ' εἰδὼς μὴδ' ἐζητακῶς πόρρωθεν ἐπιμελῶς, οὐτ' εἰ εὐνοὺς ἦν οὐτ' εἰ πλούσιος, οὐδὲν μᾶλλον ἡμελλεν ὁ τι χρὴ ποιεῖν εἰσεσθαι οὐδ' ὑμῖν ἔξειν συμβουλεύειν. ἐφάνην τοίνυν οὗτος ἐν ἐκείνῃ τῇ ἡμέρᾳ ἐγώ, καὶ παρελθὼν εἶπον εἰς ὑμᾶς, ἃ μου δυοῖν ἕνεκ' ἀκούσατε προσέχοντες τὸν νοῦν, ἐνὸς μὲν, ἵν' εἰδῆτε ὅτι μόνος τῶν λεγόντων καὶ πολιτευομένων ἐγὼ τὴν τῆς εὐνοίας τάξιν ἐν τοῖς δεινοῖς οὐκ ἔλιπον, ἀλλὰ καὶ λέγων καὶ γράφων ἐξηταζόμεν τὰ δέονθ' ὑπὲρ ὑμῶν ἐν αὐτοῖς τοῖς φοβεροῖς, ἑτέρου δέ, ὅτι μικρὸν ἀναλώσαντες χρόνον πολλῷ πρὸς τὰ λοιπὰ τῆς πάσης πολιτείας ἔσσεσθ' ἐμπεριότεροι,—

to which distinction of *πίστις* does he recur, and through which of the causes *φρόνησις*, *ἀρετὴ*, or *εὐνοία*, does he endeavour to effect persuasion?

CHAP. II.

What are the three questions which Aristotle proposes for consideration in treating of the passions? (Book II. chap. i. 9.)

With what view was this threefold division necessary?

Is it possible to obtain *τόποι* calculated for the excitement of the passions without a knowledge of these three questions proposed by Aristotle? (Book II. chap. i. 9.)

Give the definition of anger.

Is this definition proposed as a *στοιχείον* from which the *τόποι* are afterwards inferred?

Does not Aristotle explain this definition by two propositions, viz.

1st. Anger is against *some individual* on account of contempt to one's self or friends.

2nd. Pain is not so much the consequent of anger as a certain pleasure?

Explain the reference which these two explanatory propositions have to the definition of anger.

To what cause do you attribute the sensation of pain in anger?

To what causes (which are two) do you attribute the sensation of pleasure in anger?

Can you give any other reasons why pleasure should be a consequent? (Book I. chap. x. 17, 18; chap. xi. 10, 12, 13.)

Could you infer a reason from the definition of *ἡδόνῃ* in the first book?

Is the *ἡ ὀργή* a generic or specific term?

Under what generic term do you class the *ἡ ὀργή*?

What is the object of anger?

What is the cause of anger?

How many species of the *ὀλιγωρία* are there?

Does not Aristotle prove that the *καταφρόνησις* is a species of *ὀλιγωρία* from the definition of *ὀλιγωρία*?

Do you consider the *ἐπηρεασμός* to be a distinct species of *ὀλιγωρία*?

Explain how Aristotle from its own definition proves the *ἐπηρεασμός* to be a distinct species of *ὀλιγωρία*.

Is slight attended with a certain pleasure?

You have before stated in reply to questions in the former book, that all actions done by men *ἐκόντες* are *ἀγαθὰ ἢ φαινόμενα ἀγαθὰ*, *ἢ ἡδέα ἢ φαινόμενα ἡδέα*: can you show that if the *ὀλιγωρία* be a voluntary act, it must be consequently *ἡδύ ἢ φαινόμενον ἡδύ*?

Why should it not be *ἀγαθὸν ἢ φαινόμενον ἀγαθόν*? (Book I. chap. x. 18.)

To what cause do you attribute the pleasure which the *ὀβριζών* feels?

How then are men affected when they feel anger?

With what kind of persons do they feel angry?

What are the causes of this passion?

What is it incumbent on the orator to prove, to excite anger against his adversary?

What kind of person must he prove his adversary to be, to merit anger?

When Æschines uses the following arguments in his oration against Ctesiphon, does he endeavour to excite anger against Demosthenes? and by which of the causes *ὀλιγωρία*, or its species, does he endeavour to excite it against his adversary?

Δεύτερον δὲ καὶ πολλὸν τοῦτον μεῖζον ἀδίκημα ἡδίκησεν, ὅτι τὸ βουλευτήριον τὸ τῆς πόλεως καὶ τὴν δημοκρατίαν ὑρδὴν ἔλαθεν ὑφελόμενος καὶ μετένεγκεν εἰς Θίβας εἰς τὴν Καδμείαν, τὴν κωνυλίαν τῶν πράξεων τοῖς Βοιωτάρχαις συνθέμενος· καὶ τηλι-

καίτην αὐτὸς αὐτῷ δυναστείαν κατεσκεύασεν, ὥστ' ἤδη παριῶν ἐπὶ τὸ βῆμα πρεσβεύσειν μὲν ἔφη ὅποι ἂν αὐτῷ δοκῇ, κἂν μὴ ὑμεῖς ἐκπέμπητε, εἰ δέ τις αὐτῷ τῶν στρατηγῶν ἀντίποι, καταδουλούμενος τοὺς ἄρχοντας καὶ συνεθίζων μηδὲν αὐτῷ ἀντιλέγειν διαδικασίαν ἔφη γράψειν τῷ βήματι πρὸς τὸ 'στρατηγεῖον'· πλείω γὰρ ὑμᾶς ἀγαθὰ ὑφ' ἑαυτοῦ ἔφη ἀπὸ τοῦ βήματος πεπονθέναι ἢ ὑπὸ τῶν στρατηγῶν ἐκ τοῦ στρατηγείου. μισθοφορῶν δ' ἐν τῷ ξενικῷ κεναῖς χώραις, καὶ τὰ στρατιωτικὰ χρήματα κλέπτων, καὶ τοὺς μυρίους ξένους ἐκμισθώσας Ἀμφισσεῦσι πολλὰ διαμαρτυρομένον καὶ σχετλιάζοντος ἐν ταῖς ἐκκλησίαις ἐμοῦ, προσέμιξε φέρων ἀναρπασθέντων τῶν ξένων τὸν κίνδυνον ἀπαρασκευῇ τῇ πόλει. τί γὰρ ἂν οἴσθε Φίλιππον ἐν τοῖς τότε καιροῖς εὐξασθαι; οὐ χωρὶς μὲν πρὸς τὴν πολιτικὴν δύναμιν χωρὶς δ' ἐν Ἀμφίσσῃ πρὸς τοὺς ξένους διαγωνίσασθαι, ἀθύμους δὲ τοὺς Ἕλληνας λαβεῖν τηλικαύτης πληγῆς γεγεννημένης; καὶ τηλικούτων κακῶν αἴτιος γεγεννημένος Δημοσθένης οὐκ ἀγαπᾷ εἰ μὴ δίκην δέδωκεν, ἀλλ' εἰ μὴ καὶ χρυσῷ στεφάνῳ στεφανωθήσεται ἀγανακτεῖ· οὐδ' ἰκανόν ἐστιν αὐτῷ ἐναντίον ὑμῶν κηρύττεσθαι, ἀλλ' εἰ μὴ τῶν Ἑλλήνων ἐναντίον ἀναρρήθήσεται, τοῦτ' ἤδη ἀγανακτεῖ. οὕτως, ὡς οἶκε, πονηρὰ φύσις μεγάλης ἐξουσίας ἐπιλαβομένη δημοσίας ἀπεργάζεται συμφοράς.

CHAP. III.

As the ἡ πράυνσις is the contrary to the ἡ ὀργή, and the τόποι are therefore inferred *ratione contrariorum*, it will be necessary to propose many questions on this chapter.

What is the definition of the ἡ πράυνσις?

You stated in reply to a former question, that pain and pleasure were consequent to the τὰ πάθη and σημεῖα of the ἡ βούλησις, (chap. iv.) but are they both consequent to the ἡ πράυνσις, and which is the σημεῖον of the βούλησις in this passion?

CHAP. IV.

What is the definition of the τὸ φιλεῖν?

Can you infer from this definition that a friend is perceived from the indications of the ἡ βούλησις?

What are the σημεῖα of the ἡ βούλησις? (3.)

How many species of the ἡ φιλία are there? (28.)

What are the causes which give occasion to the ἡ φιλία?

What is the difference between the *ἡ ὀργή* and the *ἡ ἔχθρα* ?
How many differences does Aristotle enumerate ?

How many, and what are the causes of the *ἡ ἔχθρα* which Aristotle enumerates ? (30.)

You have stated that the *ἡ ὀργή* is felt on account of the *ἡ ὀλιγωρία* and its species ; but if a man is habitually addicted to the *ἡ ὀλιγωρία* and its species, are our sentiments those of the *ἡ ὀργή* or *ἡ ἔχθρα* ?

Do anger and hatred ever differ with respect to the objects against whom they are felt ? (xxx. line 3, 4.)

Can you class both these passions under the genus *ὀρέξεις ἄλλοι* ?

Does the sensation of the *ἡ λύπη* accompany the *ἔχθρα* ? (xxxi. line 10.)

Which of the two passions, the *ἡ ὀργή* and the *ἡ ἔχθρα*, does Aristotle consider as incurable ?

You stated in a former chapter that the *ἡ τιμωρία* was the object of the *ἡ ὀργή*, what is the object of the *ἡ ἔχθρα* ? (xxx. line 6.)

What kind of person will an orator describe his adversary to be, when he endeavours to excite feelings of hatred against him in his auditors ?

CHAP. V.

Give the definition of the *ὁ φόβος*.

Does it follow from this definition that all the *τὰ κακὰ* are the objects of the *ὁ φόβος* ?

What kind of evils then excite the *ὁ φόβος* ?

Is it absolutely necessary for the sensation of the *ὁ φόβος* that the evil should be close at hand ?

Can you mention any circumstances, or characters in life, which excite the *ὁ φόβος* in others ? (vii. et seq.)

What is the reason that men are not afraid of such evils as death ?

Am I to understand that some hope of safety is essential in the sensation of the *ὁ φόβος* ? (xiv.)

Is deliberation also essential in the sensation of the *ὁ φόβος* ?

If the *τὰ κακὰ* be of such a description as to annihilate all hope of safety, and prevent all deliberation in the sufferer, what is the *τὸ πάθος* which under such circumstances is felt ?

In what chief respects do the sensations of the *ὁ φόβος* and *τὸ δεινὸν* differ?

Do I understand you to say, "In the feeling of hope and anxiety, and excitement of deliberation, which accompany the one, but are annihilated in the other?"

Do they differ also in any other remarkable respect? (chap. v. 12, line 4; chap. viii. 13, line 4.)

Do I understand you to say, "In the sensation of the *ὁ ἔλεος* if the *τὰ κακὰ* were to happen to others and not to ourselves?"

Is the difference discoverable in the case of Amasis?

Give the definition of the *τὸ θαρρῆν*.

What is the twofold division which Aristotle makes of the men who feel the *τὸ θάρσος*? (xviii.)

What illustration does Aristotle give in support of this distinction?

To which of the three species of oration do you consider appeals to the *ὁ φόβος* most peculiar?

Give me a reason why you consider them most peculiar to the *εἶδος συμβουλευτικόν*. (Confer Book I. chap. iii. 4, with the definition of the *ὁ φόβος*.)

In which of the three species do you consider appeals to the *ἡ ὀργή*, *ὁ φθόνος*, and *ὁ ἔλεος*, most likely to occur?

Does Aristotle approve of such appeals to the *ὁ δικαστῆς*? (Book i. chap. i. 5.)

CHAP. VI.

Give the definition of the *αἰσχύνη*.

Do only acts of depravity, or do the *σημεῖα* of such specific vices as illiberality, flattery, &c., ever excite the *ἡ αἰσχύνη*?

Give me a *σημεῖον* of the *ἡ κολακεία*?

CHAP. VII.

Give the definition of the *ἡ χάρις*.

Has this word two distinct significations? (vide Schrader Annotations.)

Which of these two significations is expressive of the *τὸ πάθος*?

With what view does Aristotle explain the *ἡ χάρις* as implying gratuitous benevolence?

Is it for the purpose of showing how it may be amplified?

What division of the αἱ ὀρέξεις does Aristotle make in this chapter? (iii.)

To which division do you consider such ἐπιθυμίαι as hunger and thirst belong?

Is it necessary that the party benefited must be ἐν τῇ τοιαύτῃ δεήσει to constitute the ἡ χάρις?

Is it necessary that the party benefiting should assist the other ἐν τῇ τοιαύτῃ χρεία?

CHAP. VIII.

Give the definition of the ὁ ἔλεος.

What kind of persons are most sensible of the ὁ ἔλεος?

What reason does Aristotle give that the αἱ παντελῶς ἀπολωλότες do not feel the ὁ ἔλεος?

Why do not the οἱ ὑπερενδαιμονεῖν οἰόμενοι feel the ὁ ἔλεος?

What reason does Aristotle give that the οἱ ὄντες ἐν ὀργῇ ἢ θάρρει do not feel the ὁ ἔλεος? (vi.)

Can you give another reason drawn from the definition of the ἡ ὀργή and ὁ ἔλεος?

Can you class the ἡ ὀργή and ὁ ἔλεος under the genus ὀρέξεις ἄλογοι?

What kind of persons do men pity?

Give me a reason why you except the σφόδρα ἐγγὺς ὡσιν οἰκειότητι.

In what respects do the τὸ δεινὸν and ὁ ἔλεος differ? (xii.)

Can you give a reason why certain characters, when represented on the stage, excite pity?

CHAP. IX.

What passion is directly opposed to the ὁ ἔλεος?

Can you class the ἡ νέμεσις and ὁ ἔλεος under the same genus of the τὰ πάθη?

What is the logical difference which when added to the generic term, gives the specific terms ἡ νέμεσις and ὁ ἔλεος? (i. line 4.)

Does not Aristotle define the ἡ νέμεσις and ὁ φθόνος by a comparison of each with the ὁ ἔλεος?

Do you consider the *ἡ νέμεσις* and *ὁ ἔλεος* to proceed from the same virtuous dispositions? (*ἀπὸ τοῦ αὐτοῦ ἡθους.*)

If they do not proceed from the same virtuous dispositions, could they be classed under the same genus of the *τὰ πάθη*?

Is the *ὁ φθόνος* opposed in a measure only, or does it differ entirely from the *ὁ ἔλεος*?

In what respects do they agree, and in what differ?

Can you infer that the opposite feelings are consequent to these passions?

What is the opposite feeling and consequent to the *ὁ φθόνος*?

What is the opposite feeling and consequent to the *ὁ ἔλεος*?

Do you consider that the *ὁ φθόνος* and *ἡ νέμεσις* dispossess us of pity?

What kind of person must the orator show his adversary to be, when he wishes to excite indignation against him in his auditor?

Can you infer from its definition that the *ἡ νέμεσις* is felt at the virtues? (viii.)

You have stated that the *ἡ νέμεσις* and the *ὁ ἔλεος* are directly opposed to each other, and are under the same genus; can you infer therefore, that if the *ἡ νέμεσις* is not felt at the virtues, the *ὁ ἔλεος* is not felt at the vices of others?

CHAP. X.

Give the definition of the *ὁ φθόνος*.

What are the three distinct parts in this definition, which should be distinguished, to obtain a clear understanding of the *τόποι*?

When Aristotle says that such persons are likely to feel envy as have equals, from which part of the definition does he infer this *τόπος*?

What kind of a person must an orator represent his adversary to be when he wishes to excite the *ὁ φθόνος* in the judge?

CHAP. XI.

Give the definition of the *ὁ ζῆλος*.

Does the *ὁ ζῆλος* differ from the *ὁ φθόνος*?

In what respects do they differ?

Can the δ ζῆλος be felt at the vices of others?

To what genus of the $\tau\alpha$ πάθη does the δ ζῆλος belong?
(i. line 5.)

Is the η καταφρόνησις opposed only, or is it the contrary to the δ ζῆλος?

CHAP. XII.

Why is it necessary that an orator should consider the $\tau\alpha$ ἡθῆ of his auditors in reference to their passions, habits, ages, and fortunes?

Does Aristotle use the expression $\tau\alpha$ ἡθῆ as implying only a certain disposition peculiar to men at a certain time of life, or as implying the $\alpha\iota$ ἔξεις, or the virtues and vices?

Are the $\tau\alpha$ ἡθῆ the effects, or are they only consequent to the $\alpha\iota$ ἡλικίαι and τύχαι of men?

You have stated that the orator should consider the $\tau\alpha$ ἡθῆ of his auditors in reference to their passions, habits, &c.; under which of the three distinctions of $\pi\iota\sigma\tau\epsilon\iota\varsigma$ would you place this part of Rhetoric? (vide Riccobon in cap. xii. hujus libri.)

Do you consider that, when Aristotle treats of the $\tau\alpha$ πάθη, $\alpha\iota$ ἔξεις, and $\tau\alpha$ ἡθῆ, he considers them to have a relation to the three species of oration?

You stated in reply to a question in the former book, that the $\alpha\iota$ ἡλικίαι and τύχαι of men were not the true causes of actions, but when added to the true causes, give additional weight to an argument in judicial inquiry, (vide Book I. chap. x.) do you consider that the orator should adapt his oration to the $\tau\alpha$ ἡθῆ of his auditors in reference to their passions, habits, &c., in the demonstrative and judicial species?

What, generally speaking, are the $\tau\alpha$ ἡθῆ consequent to youth and old age?

What are the $\tau\alpha$ ἡθῆ consequent to the middle-aged?

Why does Aristotle treat of the $\tau\alpha$ ἡθῆ of the young and old before those of the middle-aged?

What, generally speaking, are the $\tau\alpha$ ἡθῆ of the noble, the rich, and the powerful?

¹ For a distinct enumeration of the $\tau\alpha$ ἡθῆ as far as the seventeenth chapter, the reader is referred to Hobbes' Brief, as a distinct exposition would swell these questions to an unnecessary length.

CHAP. XVIII.

What reason does Aristotle adduce in this chapter for his treating of the *τὰ ἥθη*?

Did Aristotle treat of any *ἥθη* in the first book of Rhetoric?

Why did he treat of the *τὰ ἥθη κατὰ τὰς πολιτείας* in the first book?

Of the *τόποι περὶ δυνατῶν καὶ ἀδυνάτων* do you consider the *τὸ γεγονός* and *τὸ ἐσόμενον* both equally applicable to the judicial and deliberative species of orations?

CHAP. XIX.

The reader is referred to Hobbes' Brief for an exposition of the *τόποι* in this chapter.

CHAP. XX.

Are the *παράδειγμα* and *ἐνθύμημα* common to all the species of oration?

As Aristotle says that the *παράδειγμα* is like induction, explain in what points they resemble, and in what they differ. (vide Riccobon in cap. xx. hujus libri.)

How many distinctions of *παράδειγμα* are there?

Into how many species is the *τὸ αὐτὸν ποιεῖν*, or matter invented by the orator, subdivided?

Explain what is meant by the species *παραβολή*?

When Cicero, in his oration against Catiline, says,—“*Quod si ex tanta latrocinio iste unus tolletur; videbimur fortasse ad breve quoddam tempus cura et metu esse relevati; periculum autem residebit, et erit inclusum penitus in venis atque visceribus reipublicæ. Ut sæpe homines ægri morbo gravi cum æstu febrique jactantur, si aquam gelidam biberint, primo relevare videntur; deinde multo gravius vehementiusque affliguntur; sic hic morbus, qui est in republica, relevatus istius pœna vehementius, civibus reliquis, ingravescet;*” is this a *παραβολή* or *λόγος*?

When Agrippa Menenius says, “*Tempore, quo in homine, non, ut nunc, omnia in unum consentiebant, sed singulus membris suum cuique consilium, suus sermo fuerat, indignatas*

reliquas partes, sua cura, suo labore ac ministerio ventri omnia quæri: ventrem, in medio quietum, nihil aliud, quam datis voluptatibus frui; conspirasse inde, ne manus ad os cibum ferrent, nec os acciperet datum, nec dentes conficerent. Hac ira, dum ventrem fame domare vellent, ipsa una membra totumque corpus ad extremam tabem venisse. Inde apparuisse, ventris quoque haud segne ministerium esse: nec magis ali, quam alere eum, reddentem in omnes corporis partes hunc, quo vivimus vigemusque, divisum pariter in venas maturum, confecto cibo, sanguinem. Is this a *παραβολή* or *λόγος*?

Which of the two distinctions of the *παράδειγμα* do you consider most persuasive in deliberative oratory?

If the orator has not enthymems at command, how does Aristotle recommend him to use the *παράδειγμα*?

But if the orator has both enthymems and examples at command, which does he recommend should be placed before the other?

In the passage quoted from Cicero does he follow Aristotle's precept or not?

Why is the *παράδειγμα* and its species, when placed before the enthymems, little adapted to a speech?

What advantage is gained by placing the *παράδειγμα* after the enthymem?

In placing the *παράδειγμα* after the enthymem will one be a sufficient proof, or are several requisite?

CHAP. XXI.

Give the definition of the *ἡ γνώμη*.

Are the conclusions of enthymems ever *γνώμαι*?

How many subaltern genera of the *ἡ γνώμη* are there?

Into how many species is the subaltern genus *ἀνευ ἐπιλόγου* subdivided?

Into how many species is the other subaltern genus *μετ' ἐπιλόγου* subdivided?

Explain what kind of *γνώμαι* those are which require not the annexation of the *ἐπιλόγος*.

Explain what kind of *γνώμαι* those are which require the annexation of the *ἐπιλόγος*.

You have stated that each subaltern genus is subdivided into two species; would you be correct in saying that the

1st species of the subaltern genus (*ἄνευ ἐπιλόγου*) require not the annexation of the *ἐπίλογος*, because they were understood before uttered; and that the

2nd species of the same subaltern genus require not the annexation of the *ἐπίλογος*, because they are understood as soon as uttered; and that the

3rd species of the subaltern genus (*μετ' ἐπιλόγου*) are parts of enthymems: and that the

4th species of the same subaltern genus are essentially enthymems, and have the *ἐπίλογος* as it were inserted in them?

What division does Aristotle make with respect to the use of *γνώμαι*? (i.)

On dubious and incredible subjects, which of the above species does Aristotle recommend to be used?

On subjects not altogether incredible, but obscure, which of the above species does he recommend to be used? (vi. αἱ δ' ἐνθυμήματι καὶ μὲν.)

We now come to the third¹ use of *γνώμαι* (*τίσιν ἀρμόττει*): is the use of *γνώμαι* equally suited to all ages and conditions of persons?

Ought *γνώμαι* not universally true to be indiscriminately used in every part of a speech?

In what occasions then should *γνώμαι* of this description only be used, and ought they to have the *ἐπίλογος*?

Are *γνώμαι* which are generally admitted to be true, admissible in every part of a speech?

Are the *γνώμαι* which contravene current sayings (*παρὰ τὰ δεδημοσιευμέναις*) equally admissible in every part of a speech?

On what occasions then is it fit that they should be used? (xiii.)

How will the *τὸ ἥθος* be made to appear *βέλτιον*?

Do I understand you to say "by being manifested in the dictum, or by annexing the reason for the received opinion?"

What advantages does the use of *γνώμαι* contribute to the orator?

When the orator wishes to give his speech an air of moral character by the use of *γνώμαι*, what principle must he manifest?

¹ Aristotle has treated of the *τίσιν ἀρμόττει* first, in violation of his proposed arrangement in the beginning of the chapter.

In the following quotation from Demosthenes *περὶ τοῦ Στεφάνου* is there a *γνώμη*?

‘*Ἄλλ’ οὐ διὰ ταῦτα προεῖντο τοὺς καταφεύγοντας ἐφ’ ἑαυτούς, ἀλλ’ ὑπὲρ εὐδοξίας καὶ τιμῆς ἤθελον τοῖς δεινοῖς αὐτοὺς διδόναι, ὁρθῶς καὶ καλῶς βουλευόμενοι. πέρας μὲν γὰρ ἅπασιν ἀνθρώποις ἐστὶ τοῦ βίου θάνατος, κἂν ἐν οἰκίσκῳ τις αὐτὸν καθείρξας τηρῇ· δεῖ δὲ τοὺς ἀγαθοὺς ἄνδρας ἐγχειρεῖν μὲν ἅπασιν ἅει τοῖς καλοῖς, τὴν ἀγαθὴν προβαλλομένους ἐλπίδα, φέρειν δ’ ὅ τι ἂν ὁ Θεὸς διδῷ γενναίως.*

To which species does it belong, and why does it not require the annexation of the *ἐπιλογος*?

CHAP. XXII. XXIII. XXIV.

The reader is referred to Hobbes' Brief on the subject of these chapters.

CHAP. XXV. XXVI.

You stated in reply to a question in the first book, that the *πίστεις διὰ τοῦ δείκνυσθαι*, &c., were divided into two species, *ἐνθύμημα* and *παράδειγμα*: what subdivision does Aristotle make of the *ἐνθύμημα* in the second book? (Book II. chap. xxii. 14.)

How many modes of the *ἡ λύσις*, or solution of arguments, are there?

Explain the different methods of starting an objection.

How is an *εἰκὸς* solvable?

How is a *παράδειγμα* solvable?

How is a *τεκμήριον* solvable?

How is a *σημεῖον* solvable?

What reason does Aristotle give for not considering the *ρὸ αὐξεῖν καὶ μειοῦν* as *τόποι ἐνθυμήματος*?

How is a solution of them effected?

ANALYTICAL QUESTIONS
ON
ARISTOTLE'S RHETORIC.

BOOK III.—CHAP. I.

WHAT importance does Aristotle ascribe to the λέξεις in rhetoric?

Does he ascribe any importance to the ὑπόκρισις?

In what does he consider it to consist? (iv.)

But why does he treat only of the λέξεις when he ascribes importance to the ὑπόκρισις? (vi. and vii.)

Does he make any distinction between the style of poetry and orations?

CHAP. II.

Define the λέξεως ἀρετή, or excellence of style.

It seems that Aristotle in this definition notes two things as conducive to the λέξεως ἀρετή, viz. τὸ σαφὴ εἶναι and πρέπουσαν; how are these attained in style? (ii. iii. and iv.)

Why does Aristotle object to the too frequent use of γλώτταις or exotic words, πεποιήμενοις or newly-coined words, and δίπλοις or compound words?

Is the orator obliged to confine himself to the use of the κύρια or words in common use, or is he at liberty to use the other species occasionally?

What advantage does the use of the κύρια contribute to style?

What advantage does the use of the γλώτταις, &c. contribute to style when sparingly used?

When Aristotle says that in the use of ornament we should seek to escape observation, and avoid a studied manner, what would be the consequence of the neglect of this twofold precept? (iv.)

Does Aristotle lay great stress on the proper use of appropriate metaphors in an oration?

For the selection of metaphors what precepts does Aristotle give? (ix. xii. xiii.)

From what sources then are appropriate metaphors deduced? (xiii.)

CHAP. III.

What nouns does Aristotle mention as contributing to a frigid style?

When do epithets render an oration frigid?

Is the too frequent use of appropriate epithets approved by Aristotle?

When do you conceive a metaphor and epithet unbecoming? (chap. ii. 9.)

CHAP. IV.

In what respect does the *εἰκὼν* differ from the *μεταφορά*?

Why does Aristotle caution the orator against the too frequent use of the *εἰκὼν*?

Can the *μεταφορά* be enunciated as the *εἰκὼν*, and the *εἰκὼν* as *μεταφορά*?

How would you change a *μεταφορά* to an *εἰκὼν*?

On what principle must the *εἰκὼν* be constructed to be appropriate?

CHAP. V.

In what does excellence of style (*λίξεως ἀρετή*) consist?

On what does purity of style (*τὸ ἐλληνίζειν*) depend?

Do I understand you to say the first consists in the proper use of words, and the latter in their clear and proper arrangement?

Why does Aristotle distinguish the *τὸ ἐλληνίζειν*, (chap. v.) the *ὁγκος*, (chap. vi.) and the *τὸ πρέπον*, (chap. vii.) from the *το σχῆμα τῆς λίξεως*? (chap. viii.)

Do I understand you to say, because the first are essential to style, or by which it becomes calculated to effect persuasion, and the latter only accidental to style, or contributing to give it elegance and beauty?

CHAP. VI.

How is elevation of style (*ὁ ὕψος*) attained?

CHAP. VII.

When will the *τὸ πρέπον*, or becoming in style, be attained?

You say that the *τὸ πρέπον* in style will be attained, if it be passionate, expressive of moral character, and suited to the subject; what do you mean by the *τὸ ἥθος λέξεως*? (vide *Annotationes* vii. 6. Vater.)

When Aristotle treats of the *τὸ ἥθος* in style, do you consider the *τὸ ἥθος λέξεως* as belonging to the *ἐν τῷ ἡθεὶ τοῦ λέγοντος*, one of the distinctions of *πίστις* in the first book?

In treating of the *πίστις ἡθικῇ* in the second book, and again in this book, on the subject of style, explain the three-fold manner in which Aristotle has treated of this distinction of *πίστις*. (vide Riccobon in Lib. II. cap. i. p. 153, and Lib. III. cap. vii. p. 246.)

When Aristotle says the style is becoming when adapted to the *ἔξεις*, what meaning do you attach to the word *ἔξεις*?

CHAP. VIII.

What precepts does Aristotle give on the *τὸ σχῆμα τῆς λέξεως*?

How many species of the *ὁ ῥυθμὸς* does Aristotle mention?

Of these, which is the only one, out of which it is impossible to construct any metre, and therefore appropriate?

Which of the two species of Pæans is most proper for the commencement and the conclusion of a speech?

CHAP. IX.

Define the *λέξις εἰρομένη* and *κατεστραμμένη*.

How many species of the *περίοδος* are there?

In treating of the *τὸ σχῆμα τῆς λέξεως* what division does Aristotle make?

- How many distinctions of the *τὸ σχῆμα τῆς λέξεως* are there?
 Which of these is the most proper for orations?
 How many species of the *περίοδος* are there?
 What do you mean by a *περίοδος ἀφελῆς*?
 Of the *περίοδος* which consists of clauses, what subdistinction does Aristotle make? (7. 9.)
 What is meant by the *παρίσωσις* and *παρομοίωσις*?

CHAP. X.

Does the invention of the *ἀστεία* and *εὐδοκμοῦντα* of style belong to rhetoric?

What reason can you give from the first book of rhetoric that they do not? (Book I. chap. ii.)

Which do you consider are the most approved *ἀστεία* and *εὐδοκμοῦντα* of style?

Why are the simile and metaphor most approved?

Can you infer from Aristotle's general inference that "those beauties and elegancies of style are most approved which are the quickest in communicating information," any particular rule for the selection of *ἐνθυμήματα* or arguments?

In treating of such *ἀστεία* as metaphor, simile, enthymem, and antithesis, why has Aristotle treated of antithesis as belonging to the *τὸ σχῆμα τῆς λέξεως*, and the others *κατὰ τὴν διάνοιαν τοῦ λεγομένου*? (chap. ii. 6; ix. 7.)

Enumerate the *ἀστεία* with which the orator should seek to grace his speech.

CHAP. XI.

How does metaphor differ from personification?

You have stated that such metaphors are most approved as are not too obvious; how will an orator avoid this fault in the selection of his metaphors, and at the same time render them more approved? (vi.)

When will a sentence be more elegant?

Do I understand you to say in proportion as it contains a greater number of these ornaments?

Are hyperboles and proverbs ever metaphors?

Do these contribute to the elegance of a sentence?

Does the use of hyperbole become the young as well as the old¹?

CHAP. XII.

What distinction of style does Aristotle first make when he wishes to ascertain the kind of style most adapted to each species of oration?

How many species of the *λέξεις ἀγωνιστικῇ* are there?

To which species of oration are the *λέξεις ῥθικῇ* and *παθητικῇ* most adapted?

Which of the two species of oration, the judicial or deliberative, require the greatest accuracy of style?

Does the *λέξεις ἀγωνιστικῇ* suit the demonstrative species?

Is nicety and precision essential in the judicial species, and what is the objection to too great nicety and precision in the deliberative species?

¹ However ready we may be to acknowledge the wonderful acuteness and subtlety of Aristotle's mind, in unfolding the whole art of rhetoric, his judgment of true wit, from the samples afforded in this chapter, convinces us, that he was a more profound philosopher than agreeable companion. We have therefore, perhaps prudently, refrained from noticing the witty applications of metaphor and hyperbole, which he has made, as some general questions on the *λέξεις* will be subsequently introduced.

GENERAL QUESTIONS

ON THE

SECOND PART OF RHETORIC.

IN treating of the *λέξις* does Aristotle propose to consider first its nature and the matter of which it is formed?

In doing this does he consider,

1st. The matter of which it is composed as words;

2nd. Its forms—of which one is the essential or modification of the matter, by which it becomes adapted to its purpose of effecting persuasion; and another, which is the accidental, or the figure, or modification of the matter, by which it becomes adapted to its purpose of pleasing the ear:

3rd. Of the *ῥοσείον*, or introduction of metaphor, apothegm, and wit?

Aristotle has hitherto treated of the nature of style and its modifications; what does he secondly, and lastly, propose to consider?

CHAP. XIII.

Enumerate the *τὰ μέρη* of orations.

Why does Aristotle object to more than the *πρόθεσις* and *πίστις*?

How many and what are the *τὰ μέρη* which Aristotle treats of?

Why has he treated of them when he set out with objecting to them?

To which of the species of oration is the διήγησις peculiar?
Does the deliberative species always require as many parts as the judicial? and which are the parts which it does not require?

When does it require the προίμιον (xiv. 11) ἀντιπαραβολή and ἐπάνοδος?

Is the ἐπίλογος always necessary in the judicial species?

Of how many parts will a judicial oration delivered by an accuser be composed?

Under which of these parts is the τὰ πρὸς ἀντίδικον or refutation, and the ἀντιπαραβολή or contrast of arguments, included when the oration is delivered by an accused?

Why should they not be included in the προίμιον or ἐπίλογος? (4.)

CHAP. XIV.

Give the definition of προίμιον.

From what sources are the προίμια in the demonstrative species drawn? (2.)

What ought to be the chief object of a judicial προίμιον? (6.)

From what sources are judicial προίμια drawn?

Who is most likely to draw the matter of his προίμιον ἐκ τοῦ λέγοντος—the accuser or accused?

Turn to the oration against Verres (Act. Sec. Lib. iii.) and tell me from which of the sources Cicero's exordium is drawn.

In which of the parts of a judicial oration, delivered by an accused, would the orator be most likely to have recourse to the πιστεύς ἐν τῷ ᾗθει τοῦ λέγοντος?

Are they admissible in all parts?

In which part of the oration does the accuser introduce the τὰ πρὸς διαβολήν?

What is the objection to their being mentioned in the προίμιον?

In which part of the oration does the accused reply to the τὰ πρὸς διαβολήν?

What is the orator's object when his προίμιον is drawn ἐκ τοῦ ἀκροατοῦ? (7.)

Does the deliberative species always require the προίμιον?

CHAP. XV.

The reader is referred to Hobbes' Brief for the *τόποι* on this chapter.

CHAP. XVI.

What kind of *δήγησις* does Aristotle prefer in the demonstrative species of oration?

May the proof and amplification be blended in this species? (vide Riccobon in cap. xvi. hujus libri.)

What is the objection to a continuous *δήγησις* (*ἐφεξῆς*) in this species?

In a judicial oration should the *δήγησις* be *ἐφεξῆς* or *κατὰ μέρος*?

What matter does the accuser naturally relate in his *δήγησις*? (iv. line 6.)

How does the *δήγησις* of an accused differ from an accuser's?

What relation is there between the *δήγησις* and the *πίστις*¹?

On what points should an accused refrain from dwelling, and when should both the accuser and the accused dilate on circumstances in the *δήγησις*? (8.)

Is it of consequence to the orator to vest himself with moral character, and to adapt his *δήγησις* to the *πίστις*, in order that the one may support the other.

Is it of consequence to the orator to vest himself with moral character, (7,) and ought he to do this at the commencement of his *δήγησις*? (10.)

¹ Quoniam narratio est rerum explicatio, et quædam quasi sedes ac fundamentum constituendæ fidei, ea sunt in ea servanda maxime, quæ etiam in reliquis dicendi partibus, quæ partim sunt necessaria, partim assumpta ad ornandum.

Nam ut dilucide probabiliterque narremus, necessarium est; sed assumimus etiam suavitatem. Probabilis autem narratio erit, si personis, si temporibus, si locis ea, quæ narrabuntur, consentient; si cujusque facti et eventus causa ponetur, si testata dici videbuntur, si cum hominum opinione, auctoritate, si cum lege, cum more, cum religione conjuncta, si probitas narrantis significabitur, si antiquitas, si memoria, si orationis veritas, et vitæ fides. Suavis autem narratio est, quæ habet admirationes, exitus inopinatos, interpositos motus animorum, colloquia personarum, dolores, iracundias, metus, lætities, cupiditates. Cicero, de Orator. Partit.

Does the deliberative species of orations require a *διήγησις*?

When is a *διήγησις* used in this species?

When it is used has it the resemblance to the *παράδειγμα*?

CHAP. XVII.

What are the four questions for proof in an accuser's oration?

Has the *διήγησις* previously prepared the judge?

Can you repeat the division which Aristotle made of *ἐγκλήματα* in the first book, (chap. xiii. 7,) and reconcile it with the questions to be proved by an accused as stated in this chapter, viz.

either *ὅτι οὐ γέγονεν*

or *ὅτι οὐκ ἔβλαβε*

or *ὅτι οὐτόσονδε, ἢ ὅτι δικαίως?*

Suppose the accuser charges the accused with a deliberative injury, what cause will he assign for the action done? (Book I. chap. 10.)

Suppose the accused is compelled by weight of testimony to acknowledge the commission of the act and hurt done, but denies the *προαίρεσις*: if he proved that the act was done *μη' δι' αὐτον* or *ἐξ ἀνάγκης*,—would it be a refutation of the accuser?¹ (vide Book I. chap. x. 6.)

Suppose the accused acknowledges the act to have been done, and that act to have been hurtful, but denies the *προαίρεσις*, on which points will he dwell in the refutation?

What do you mean by refutation,² and is the refutation in a measure different from proof?

What chiefly constitutes proof in the demonstrative species? (3.)

What species of the *πίστις διὰ τοῦ δείκνυναι* is mostly used in the deliberative?

¹ Aut jure factum, depellendi aut ulciscendi doloris gratia, aut pietatis, aut pudicitiae, aut religionis, aut patriæ nomine, aut denique necessitate, inscitia, casu. Nam quæ motu animi et perturbatione facta sine ratione sunt, ea defensionem contra crimen, in legitimis judiciis, non habent, in liberis disceptationibus habere possunt. Cic. Orat. Partit.

² Ea quæ ad fidem faciendam pertinent in confirmationem et reprehensionem dividuntur. In confirmando nostra probare volumus; in reprehendendo redarguere contraria. Quoniam igitur omne quod in controversiam venit, id aut sit, necne sit, aut quid sit, aut quale sit, queritur primo conjectura, in altero definitio, in tertia ratio. Cic. Orat. Partit.

Do you recollect any precepts which Aristotle gives on the use of enthymems as proofs?

Why should they not be used when the orator seeks to excite the passions?

Why should they not be used ἐφεξῆς, or in a continued series?

To which of the three distinctions of *πίστεις* in the first book, and to which species does Aristotle reduce the τὰ πρὸς ἀντιδικόν?

How is the refutation effected by enthymem? (Book II. chap. xxv. 1.)

Ought not an accuser to notice the objections which the accused is likely to bring forward before he states his own?

Why should he not, and when is a violation of this order unobjectionable?

Ought the accused to refute his adversary before introducing his own proofs?

What reason can you assign for this order in the proof?

Are γνώμαι admissible as proofs, and which species is the best? (Vide Book II. chap. xxi.)

CHAP. XVIII.

Can you mention any cases in which the orator may inter-rogate with success?

Is the ἐρώτησις prudent on every question, and when is it not?

What answer is the best to an equivocal ἐρώτησις?

What distinction does Aristotle make between εἰρωνεία and βωμολοχία?

CHAP. XIX.

What does the orator propose to do in the ἐπίλογος?

Why should an accuser prefer the ἐπίλογος to the other parts of the oration, for exciting the passions and prejudices of his audience against his adversary?

Which part of the oration of an accused is opposed to the ἐπίλογος of an accuser?

In what kind of judicial cases will the ἀνάμνησις be used instead of τὸ εἰς τὰ πάθη τὸν ἀκροατὴν καταστήσαι?

Will every case admit of the excitement of the passions in the *ἐπίλογος*?

What kind of cases require the excitement of anger, hatred, and pity?

Is it necessary to the excitement of anger in the *ἐπίλογος*, that the orator should show in the *πίστις* that his adversary has acted with the *ὀλιγωρία* and its species?

Why is it?

Do I understand you to say because these are the *στοιχεῖα* out of which anger is excited? (vide Book II. chap. ii.)

Why does the conciliation of the hearer in the *ἐπίλογος* naturally follow the *πίστις*?

Why does amplification and extenuation naturally follow the *τὸ κατασκευάσαι εὖ τὸν ἀκροατὴν*?

Should the *ἀνάμνησις* be long or brief?

APPENDIX

TO THE

ANALYSIS OF ARISTOTLE'S RHETORIC,

CONTAINING THE ORIGINAL DEFINITIONS.

BOOK I.

I.—1. RHETORIC corresponds with Logic, since ἀμφοτέραι περὶ τοιούτων τινῶν εἰσιν, ἃ κοινὰ τρόπον τινὰ ἀπάντων ἐστὶ γνωρίζειν, καὶ οὐδεμιᾶς ἐπιστήμης ἀφωρισμένης.

2. But since men do it not only εἰκῇ, but also διὰ συνήθειαν, ἀπὸ ἔξεως, εἴη ἂν αὐτὸ καὶ ὁδοποιεῖν, and therefore τὴν αἰτίαν θεωρεῖν ἐνδέχεται. Consequently, there must be an art of Rhetoric.

3. But previous writers have done but little towards it, for αἱ πίστεις ἐντεχνόν ἐστι μόνον· τὰ δ' ἄλλα προσθῆκαι, and they have neglected enthymemes, ὅπερ ἐστὶ σῶμα τῆς πίστεως.

4. But appeals to the passions, οὐ περὶ τοῦ πράγματός ἐστιν,

5. ἀλλὰ πρὸς τὸν δικαστήν· which is unjust, and avoided by the Areopagus.

6. The business of the pleader is only with the fact, ὅτι ἐστὶν ἢ οὐκ ἐστὶν, ἢ γέγονεν ἢ οὐ γέγονεν· not with the question of its importance.

7. Laws would therefore be best, if they could mark out (διορίζειν) all cases, and leave but little to the judges, both on account of the difficulty of getting many good men to legislate, and because αἱ μὲν νομοθεσίαι ἐκ πολλοῦ σκεψαμένων γίνονται· αἱ δὲ κρίσεις ἐξ ὑπογύου· and because the legislator does not judge for the present and particular case, but for the future and universal, and is therefore free from prejudice or passion.

9. Therefore the exordium, narrative, etc. have nothing to do with the *art*, as all that aims at making the judge ποιὸν τινα.

10. Although *δημηγορικὴ* is superior to *δικανικὴ*, all men prefer the latter, because it best admits of superfluity and false reasoning.

11. Now *ἡ μὲν ἔντεχνος μέθοδος περὶ τὰς πίστεις ἐστίν· ἡ δὲ πίστις, ἀπόδειξις τις· ἐστὶ δ' ἀπόδειξις ῥητορικὴ, ἐνθύμημα· καὶ ἐστὶ τοῦτο, ὡς εἰπεῖν ἀπλῶς, κυριώτατον τῶν πίστειν· τὸ δὲ ἐνθύμημα, συλλογισμὸς τις·* δῆλον δ', ὅτι ὁ μάλιστα τοῦτο δυνάμενος θεωρεῖν, ἐκ τίνων καὶ πῶς γίγνεται συλλογισμὸς, οὗτος καὶ ἐνθυμηματικὸς ἂν εἴη μάλιστα. But he must also know not Logic only, but the subjects (*περὶ ποῖα*) enthymemes are, and their differences from the syllogisms of Logic. For *τό τε ἀληθές, καὶ τὸ ὅμοιον τῷ ἀληθεῖ, τῆς αὐτῆς ἐστὶ δυνάμεως ἰδεῖν* and from a natural aptness to discover truth, man has an aptness in conjecturing probabilities.

12. Rhetoric is useful, 1. *διὰ τὸ φύσει εἶναι κρείττω τὰ ληθῆ καὶ τὰ δίκαια τῶν ἐναντίων·* 2. because, on account of the unscientific character of some hearers, *ἀνάγκη διὰ τῶν κοινῶν ποιέσθαι τὰς πίστεις καὶ τοὺς λόγους·* 3. *τὰναντία δεῖ δύνασθαι πείθειν, καθάπερ καὶ ἐν τοῖς συλλογισμοῖς,* in order to confute *ἄλλον χρώμενον μὴ δικαίως τοῖς λόγοις αὐτοῖς,* which Dialectic and Rhetoric alone can do. 4. *ἄτοπον, εἰ τῷ σώματι μὲν αἰσχρὸν μὴ δύνασθαι βοηθεῖν ἑαυτῷ, λόγῳ δ' οὐκ αἰσχρόν·* ὁ μᾶλλον ἰδίον ἐστὶν ἀνθρώπου τῆς τοῦ σώματος χρείας.

13. The improper use of Rhetoric is an objection common to all things except *ἀρετή*.

14. The business of Rhetoric *οὐ τὸ πείσαι, ἀλλὰ τὸ ἰδεῖν, τὰ πιθανὰ, and both τὸ πιθανόν, καὶ τὸ φαινόμενον πιθανόν,* as in Dialectic. *ἡ γὰρ σοφιστικὴ οὐκ ἐν τῇ δυνάμει, ἀλλ' ἐν τῇ προαιρέσει.* But in Rhetoric *ἐστὶ ὁ μὲν κατὰ τὴν ἐπιστήμην, ὁ δὲ κατὰ τὴν προαίρεσιν, ῥήτωρ·* but in Dialectic, *σοφιστὴς μὲν κατὰ τὴν προαίρεσιν, διαλεκτικὸς δὲ οὐ κατὰ τὴν προαίρεσιν, ἀλλὰ κατὰ τὴν δύναμιν.*

II.—1. Rhetoric is defined to be *δύναμις περὶ ἕκαστον τοῦ θεωρῆσαι τὸ ἐνδεχόμενον πιθανόν·* and that on any given subject (*περὶ τοῦ δοθέντος*).

2. *Τῶν δὲ πίστειν αἱ μὲν ἄτεχνοί εἰσιν, αἱ δὲ ἔντεχνοί· ἄτεχνα δὲ λέγω, ὅσα μὴ δι' ἡμῶν πεπóρισται, ἀλλὰ προϋπῆρχεν·* οἷον μάρτυρες, βάσανοι, συγγραφαί, καὶ ὅσα τοιαῦτα· *ἐντεχνα δὲ, ὅσα διὰ τῆς μεθόδου καὶ δι' ἡμῶν κατασκευασθῆναι δυνατόν·* ὥστε δεῖ τούτων τοῖς μὲν χρῆσασθαι, τὰ δὲ εὐρεῖν.

3. The *ἐντεχνοὶ πίστεις* are of three kinds. 1. *ἐν τῷ ἡθεῖ*

τοῦ λέγοντος· 2. ἐν τῇ τὸν ἀκροατὴν διαθεῖναι πως· 3. ἐν αὐτῇ τῇ λόγῳ.

4. The first takes place when the speaker makes himself appear worthy of credit; the second, when the hearer is excited with any feeling; the third, when a real or apparent truth is shown.

7. Rhetoric is οἷον παραφύες τι τῆς Διαλεκτικῆς, καὶ τῆς περὶ τὰ ἥθη πραγματείας (i. e. πολιτικῆς).

8. The means of persuading are either ἐνθύμημα = ῥητορικὸς συλλογισμὸς, or παράδειγμα = ῥητορικὴ ἐπαγωγή, by one of which all men persuade.

9. Now, to show ὅτι ἐπὶ πολλῶν καὶ ὁμοίων, οὕτως ἔχει, in Logic is ἐπαγωγή, but in Rhetoric παράδειγμα· but that, τίνων ὄντων, ἕτερόν τι διὰ ταῦτα συμβαίνειν παρὰ ταῦτα τῇ ταῦτα εἶναι, ἢ καθόλου, ἢ ὡς ἐπὶ τὸ πολὺ, is in Logic called συλλογισμὸς, but in Rhetoric ἐνθύμημα.

10. Although example is often used, yet enthymematic reasonings are most applauded (θορυβοῦνται).

11. As in medicine, universals are alone considered by Rhetoric, and it is ἐκ τῶν ἤδη βουλευέσθαι εἰωθότων.

12. As the reader is supposed to be ἀπλοῦς, the ἀσυλλόγιστα are better than the συλλελογισμένα, for the latter are not εὐπαρακολούθητα διὰ τὸ μῆκος.

13. We can only reason from τὰ ἐνδεχόμενα ὡς τὰ πολλὰ ἔχειν καὶ ἄλλως.

14. But as there are but few ἀναγκαῖα which form rhetorical syllogisms, they are generally contingent (ὡς ἐπὶ τὸ πολὺ). Hence ἐνθυμήματα are said to be ἐξ εἰκότων καὶ ἐκ σημείων· But εἰκὸς is ὡς ἐπὶ τὸ πολὺ γιγνόμενον· οὐχ ἀπλῶς δὲ· ἀλλὰ τὸ περὶ τὰ ἐνδεχόμενα ἄλλως ἔχειν οὕτως ἔχον πρὸς ἐκεῖνο, πρὸς ὃ εἰκὸς, ὡς τὸ καθόλου πρὸς τὸ κατὰ μέρος. But of σήμεια, the one οὕτως ἔχει, ὡς τῶν καθ' ἕκαστόν τι πρὸς τὸ καθόλου· but the other ὡς τῶν καθόλου τι πρὸς τὸ κατὰ μέρος· and of these the ἀναγκαῖον is called τεκμήριον· but the μὴ ἀναγκαῖον has no name to distinguish it.*

19. But παράδειγμα is an ἐπαγωγή, but ὡς μέρος πρὸς μέρος. ὅμοιον πρὸς ὅμοιον, ὅταν ἄμφω μὲν ἢ ὑπὸ τὸ αὐτὸ γένος, γνωριμώτερον δὲ θάτερον ἢ θατέρον.

* The best explanation of the difficulties of this passage will be found in Mansell's Logic, Appendix, note E. Some useful illustrations will also be found in the notes to the translation, pp. 17—21.

21. Those syllogisms are properly logical and rhetorical, which are of equal extent with the arts themselves, in reference to which the *τόποι* are used. For these are common *περὶ πολλῶν διαφερόντων* εἶδει, such as *lesser* and *greater*, etc. But the εἶδη are confined to their respective subjects; thus there are *προτάσεις* concerning physics, that are of no use in morals, etc.

The *τόποι* convey no specific knowledge, as they are *περὶ οὐδὲν ὑποκείμενον*, but the εἶδη, if well selected, will gradually produce a science distinct from the Dialectic and Rhetoric.

22. "Εἶδη = αἱ καθ' ἑκαστον γένος ἴδιαι προτάσεις.

Τόποι = αἱ κοιναὶ ὁμοίως πάντων.

III.—1. There are three εἶδη of Rhetoric, as there are three kinds of hearers, and the speech consists of three things; 1. ὁ λέγων. 2. περὶ οὗ λέγει. 3. πρὸς ὃν.

2. The hearer is either *θεωρὸς περὶ τῆς δυνάμεως*, (the skill of the orator,) or *κριτής*, i. e. *κριτής ἢ τῶν γεγεννημένων, ἢ τῶν μελλόντων*, the latter being *ἐκκλησιαστής*, the former *δικαστής*.

3. Hence oratory is thus divided:—

	Business.	Time.	End.
1. συμβουλευτική	{ προτροπή. and ἀποτροπή.	ὁ μέλλων.	συμφέρον and βλαβερόν.
2. δικανική	{ κατηγορία and ἀπολογία.	ὁ γενόμενος.	δίκαιον and ἄδικον.
3. ἐπιδεικτική	{ ἔπαινος or ψόγος.	ὁ παρῶν, but some- times the others by recollection or anticipation.	καλὸν and αἰσχρόν.

8. In all three kinds we must have propositions on *δυνατὸν* and *ἀδύνατον*, εἰ γέγονεν, ἢ μὴ, ὅτι μέγα ἢ μικρόν, δίκαιον ἢ ἄδικον, καλὸν ἢ αἰσχρόν, etc.

IV.—1. Excluding *ἀδύνατα*, *ἀναγκαῖα*, and *ἀπὸ τύχης γε- νόμενα* ἀγαθὰ, Aristotle enumerates five things *περὶ ὧν συμβουλευονται πάντες*. 1. πόροι. 2. πόλεμος καὶ εἰρήνη. 3. φυ- λακὴ τῆς χώρας. 4. εἰσαγόμενα καὶ ἐξαγόμενα. 5. νομοθεσία. Then follow the εἶδη of each, and the knowledge necessary and useful.*

* As these are fully enumerated by Hobbes, I shall here omit them, as in all similar cases.

V.—1. As to the Epideictic orator, *εὐδαιμονία* is his aim, *περὶ γὰρ ταύτης, καὶ τῶν εἰς ταύτην συντεινόντων, καὶ τῶν ἐναντίων ταύτῃ, αἱ τε προτροπαὶ καὶ αἱ ἀποτροπαὶ πᾶσαι εἰσι.*

3. But *εὐδαιμονία* is, 1stly, *εὐπραξία μετὰ ἀρετῆς*. 2ndly, *αὐταρκεία ζωῆς*. 3rdly, *ὁ βίος ὁ μετὰ ἀσφαλείας ἡδιστος*. 4thly, *εὐσθένεια κτημάτων καὶ σωμάτων, μετὰ δυνάμειος φυλακτικῆς τε καὶ πρακτικῆς τούτων.*

4. Now he is *αὐταρκέστατος*, ᾧ ὑπάρχει τὰ τ' ἐν αὐτῷ, καὶ τὰ ἐκτὸς ἀγαθὰ. Ἔστι δὲ ἐν αὐτῷ μὲν, τὰ περὶ ψυχὴν, καὶ τὰ ἐν σώματι. Ἔξω δὲ, *εὐγένεια, καὶ φίλοι, καὶ χρήματα, καὶ τιμὴ*.

7. The parts of wealth are *νομίσματος πληθος, γῆς, χωρίων κτήσις*. ἔτι δὲ, *ἐπίπλων κτήσις καὶ βοσκημάτων καὶ ἀνδραπόδων πλήθει καὶ μεγέθει καὶ κάλλει διαφερόντων.* And all these must be *ἀσφαλῆ καὶ ἐλευθέρια καὶ χρήσιμα.* But the most useful are τὰ *κάρπιμα*. the liberal, τὰ πρὸς ἀπόλαυσιν. And they are *κάρπιμα* ἀφ' ὧν αἱ πρόσοδοι. but ἀπολαυστικά, ἀφ' ὧν μηδὲν παρὰ τὴν χρῆσιν γίγνεται, ὅ τι καὶ ἄξιον. Ἀσφαλεία consists in possessing wealth ὥστ' ἐφ' αὐτῷ εἶναι τὴν χρῆσιν αὐτῶν.

8. *Εὐδοξία, τὸ ὑπὸ πάντων σπουδαῖον ὑπολαμβάνεσθαι.*

9. Τιμὴ, σημείον *εὐεργετικῆς δόξης.*

Εὐεργεσία, ἡ εἰς σωτηρίαν, καὶ ὅσα αἷτια τοῦ εἶναι, ἢ εἰς πλοῦτον, ἢ εἰς τι τῶν ἄλλων ἀγαθῶν.

12. *Ἰσχύς, δυνάμις τοῦ κινεῖν ἕτερον, ὡς βούλεται.*

15. *Εὐγηνρία, βραδυτῆς γήρως μετ' ἀλυντίας.*

16. Φίλος, ὅστις, ᾧ οἶεται ἀγαθὰ εἶναι ἐκείνῳ, *πρακτικός ἐστιν αὐτῶν δι' ἐκείνον.* A man who possesses many such, enjoys *πολυφιλία* and *χρηστοφιλία.*

17. *Εὐτυχία δὲ ἐστίν, ὧν ἡ τύχη ἀγαθῶν αἰτία, ταῦτα γίγνεσθαι καὶ ὑπάρχειν ἢ πάντα, ἢ τὰ πλείονα, ἢ τὰ μέγιστα.*

18. As *ἀρετὴ* is most closely connected with *ἔκαινος*, Aristotle proceeds to τὰ πρὸς τὸ τέλος of deliberative oratory.

VI.—1. And these are τὰ *συμφέροντα* πρὸς τὰς πράξεις, τὸ δὲ *συμφέρον* ἀγαθόν, which must therefore be considered. Ἀγαθόν is defined to be ὁ ἂν αὐτὸ ἑαυτοῦ ἕνεκα ᾗ αἰρετόν. καὶ οὐ ἕνεκα ἄλλο αἰρούμεθα. καὶ οὐ ἐφίεται πάντα, ἢ πάντα τὰ αἰσθησιν ἔχοντα, ἢ νοῦν, ἢ εἰ λάβοι νοῦν. καὶ ὅσα ὁ νοῦς ἂν ἐκάστω ἀποδοίη. καὶ ὅσα ὁ περὶ ἑκάστον.

3. And goods follow ἡ *ἄμα, ἡ ὕστερον.* A copious enumeration of the *τόποι* next follows, for which see Hobbes.

18. Enumeration of τὰ *ἀμφισβητήσιμα ἀγαθὰ.*

VII.—1. In order to enumerate the *τόποι* of comparative

good and expediency, which the deliberative orator must discuss, Aristotle defines *ὑπερέχον, τοσούτον, καὶ ἔπι·* and *ὑπερέχόμενον, τὸ ἐννύαρχον.* Observing, *μείζον μὲν αἰεὶ καὶ πλείον· πρὸς ἑλαττον· μέγα δὲ καὶ μικρόν, καὶ πολὺ καὶ ὀλίγον, πρὸς τὸ τῶν πολλῶν μέγεθος· καὶ ὑπερέχον μὲν, τὸ μέγα· τὸ δὲ ἐλλείπον, μικρόν· καὶ πολὺ καὶ ὀλίγον ὡσαύτως.* Then follow the *τόποι.* See Hobbes.

VIII.—1. To be able *πείθειν καὶ καλῶς συμβουλεύειν*, one ought to be able *τὰς πολιτείας ἀπάσας λαβεῖν*, καὶ τὰ ἐκάστης ἔθνη, καὶ νόμιμα, καὶ συμφέροντα διελεῖν. For, 1. *πείθονται πάντες τῷ συμφέροντι.* 2. *κυρία ἡ τοῦ κυρίου ἀπόφανσις.*

3. There are four *πολιτεῖαι*, *δημοκρατία, ὀλιγαρχία, ἀριστοκρατία, μοναρχία·* so that the ruling and judicial functions will be one part of these or the whole. But *δημοκρατία* is defined, *πολιτεία, ἐν ᾗ κλήρῳ διανέμονται τὰς ἀρχάς· ὀλιγαρχία, ἐν ᾗ οἱ ἀπὸ τιμημάτων· ἀριστοκρατία, ἐν ᾗ οἱ κατὰ παιδείαν.* But by *παιδεία* I mean *τὴν ὑπὸ τοῦ νόμου κειμένην.* But *μοναρχία* is that, *ἐν ᾗ εἷς ἀπάντων κύριός ἐστι·* and *ἡ μὲν κατὰ τάξιν τινα, is called βασιλεία·* but *ἡ ἀόριστος, τυραννίς.*

5. Their respective *τέλη* are,

Of δημοκρατία,	ἐλευθερία.
ὀλιγαρχία,	πλοῦτος.
ἀριστοκρατία,	τὰ περὶ παιδείαν καὶ τὰ νόμιμα.
τυραννίδος,	φυλακή.

IX.—1. But as ethical character is also necessary in the speaker, and as virtue and vice are the objects of the Epideictic orator, and also enable us to appear *ποιοὶ τινες κατὰ τὸ ἦθος*, which is the second *πίστις ἔντεχνος*, we must therefore define thus:

3. *Καλόν, ὃ ἂν δι' αὐτὸ αἰρετὸν ὃν ἐπαινετὸν ᾗ· ἡ δ' ἂν ἀγαθὸν ὃν ἡδὺν ᾗ, ὅτι ἀγαθόν.* And, 'if so, *ἀρετὴ* must needs be *καλόν· ἀγαθὸν γὰρ ὃν ἐπαινετὸν ἐστίν.* 4. But *ἀρετὴ* is, as it seems, *δύναμις ποριστικὴ ἀγαθῶν καὶ φυλακτικὴ καὶ δύναμις εὐεργετικὴ πολλῶν καὶ μεγάλων καὶ πάντων περὶ πάντα.* 5. Its parts are *δικαιοσύνη, ἀνδρεία, σωφροσύνη, μεγαλοπρέπεια, μεγαλοψυχία, ἐλευθεριότης, πραότης, φρόνησις, σοφία.* 7. Which are thus defined: *Δικαιοσύνη, ἀρετὴ, δι' ἣν τὰ αὐτῶν ἕκαστοι ἔχουσιν, καὶ ὡς ὁ νόμος·* but *ἀδικία, δι' ἣν τὰ ἀλλότρια, σὺχ ὡς ὁ νόμος.* 8. *Ἀνδρεία, δι' ἣν πρακτικοὶ εἰσι τῶν καλῶν ἔργων ἐν τοῖς κινδύνοις, καὶ ὡς ὁ νόμος κελεύει, καὶ ὑπηρετικοὶ τῷ νόμῳ·* but *δειλία* the reverse. 9. *Σωφροσύνη, ἀρετὴ, δι' ἣν πρὸς τὰς ἡδονὰς τοῦ*

σώματος οὕτως ἔχουσιν, ὥς ὁ νόμος κελεύει· but ἀκολασία the reverse. 10. Ἐλευθεριότης, περί χρήματα εὖ ποιητική· but ἀνελευθερία the reverse. 11. Μεγαλοψυχία, ἀρετὴ μεγάλων ποιητικὴ ἐνεργημάτων· but μικροψυχία the reverse. 12. Μεγαλοπρέπεια, ἀρετὴ ἐν δαπανήμασι μεγέθους ποιητικὴ· but μικροπρέπεια and μικροπρέπεια the reverse. 13. Φρόνησις, ἀρετὴ διανοίας, καθ' ἣν εὖ βουλεύεσθαι δύνανται περί ἀγαθῶν καὶ κακῶν τῶν εἰρημένων εἰς εὐδαιμονίαν.

Then follows a copious list of τὰ καλά.

32. But as praise results from moral action, we must endeavour to show that the person commended has always acted κατὰ προαίρεσιν. He defines ἔπαινος, λόγος ἐμφανίζων μέγεθος ἀρετῆς.

35. Ἐχει δὲ κοινὸν εἶδος ὁ ἔπαινος καὶ αἱ συμβουλαί· ἃ γὰρ ἐν τῷ συμβουλευεῖν ὑπόβοιο ἂν, ταῦτα, μετατεθέντα τῇ λεξει, ἐγκώμια γίνονται.

38. In praise, we may also use τὰ ἀνζητικά, as εἰ μόνος, ἢ πρῶτος, ἢ μετ' ὀλίγων, ἢ καὶ ὁ μάλιστα πεποίηκεν. Also τὰ ἐκ τῶν χρόνων καὶ τῶν καιρῶν καὶ εἰ πολλάκις.

X. Judicial Oratory requires us to consider three things, ἐν μὲν, τίνων, καὶ πόσων ἕνεκα ἀδικοῦσι· δεύτερον δὲ, πῶς αὐτοὶ διακείμενοι· τρίτον δὲ, τοὺς ποίους, καὶ πῶς ἔχοντας.

3. Aristotle then defines τὸ ἀδικεῖν, τὸ βλάπτειν ἐκόντα παρὰ τὸν νόμον. But νόμος is either ἴδιος or κοινός. Ἴδιος is that, καθ' ὃν γεγραμμένοι πολιτεύονται· but κοινός, ὅσα ἄγραφα παρὰ πᾶσιν ὁμολογεῖσθαι δοκεῖ. Men ἐκόντες, ὅσα εἰδότες, καὶ μὴ ἀναγκαζόμενοι. Ὅσα μὲν οὖν ἐκόντες, οὐ πάντα προαιρούμενοι· ὅσα δὲ προαιρούμενοι, εἰδότες ἅπαντα· οὐδεὶς γὰρ, ὃ προαίρεται, ἀγνοεῖ. But the motives through which προαιροῦνται βλάπτειν, καὶ φάλα ποιεῖν παρὰ τὸν νόμον, are κακία and ἀκρυσία.

6. The motives of injustice.

7. Motives of all actions are either

12. Now τὰ ἀπὸ τύχης are τὰ τοιαῦτα γιγνόμενα, ὅσων ἡ τε αἰτία ὀρίστος, καὶ μὴ ἕνεκά του γίγνεται· καὶ μήτε αἰεὶ, μήτε ὡς ἐπὶ τὸ πολὺ, μήτε τεταγμένως.

13. But τὰ φύσει, ὅσων ἡ τε αἰτία ἐν αὐτοῖς καὶ τεταγμένη· ἡ γὰρ αἰεὶ, ἡ ὡς ἐπὶ τὸ πολὺ ὡσαύτως ἀποβαίνει.

14. Τὰ βίᾳ are ὅσα παρ' ἐπιθυμίαν ἢ τοὺς λογισμοὺς γίγνεται δι' αὐτῶν τῶν πραττόντων.

15. Ἐθεὶ δὲ, ὅσα διὰ τὸ πολλάκις πεποιηκέναι ποιοῦσι.

16. Λογισμῷ δὲ, τὰ δοκοῦντα συμφέρειν ἐκ τῶν εἰρημένων ἀγαθῶν, ἡ ὡς τέλος, ἡ ὡς πρὸς τὸ τέλος, ὅταν διὰ τὸ συμφέρον πράττηται.

17. Διὰ θυμὸν δὲ καὶ ὀργὴν τα τιμωρητικά.

But we must observe that ἡ κόλασις τοῦ πάσχοντος ἕνεκά ἐστιν· ἡ δὲ τιμωρία τοῦ ποιοῦντος, ἵνα ἀποκληρωθῇ.

18. Δι' ἐπιθυμίαν δὲ πράττεται, ὅσα φαίνεται ἡδέα.

XI.—1. Ἡδονὴ is defined to be κίνησις τις τῆς ψυχῆς, καὶ κατάστασις ἀθρόα καὶ αἰσθητὴ εἰς τὴν ὑπαρχουσαν φύσιν· λύπη δὲ τοῦναντίον.

Enumeration of τὰ ἡδέα.

XII. Πῶς ἔχοντες ἀδικοῦσι, καὶ ποῖα, καὶ ποίους.

For this chapter, see Hobbes.

XIII.—3. Division of laws into ἴδιοι and κοινοί, and consequently of τὰ ἀδικήματα καὶ δικαίωματα.

5. Aristotle defines ἀδικεῖσθαι, τὸ ὑπὸ ἐκόντος τὰ ἀδικοῦντας· adding, τὸ γὰρ ἀδικεῖν ὄρισταί πρότερον ἐκούσιον εἶναι.

11. As there are τῶν δικαίων καὶ τῶν ἀδίκων δύο εἶδη· τὰ μὲν γεγραμμένα· τὰ δὲ ἄγραφα· so, of these latter ἐστὶ τὰ μὲν καθ' ὑπερβολὴν ἀρετῆς καὶ κακίας, ἐφ' οἷς ὀνειδὴ καὶ ἔπαινοι, καὶ ἀτιμίαι καὶ τιμαί, καὶ δωρεαί· οἷον, τὸ χάριν ἔχειν τῷ ποιήσαντι εὖ, καὶ ἀντενποιεῖν τὸν εὖ ποιήσαντα· but others are τοῦ ἰδίου νόμου καὶ γεγραμμένου ἔλλειμμα, i. e. ἐπιεικὲς or equity, which is defined τὸ παρὰ τὸν γεγραμμένον νόμον δίκαιον. And this happens, τὰ μὲν ἐκόντων, τὰ δὲ ἀκόντων τῶν νομοθετῶν· ἀκόντων μὲν, ὅταν λάθῃ· ἐκόντων δὲ, ὅταν μὴ δύνωνται διορίσαι, ἀλλ' ἀναγκαῖον μὲν ἢ καθόλου εἰπεῖν, μὴ ἢ δὲ, ἀλλ' ὡς ἐπὶ τὸ πολὺ.

15. And hence τὰ ἐπιεικῆ are those deeds, ἐφ' οἷς δεῖ σὺ γνῶμην ἔχειν.

18. And Equity consists in looking rather to the προαίρεσις than the πράξις.

XIV. Enumeration of the degrees of guilt. See Hobbes.

XV.—1. The ὑπεχνοί πίστεις are νόμοι, μάρτυρες, συνθήκαι, βάσανοι, ἔρκοι.

3. Arguments for the use or opposition of the laws.

13. Μάρτυρές εἰσι διττοί, οἱ μὲν παλαιοί, οἱ δὲ πρόσφατοι. Καὶ τούτων οἱ μὲν μετέχοντες τοῦ κινδύνου· οἱ δὲ ἐκτός. Παλαιοί, οἱ ποιηταὶ καὶ οἱ χρησμολόγοι, the former περὶ τῶν γενομένων, the latter περὶ τῶν ἐσομένων.

Also proverbs are μαρτυρία.

15. Πρόσφατοι, ὅσοι γνώριμοι τὶ κεκρίκασιν· χρήσιμοι γὰρ αἱ τούτων κρίσεις τοῖς περὶ τῶν αὐτῶν ἀμφισβητοῦσιν.

Manner of using or invalidating witnesses.

20. Use of συνθήκαι. See Hobbes.

26. Use of βάσανοι.

27. In regard to oaths, there is a fourfold division, ἡ γὰρ δίδωσι, καὶ λαμβάνει, ἡ οὐδέτερον· ἡ τὸ μὲν, τὸ δ' οὐ· καὶ τούτων ἡ δίδωσι μὲν, οὐ λαμβάνει δέ· ἡ λαμβάνει μὲν, δίδωσι δὲ οὐ.

Manner of using the oath under the different circumstances.

BOOK II.

I. HAVING discussed deliberative and epideictic oratory, Aristotle now turns to judicial, observing: ἔνεκα κρίσεώς ἐστιν ἡ ῥητορική· καὶ γὰρ τὰς συμβουλάς κρίνουσι, καὶ ἡ δίκη κρίσις ἐστίν· therefore we must not only consider ὅπως ἀποδεικτικὸς ἔσται καὶ πιστὸς ὁ λόγος, ἀλλὰ καὶ αὐτὸν ποῖόν τινα καὶ τὸν κριτὴν κατασκευάζειν.

4. And this is chiefly important for the speaker εἰς τὰς συμβουλάς, but for the hearer εἰς τὰς δίκας. For men form different opinions according as they are φιλοῦντες, μισοῦντες, ὀργιζόμενοι, or πρῶως ἔχοντες, ἐπιθυμοῦντες, or εὐέλπιδες.

5. Τοῦ μὲν οὖν αὐτοὺς εἶναι πιστοὺς τοὺς λέγοντας τρία ἐστὶ τὰ αἷτια· τοσαῦτα γὰρ ἐστὶ, δι' ἃ πιστεύομεν ἕξω τῶν ἀποδείξεων. Ἔστι δὲ ταῦτα φρόνησις, καὶ ἀρετὴ, καὶ εὐνοία.

7. But how men may appear virtuous and prudent, may be learnt from the chapter on virtues.

But εὐνοία must be derived from a knowledge of τὰ πάθη, which are δι' ὅσα μεταβάλλοντες διαφέρουσι πρὸς τὰς κρίσεις, οἷς

ἐπεται λύπη καὶ ἡδονή· οἶον, ὀργή, ἔλεος, φόβος, καὶ ὅσα ἄλλα τοιαῦτα, καὶ τὰ τούτοις ἐναντία. Δεῖ δὲ διαφεῖν [τὰ] περὶ ἕκαστον εἰς τρία· λέγω δ', οἶον περὶ ὀργῆς, πῶς τε διακείμενοι ὀργίλοι εἰσὶ, καὶ τίσιν εἰώθασιν ὀργίζεσθαι, καὶ ἐπὶ ποίοις.

II. Anger is defined to be ὀρεξίς μετὰ λύπης τιμωρίας φαινομένης διὰ φαινομένην ὀλιγωρίαν τῶν εἰς αὐτὸν, ἢ εἰς αὐτοῦ τινα μὴ προσηκόντως. 2. Thus anger will always be against a *particular* object, and all anger will be accompanied by a certain pleasure, ἀπὸ τῆς ἐλπίδος τοῦ τιμωρήσασθαι. 3. ἡ ὀλιγωρία ἐστὶν ἐνέργεια δόξης περὶ τὸ μηδενὸς ἄξιον φαινόμενον· but there are three kinds of ὀλιγωρία, καταφρόνησις, ἐπηρεασμός, and ὑβρις.

For the enumeration of the feelings and objects of anger, see Hobbes.

III.—1. As τῷ ὀργίζεσθαι ἐναντίον τὸ πραῦνεσθαι, Aristotle defines πρᾶνσις, κατάστασις καὶ ἡρέμησις ὀργῆς.

IV.—1. He now defines τὸ φιλεῖν, τὸ βούλεσθαι τινι, ἃ οἶεται ἀγαθὰ, ἐκείνου ἕνεκα, ἀλλὰ μὴ αὐτοῦ, καὶ τὸ κατὰ δύναμιν πρακτικὸν εἶναι τούτων. Φίλος δ' ἐστὶν ὁ φιλῶν καὶ ἀντιφιλούμενος. So it follows, φίλον εἶναι τὸν συνηδόμενον τοῖς ἀγαθοῖς, καὶ συναλγούντα τοῖς λυπηροῖς, μὴ διὰ τὶ ἕτερον, ἀλλὰ δι' ἐκείνον.

After enumerating τοὺς φιλοῦντας καὶ μισοῦντας, Aristotle observes, ποιητικὰ ἔχθρας, ὀργή, ἐπηρεασμός, διαβολή.

31. Ὀργὴ μὲν οὖν ἐστὶν ἐκ τῶν πρὸς αὐτόν· ἔχθρα δὲ καὶ ἀνευ τοῦ πρὸς αὐτόν· and ἡ μὲν ὀργὴ αἰετὶ πρὸς τὰ καθ' ἕκαστα· τὰ δὲ μῖσος καὶ πρὸς τὰ γένη. And all λυπηρὰ are αἰσθητὰ, but τὰ μάλιστα κακὰ, ἥκιστα αἰσθητὰ, ἅς ἀδικία and ἀφροσύνη.

V.—1. Φόβος is λύπη τις ἢ ταραχὴ ἐκ φαντασίας μέλλοντος κακοῦ ἢ φθαρτικοῦ, ἢ λυπηροῦ· and φοβερά, ὅσα φαίνεται δύναμιν ἔχειν μεγάλην τοῦ φθείρειν, ἢ βλάπτειν βλάβας εἰς λύπην μεγάλην συντεινούσας.

16. After enumerating the feelings and objects of fear, Aristotle remarks of confidence, τό τε θάρσος ἐναντίον τῷ φόβῳ, καὶ τὸ θαρρᾶλέον τῷ φοβερῷ· ὥστε μετὰ φαντασίας ἢ ἐλπίς τῶν σωτηρίων, ὡς ἐγγυὲς ὄντων· τῶν δὲ φοβερῶν ἢ μὴ ὄντων, ἢ πόρρω ὄντων.

VI.—2. Αἰσχύνη is λύπη τις καὶ ταραχὴ περὶ τὰ εἰς ἀδοξίαν φαινόμενα φέρειν τῶν κακῶν, ἢ παρόντων, ἢ γεγονότων, ἢ μελλόντων. But ἀναισχυντία, ὀλιγωρία τις καὶ ἀπάθεια περὶ τὰ αὐτὰ ταῦτα.

VII. Aristotle defines χάρις, καθ' ἣν ὁ ἔχων λέγεται χάριν

ὑποσυργεῖν τῷ δεομένῳ, μὴ ἀντὶ τινός, μηδ' ἵνα τι αὐτῷ τῷ ὑποσυργούντι, ἀλλ' ἵνα τι ἐκείνῳ.

5. We may do away with obligation on the grounds ἡ ὅτι αὐτῶν ἕνεκα ἀπηρετοῦσιν, ἡ ὑπηρετήσαν' ἡ ὅτι ἀπὸ τύχης συνέπεσεν, κ. τ. λ.

VIII. Ἐλεος is λύπη τις ἐπὶ φαινόμενῳ κακῷ φθαρτικῷ καὶ λυπηρῷ τοῦ ἀναξίου τυγχάνειν, ὃ κὰν αὐτὸς προσδοκῆσειεν ἂν παθεῖν, ἢ τῶν αὐτοῦ τινα καὶ τοῦτο, ὅταν πλησίον φαίνηται.

8. Ἐλεεινά are ὅσα τῶν λυπηρῶν καὶ ὁδοιπορῶν φθαρτικά.

IX. But to pity is particularly opposed τὸ νευεσθῆν' τῷ γὰρ λυπεῖσθαι ἐπὶ ταῖς ἀναξίαις κακοπραγίαις ἀντικειμένον ἐστὶ τρόπον τινα, καὶ ἀπὸ τοῦ αὐτοῦ ἦθους, τὸ λυπεῖσθαι ἐπὶ ταῖς ἀναξίαις εὐπραγίαις· καὶ ἄμφω τὰ πάθη ἦθους χρηστοῦ. 2. Whence νέμεσις is even an attribute of the gods.

3. But φθόνος is differently opposed to pity, for it is λύπη παραώδης ἐπὶ εὐπραγίᾳ, ἀλλ' οὐ τοῦ ἀναξίου, ἀλλὰ τοῦ ἴσου καὶ ὁμοίου. But it is solely with reference to one's neighbour, otherwise it will be φόβος.

4. But, by parity of reasoning, ὁ λυπούμενος ἐπὶ τοῖς ἀναξίως κακοπραγοῦσιν ἡσθήσεται, ἡ ἄλυπος ἐσται, ἐπὶ τοῖς ἐναντίως κακοπραγοῦσιν.

5. Ὁ αὐτός ἐστιν ἐπιχαιρέκακος καὶ φθονερός· ἐφ' ᾧ γάρ τις λυπεῖται γιγνομένῳ, καὶ ὑπάρχοντι, ἀναγκαῖον, τοῦτον ἐπὶ τῇ στερήσει, καὶ τῇ φθορᾷ τῇ τούτου χαίρειν ἀνάγκη.

For the enumeration of the objects of νέμεσις, see Hobbes.

X.—1. Φθόνος is defined to be λύπη τις ἐπὶ εὐπραγίᾳ φαινόμενη τῶν εἰρημένων ἀγαθῶν περὶ τοὺς ὁμοίους, μὴ ἵνα τι αὐτῷ, ἀλλὰ δι' ἐκείνους· φθονήσουσι μὲν γὰρ οἱ τοιοῦτοι, οἱ εἰσὶ τινες ὅμοιοι, ἢ φαίνονται. And ὅμοιοι are κατὰ γένος, κατὰ συγγένειαν, καθ' ἡλικίας, καθ' ἔξεις, κατὰ δόξαν, κατὰ τὰ ὑπάρχοντα.

XI. Ζῆλος is λύπη τις ἐπὶ φαινόμενῳ παρουσίᾳ ἀγαθῶν ἐντίμων, καὶ ἐνδεχομένων αὐτῷ λαβεῖν, περὶ τοὺς ὁμοίους τῇ φύσει, οὐχ ὅτι ἄλλῳ, ἀλλ' ὅτι οὐχὶ καὶ αὐτῷ ἐστὶ. Hence ζῆλος ἐπικεῖς ἐστὶ, καὶ ἐπικιών, but φθόνος is φαῦλον, καὶ φαύλων.

XII. Aristotle now considers the passions and habits of men according to their ages, which are three, νεότης, ἀκμή, καὶ γῆρας. See Hobbes.

16. Mirth or εὐτραπεία πεπαιδευμένη ὑβρις ἐστὶ.

XIII. Old men are in most respects the contrary.

XIV. But οἱ ἀκμάζοντες are μεταξὺ τούτων τὸ ἦθος, in all respects.

XV. The goods of fortune are next considered, in as far as they influence the dispositions of men. And, first, the *ἥθος* of 2. *εὐγένεια* is defined to be τὸ φιλοτιμότερον εἶναι τὸν κεκτημένον αὐτήν· but *εὐγένεια* is ἐντιμότες προγόνων· καὶ καταφρονητικὸν καὶ τῶν ὁμοίων τοῖς προγόνοις τοῖς αὐτῶν. 3. It differs from τὸ γενναῖον, inasmuch as *εὐγενές* is said κατὰ τὴν τοῦ γένους ἀρετήν· but *γενναῖον* κατὰ τὸ μὴ ἐξίστασθαι τῆς φύσεως.

XVI. Of wealth it is observed, ὕβρισταί καὶ ὑπερήφανοι πάσχοντές τι ὑπὸ τῆς κτήσεως τοῦ πλούτου. He then enumerates the characteristics of the wealthy, observing ἐν κεφαλαίῳ, ἀνόητον εὐδαίμονος ἥθος πλούτου ἐστι. But the difference between those of recent and long-standing wealth, consists τῷ ἅπαντα μᾶλλον καὶ φαυλότερα τὰ κακὰ ἔχειν τοὺς νεοπλοῦτους· ὥσπερ γὰρ αἰκιδενυσία πλούτου ἐστὶ τὸ νεόπλουτον εἶναι.

XVII. The disposition of the powerful and the fortunate.

XVIII.—1. Having shown that there are κοινὰ εἶδη belonging to all the three kinds of oratory, πᾶσι γὰρ ἀναγκαῖον, τὰ περὶ τοῦ δυνατοῦ καὶ ἀδυνάτου προσχρῆσθαι ἐν τοῖς λόγοις· καὶ τοὺς μὲν, ὡς ἔσται· τοὺς δὲ, ὡς γέγονε, πειρᾶσθαι δεικνύναι. "Εἰ δὲ, περὶ μεγέθους κοινὸν ἀπάντων ἐστὶ τῶν λόγων· χρώνται γὰρ πάντες τῷ μειῶν καὶ αὐξείν, καὶ συμβουλευόντες ἢ ἀποτρέποντες, καὶ ἐπαινοῦντες ἢ ψέγοντες, καὶ κατηγοροῦντες ἢ ἀπολογούμενοι. Aristotle proceeds to lay down a list of the different κοινὰ εἶδη applicable to each. See Hobbes.

XX. Having treated of αἱ ἴδιαι πίστεις, Aristotle proceeds to αἱ κοιναί, which are δύο τῷ γένει, παράδειγμα καὶ ἐνθύμημα· 2. ἡ γὰρ γνώμη μέρος ἐνθυμήματός ἐστι. 3. Παραδειγμάτων δ' εἶδη δύο· ἐν μὲν γὰρ ἐστὶ παραδείγματος εἶδος τὸ λέγειν πράγματα προγεγενημένα· ἐν δὲ τὸ αὐτὸν ποιεῖν. Τούτου δ' ἐν μὲν παραβολή· ἐν δὲ λόγοι· ὅσον οἱ Αἰσώπειοι. Specimens of both.

7. The λόγοι are δημηγορικοί, and have the advantage, ὅτι πράγματα εὐρεῖν ὅμοια γεγενημένα, χαλεπὸν· λόγους δὲ, ῥᾶον. But τὰ πράγματα are best πρὸς τὸ βουλευσασθαι· ὅμοια γὰρ ὡς ἐπὶ τὸ πολὺ τὰ μέλλοντα τοῖς γεγονόσι.

9. Δεῖ δὲ χρῆσθαι τοῖς παραδείγμασιν, οὐκ ἔχοντα μὲν ἐνθυμήματα, ὡς ἀποδείξεις· ἡ γὰρ πίστις διὰ τούτων· ἔχοντα δὲ, ὡς μαρτυροῖς, ἐπιλόγῳ χρώμενον [ἐπὶ] τοῖς ἐνθυμήμασι.

XXI.—2. Γνώμη is defined ἀπόφασις, οὐ μέντοι περὶ τῶν καθ' ἕκαστον· ἀλλὰ καθόλον· καὶ οὐ περὶ πάντων, ἀλλὰ περὶ δυνάμει αἱ πράξεις εἰσὶ, καὶ αἰρετὰ ἢ φευκτὰ ἐστὶ πρὸς τὸ πράσσειν.

But since enthymemes are syllogisms περὶ τοιούτων, τὰ συμ-

περάσματα τῶν ἐνθυμημάτων, καὶ αἱ ἀρχαὶ, ἀφαιρεθέντος τοῦ συλλογισμοῦ, γινώμαί εἰσιν· προστεθείσης δὲ τῆς αἰτίας, καὶ τοῦ διὰ τί, ἐνθύμημα ἔσται τὸ ἅπαν.

3. Hence there are four kinds of γνῶμη, as being either μετ' ἐπιλόγου, ἀνευ ἐπιλόγου,

1. ἐνθυμήματος μέρος.

1. διὰ τὸ προεγνώσθαι.

2. ἐνθυμηματικά, ἐν ὅσαις ἐμφαίνεται τοῦ λεγομένου τὸ αἶτιον.

2. ἅμα λεγόμεναι δηλαί.

15. These sort of sayings are of great use, 1. διὰ τὴν φορτικότητα τῶν ἀκροατῶν· χαίρουσι γὰρ, ἂν τις καθόλου λέγων ἐπιτύχη τῶν δοξῶν, ὥς ἐκεῖνοι κατὰ μέρος ἔχουσιν. 2. ὅτι ἠθικὸς ποιεῖ τοὺς λόγους, which takes place ἐν ὅσοις δήλη ἡ προαίρεσις.

XXII. Requisites of enthymems. 1. οὔτε πόρρωθεν, οὔτε πάντα δεῖ λαμβάνοντα συνάγειν· 2. οὐκ ἐξ ἀπάντων τῶν δοκούντων, ἀλλ' ἐκ τῶν ὠρισμένων λεκτέον· 3. μὴ μόνον συνάγειν ἐκ τῶν ἀναγκαίων, ἀλλὰ καὶ ἐκ τῶν ὡς ἐπὶ τὸ πολὺ.

4—12. Enumeration of the manner of forming enthymems on different subjects.

13. Στοιχεῖον καὶ τόπος ἐνθυμήματος τὸ αὐτό.

14. Two kinds of enthymems, τὰ μὲν γὰρ δεικτικά ἐστίν, ὅτι ἔστιν, ἢ οὐκ ἔστι· τὰ δὲ ἐλεγκτικά· καὶ διαφέρει, ὥσπερ ἐν τοῖς διαλεκτικοῖς ἐλεγχος καὶ συλλογισμὸς. "Ἐστὶ δὲ τὸ μὲν δεικτικὸν ἐνθύμημα τὸ ἐξ ὁμολογουμένων συνάγειν· τὸ δὲ ἐλεγκτικὸν τὰ ἀνομολογούμενα συνάγειν.

XXIII. The τύποι ἐνθυμημάτων are,

1. τῶν ἐναντίων.

2. ἐκ τῶν ὁμοίων πτωσέων.

3. ἐκ τῶν πρὸς ἄλληλα.

4. ἐκ τοῦ μᾶλλον καὶ ἥττον, *a fortiori*, or *a minori*.

5. εἰ μήτε μᾶλλον, μήτε ἥττον, *by parity of reasoning*.

6. ἐκ τοῦ τὸν χρόνον σκοπεῖν.

7. ἐκ τῶν εἰρημένων καθ' αὐτοὺς πρὸς τὸν εἰπόντα.

8. ἐξ ὀρισμοῦ.

9. ἐκ τοῦ ποσαχῶς.

10. ἐκ διαιρέσεως.

11. ἐξ ἐπαγωγῆς.

12. ἐκ κρίσεως περὶ τοῦ αὐτοῦ, ἢ ὁμοίου, ἢ ἐναντίου.

13. ἐκ τῶν μερῶν.

14. ἐπειδὴ ἐπὶ τῶν πλείστων συμβαίνει, ὥσθ' ἔπεισθαι τι

αὐτοῖς ἀγαθὸν καὶ κακὸν, ἐκ τοῦ ἀκολουθοῦντος προτρέπειν ἢ ἀποτρέπειν.

15. ὅταν περὶ δυοῖν καὶ ἀντικειμένον [ἢ] προτρέπειν ἢ ἀποτρέπειν δέη, καὶ τῷ πρότερον εἰρημένῳ τύπῳ ἐπ' ἀμφοῖν χρῆσθαι, the dilemma.

16. ἐπειδὴ οὐ τὰ αὐτὰ φανερώς ἐπαινοῦσι καὶ ἀφανῶς.

17. ἐκ τοῦ ἀνάλογον ταῦτα συμβαίνειν.

18. ἐκ τοῦ, τὸ συμβαίνειν ἔαν ἢ ταῦτόν, ὅτι καὶ ἐξ ὧν συμβαίνει ταῦτά.

19. ἐκ τοῦ μὴ ταῦτό αἰεὶ αἰρεῖσθαι ὕστερον ἢ πρότερον, ἀλλ' ἀνάπαλιν, οἷον τόδε τὸ ἐνθύμημα.

20. τὸ, οὐ ἔνεκα ἂν εἴη, ὃ γένοιτο, τούτου ἔνεκα φάναι εἶναι, ἢ γεγενῆσθαι.

21. σκοπεῖν τὰ προτρέποντα καὶ ἀποτρέποντα, καὶ ὧν ἔνεκα καὶ πράττουσι καὶ φεύγουσι.

22. ἐκ τῶν δοκούντων μὲν γίγνεσθαι, ἀπίστων δέ.

23. ἐλεγκτικὸς, τὸ τὰ ἀνομολογούμενα σκοπεῖν, εἴ τι ἀνομολογούμενον ἐκ πάντων [καὶ] χρόνων, καὶ πράξεων, καὶ λόγων.

24. τοῖς προδιαβεβλημένοις καὶ ἀνθρώποις καὶ πράγμασι, ἢ δοκοῦσι, τὸ λέγειν τὴν αἰτίαν τοῦ παραδόξου.

25. ἀπὸ τοῦ αἰτίου, ἂν τε ὑπάρχη, ὅτι ἐστί· καὶ μὴ ὑπάρχη, ὅτι οὐκ ἔστιν· ἅμα.

26. εἰ ἐνεδέχeto βέλτιον ἄλλως, ἢ ἐνδέχεται, ὧν ἢ συμβουλεύει, ἢ πράττει, ἢ πέπραχεν, σκοπεῖν.

27. ὅταν τι ἐναντίον μέλλῃ πράττεσθαι τοῖς πεπραγμένοις, ἅμα σκοπεῖν.

28. τὸ ἐκ τῶν ἁμαρτηθέντων κατηγορεῖν, ἢ ἀπολογεῖσθαι.

29. ἀπὸ τοῦ ὀνόματος.

The ἐλεγκτικὰ are preferred.

XXIV. Apparent enthymemes are,

1. παρὰ τὴν λέξιν. 1. τὸ μὴ συλλογισάμενον συμπερασματικῶς τὸ τελευταῖον εἰπεῖν. 2. το παρὰ τὴν ὁμωνυμίαν.

2. τὸ διηρημένον συντιθέντα λέγειν, ἢ τὸ συγκείμενον διαιροῦντα.

3. τὸ δεινῶσει κατασκευάζειν, ἢ ἀνασκευάζειν, ὅταν μὴ δείξας, ὅτι ἐποίησεν, αὐξήσῃ τὸ πρᾶγμα.

4. τὸ ἐκ σημείου.

5. διὰ τὸ συμβεβηκός.

6. παρὰ τὸ ἐπόμενον.

7. παρὰ τὸ ἀνατίον ὡς αἷτιον.

8. παρὰ τὴν ἔλλειψιν τοῦ πότε καὶ πῶς.

9. ὥσπερ ἐν τοῖς ἱριστικοῖς παρὰ τὸ ἀπλῶς καὶ μὴ ἀπλῶς, ἀλλό τι, γίννεται φαινόμενος συλλογισμός· from what is not ἀπλῶς εἰκός, but τι εἰκός.

XXV. Solution of arguments is managed either by an ἀντισυλλογισμός or ἔνστασις.

3. "Ἐνστασις is fourfold. 1. ἐκ ταύτου. 2. ἐκ τοῦ ὁμοίου. 3. ἐκ τοῦ ἐναντίου. 4. ἐκ τῶν κεκριμένων.

8. Since enthymems are derived from εἰκός, παραδείγμα, τεκμήριον, and σημείον, and since the inferences from what is usual are ἐκ τῶν εἰκότων, but those from ἐπαγωγή are derived διὰ παραδείγματος, but ἀναγκαῖα, διὰ τεκμηρίου, and those drawn from what holds good or not, either universally or particularly, are διὰ σημείων, and as εἰκός is only ἐπὶ τὸ πολὺ, it is plain that all reasonings may be got rid of by objection.

9. 'Ἡ δὲ λύσις φαινομένη, ἀλλ' οὐκ ἀληθὴς αἰεὶ· οὐ γάρ, ὅτι οὐκ εἰκός, λυεῖ ὁ ἐνιστάμενος, ἀλλ' ὅτι οὐκ ἀναγκαῖον. Διὸ καὶ αἰεὶ ἐστὶ πλεονεκτεῖν ἀπολογούμενον μᾶλλον ἢ κατηγοροῦντα, διὰ τοῦτον τὸν παραλογισμόν.

12. Λύεται δὲ καὶ τὰ σημεῖα, καὶ τὰ διὰ σημείου ἐνθυμήματα εἰρημένα, κἂν ᾗ ὑπάρχοντα, since ἀσυλλόγιστόν ἐστι πᾶν σημεῖον.

13. The same λύσις applies to τὰ παραδειγματώδη καὶ τὰ εἰκότα· εἰν γὰρ ἔχωμέν τι οὐχ οὕτως, λέλνται, but, if the major part be against us, we must strive to show ὅτι οὐχ ὅμοιον τὸ παρόν.

14. But τεκμήρια καὶ τεκμηριώδη ἐνθυμήματα κατὰ μὲν τὸ ἀσυλλόγιστον οὐκ ἔσται λύσαι.

XXVI. Τὸ αὔξειν καὶ μειοῦν οὐκ ἔστιν ἐνθυμήματος στοιχεῖον, but they are ἐνθυμήματα πρὸς τὸ δεῖξαι, ὅτι μέγα ἢ μικρόν.

3. Οὐδὲ τὰ λυτικά ἐνθυμήματος εἶδος τί ἐστὶν ἄλλο τῶν κατασκευαστικῶν.

4. Nor is ἔνστασις an enthymem, but τὸ εἰπεῖν δόξαν τινὰ, εἰ ἥς ἔσται δῆλον, ὅτι οὐ συλλελόγισται, ἢ ὅτι ψεῦδός τι εἰληφεν.

BOOK III.

I.—1. Three points to be considered in a speech, *πίστις*, *λέξις*, and *ράξις*.

2. We may treat of *λέξις*, for it is not sufficient *ἔχειν*, ἀ δὲ λέγειν, ἀλλ' ἀνάγκη καὶ ταῦτα, ὥς δεῖ, εἰπεῖν.

3. Now *ὑπόκρισις* has been omitted, which indeed came late into Tragedy and Rhapsody, for the poets at first recited their own verses.

4. It consists in three things, *μέγεθος*, *ἁρμονία*, *ῥυθμός*.

6. After showing its disadvantages, Aristotle observes, τὸ μὲν οὖν τῆς λέξεως ὁμῶς ἔχει τι μικρὸν ἀναγκαῖον ἐν πάσῃ διδασκαλίᾳ· διαφέρει γάρ τι πρὸς τὸ δηλῶσαι, ὥδὲ ἢ ὥδὲ εἰπεῖν, οὐ μέντοι τοσοῦτον· ἀλλ' ἅπαντα φαντασία ταῦτά ἐστι, καὶ πρὸς τὸν ἀκροατήν.

7. The effect of it is the same as that produced by acting.

8. The poets first made it their study, then the rhetoricians, after which it fell off, as the tragic poets have changed from tetrametre to Iambics.

II. Two ἀρεταὶ λέξεως. 1. σαφὴ εἶναι. 2. μὴ ταπεινὴν, μήτε ὑπὲρ τὸ ἀξίωμα, ἀλλὰ πρέπουσαν.

2. The former virtue is obtained by the use of κύρια ὀνόματα, the latter by τὰ ἅλλα, διὸ δεῖ ποιεῖν ξένην τὴν διάλεκτον, because the hearers are θαυμασταὶ τῶν ἀπόντων.

3. This is more easy and suitable in poetry, hence in prose δεῖ λανθάνειν ποιῶντας, καὶ μὴ δοκεῖν λέγειν πεπλασμένως, ἀλλὰ πεφυκότως· τοῦτο γὰρ πιθανόν, ἐκεῖνο δὲ τοῦναντίον.

5. Of the many species of nouns γλῶτταις μὲν, καὶ διπλοῖς ὀνόμασι, καὶ πεποιημένοις, ὀλιγάκις καὶ ὀλιγαχοῦ χρηστότερον· ἐπὶ τὸ μεῖζον γὰρ ἐξαλλάττει τοῦ πρέποντος.

6. Τὸ δὲ κύριον καὶ τοῦ οἰκείου, καὶ μεταφορά, μόναι χρήσιμοι πρὸς τὴν τῶν ψιλῶν λόγων λέξιν· ὅτι τούτοις μόνους πάντες χρῶνται· πάντες γὰρ μεταφοραῖς διαλέγονται, καὶ τοῖς οἰκείοις, καὶ τοῖς κυρίοις. Hence if any one form his discourse well, ἔσται τε ξενικόν, καὶ λανθάνειν ἐνδέχεται, καὶ σαφηνεῖ.

7. ὁμωνυμίαι are useful to the sophist, συνώνυμα and κύρια to the poet.

8. Τὸ σαφές, καὶ τὸ ἡδὺ, καὶ τὸ ξενικόν ἔχει μάλιστα ἢ μεταφορά.

9. Δεῖ δὲ καὶ τα ἐπίθετα, καὶ τὰς μεταφορὰς ἀρμοστούσας λέγειν,
i. e. ἐκ τοῦ ἀνάλογον.

10. Καὶ ἐὰν κοσμεῖν βούλη, ἀπὸ τοῦ βελτίονος τῶν ἐν ταύτῃ
γένοι φέρειν τὴν μεταφορὰν, ἐὰν δὲ ψέγειν, ἀπὸ τῶν χειρόνων.

11. Ἔστι δὲ καὶ ἐν ταῖς συλλαβαῖς ἀμαρτία, ἐὰν μὴ ἡδέιαι ἢ
σημεῖα φωνῆς.

12. Οὐ πόρρωθεν δεῖ, ἀλλ' ἐκ τῶν συγγενῶν καὶ τῶν ὁμοειδῶν
μεταφέρειν τὰ ἀνώνυμα ὠνομασμένως, ὃ λεχθὲν δῆλόν ἐστιν ὅτι
συγγενές.

13. Καὶ ἀπὸ καλῶν ἢ τῇ φωνῇ, ἢ τῇ δυνάμει, ἢ τῇ ὤψει, ἢ ἄλλῃ
τενὶ αἰσθήσει.

14. And epithets may be derived ἀπὸ φαύλου ἢ αἰσχροῦ, or
ἀπὸ τοῦ βελτίονος, and we may also make use of ὑποκορισμός.

III. Ψυχρὰ are produced in four ways:

1. ἐν τοῖς διπλοῖς ὀνόμασιν.

2. ἐν τῇ χρῆσθαι γλώτταις.

3. ἐν τοῖς ἐπιθέτοις, τὸ ἢ μακροῖς, ἢ ἀκαίροις, ἢ πυκνοῖς
χρῆσθαι.

4. μεταφοραὶ ἀπρεπεῖς, αἱ μὲν διὰ τὸ γελοῖον, αἱ δὲ διὰ τὸ
σεμνὸν ἄγαν καὶ τραγικόν.

IV. Simile akin to metaphor. Examples.

V. Ἀρχὴ τῆς λήξεως τὸ Ἑλληνίζειν. And this is produced
in four ways:

1. ἐν τοῖς συνδέσμοις.

2. ἐν τῇ τοῖς ἰδίους ὀνόμασι λέγειν, καὶ μὴ τοῖς περιέχουσι.

3. μὴ ἀμφιβόλοις.

4. ἐν τῇ τὰ γένη τῶν ὀνομάτων ἀρρένα, καὶ θήλεα, καὶ σκεύη
ἀποδιδόναι ὀρθῶς.

5. ἐν τῇ τὰ πολλὰ, καὶ ὀλίγα, καὶ ἐν, ὀρθῶς ὀνομάζειν.

6. Ὅλως δὲ δεῖ εὐανάγνωστον εἶναι τὸ γεγραμμένον, καὶ
εὐφραστον· and this must not depend upon the punctuation.

7. It causes a solecism, μὴ ἀποδιδόναι, ἐὰν μὴ ἐπιζευγνύης
ἀμφοῖν, ὃ ὑμῶντε.

And it is indistinct, ἂν μὴ προθεῖς εἴπης, μέλλων πολλὰ με-
ταξὺ ἐμβάλλειν.

VI. To produce ὄγχος, the following rules contribute:

1. τὸ λόγῳ χρῆσθαι ἀντ' ὀνόματος.

2. ἐὰν αἰσχροιν ἢ ἐν τῇ λόγῳ, τοῦνομα λέγειν, and vice versâ.

3. μεταφοραῖς δηλοῦν, καὶ ἐπιθέτοις, εὐλαβούμενον τὸ ποιητικόν.

4. τὸ ἐν πολλὰ ποιεῖν.

5. μὴ ἐπιζευγνύναι.

6. μετὰ συνδέσμον λέγειν.

7. By negative epithets.

VII.—1. Τὸ δὲ πρέπον ἔξει ἡ λέξις, ἂν ᾗ παθητικὴ τε καὶ ἠθικὴ, καὶ τοῖς ὑποκειμένοις πράγμασιν ἀνάλογον. But ἀνάλογον is, ἂν μῆτε περὶ εὐόγκων αὐτοκαβδάλως λέγεται, μῆτε περὶ εὐτελῶν σεμνῶς· μὴδ' ἐπὶ τῷ εὐτελεῖ ὀνόματι ἐπὶ κόσμος. Instances. See Hobbes.

VIII. On the rhythms. See the notes, p. 227, sq.

XI. Εἰρομένη λέξις, ἡ οὐδὲν ἔχει τέλος καθ' αὐτήν, ἀν μὴ τὸ πρᾶγμα λεγόμενον τελειωθῇ.

Κατεστραμμένη, ἡ ἐν περιόδῳ. And περίοδος is defined to be λέξις ἔχουσα ἀρχὴν καὶ τελευτὴν αὐτὴν καθ' αὐτήν, καὶ μέγεθος εὐσύνοπτον· and it must finish with the sense, and not be cut off.

5. Περίοδος δὲ, ἡ μὲν ἐν κώλοισ· ἡ δὲ ἀφελής. "Ἐστὶ δὲ ἐν κώλοισ μὲν λέξις ἡ τετελειωμένη τε καὶ διηρημένη, καὶ εὐανάπνευστος, μὴ ἐν τῇ διαιρέσει, ὥσπερ ἡ εἰρημένη περίοδος, ἀλλ' ὅλη. Κῶλον δ' ἐστὶ τὸ ἕτερον μῶριον ταύτης. Ἀφελῇ δὲ λέγω τὴν μονόκωλον.

7. And ἡ ἐν κώλοισ is either διηρημένη or ἀντικειμένη.

9. Παρομοίωσις is when ὅμοια τὰ ἔσχατα ἔχῃ ἑκάτερον τῶν κώλων.

X.—2. Since τὸ μανθάνειν ῥαδίως ἡδὺ φύσει πᾶσιν, κύρια, μεταφοραὶ, and εἰκονες chiefly contribute to the fundamental principle of elegance, μάθησις.

4. Ἀνάγκη δὴ, καὶ λέξιν, καὶ ἐνθυμήματα ταῦτα εἶναι ἀσπεῖα, ὅσα ποιεῖ ἡμῖν μάθησιν ταχεῖαν.

5. καὶ ἂν ἀντικειμένως λέγεται.

7. Of the four kinds of metaphors, αἱ καθ' ἀναλογίαν εὐδοκимоῦσι μάλιστα.

XI.—1. A man is said ποιεῖν πρὸ ὁμμάτων, ὅσα ἐνεργοῦντα σημιώνει. See Hobbes, p. 337.

XII. Each kind of oratory has its proper λέξις.

Now the λέξις γραφικὴ is ἡ ἀκριβεστάτη· but the ἀγωνιστικὴ is ἡ ὑποκριτικωτάτη. Ταύτης δὲ δύο εἶδη· ἡ μὲν γὰρ ἠθικὴ· ἡ δὲ παθητικὴ.

4. And δημηγορικὴ λέξις παντελῶς ἔοικε τῇ σκιαγραφίᾳ.

5. ἡ δὲ δίκη ἀκριβέστερον.

6. ἡ δὲ ἐπιδεικτικὴ λέξις γραφικωτάτη· δευτέρα δὲ ἡ δικανικὴ.

XIII.—1. The parts of a speech are two, ἀναγκαῖον γὰρ, τὸ πρᾶγμα εἰπεῖν, περὶ οὗ, καὶ τοῦτ' ἀποδείξαι.

2. Hence the *πρόθεσις* and *πίστις* are τὰ ἀναγκαῖα μόρια.

4. But there are in all four, *προοίμιον*, *πρόθεσις*, *πίστις*, *ἐπιλόγιος*.

XIV. Προοίμιον ἐστὶν ἀρχὴ λόγου· ὅπερ ἐν ποιήσει πρόλογος, καὶ ἐν ἀλλήσει προαῦλιον. For this and the next chapter, see Hobbes, p. 339, sqq.

XVI. Διήγησις δ' ἐν μὲν τοῖς ἐπιδεικτικοῖς ἐστὶν οὐκ ἐφεξῆς, ἀλλὰ κατὰ μέρος.

4. In *δικανική*, the *διήγησις* must be clear, and the orator should, by a *παραδιήγησις*, tell ὅσα εἰς τὴν ἑαυτοῦ ἀρετὴν φέρει, ἢ θατέρου κακίαν, ἢ ὅσα ἡδέα τοῖς δικασταῖς.

7. Πεπραγμένα δεῖ λέγειν, ὅσα μὴ πραττόμενα ἢ οἶκτον, ἢ δεινῶσιν φέρει.

8. And the *διήγησις* must be *ἡθική*. 1. By showing the *προαίρεσις*. 2. τὰ ἐπόμενα ἐκάστῃ ἤθει. 3. μὴ ὡς ἀπὸ διανοίας λέγειν, ἀλλ' ὡς ἀπὸ προαιρέσεως.

10. Ἐτί, ἐκ τῶν παθητικῶν λέγε, διηγούμενος καὶ τὰ ἐπόμενα, καὶ ἃ ἴσασι, καὶ τὰ ἰδίᾳ ἢ αὐτῷ, ἢ ἐκείνῳ προσόντα. Καὶ εὐθὺς εἰσάσασγε σεαυτὸν ποῖον τινα, ἵνα ὡς τοιοῦτον θεωρῶσι, καὶ τὸν ἀντίδικον· λανθάνων δὲ ποιεῖ.

11. But in *δημηγορία*, *διήγησις* is least used, and only *περὶ μελλόντων*, ἵνα ἀναμνησθέντες ἐκείνων βέλτιον βουλευσῶνται *περὶ τῶν ὕστερον*.

XVII. Πίστις must be ἀποδεικτική, upon four points. See Hobbes, p. 343, sq. As also for the two next chapters.

THE END.

THE POETIC

OF

ARISTOTLE,

LITERALLY TRANSLATED, WITH A SELECTION OF NOTES,
AN ANALYSIS, AND QUESTIONS.

BY

THEODORE BUCKLEY, B.A.

OF CHRIST CHURCH.

THE POETIC.

CHAP. I.

On Poetry in general, as an imitative Art, and its different Species.

LET us speak concerning poetry itself, and its [different] species¹; what power each possesses, and how fables must be composed, in order that poetry may be such as is fitting: further still, [let us show] of how many and what kind of parts it consists; and in like manner [let us treat] concerning such other things as pertain to this method, beginning, conformably to nature, first from such things as are first.

1. On Poetry, its influence and species.

The epopee, therefore, and tragic poetry, and moreover comedy, and dithyrambic poetry, and the greatest part of the art pertaining to the flute and the lyre², are all entirely imitations³. They differ, however, in three things; for [they differ] either by imitating through means different in kind, or by imitating different objects, or in a different, and not after the same manner. For as certain persons assimilating, imitate many things by colours and figures, some indeed through art, but others through custom, [and others through voice]⁴; thus also in the afore-

2. The imitative arts.

3. Their difference.

4.

¹ "Poesis in species sive formas (εἶδη), formæ rursus in partes (μέρη, μέρη) dividuntur." Ritter.

² Cf. Plato Theag. p. 10. C. Cithern-playing was one of the favourite accomplishments of the Athenian youth, ibid. p. 8. E. Alcib. Pr. p. 26. D. Læm. and Olympiodor. in eund. t. ii. p. 65. ed. Creuz.

³ See Ritter, and Twining's Dissertations and first note.

⁴ Hermann reads φέρεται for φερέται with Madius, but Ritter condemns the words as spurious.

mentioned arts, all of them indeed produce imitation in rhythm, words, and harmony; and in these, either distinctly, or mingled together, as, for instance, the arts of the flute and the lyre alone employ harmony and rhythm⁵; and this will also be the case with any other arts which possess a power of this kind, such as the art of playing on reed-pipes. But the arts pertaining to dancing imitate by rhythm, without harmony; for dancers, through figured rhythms, imitate manners, and passions, and actions. But the epopee alone imitates by mere words⁶ or metres, and by these either mingling them with each other, or employing one certain kind of metres, which method has been adopted up to the present time⁷. For otherwise we should have no common name, by which we could denominate the Mimes of Sophron and Xenarchus, and the dialogues of Socrates; or those who imitate by trimetres, or elegies, or certain other things of this kind; except that men joining with metre the verb *to make*⁸, call some of these *makers of elegies*, but others epic *makers*, not as poets according to imi-

5. Dancing imitates by rhythm only.

6. The epopee by words.

7. Etymology of the name Poet.

⁵ Cf. Rhet. iii. 8.

⁶ There is much difficulty about this definition of *ἱποποιία*, as *λόγοις ψιλῶς* is supposed by some to mean *prose*, (see Robertsonell, p. 14,) by others, *verse without music*. The former opinion is advocated by Hermann, the latter by Buhle. Ritter seems to have clearly shown that *ἢ τοῖς μέτροις* is added, not as an explanation of *λόγοις ψιλῶς*, but disjunctively, and that *ἱποποιία* is used in a new sense for certain parts of prose-writing as well as verse. The sense is, therefore, "by prose or by metre, but unaccompanied by song."

⁷ Ritter observes that the following passage is an excuse for the new signification of *ἱποποιία*.

⁸ It may be necessary to observe, that the Greek word (*ποιητής—poietes*) whence *poeta*, and *poet*, is, literally, *maker*; and maker, it is well known, was once the current term for *poet* in our language; and to write verses, was, to *make*. Sir Philip Sidney, speaking of the Greek word, says, "wherein, I know not whether by luck or wisdom, we Englishmen have *met* with the Greeks, in calling him *maker*." Defense of Poesy.

So Spenser:

The god of shepherds, *Tityrus*, is dead,
Who taught me, homely, as I can, to *MAKE*.

Shep. Cal. June. Twining.

tation, but denominating them in common according to measure. For they are accustomed thus to denominate them, if they write any thing medical or musical in verse. There is, however, nothing common to Homer and Empedocles except the measure; on which account, it is right indeed to call the former a poet; but the latter, a physiologist rather than a poet. In like manner, though some one, mingling all the measures, should produce imitation, as Chæremôn has done in his *Centaur*, a mixed rhapsody of all the metres, yet he must not be called a poet⁹. Let it then be thus laid down concerning these particulars. But there are some kinds of poetry which employ all the before-mentioned means, I mean, rhythm, melody, and measure, such as dithyrambic poetry and the *Nomes*¹⁰, and also tragedy and comedy. But these differ, because some of them use all these at once, but others partially. I speak, therefore, of these differences of the arts in respect to the means by which they produce imitation.

8. Which name is common to writers on other subjects.

9. But the adherence to metre does not make the poet.

10. Means respectively employed by the different kinds of poetry.

CHAP. II.

On Imitation, and its usual Objects.

BUT since imitators imitate those who do something, and it is necessary that these should either be worthy or depraved persons; (for manners nearly always depend on these alone, since all men differ in their manners by vice and virtue;) it is necessary either [to imitate] those who are better than we are,

1. Objects of imitation either good or bad, as in painting.

⁹ "For imitation makes the poet, not the metre." Ritter.

¹⁰ In dithyrambic or *Bacchic* hymns, and in the *Nomes*, which were also a species of hymns to Apollo and other deities, *all* the means of imitation were employed *together*, and *throughout*: in tragedy and comedy, *separately*; some of them in one part of the drama, and some in another. In the *choral* part, however, at least, if no where else, *all*, melody, rhythm, and words, must probably have been used *at once*, as in the hymns. Twining.

- or those who are worse, or such as are like ourselves¹, in the same manner as painters do. For Polygnotus, indeed, painted men more beautiful than they are, but Pauson less so, and Dionysius painted them as they are². But it is evident that each of the before-mentioned imitations will have these differences; and imitation is different, by imitating different things
2. And imitations different.
3. after this manner. For there may be differences of this kind in dancing, in playing on the flute, on the lyre, and also in orations and mere measure. Thus Homer imitates better men³ [than exist], but Cleophon men as they are; and Hegemon the Thasian, who first made parodies, and Nicochares, who wrote
4. the *Deliad*, imitate worse characters. In like manner in dithyrambics and the *Nomi*, [as Timotheus and Philoxenus have imitated the Persians and the Cyclops,] one may imitate⁴. By this very same difference, also, tragedy differs from comedy. For the one seeks to imitate worse, but the other better men than are.

CHAP. III.

The third difference of Poetry according to the manner of imitating.

1. Imitations different in the manner.
- THERE is also a third difference of these, consisting in the manner in which one may imitate each of

¹ Or, "those who are commonly found."

² Polygnotus and Dionysius lived about Ol. 80; Pauson about Ol. 90. On the following poets see Ritter.

³ Superior, that is, in courage, strength, wisdom, prudence, etc.—in *any* laudable, useful, or admirable quality, whether such as we denominate *moral*, or not. If superiority of *moral* character only were meant, the assertion would be false.—It is necessary to remember here, the *wide* sense in which the ancients used the terms *virtus*, *vice*—*good*, *bad*, etc. See note 19.—The difference between *moral* and *poetical* perfection of character, is well explained by Dr. Beattie, *Essay on Poetry*, etc., Part I. ch. 4. The heroes of Homer, as he well observes, are "*finer animals*" than we are, (p. 69,) not *better men*. Twining.

⁴ Ritter would throw out the words enclosed in brackets. See his note.

them. For by the same instruments the same things may be imitated, the poet sometimes himself narrating, and sometimes assuming another person [as Homer does]¹; or speaking as the same person without any change; or as all imitate [who do so] by deed and action. But imitation consists in these three differences, as we said in the beginning; viz. in the means, the objects, or the manner. Hence, Sophocles will in one respect be the same imitator as Homer, for both of them imitate elevated characters; and in another the same as Aristophanes, for both of them imitate persons engaged in acting; [²whence also it is said that certain persons call their works *dramas*, because they imitate those who are engaged in *doing* something. On this account the Dorians lay claim to the invention of tragedy and comedy; of comedy indeed the Megarians, as well those who are natives of Greece, as being invented by them at the time when their government was a democracy, as those of Sicily. For thence was the poet Epicharmus, who was much prior to Chonides and Magnes. But some of those Dorians who inhabit Peloponnesus lay claim to tragedy, making names an evidence. For they allege that they call their villages *komai*, but the Athenians *demoi*; as if comedians were not so denominated from *komazein*, [i. e. *to revel*,] but from their wandering through villages, being ignominiously expelled from the cities. The verb *poiein* also, or *to make*, is by the Dorians denominated *dran*, but by the Athenians *prattein*.] And thus much concerning the differences of imitation, as to their number and quality.

2. And the differences of imitation are three.

3. Etymology of the drama and claims to its invention.

¹ But this assertion is not correct, and Ritter shows that the words are spurious.

² The learned note of Ritter seems to condemn the whole of this passage as spurious.

CHAP. IV.

The Causes and Progress of Poetry.

1. Two causes
2. of poetry, and those natural:
the first, the natural taste for imitation,
3. seen in respect to the works of art;
4. because to learn is ever pleasant.
5. Hence a delight in images.
- Two causes, however, and these physical, appear to have produced poetry in general. For to imitate is congenial to men from childhood. And in this they differ from other animals, that they are most imitative, and acquire the first disciplines through imitation; and that all men delight in imitations. But an evidence of this is that which happens in the works [of artists]. For we are delighted on surveying very accurate images, the realities of which are painful to the view; such as the forms of the most contemptible animals, and dead bodies. The cause, however, of this is, that learning is not only most delightful to philosophers, but in like manner to other persons, though they partake of it but in a small degree. For on this account, men are delighted on surveying images, because it happens that by surveying they learn and infer what each particular is; as, that *this* is an image of *that man*; since, unless one happen to have seen [the reality], it is not the imitation that pleases¹, but [it is through] either the workmanship, or the colour, or some other cause of the like kind. But imitation, harmony, and rhythm being natural to us, (for it is evident that measures or metres are parts of rhythms,²) the earliest among mankind, making a gradual progress in these things
6. And from imitation, harmony, and rhythm,

¹ Ritter well reads *ὅχι μίμημα ᾗ μίμημα*.

² "RHYTHM differs from METRE, inasmuch as RHYTHM is proportion, applied to any motion whatever; METRE is proportion, applied to the motion of words spoken. Thus, in the drumming of a march, or the dancing of a hornpipe, there is *rhythm*, though *no metre*; in *Dryden's* celebrated Ode there is METRE as well as RHYTHM, because the poet with the *rhythm* has associated certain words. And hence it follows, that, though ALL METRE is RHYTHM, yet ALL RHYTHM is NOT METRE." Harris's Philol. Inquiries, p. 67,—where it is also observed, very truly, that "no English word expresses *rhythmus* better than the word *time*." P. 69, note. Twining.

from the beginning, produced poetry from extemporaneous efforts. But poetry was divided according to appropriate manners. For men of a more venerable character imitated beautiful actions, and the actions of such men; but the more ignoble imitated the actions of depraved characters, first composing vituperative verses, in the same manner as the others composed hymns and encomiums. Of the authors, therefore, before Homer, we cannot mention any poem of this kind; though it is probable that there were many such writers. But if we begin from Homer, there are such for instance as his *Margites*³, and some others, in which, as being suited, the measure is Iambic. Hence, also, the Iambic verse is now called, because in this metre they used to *Iambize* (i. e. defame) each other. Of ancient poets, likewise, some composed heroic poems, and others Iambic. But as Homer was the greatest of poets on serious subjects, (and this not only because he alone imitated well, but also because he made dramatic imitations,) thus too he first demonstrated the figures of comedy, not dramatically exhibiting invective, but ridicule. For the *Margites* bears the same analogy to comedy, as the *Iliad* and *Odyssey* to tragedy. But when tragedy and comedy had appeared, those poets who were naturally impelled to each kind of poetry, some, instead of writing Iambics, became comic poets, but others, instead of [writing] epic poems, became the authors of tragedies, because these forms [of poetry] are greater and more esteemed than those. To consider, therefore, whether tragedy is now perfect in its species or not, regarded as well with reference to itself as to the theatres, is the business of another treatise. Both tragedy and comedy, therefore, at first originated from extemporaneous efforts.

men originally produced poetry, 7. which was varied according to suitable manners.

8. No satirical poetry before Homer's *Margites*.

9. The old poets thence were either heroic or Iambic.

10. Progress of the two styles, upon the introduction of tragedy and comedy.

11.

12. Both at first extemporaneous.

³ The character of the hero is handed down to us thus:

Τὸν δ' οὐτ' ἀρ' σκαπτῆρα θεοὶ θίσαν οὐτ' ἀροτῆρα
οὐτ' ἄλλαι τι σοφόν, πάσῃ δ' ἡμάρτανε τίχυνε.

And again,

πολλ' ἥπιστατο ἔργα, κακῶς δ' ἥπιστατο πάντα.

A character not unlike Sir Abel Handy in Morton's "School of Reform."

13. *Æschylus improves tragedy, and then Sophocles.*

14. *It becomes elevated in style.*

Suitableness of the Iambic metre.

- (And tragedy, indeed, originated from those who led the dithyramb, but comedy from those who sung the Phallic verses, which even now in many cities remain in use; and it gradually increased as obvious improvements became known. And tragedy, having experienced many changes, rested when it had arrived at its proper nature. *Æschylus*, also, first increased the number of players from one to two⁴, abridged the functions of the chorus, and made one of the players act the chief part⁵. But *Sophocles* introduced three players into the scene, and added scenic painting. Further still, the magnitude [of tragedy increased] from small fables and ridiculous diction, in consequence of having been changed from satyric⁶ composition, it was late before it acquired dignity. The metre also of tragedy, from tetrameter, became Iambic (for at first they used tetrameter in tragedy, because poetry was then satyrical, and more adapted to the dance, but dialogue being adopted, nature herself discovered a suitable metre; for the Iambic measure is most of all adapted to conversation. And as an evidence of this, we most frequently speak in Iambics in familiar discourse with each other; but we seldom speak in hexameters, and then only when we depart from that harmony which is adapted to conversation). Again, tragedy is said to have been further adorned, with a multitude of episodes, and
15. other particulars. Let, therefore, thus much said suffice concerning these things; for it would perhaps be a great toil to discuss every particular.

⁴ See my introduction to *Æschylus*, p. vii. ed. Bohn.

⁵ See *ibid.* note.

⁶ *Satyric*, from the share which those fantastic beings called *Satyrs*, the companions and *play-fellows* of *Bacchus*, had in the earliest Tragedy, of which they formed the chorus. *Joking* and *dancing* were essential attributes of these rustic semi-deities. Hence the "*ludicrous language*" and the "*dancing genius*" of the old Tragedy, to which the TROCHAIC or *running* metre here spoken of was peculiarly adapted; being no other than this:

"Jolly mortals, fill your glasses, noble deeds are done by wine."

The reader will not confound *satyric* with *satiric*; nor the

CHAP. V.

On Comedy, and its Origin.—Difference of Epopee and Tragedy.

BUT comedy is, as we have said, an imitation indeed of bad characters, yet it does not imitate them according to every vice, [but the ridiculous only ;] since the ridiculous is a portion of turpitude. For *the ridiculous is a certain error, and turpitude unattended with pain, and not destructive.* Thus, for instance, a ridiculous face is something deformed and distorted without pain. The transitions, therefore, of tragedy, and the causes through which they are produced, are not unknown ; but [those of] comedy have escaped our knowledge, because it was not at first an object of attention. For it was late before the magistrate gave a chorus to comedians¹ ; but prior to that period, the choruses were voluntary. Comedy, however, at length having obtained a certain form, those who are said to have been poets therein are commemorated. But it is unknown who it was that introduced masks or prologues,² or a multitude of players, and such like particulars. But Epicharmus and Phormis [were the first] to compose fables ; which, therefore, originated from Sicily. But among the Athenians, Crates, rejecting the Iambic³

1. Comedy an imitation of the ridiculous.

2. Its changes not known.

3. Nor the inventors of masks, etc.

Greek *satyric* drama with the *satire* of Roman origin. See Harris's Phil. Arrang. p. 460, note. Dacier's Preface to Horace's Satires. The two words are of different derivations. Twining.

¹ This was almost equivalent to the modern "licensing" of plays, but was probably conducted with more taste and less absurdity. The poet was said *αλτρίν χορόν*, the choragus *διδόναι*, and, if the piece was approved by the archon, the poet *χορόν δαβει*. See Ritter.

² But this is evidently corrupt. Ritter reads *λόγους* with Hermann, understanding those passages which the single actor either recited, or spoke in conversation with the chorus, opposing *λόγους ὑποκριτῶν* to the *δραματα κωμικῶν*.

³ *Iambic*, i. e. *satirical*, and *personally* so, like the old *Iambi*,

4. Similarity of tragedy to epic poetry.

form, first began generally to compose speeches and fables. The epopee, therefore, is an attendant on tragedy, [with the exception of the long metre⁴,] since through this it is an imitation of worthy characters and actions. But it differs from tragedy in that it has a simple metre, and is a narration. It also [differs from it] in length. For tragedy is especially limited by one period of the sun, or admits but a small variation from this period; but the epopee is not defined within a certain time, and in this it differs; though at first they observed the same conduct with tragedy⁵, no less than epic poetry. With respect to the parts, however, [of the epopee and tragedy,] some are the same in both, but others are peculiar to tragedy. Hence he who knows what is a good or bad tragedy, knows the same in respect to epic poetry. For those things which the epopee possesses are to be found in tragedy; but every thing which tragedy contains is not in the epopee.

5. Their common and distinctive parts.

CHAP. VI.

On the Form and End of Tragedy, and on its six parts, especially the Plot.

1. CONCERNING, therefore, imitative poetry in hexameters, and comedy, we shall speak hereafter. Let us now, however, speak concerning tragedy, assuming the definition of its essence as arising from what has been already said. *Tragedy, therefore, is an imitation of a worthy or illustrious and perfect action,*
2. Definition of tragedy.

invectives, or lampoons, of which Aristotle speaks above, and from which the *iambic metre*, which is not here alluded to, took its name. Twining.

⁴ The words *μέχρι μόνου μέτρου μεγάλου* or *μετά λόγου* are thrown out by Ritter, and can have no meaning.

⁵ On the question of the unities, see Twining, note 43, and my own note on *Æsch. Eum.* 235.

*possessing magnitude, in pleasing language, using separately the several species of imitation in its parts, by men acting, and not through narration, through pity and fear effecting a purification from such like passions*¹. But by *pleasing language*, I mean language

possessing rhythm, harmony, and melody. And it *uses separately the several species* [of imitation], because some parts of the tragedy are alone perfected through metres, and others again through melody. But since they produce imitation by acting, in the first place the ornament of the spectacle² will be a certain part of the tragedy, and in the next place the melopœia³ and the diction. For by these they produce imitation. But I call diction, indeed, the composition of the metres; and melopœia that, the whole power of which is apparent. Since, however, [tragedy] is an imitation of action, and action is effected by certain agents, who must needs be persons of a certain description both as to their manners and their sentiments⁴, (for from these we say that

3. Its language, and different manners of imitation;
4. of scenery, melopœia, and diction.

5. Two causes of action, sentiments, and moral habit.

¹ On the different interpretations of this difficult passage, see Twining, note 45. Ritter has followed the views of Lessing, in a note too full of argument to admit of condensation. Taylor's note is, as usual, a blundering Neo-Platonic attempt to reconcile the discrepancies of Aristotle and Plato.

² *Decoration*—literally, the decoration of the *spectacle*, or *sight*. In other places it is called the *spectacle*, or *sight* only—*ὄψις*. It comprehends *scenery*, *dresses*—the whole visible apparatus of the theatre. I do not know any single English word that answers fully to the Greek word. Twining.

³ *Melopœia*—literally, the *making*, or the *composition*, of the *Music*; as we use *Epopœia*, or according to the French termination, which we have naturalized, *Epopee*, to signify *epic poetry*, or *epic-making*, in general.—I might have rendered it, at once, the *music*; but that it would have appeared ridiculous to observe, of a word so familiar to us, even that "*its meaning is obvious*." Twining.

⁴ *Dianoia*—*διανοία*, in a general way, may be defined to be *διεξοδική τοῦ λόγου ἐναργεία*, i. e. *the discursive energy of reason*. But accurately speaking, it is *that power of soul which reasons scientifically, deriving the principles of its reasoning from intellect*. This latter definition, however, pertains to it, so far as it is not influenced in its reasonings by imagination and false opinions. TAYLOR, who objects to translating it "*sentiments*." I prefer following Twining, understanding sentiments not ex-

- actions derive their quality,) hence there are naturally two causes of actions, (sentiments and moral habit, and through these actions all men obtain or fail of the object of their wishes. But a fable, indeed, is an imitation of action; for I mean by a *fable* here, the composition of incidents. By *manners*, I mean those things according to which we say that agents are persons of a certain character; and by *sentiment*, that through which those who speak demonstrate anything, or explain their meaning. It is necessary, therefore, that the parts of every tragedy should be six, from which the tragedy derives its quality. But these are, fable and manners, diction and sentiment, spectacle and melopœia. Of these parts, however, two pertain to the means by which they imitate; one, to the manner; and three, to the objects⁵. And besides these, there are no other. [Not a few [tragic poets], therefore, as I may say, use all these parts⁶.] For every tragedy has scenic apparatus, manners, and a fable, and melody, and, in a similar manner, sentiment. But the greatest of these is the combination of the incidents. For tragedy is an imitation not of men, but of actions, [of life, and of felicity. For infelicity consists in action, and the end is a certain action, and not a quality⁷.] Men, however, are persons of a certain character, according to their manners; but according to their actions, they are happy, or the contrary. The end of tragedy, therefore, does not consist in imitating manners, but it embraces manners on account of actions; so that the action and the fable are the end of tragedy. But the end is the greatest of all things. Moreover, without action, tragedy cannot exist; but it may exist without
6. Definition of fable, manners, and sentiment.
7. Six parts in every tragedy.
8. Some tragic poets use all these parts.
9. Tragedy an imitation of actions.
10. What constitutes character. Manner not the end of tragedy;
11. but action.

pressed, (*γνώμας*, cf. *Rhet.* ii. 21,) but in the mind, and forming the mainspring of action.

⁵ i. e. *λίξις* and *μελοποιία* are the means or instruments, *ᾠδὴς* the manner, *μῦθος*, *ἥθη*, and *διανοία*, the objects.

⁶ An evident interpolation. See Ritter.

⁷ Thus stands the text, as freed from the additions made by Aldus, or other Italian critics. But the whole passage is probably an interpolation, as Ritter seems to have clearly shown. See his judicious note.

manners. } For most modern tragedies are without manners; and in short, many poets are such as among painters Zeuxis is when compared with Polygnotus. For Polygnotus, indeed, painted the manners of the good; but the pictures of Zeuxis are without manners. Further still, if any one place in a continued series moral speeches, sayings, and sentiments well framed, he will not produce that which is the work of tragedy; but that will be much more a tragedy, which uses these things as subordinate, and which contains a fable and combination of incidents. Add to this, that the greatest parts by which fable allures the soul, are the *revolutions* and *discoveries*. Again, it is likewise an evidence of this, that those who attempt to write tragedies, acquire the power of expressing a thing in tragic diction and manners accurately, before they can compose a fable, as was the case with nearly all the first poets. The fable, therefore, is the principal part, and as it were the soul of tragedy; but the manners are next in rank⁸. [Just as in painting, if any one were to spread the most beautiful pigments on promiscuously, he would not please the view so much as by outlining an image with white colour only. Tragedy also is an imitation of action, and on this account, especially, [an imitation] of agents. But the sentiments rank third. And by them [I mean] *the power of explaining what is inherent in the subject, and adapted to it*, which is the peculiar province of politics⁹ and rhetoric. For the ancient poets represent those whom they introduce as speaking politically; but those of the present day, rhetorically. But the manners are, whatever shows what the deliberate choice is. Hence those speeches are without manners, in which there is altogether

12. Proof.

13. The revolution and discovery cause most pleasure.

14. Proof from the difficulty of forming a plot.

15. Comparison of painting.

16. Definition of sentiment.

17. Of manners and of sentiment.

⁸ The rest of this chapter is condemned by Ritter as an interpolation.

⁹ The reader, here, must not think of our modern *politics*.—The *political*, or *civil art*, or *science*, was, in Aristotle's view, of wide extent and high importance. It comprehended *ethics* and *eloquence*, or the art of public speaking; every thing, in short, that concerned the well-being of a *state*.—See note 57. Twining.

18. Of
diction.

19. Melo-
poia and
spectacle,
the latter
least per-
taining to
art.

nothing that the speaker may choose or avoid¹⁰. But *sentiment is that through which they show that a certain thing is, or is not, or by which they universally enunciate something.* And the fourth part of tragedy is diction. But I say, as was before observed, that *diction is interpretation by the means of words, and which also has the same power in verse and prose.*

But of the remaining five, the melopoeia is the greatest of the embellishments. But the scenic decoration is alluring indeed; yet it is most inartificial, and is in the smallest degree akin to poetry. For the power of tragedy remains, even when unaccompanied with scenic apparatus and players. And further still, the art of the mechanic possesses more power in constructing the scenic apparatus than that of the poet.]

CHAP. VII.

On the Requisites and Length of Tragic Action.

1. Defini-
tion of a
plot.

3. Of a
dramatic
whole,
and its
parts.

THESE things being defined, let us in the next place show what the combination of the incidents ought to be, since this is the first and greatest part of tragedy.

2. But it is granted to us, that tragedy is the imitation of a perfect and whole action, and of one which possesses a certain magnitude; for there may be a whole which has no magnitude. But a whole is that which has a beginning, middle, and end. And the beginning is that which necessarily is not itself posterior to another thing; but another thing is naturally expected to follow it. On the contrary, the end is that which is itself naturally adapted to be posterior to another thing, either from necessity, or for the most part; but after this there is nothing else. But the middle is that which is itself after another thing, and after which there is something else. Hence, it is necessary that those who compose fables properly, should neither

¹⁰ These words are differently placed in some editions.

begin them casually, nor end them casually, but should employ the above-mentioned forms [of beginning, middle, and end]. Further still, since that which is beautiful, whether it be an animal, or any thing else which is composed from certain parts, ought not only to have these parts arranged, but a magnitude also which is not casual. For the beautiful consists in magnitude and order. Hence, neither can any very small animal be beautiful; for the survey of it is confused, since it is effected in a time nearly insensible. Nor yet a very large animal; for it is not surveyed at once, but its subsistence as one and a whole escapes the view of the spectators; such as if, for instance, it should be an animal of ten thousand stadia in length. Hence, as in bodies and in animals it is necessary there should be magnitude; but such as can easily be seen; thus also in fables, there should be length, but this such as can easily be remembered¹. The definition, however, of the length with reference to contests² and the senses, does not fall under the consideration of art. For if it were requisite to perform a hundred tragedies, [as is said to have been the case more than once³,] the performance ought to be regulated by a clepsydra. But the definition [of the length of the fable] according to the nature of the thing, is this, that the fable is always more beautiful the greater it is, if at the same time it is perspicuous. Simply defining the thing, however, we may say, [that a fable has an appropriate magnitude,] when the time of its duration is such as to render it probable that there can be a transition from prosperous to adverse, or from adverse to prosperous fortune, according to the necessary or probable order

4. Magnitude and order the constituents of beauty.

5. Magnitude in reference to plots;

6. 1stly, as to dramatic exhibitions.

7. 2ndly, as to intrinsic value.

¹ The unity here spoken of, it must be remembered, is not *absolute* and *simple*, but *relative* and *compound*, unity; a unity consisting of different *parts*, the relation of which to each other, and to the whole, is easily perceived at one view. On this depends the perception of beauty in *form*.—In objects too extended, you may be said to have *parts*, but no *whole*: in very minute objects the *whole*, but no *parts*. Twining.

² I. e. to its representation at the dramatic contests.

³ These words are condemned by Ritter.

of things as they take place. This is a sufficient definition of magnitude.

CHAP. VIII.

On the Unity of the Fable.

1. On dramatic unity. THE fable, however, is one, not as some suppose, if one person is the subject of it; for many things which are infinite in kind happen [to one man], from a certain number of which no one event arises. Thus, also, there are many actions of one man, from which no one action is produced. Hence all those poets appear to have erred who have written the Heracleid, and Theseid, and such like poems. For they suppose that because Hercules was one person, it was fit that the fable should be one. Homer, however, as he excelled in other things, appears likewise to have seen this clearly, whether from art, or from nature. For in composing the Odyssey, he has not related every thing which happened to Ulysses; such as the being wounded in Parnassus¹, and pretending to be insane² at the muster of the Greeks; one of which taking place, it was not necessary or probable that the other should happen; but he composed the Odyssey, as also his Iliad, upon one³ action. It is requisite, therefore, that as in other imitative arts one imitation⁴ is the imitation of one thing, thus,
2. Previous misconceptions on the subject.
3. Conduct of Homer.
4. Application of unity to the plot.

¹ This incident is, however, related, and at considerable length, in the ninth book of the Odyssey, (v. 563 of Pope's translation,) but digressively, and incidentally; it made no essential part of his *general plan*. Twining.

² A ridiculous story.—"To avoid going to the Trojan war, Ulysses pretended to be mad; and, to prove his insanity, went to plough with an ox and a horse; but Palamedes, in order to detect him, laid his infant son, Telemachus, in the way of the plough; upon which Ulysses immediately stopped, and thereby proved himself to be in his right senses."—(Hyginus, etc.) Twining.

³ I follow Ritter's text.

⁴ i. e. one *imitative work*. Thus one picture represents, or

also, [in tragedy,] the fable, since it is an imitation of action, should be the imitation of one action, and of the whole of this, and that the parts of the transactions should be so arranged, that any one of them being transposed, or taken away, the whole would become different and changed. For that which when present or not present produces no sensible [difference], is not a part of the fable⁴.

CHAP. IX.

On the difference between History and Poetry, and how historical matter should be used in Poetry.

BUT it is evident from what has been said, that it is not the province of a poet to relate things which have happened, but such as might have happened, and such things as are possible according to probability, or which would necessarily have happened¹. For an historian and a poet do not differ from each other, because the one writes in verse and the other in prose; for the history of Herodotus might be written in verse, and yet it would be no less a history

1. The poet does not relate real events,

2. for then he would clash with the historian.

should represent, but one thing;—a single object, or a single action. etc. So, every poem (the *Orlando Furioso* as much as the *Iliad*) is *one imitation*—one imitative work, and should imitate *one action*, in Aristotle's sense of *unity*, like the poems of Homer; not a number of actions unconnected with each other, or connected merely by their common *relation to one person*, as in the *Thesoids*, etc., or to *one time*, as in the poem of Ariosto; or, by their *resemblance* merely, as in the *Metamorphoses* of Ovid. Twining.

² "The painter will not inquire what things may be admitted without much censure. He will not think it enough to show that they *may* be there, he will show that they *must* be there; that their *absence* would render his picture *maimed and defective*.—They should make a *part of that whole which would be imperfect without them*."—Sir J. Reynolds, Disc. on Painting, p. 106. Twining.

¹ Cf. Sheridan's Critic, vii. 1. "What the plague! a play is not to show occurrences that happen every day, but things just so strange, that though they never did, they might happen."

3. Hence poetry is universal and philosophic.

4. Definition of universal and particular.

5. As is evident in comedy.

6. Real names retained in tragedy,

7. but not real names only.

8. Nor must we entirely confine ourselves to traditional fables.

with metre, than without metre. But they differ in this, that the one speaks of things which have happened, and the other of such as might have happened. Hence, poetry is more philosophic, and more deserving of attention, than history. For poetry speaks more of universals, but history of particulars. But *universal* consists indeed in relating or performing certain things which happen to a man of a certain description, either probably or necessarily, [to which the aim of poetry is directed in giving names²;] but *particular* consists in narrating what, [for example,] Alcibiades did, or what he suffered. In comedy, therefore, this is now become evident. For [comic poets] having composed a fable through things of a probable nature, they thus give whatever names they please³ to their characters, and do not, like Iambic poets, write poems about particular persons. But in tragedy they cling to real names. The cause, however, of this is that the possible is credible. Things, therefore, which have not yet been done, we do not yet believe to be possible; but it is evident that things which have been done are possible; for they would not have been done, if they were impossible. Not, indeed, but that in some tragedies there are one or two of known names, and the rest are feigned; but in others there is no known name; as, for instance, in *the Flower* of Agatho. For in this tragedy, the things and the names are alike feigned, and yet it delights no less. Hence, one must not seek to adhere entirely to traditional fables, which are the subjects of tragedy. For it is ridiculous to make this the object of search, because even known subjects are known but to a few, though at the same time they

² Ritter well observes that the perspicuity of this otherwise clear passage is destroyed by this absurd interpolation.

³ Thus nearly all the names in the tragedies of Terence and Plautus, thus Dromo and Sosia are applied to slaves, Pamphilus to a lover, Glycerium or Philumena to a lady, Pyrgopolinices or Thraso to soldiers. Also the names in Petronius and Apuleius, as Pannychis, Meroe, Fotis, etc. So Ben Jonson has personified the virtues and vices in "*Cynthia's Revels*," and elsewhere.

delight all men. From these things, therefore, it is evident that a poet ought rather to be the author of fables than of metres, inasmuch as he is a poet from imitation, and he imitates actions. Hence, though it should happen that he relates things which have happened, he is no less a poet. For nothing hinders but that some actions which have happened, are such as might both probably⁴ and possibly have happened, and by [the narration of] such he is a poet.

9. Hence the plot, rather than the metre, is the poet's object.

But of simple plots and actions, the episodic are the worst. But I call the plot episodic, in which it is neither probable nor necessary that the episodes follow each other. Such plots, however, are com-

10. Objection to, and definition of, episodic fables.

⁴ It may appear to the reader to be a strange observation, that "*some true events may be probable.*" But he will recollect what sort of events, and what sort of probability, Aristotle here speaks of: i. e. of extraordinary events, such as Poetry requires, and of that more strict and perfect probability, that closer connexion and visible dependence of circumstances, which are always required from the poet, though in such events, not often to be found in fact, and real life, and therefore not expected from the historian.

Aristotle alludes to these two lines of Agatho:

Τάχ' ἂν τις εἰκότι αὐτὸ τῦρ' εἶναι λέγοι,
Βροτοῖσι πολλὰ τυγχάνειν ἐκ εἰκότα.

Even *this*, it may be said, is *probable*,
That many things *improbable* should happen,
In human life.—

See Rhet. ii. 24. 10, and Bayle's Dict. Art. AGATHON, note [F], who mentions a similar maxim of St. Bernard's: "Ordinatissimum est, minus interdum ordinatè fieri." "Il est tout à fait de l'ordre, que de tems en tems il se fasse quelque chose contre l'ordre."

This general, and, if I may call it so, possible sort of probability, may be termed, the probability of romance; and these lines of Agatho furnish a good apologetical motto for the novel writer. It might be prefixed, perhaps, without impropriety, even to the best productions of the kind—to a CLARISSA, or a CECILIA. Nothing is so commonly complained of in such works, as their improbability; and often, no doubt, the complaint is well-founded: often, however, the criticism means nothing more, than that the events are uncommon, and proves nothing more, than the want of fancy, and an extended view of human life, in the reader. If the events were not uncommon, where would the book find readers? Twining.

- posed by bad poets indeed, through their own want of ability⁵; but by good poets, on account of the players⁶. For, introducing [dramatic] contests, and extending the plot beyond its capabilities, they are frequently compelled to distort the connexion of the parts. But, since tragedy is not only an imitation of a perfect action; but also of actions which are terrible and piteous, and actions principally become such, [and in a greater degree, when they happen contrary to opinion,⁷] on account of each other. * * * * For thus they will possess more of the marvellous, than if they happened from chance and fortune; since, also, of things which are from fortune, those appear to be most admirable, which seem to happen as it were by design. Thus the statue of Mityus at Argos, killed him who was the cause of the death of Mityus by falling as he was surveying it.⁸ For such events as these seem not to take place casually. Hence it is necessary that fables of this kind should be more beautiful.
11. Definition of the terrible.
12. Of chance circumstances.

CHAP. X.

Fables either simple or compound.

1. Of fables simple and complex. Of fables, however, some are simple, and others complex; for so also are the actions of which fables are the imitations. But I call the action *simple*,

⁵ Such is the sense of δι' αὐτοῦς—"propter ingenii tarditatem," Ritter.

⁶ i. e. that the play may not show off only one actor. Thus a modern dramatist writes a play for Charles Kean, and puts in a few episodes for Buckstone or Keeley. It is clear from this that plays were often written to suit particular performers.

⁷ These words are condemned as interpolated. But the apodosis to the whole sentence is wanting, and I have therefore marked the lacuna with Ritter.

⁸ A similar story of the death of a cruel beloved being killed by the falling of a statue of Cupid, is told by Theocritus, Id xxiii. sub fin.

from which taking place, as it has been defined, with continuity and unity, there is a transition without either revolution or *discovery*; but complex, from which there is a transition, together with discovery, or revolution, or both. It is necessary, however, 3. that these should be effected from the composition itself of the fable, so that from what has formerly happened it may come to pass that the same things take place either necessarily or probably. For it makes a great difference whether these things are effected on account of these, or after these.

CHAP. XI.

Now, revolution is a mutation, as has been stated, of 1. Definition of revolution;
actions into a contrary condition; and this, as we say, according to the probable, or the necessary. Thus in the "Œdipus,"¹ the messenger who comes with an intention of delighting Œdipus and liberating him from his fear respecting his mother, when he makes himself known, produces a contrary effect. Thus, too, in the "Lynceus," he indeed is introduced as one who is to die, and Danaus follows with an intention of killing him; but it happens from the course of incidents, that Lynceus is saved, and Danaus is slain. And discovery is, as the name signifies, a change 2. of discovery.
from ignorance to knowledge, or into the friendship or hatred of those who are destined to prosperous or adverse fortune. The discovery, however, is most beautiful, when at the same time there are, as in the "Œdipus,"² revolutions. There are, therefore, other 3. Other recognitions.
discoveries also. For sometimes it happens, as has been before observed, that there are discoveries of things inanimate³, and casual; or if some one has

¹ Cf. Soph. Œd. Tyr. 1014, sqq. Dind.

² Such is the *discovery* of Joseph by his brethren, Gen. xlv. —the most beautiful and affecting example that can be given. Twining.

³ I do not understand Aristotle to be here speaking of such

4. Feelings excited by revolution and discovery.

5. Different discoveries.

6. The third requisite is pathos or disaster.

performed, or has not performed, a thing, there is a recognition of it; but the discovery which especially pertains to the fable and the action is that before mentioned. For a discovery and revolution of this kind will excite either pity or fear; and tragedy is supposed to be an imitation of such actions [as excite fear and pity]. Again, it will happen that infelicity and felicity will be in such like discoveries. But since discovery is a discovery of certain persons, some [discoveries] are of one person only with reference to another, when it is evident who the other person is, but sometimes it is necessary to discover both persons. Thus Iphigenia was recognised by Orestes through the sending an epistle⁴; but another discovery was requisite to his being known by Iphigenia⁵. [Two parts of the fable, therefore, viz. revolution and discovery, are conversant with these things; but the third part is pathos. And of these, revolution and discovery have been already discussed. Pathos, however, is an action destructive, or lamentable; such as death when it is obvious, grievous pains, wounds, and such like particulars⁶.]

CHAP. XII.

On the Parts of Tragedy.

1 The parts of tragedy according to quantity.

[But we have before spoken of the parts of tragedy which are requisite to constitute its quality. The parts of tragedy, however, according to quantity, and

discoveries of "*inanimate things*" (rings, bracelets, etc.) as are the *means* of bringing about the *true* discovery—that of the *persons*. For, in what follows, it is implied that these "*other sorts of discovery*" produce neither *terror* nor *pity*, neither *happiness* nor *unhappiness*; which can by no means be said of such discoveries as are instrumental to the *personal* discovery, and, through that, to the catastrophe of the piece. Of these, he treats afterwards.—Dacier, I think, has mistaken this. Twining.

⁴ Cf. Eur. Iph. Taur. 759. 92.

⁵ Ibid. 811. 26.

⁶ The whole of this paragraph is condemned by Ritter.

into which it is separately divided, are as follow : prologue,¹ episode,² exode,³ and chorus, of the parts of which one is the *parodos*,⁴ but the other is the *stasimon*.⁵ These [five] parts, therefore, are common to all [tragedies]; but the peculiar parts are [the songs] from the scene and the *kommoi*. And the prologue, indeed, is the whole part of the tragedy, prior to the entrance of the chorus. The episode is the whole part of the tragedy between two complete odes of the chorus. The exode is the whole part of the tragedy, after which there is no further melody of the chorus. And of the chorus, the *parodos*, indeed, is the first speech of the whole chorus; but the *stasimon* is the melody of the chorus, without anapaest and trochee: and the *commos*⁶ is the common lamentation of the chorus and from the scene. But we have before shown what the parts of tragedy are which must necessarily be used; but the parts of it according to quantity, and into which it is separately divided, are these⁷.]

2. Prologue.

Episode.

Exode.

Parodos.

Stasimon

Commos.

3.

¹ *Prologue*—This may be compared to our *first act*. See note 40. Twining.

² *Episode*—i. e. a part introduced, inserted, etc., as all the dialogue was, originally, between the choral odes. Twining.

³ *Exode*—i. e. the *going out*, or *exit*; the concluding act, as we should term it. The Greek tragedies never finished with a choral ode. Twining.

⁴ *Parode*—i. e. *entry* of the chorus upon the stage: and hence the term was applied to *what they first sung*, upon their entry. Twining.

⁵ *Stasimon*—i. e. *stable*; because, as it is explained, these odes were sung by the choral troop when fixed on the stage, and at rest: whereas the *parode* is said to have been sung as they came on. Hence, the *trochaic* and *anapaestic* measures, being lively and full of motion, were adapted to the *parode*, but not to the *stasimon*. Twining.

⁶ From a verb signifying to *beat* or *strike*; alluding to the gestures of violent grief.

⁷ Ritter, who has illustrated this whole chapter with great learning and taste, allows its utility, but doubts that it is the work of Aristotle. The reader will find his remarks on the different parts of tragedy very valuable.

CHAP. XIII.

The Essentials for a Tragic Plot.

1. In the next place we must show, as consequent to what has been said, what those who compose fables ought to aim at, and beware of, and whence the purpose of tragedy is effected. Since, therefore, it is necessary that the composition of the most beautiful tragedy should not be simple, but complex, and that it should be imitative of fearful and piteous actions—(for this is the peculiarity of such imitation)—in the first place it is evident, that it is not proper that worthy men should be represented as changed from prosperity to adversity, (for this is neither a subject of terror nor commiseration, but is impious,) nor should depraved characters [be represented as changed] from adversity to prosperity; for this is the most foreign from tragedy of all things, since it possesses nothing which is proper; for it neither appeals to moral sense¹, nor is piteous, nor fearful. Nor, again, must a very depraved man be represented as having fallen from prosperity into adversity. For such a composition will indeed possess moral tendency, but not pity or fear. For the one is conversant with a character which does not deserve to be unfortunate; but the other, with a character similar [to one's own]. [And pity, indeed, is excited for one who does not deserve to be unfortunate; but fear, for one who resembles oneself²]; so that the event will neither appear to be commiserable, nor terrible. There remains therefore the character between these. But a character of this kind is one, who neither excels in virtue and justice, nor is changed through vice and depravity, into misfortune, from a state of
2. Tragedy should not be simple. Proper vicissitudes.
3. The character of the hero must be of a moderate

¹ Ritter considers τὸ φιλόπρωπον as a feeling bordering on *ἔλεος*, "id quidem quod prope ad miserationem accedit." It probably is best expressed by our "humanity," considered in both its senses.

² Ritter condemns these words as a marginal annotation.

great renown and prosperity, but has experienced this change through some [human] error; such as Œdipus and Thyestes, and other illustrious men of this kind. Hence it is necessary that a plot which is well constructed, should be rather single³ than twofold, (though some say it should be the latter,) and that the change should not be into prosperity from adversity, but on the contrary into adversity from prosperity, not through depravity, but through some great error, either of such a character [as we have mentioned], or better rather than worse. But the proof of this is what has taken place. For of old the poets adopted any casual fables; but now the most beautiful tragedies are composed about a few families; as for instance, about Alcmaeon, Œdipus, Orestes, Meleager, Thyestes, and Telephus⁴, and such other persons as happen either to have suffered or done things of a dreadful nature. The tragedy, therefore, which is most beautiful according to art, is of this construction. Hence they erroneously blame Euripides, who accuse him of having done this in his tragedies, and for making many of them terminate in misfortune. For this method, as we have said, is right; of which this is the greatest evidence, that in the scenes, and contests of the players, simple fables which terminate unhappily appear to be most tragical, if they are properly acted. And Euripides, though he does not manage other things well, yet appears to be the most tragic of poets⁵. The fable, however, ranks in the second place, though by some it is said to be the first composition, which has a twofold construction, such as the Odyssey, and which terminates in a contrary fortune, both to the better

excellence or depravity.

4. Simple fable preferable to twofold.

5. Proof from the popular subjects of tragedy.

6. An unhappy end most suitable to tragedy,

7. but least popular.

³ What is here meant by a *single* fable, will appear presently from the account of its opposite—the *double* fable. It must not be confounded with the *simple* fable, though in the original both are expressed by the same word. The *simple* fable is only a fable *without revolution, or discovery*. Twining.

⁴ The same remark applies to the French tragic stage.

⁵ But below, xv. 5. and Eth. iii. 1, Euripides is justly charged with the improper introduction of comic characters and language. The praise applies only to the catastrophe.

8. and the
happy
conclu-
sion pre-
ferred.

and worse characters. It appears, however, to rank in the first place, through the imbecility of the spectators⁶. For the poets, in composing their plots, accommodate themselves to the wish of the spectators. This pleasure, however, is not [properly] derived from tragedy, but is rather suited to comedy. For there, though the greatest enemies be introduced, as Orestes and Ægisthus, yet in the end they depart friends, and no one falls by the hand of the other⁷.

CHAP. XIV.

Of Terror and Pity.

1. Terror
and pity,
how pro-
duced.

TERROR and pity, therefore, may be produced from the sight¹. But they may also arise from the com-

⁶ That weakness which cannot bear strong emotions, even from fictitious distress. I have known those who could not look at that admirable picture, the *Ugolino* of Sir Jos. Reynolds.—To some minds, every thing that is not *cheerful* is *shocking*.—But, might not the preference here attributed to *weakness*, be attributed to better causes—the gratification of philanthropy, the love of justice, order, etc. ?—the same causes which, just before, induced Aristotle himself to condemn, as *shocking and disgusting*, those fables which involve the virtuous in calamity. Twining.

Modern audiences partake of this weakness. Thus, the catastrophe of "Measure for Measure," "Cymbeline," or "Winter's Tale," are more satisfactory than those of "Hamlet" or "Pizarro." Knowles's "Hunchback" is a happy specimen of *ἀναγνώρισις*, leading to a happy termination, while his "Wife" displeases. Marston's "Heart and the World," weak as the play is, is more agreeable than his "Patrician's Daughter." But, such plays are merely serious comedies.

⁷ This is excellently applicable to the plays of Vanbrugh and Cibber. Compare the conclusions of the "Relapse," (Sir Tunbelly excepted,) the "Provoked Wife," etc. As to the *ἀποθνήσκει οὐδείς ὅπ' οὐδένος*, it is very descriptive of the *duels* in a modern or ancient comedy, as in "London Assurance," or in the "Beaux Stratagem," according to Scrub's description.

¹ See a very pleasant paper of Addison's on this subject, "Spectator," No. 42. We know the effect of the skull and

bination of the incidents, which is preferable, and the province of a better poet. For it is necessary that the fable should be so composed, that he who hears the things which are transacted, may be seized with horror, and feel pity, from the events, without the assistance of the sight; and in this manner any one who hears the fable of *Œdipus* is affected. But to effect this through spectacle is more inartificial, and requires great expense². But they who produce not the terrible, but the monstrous alone, through scenic representation, have nothing in common with tragedy. For it is not proper to expect every kind of pleasure from tragedy, but that which is appropriate. Since, however, it is necessary that the poet should procure pleasure from pity and fear through imitation, it is evident that this must be effected by the circumstances. Let us, then, ascertain what kind of events appear to be dreadful or lamentable. But it is necessary that actions of this kind should either be those of friends towards each other, or of enemies, or of neither. If, therefore, an enemy kills an enemy, he does not show any thing which is an object of pity, neither while he does the deed, nor when he is about to do it, except what arises from the deed itself. And this will be the case, when one of those who are neither friends nor enemies do the same. But when these things happen in friendships³, as when a brother kills a brother, or a son his father, or a mother her son, or a son his mother, or intends to do it, or does any thing else of the like kind—such subjects are to be sought for. One must not, therefore, [completely] alter the received fables. I mean, for instance, such as the fable of *Clytemnestra* being slain by *Orestes*, and of

2. The monstrous not tragic.

3. The proper pleasure to be derived from tragedy.

4. What actions are dreadful or lamentable.

5. Further pre-

black hangings in the "*Fair Penitent*," the scaffold in "*Venice Preserved*," the tomb in "*Romeo and Juliet*," etc. Twining. But Ritter understands *δυσία* to mean the countenance of the actor.

² "*Χρησίων γενετήριον προ πρετίσας et operoso apparatu et apte dici posse et eo intellectu h. l. accipiendam esse manifestum est.*" Ritter.

³ As in the "*Fatal Curiosity*" of Lillo. Twining.

cepts re-
specting
fable.

6. Exam-
ples.

Eriphyle by Alcmaeon. But it is necessary that the poet should invent the plot, and use in a becoming manner those fables which are handed down. What, however, we mean by [using fables] in a becoming manner, let us explain more clearly. Now, the action may take place in such a way as the ancients have represented it, viz. knowingly with intent; as Euripides represents Medea killing her children. Men may also do an action, who are ignorant of, and afterwards discover their connexion [with, the injured party,] as in the "Œdipus" of Sophocles. This, therefore, is extraneous to the drama⁴, but is in the tragedy itself; as in the "Alcmaeon" of Atydamas, or Telegonus in the "Ulysses Wounded."

7. Further still, besides these there is a third mode, when some one is about to perpetrate, through ignorance, an atrocious deed, but makes the discovery before he does it⁵. And besides these there is no other mode. For it is necessary to act, or not; and that knowing, or not knowing. But of these, to intend to perpetrate the deed knowingly, and not to perpetrate it, is the worst; for it is wicked and not tragical; because it is void of pathos. [Hence, no poet introduces a character of this kind except rarely; as in the "Antigone," in which Hæmon [endeavours to kill his father] Creon, [but does not

⁴ The murder of Laius by Œdipus, his son, is supposed to have happened a considerable time before the beginning of the action. Twining.

⁵ Of these two dramas nothing more is known than the little that Aristotle here tells us. In the first, the poet adhered so far to history, as to make Alcmaeon *kill* his mother Eriphyle, but with the improvement, (according to Aristotle's idea,) of making him do it *ignorantly*. The story of *Telegonus* is, that he was a son of Ulysses by *Circe*; was sent by her in quest of his father, whom he wounded, without knowing him, in a skirmish relative to some sheep, that he attempted to carry off from the island of Ithaca. It is somewhat singular, that the wound is said to have been given with a kind of *Otaheite* spear, headed with a sharp fish-bone. See Pope's *Odyssey*, xi. 167, and the note. Twining.

⁶ Thus in Talfourd's "Ion," Ion discovers Adrastus to be his father, just as he is on the point of murdering him.

effect his purpose.]⁷ For the action here ranks in the second place. But it is better to perpetrate the deed ignorantly, and having perpetrated to discover; for then it is not attended with wickedness, and the discovery excites horror. The last mode, however, is the best; I mean, as in the "Cresphontes," in which Merope is about to kill her son, but does not, in consequence of discovering that he was her son. Thus, too, in the "Iphigenia in Tauria," in which the sister is going to kill the brother, [but recognises him;] and in the "Helle," the son is about to betray his mother, but is prevented by recognising her. Hence, as has been formerly observed, tragedies⁸ are not conversant with many families; for poets were enabled to discover incident of this kind in fables, not from art, but from fortune⁹. They were compelled, therefore, to direct their attention to those families in which calamities of this kind happened.

And thus we have spoken sufficiently concerning the combination of the incidents, and have shown what kind of fables ought to be employed.

CHAP. XV.

WITH respect to manners, however, there are four things to which one ought to direct attention: one, indeed, and the first, that they be good. But the tragedy will indeed possess manners, if, as was said, the words or the action render any deliberate intention apparent; containing good manners¹, if the deliberate intention is good. But manners are to be found in each genus; for both a woman and a slave may be good; though perhaps of these, the one is

1. Requisites of manners, that they express *προαίρεσις*,

⁷ Ritter condemns this passage. See also Donaldson, Introduction to the Antigone, p. xl.

⁸ i. e. to history or tradition.

⁹ The interpolation *φᾶλλον μὲν ἢ δὲ φάλη* ἧ is rightly thrown out by Ritter.

2. that they be adapted to the persons, less good², and the other is wholly bad³. In the second place, the manners must be adapted to the persons. For there are manners which are characterized by fortitude, but it is not suited to a woman to be either brave or terrible. In the third place, the manners must be similar. For this, as was before observed, differs from making the manners to be good and adapted⁴. In the fourth place, they must be uniform; for if he is anomalous, who exhibits the imitation, and expresses such like manners, at the same time it is necessary that he should be uniformly unequal. The example, however, of depraved manners is indeed not necessary; such, for instance, as that of Menelaus in the "Orestes," but an example of unbecoming and inappropriate manners is, the lamentation of Ulysses in the tragedy of "Scylla,"⁵ and the speech of Menalippe; and the example of anomalous manners in the Iphigenia in Aulis. For Iphigenia
3. similar,
4. and consistent.
5. Depraved manners unnecessary.

² This is very Euripidean gallantry. Compare Aristoph. 546, sqq.

³ This is observed, to show the consistence of this *first* precept with the next. The manners must be drawn as good as may be, consistently with the observance of *propriety*, with respect to the *general* character of different sexes, ages, conditions, etc. It might have been objected—"You say the character must be *good*. But suppose the poet has to represent, for instance, a slave?—the character of slaves in general is notoriously *bad*."—The answer is,—*any thing* may be good in its *kind*. Twining.

⁴ This is very trivial, compared with Horace's description of the manners suited to different characters. Cf. *Ars Poet.* 114, sqq.

⁵ Of the Scylla nothing is known.—Some fragments remain of "Menalippe the Wise," (for this was the title,) a tragedy of Euripides, the subject of which is a curiosity. *Menalippe* was delivered of two children, the fruits of a stolen amour with *Neptune*. To conceal her shame, she hid them in her father's cow-house; where he found them, and being less of a philosopher than his daughter, took them for a monstrous production of some of his cows, and ordered them to be burned. His daughter, in order to save them, without exposing herself, enters into a long physical argument, upon the principles of *Anaxagoras*, to cure her father of his unphilosophical prejudices about monsters and portentous births, and to convince him that these infants *might* be the *natural* children of his cows. Twining.

supplicating does not at all resemble the Iphigenia in the latter part of the tragedy. It is requisite, however, in the manners as well as in the combination of the incidents, always to investigate, either the necessary or the probable; so that such a person should say or do such things, either necessarily or probably; and that it be necessary or probable, that this thing should be done after that. It is evident, therefore, that the solutions of fables ought to happen from the fable itself, and not as in the "Medea,"⁶ from the machinery, and in the tragedy called the "Iliad," from the particulars respecting the sailing away [from Troy⁷]. But we must employ machinery in things which are external to the drama, which either happened before, and which it is not possible for men to know, or which happened afterwards, and require to be previously foretold and announced. For we ascribe to the gods the power of seeing all things, but we do not admit the introduction of any thing absurd in the incidents⁸, but if it is introduced it must be external to the tragedy; as in the "Cedipus" of Sophocles. Since, however, tragedy is an imitation of better things, it is necessary that we should imitate good painters. For these, in giving an appropriate form to the image, depict the similitude, but increase the beauty⁹. Thus, also, it is requisite that the poet, in imitating the wrathful and the indolent, and those who are similarly affected in their manners, should form an example of equity, or asperity; such as Agatho and Homer have represented Achilles. These things, indeed, it is necessary to observe; and besides these, such perceptions of the senses as are attendant upon poetry, besides

6. Necessity and probability of action.

7. Solution ought to be from the fable, not the machinery.

8. Comparison with painting.

9.

⁶ Of Euripides. *Medea* is carried off, at the end of the tragedy, in a chariot drawn by flying dragons. Twining.

⁷ Pope's *Iliad*, ii. 189, etc. Twining.

⁸ By incidents of the fable, Aristotle here plainly means all those actions or events which are *essential parts* of the subject or story, whether previous to the action, and necessary to be known, or included in it, and actually represented in the drama.

⁹ This seems intended to explain his *third* precept, of *resemblance* in the manners; to reconcile it with his *first*, and to show what sort of likeness the nature of tragic imitation requires. Twining.

the necessary ones.¹⁰ For in these, errors are frequently committed. But concerning these things, enough has been said in the treatises already published.

CHAP. XVI.

- i. On the different recognitions. [WHAT discovery, however, is, has been before stated. But with respect to the species of recognition, the first indeed is the most inartificial, and that which most poets use through being at a loss, and is effected through signs. But of these, some are natural, such as the "lance with which the earth-born³ race are marked," or the stars [on the bodies of the sons] in the "Thyestes" of Carcinus. Others are adventitious, and of these some are in the body, as scars; but others are external, such as necklaces; and such as [the discovery] through a small boat, in the "Tyro³." These signs also may be used in a better or worse manner. Thus Ulysses,⁴ through his scar, is in one way known by his nurse, and in another by the swineherds. For the discoveries which are for the sake of credibility, are more inartificial, and all
2. through signs. But of these, some are natural, such as the "lance with which the earth-born³ race are marked," or the stars [on the bodies of the sons] in the "Thyestes" of Carcinus. These signs also may be used in a better or worse manner. Thus Ulysses,⁴ through his scar, is in one way known by his nurse, and in another by the swineherds. For the discoveries which are for the sake of credibility, are more inartificial, and all
3. Their use.

¹⁰ i. e. to the *sight*, and the *hearing*; in other words, to actual *representation*.

¹ The reader, who recollects the conclusion of Sect. 14, where the author took a formal leave of the "*fable and its requisites*," and proceeded to the *second* essential part of tragedy, the *manners*, will hardly be of Dacier's opinion, who contends that this section is rightly placed. His reasons are perfectly unsatisfactory. Twining. I have enclosed it in brackets, with Ritter.

² The descendants of the original Thebans, who, according to the fabulous history, sprung from the earth when Cadmus sowed the dragon's teeth, etc.—This *noble race* are said to have been distinguished by the natural mark of a lance upon their bodies.

³ Sophocles wrote two tragedies of this name, neither of them preserved.—The story of Tyro leads us to suppose, that Aristotle means the little boat, trough, or, as some render it, *cradle*, in which Tyro had exposed her children, on, or near, the river: the particular manner of the discovery it would be in vain to guess.

⁴ See Pope's *Odyssey*, xix. v. 451, etc., and the note there, on v. 461, and xxi. 226.

of them are of this kind; but those which are from revolution, as in the "Washing of Ulysses⁵," are better. And those recognitions rank in the second place, which are invented by the poet, on which account they are inartificial. Thus Orestes in the "Iphigenia" discovers that he is Orestes⁶. For she indeed recognises her brother through a letter, but Orestes himself speaks what the poet designs, but not what the fable requires; on which account it is near to the above-mentioned error; since he might have introduced some [of the real things as signs]. Thus, too, in the "Tereus" of Sophocles, the "voice of the shuttle" [produced a recognition⁷]. But the third mode of discovery is through memory, from the sensible perception of something by sight, as in the "Cyprii" of Dicaeogenes; for on seeing the picture a certain person weeps. And in the "Tale of Alcinous;" for Ulysses, on hearing the lyrist, and recollecting the story, weeps; whence also [all these] were recognised. The fourth mode of discovery is derived from syllogism⁸, as in the "Choephoræ"—a person like

4. Invented recognitions.

5. By memory.

6. By reasoning.

⁵ The ancients distinguished the different parts of Homer's poems by different titles accommodated to the different subjects, or episodes; and, in referring to him, they made use of these, not of the division into *books*. Thus, the part of the ninth book of the *Odyssey* above referred to, was called *The Washing*. The *Tale of Alcinous* was another title, which will presently be mentioned. Twining.

⁶ I follow Ritter, who supplies "to Iphigenia." The older editors interpolated the passage. See Ritter's note on the following passage. The whole disputation is "arguta et obscura," as the learned critic observes.

⁷ Taylor's note is pre-eminently absurd. Tyrwhitt elegantly explains the passage thus: *κρηίδος φωνή* is a quotation from the play, and denotes the *web itself*, by means of which Philomela explained to her sister Procne the injuries she had suffered from Tereus, since, her tongue being cut out, she could not speak. Cf. Ovid, *Met.* VI. 424; Hygin. *Fab.* 45, quoted by Ritter, whose note deserves the student's attention. As the *web* is said to *speak*, which *describes*, so the shield of Capaneus *χρυσοῖς φωνεῖ γράμμασιν*, *Æsch.* Sept. C. Th. 434.

⁸ Occasioned by reasoning;—i. e. by reasoning, (or rather, inference, or conclusion,) in the person discovered. See the note.—It should be remembered, that Aristotle is not, in this chapter, inventing discoveries, nor enumerating all the kinds

me is arrived—there is no person like me but Orestes,—Orestes, therefore, is arrived. Thus too in the “Iphigenia”⁹ of Polyides the sophist. For it was probable that Orestes would syllogistically conclude, that because his sister had been immolated, it would likewise happen to him to be sacrificed. Thus also in the “Tydeus”¹⁰ of Theodectes, a certain person comes to discover his son, and himself perishes¹¹. Another example also is in the “Phinidæ.” For the women, on seeing the place, inferred what their fate would be, viz. that they must needs perish in this place; for they were exposed in it from their infancy. There is also a certain compound [discovery], which is produced from the false inference of the spectator, as in the “Ulysses the False Messenger.” For he says, he should know the bow, which he had not seen; but the [audience], as if he must be known through this, on this account infer falsely. The best recognition, however, of all, is that which arises from the things themselves, astonishment being excited through probable circumstances; as in the “Œdipus” of Sophocles and the “Iphigenia;” (for it is probable that she would be willing to send letters;) since such things alone are without fictitious signs and necklaces¹². But the recognitions which rank in the second place, are those which are derived from syllogism.]

7. By the misconception of the audience.

8. The best is from the circumstances themselves.

possible or practicable; but only classing and examining such as he found in use, or could recollect, in the tragedies and epic poems of his time. Twining.

⁹ The subject appears to have been the same as that of the *Iphigenia in Tauris* of Euripides. We are to suppose, that *Orestes* was discovered to his sister by this natural exclamation, at the moment when he was led to the altar of *Diana* to be sacrificed. Twining.

¹⁰ Of this and the preceding tragedy, we know nothing but what we learn here: i. e. that in the one, a *father*, and in the other, the *daughters* of *Phineus*, were discovered, and, probably, saved, by those exclamations. Twining.

¹¹ See Ritter. Nothing of this play is known.

¹² All this passage is hopelessly corrupt.

CHAP. XVII.

It is necessary, however, that the poet should form the plots, and elaborate his diction, in such a manner that he may as much as possible place the thing before his own eyes¹. For thus the poet perceiving most acutely, as if present with the transactions themselves, will discover what is becoming, and whatever is repugnant will be least concealed from his view. An evidence of this is the fault with which Carcinus is reproached. For Amphiarus had left the temple, which was concealed from the spectator, who did not perceive it, and the piece was driven² from the stage in consequence of the indignation of the spectators. For the poet as much as possible should co-operate with the gestures [of the actor]; since those are naturally most adapted to persuade who are themselves under the influence of passion. Hence, also, he agitates others who is himself agitated³, and he excites others to anger who is himself most truly enraged. Hence, poetry is the province either of one who is naturally clever, or of one who is insane⁴.

1. Rules for realizing ideas.

2. The poet should feel what he writes,

¹ i. e. place himself in the position of a spectator. Ritter observes that *ἐν συνίσταντα* must be supplied.

² *ἰκνίπτειν* is properly used of the condemnation of a piece. See Hemst. on Lucian, Nigrin. § 8. In Demosth. de Coron. p. 315, ed. Beisk. it is applied to the actor. Cf. Bud. Com. L. Gr. p. 536. There is a pun upon the double meaning of the verb. Amphiarus went (*ἰξίπτει*) away, and the piece was condemned (*ἰξίπτει*) in consequence.

³ But Twining, in a long and learned note, expresses his opinion that *χρῆμαιναι* may be used in its proper neuter sense, and that the meaning may be as follows: "The poet should work himself, as far as may be, into the passion he is to represent, by even assuming the countenance and the gestures which are its natural expressions. For they, of course, have most probability and truth in their imitation, who actually feel, in some degree, the passion: and no one expresses agitation of mind (*χρῆμαιναι*) so naturally, (*ἀληθινώτατα*), as he who is really agitated, (*χρῆμαζόμενος*) or expresses anger (*χρηλεταίνειν*) so naturally, as he who is really angry (*ὀργιζόμενος*)."

⁴ "In an enthusiasm allied to madness," is Twining's translation, which is all that Aristotle means to say, under-

3. and
should
form a
general
sketch of
his plot.

For of these characters, the one is easily fashioned, but the other is prone to ecstasy. It is likewise necessary that the poet should in a general way lay down the fables composed by others, and those which he composes himself, and afterwards introduce episodes and lengthen out [the play]. But I say that he should give a general sketch after this manner. Thus, for instance, in the "Iphigenia⁵," a certain virgin on the point of being sacrificed, and vanishing from the view of those who were to sacrifice her, and being brought to another country in which it was a law to sacrifice strangers to a certain goddess, she is appointed the priestess of these rites. Some time after, it happened that the brother of the priestess came to this place; [but on what account? Because some god had ordered him, for a certain reason which does not pertain to the general view of the tragedy,] to come thither, [but why he did so is foreign to the fable⁶]. The brother, therefore, coming, and being made captive, discovered [his sister], when he is going to be sacrificed; whether, as Euripides says, [by an epistle,] or, as Polyides feigns, speaking according to probability, because he said, it was not only requisite that the sister, but that he also should be sacrificed:—and hence safety arises. After these things, the poet having given names to the persons, should insert the episodes; and he must be careful that the episodes be appropriate; as that of the insanity through which Orestes was taken captive, and his being saved through expiation. In dramas, therefore, the episodes are short, but by these the epopee is lengthened. For the fable of the Odyssey is short, viz. a certain man wandering for many years, and persecuted by Neptune, and left alone. And besides this, his domestic affairs being so circumstanced, that his standing "eos, qui animo commotiores sunt," as Ritter renders it. On the connexion between poetic enthusiasm and madness, cf. Plato, Ion. p. 145. C. etc. Phædr. p. 344. B. Læm. with Clemens Alex. Strom. vi. p. 827. Theodoret. *θεσπειν*. II. p. 25. Cicer. de Div. I. 37.

⁵ Eur. Iph. Taur.

⁶ The passage is interpolated. See Ritter.

4. The
episodes

5. and
short.

wealth is consumed by suitors, and stratagems are plotted against his son. But driven by a tempest, he returns, and making himself known to certain persons, he attacks the suitors, and is himself saved, but destroys his enemies. This, therefore, is the peculiarity of the fable, but the rest is episode.

CHAP. XVIII.

[In every tragedy, however, there is a complication and development¹. And external circumstances indeed, and some of those that are internal, frequently form the complication; but the rest the development. I call, however, the complication, the whole of that which extends from the beginning to the last part, from which there is a transition to good fortune; but I call the development that part which extends from the beginning of the transition to the end. Thus in the *Lynceus* of Theodectes, the past transactions, and the capture of the son, are the complication; but the part which extends from the charge of murder to the end, is the development. But of tragedy there are four species; for so many parts of it have also been enumerated. And one species is the complicated, of which the whole is revolution and discovery; another, the pathetic, such as the tragedies of *Ajax* and *Ixion*; another, the moral², such as the *Phthiotides* and the *Peleus*; but the

1. Complication and development.

2. Four species of tragedy;

¹ Literally, the *tying* and *untying*. With the French, *Nœud* and *Dénouement* are convenient and established terms. I hope I shall be pardoned for avoiding our awkward expressions of the *intrigue* and *unravelling* of a plot, etc. I could find no terms less exceptionable than those I have used. Twining.

² i. e. in which the delineation of *manners* or *character* is predominant. Our language, I think, wants a word to express this sense of the Greek *ἠθικόν*, and the Latin, *moratum*. *Mannered* has, I believe, sometimes been used in this sense; but so seldom, as to sound awkwardly. We know nothing of the subjects here given as examples. Twining.

3. all
which the
poet
should
under-
stand.

4. On epic
tragedy.

5. Illus-
trations.

fourth is another such as the "Phorciades"³ and the "Prometheus," and the tragedies which represent what passes in Hades. It is especially necessary, therefore, that the poet should endeavour to have all these species; or at least that he should have the greatest and most of them, especially since men of the present age calumniate the poets. For as there have been good poets in each part of tragedy, they now expect one poet to excel in all the parts. But it is right to call tragedy different and the same, though not perhaps with any reference to the fable; but this [may be the case with those] of which there is the same plot and solution. But many poets complicate well, and develope badly⁴. But both these should always be applauded⁵. But it is necessary to recollect, as has been often observed, that we must not make tragedy an epic system. Now, I call that tragedy an epic system, which consists of many fables; as if some one should compose a tragedy from the whole fable of the Iliad. For in the Iliad, on account of its length, the parts receive an appropriate magnitude. But in dramas, the effect produced would be very contrary to expectation. The truth of this is indicated by such as have represented [in one tragedy] the whole destruction of Troy, and not some part of it, as the "Niobe" or "Medea" of Euripides, and who have not acted like Æschylus; for these have either been condemned,

³ Æschylus wrote a tragedy so named. It is difficult to imagine what he could make of these three curious personages, who were *born old women*, lived under ground, and had but one eye among them, which they used by turns; carrying it, I suppose, in a case, like a pair of spectacles. Such is the tale of Twining.

⁴ No fault so common: see note 59. It was with the Greek tragedians, probably, as with *Shakspeare*.—"In many of his plays the latter part is evidently neglected. When he found himself near the end of his work, and in view of his reward, he shortened the labour, to snatch the profit. He therefore remits his efforts where he should most vigorously exert them, and his catastrophe is improbably produced, or imperfectly represented." Johnson's Pref. to *Shakspeare*. Twining.

⁵ This passage is contradictory and unintelligible. See Ritter, who condemns the whole as spurious.

or contend without success; since Agatho also failed in this alone. But in revolutions, and in simple actions, those poets admirably effect their aim. For this is tragical, and has a moral tendency. This, however, takes place when a wise but a depraved man, such as Sisyphus, is deceived; and a brave but unjust man is vanquished. But this is probable, as Agatho says. For it is probable that many things may take place contrary to probability. It is necessary likewise to conceive the chorus to be one of the players⁶ and a part of the whole, and that it co-operates with the players, not as in Euripides⁷, but as in Sophocles. But with other tragedians, the choral songs do not more belong to that fable, than to any other tragedy; on which account the chorus sing detached pieces, inserted at pleasure⁸, of which Agatho was the inventor. What difference, however,

7. The business of the chorus.

⁶ *Actoris partes chorus, officiumque virile*
Defendat: neu quid *medios intercrinat actus*,
Quod non proposito conducat et hareat aptè.

Hor. A. P. 193.

⁷ This expression does not, I think, necessarily imply any stronger censure of *Euripides*, than that the choral odes of his tragedies were, in general, more loosely connected with the subject, than those of *Sophocles*; which, on examination, would, I believe, be found true. For that *this* is the fault here meant, not the improper "*choice of the persons who compose the chorus*," as the ingenious translator of Euripides understands, is, I think, plain from what immediately follows; the connexion being this:—" *Sophocles* is, in this respect, most perfect; *Euripides* less so; as to the others, their choral songs are totally foreign to the subject of their tragedies." See Potter's *Euripides*—Postscript to the *Trojan Dames*. Warton's *Essay on the Genius*, etc., of Pope, vol. i. p. 71.

⁸ It is curious to trace the gradual extinction of the chorus. At first, it was *all*; then, relieved by the intermixture of dialogue, but still *principal*; then, *subordinate* to the dialogue; then, digressive, and *ill connected* with the piece; then, borrowed from *other pieces* at pleasure—and so on, to the fiddles and the act-tunes, at which Dacier is so angry. (See his note, p. 335.) The performers in the *orchestra* of a modern theatre are little, I believe, aware, that they occupy the *place*, and may consider themselves as the lineal descendants, of the ancient *chorus*. *Orchestra* (*ὀρχήστρα*) was the name of that part of the ancient theatre which was appropriated to the chorus. [Jul. Pollux, IV. p. 423.]

does it make, to sing inserted pieces, or to adapt the diction of one drama to another, or the whole episode?

CHAP. XIX.

1. Diction and sentiment. Of the other parts of tragedy enough has now been said. But it remains that we should speak concerning the diction and the sentiments. The particulars, therefore, respecting the sentiments, are unfolded in the treatise on Rhetoric, to which it more properly belongs. But those things pertain to the sentiments, which it is requisite to procure by a reasoning process. And the parts of these are, to demonstrate, to refute, and to excite the passions; such as pity, or fear, or anger, and such like; and besides these, to
2. Their parts. 3. amplify and extenuate. It is evident, however, that in things, also, it is requisite to derive what is useful from the same forms, when it is necessary to procure objects of pity, or things that are dreadful, or great, or probable. Except that there is this difference, that things in tragedy ought to be rendered apparent without teaching, but in an oration they are to be shown by the speaker, and in consequence of the speech. For what employment would there be for the orator, if the things should appear [of themselves] pleasing, and not through the speech? But of things pertaining to diction, there is one species of theory respecting the forms of speech¹, which it is the pro-
4. How far the poet should be

¹ What are we to understand by these σχήματα λέξεως?—The learned reader will immediately see, that, as Victorius has observed, they are not to be confounded with those σχήματα λέξεως, of which we hear so much from Cicero, Quintilian, Dion. Hal. etc.,—those “*figuræ verborum*,” which are opposed to the σχήματα διανοίας, the “*figuræ mentis, sententiarum*,” etc. Indeed, no such division of σχήματα is, I believe, to be found in Aristotle. It seems to have been the invention of the later rhetoricians; and how little they were agreed, as to the number and the species of these σχήματα, the propriety of the division itself, and even the precise sense of the word σχήμα, may be seen in Quintilian ix. 1.—The σχήματα λέξεως of Aris-

vince of the actor to know, and of him who is a master artist in this profession. Thus, for instance, [it is requisite he should know,] what a mandate is, what a prayer, narration, threats, interrogation and answer are, and whatever else there may be of this kind. For from the knowledge or ignorance of these, the poetic art incurs no blame of any moment. For who would think that Homer errs in what he is reproved for by Protagoras? viz. that while he fancies he prays, he commands, when he says, "The wrath, O goddess, sing." For, says he, to order a thing to be done, or not to be done, is a mandate. Hence, this must be omitted as a theorem pertaining to another art, and not to poetry.

acquainted with the different applications of diction.

CHAP. XX.

The parts of Diction.

[¹Of all diction, however, the following are the parts; viz. the letter, the syllable, the conjunction, the noun, the verb, the article, the case, and the sentence. The

1. The parts of diction.

totle in this place, are plainly such as would have been denominated by later writers, *σχήματα διαβολας*—figures of the *thought* or *sense*. Indeed we find them actually enumerated among the figures of that class. See Dionys. Halicarn. de Struct. etc. Sect. 8.—So Quintilian; "*Figuras quoque mentis, quæ σχήματα διαβολας dicuntur, res eadem recipit omnes, in quas nonnulli diviserunt species dictorum, (i. e. of jokes, bons mots). Nam et interrogamus, et dubitamus, et affirmamus, et minamur, et optamus.*"

I see, therefore, not the least reason why the expression *σχήμα λήξεως* should not be rendered here exactly as in the other passages above referred to, "*figura orationis*"—*form, or configuration, of speech*. For *λήξις*, it must be observed, is here used, not in the particular sense of *diction*, or *style and manner of expression*, (as it is used Rhet. iii. 8,) but in the general sense of *λόγος, speech*, as we find it used in the beginning of the next chapter.

¹ This chapter is an evident interpolation, and the student will gain but little benefit from its perusal, as the matter of it is incorrect and ill arranged. See Ritter.

2. *Letters.* letter, therefore, indeed, is an indivisible sound²; yet not every such sound, but that from which an intelligible sound is adapted to be produced. For there are indivisible vocal sounds of brutes, no one of which I call a letter³. But the parts of this indivisible sound are, vowel, semivowel, and mute. And a vowel, indeed, is that which has an audible sound, without percussion⁴; such as *a* and *o*. But a semivowel is that which has an audible sound, with percussion; as *s* and *r*. And a mute is that which, even with the concurrence of the tongue, has of itself, indeed, no sound, but becomes audible in conjunction with things which have a certain sound; as *g* and *d*.
3. *Their divisions,*
4. *and differences.* But these differ by the configurations of the mouth, in the parts [of the mouth⁵] by density and tenuity of aspiration, by length and shortness; and further still, they differ by acuteness and gravity, and by the medium between both these; the theory respecting each of which pertains to the metrical art. But a syllable is a sound without signification, composed from a mute, and an element which has sound [i. e. from a vowel, or semivowel]. For *gr* without *a* is a syllable⁶, and also with *a*, as *gra*.
5. *Syllables.*

² "Vocal sound," is Taylor's translation of *φωνή*.

³ "Element of diction," Taylor.

⁴ As Hermann has ventured to call *προσβολή* *allius*, I trust I shall be excused for adopting Twining's quaint, but clear translation. He observes: "Literally, *percussion*, i. e. of the tongue against the palate, or teeth, the lips against the teeth, or against each other, and all the other modes of *consonant* articulation. See *Hermes*, iii. 2. p. 322, where they are called '*contacts*.' Dacier makes sad confusion here, both in his version and his notes, by confounding the *names* of the consonants, when vowels are prefixed, or put after them, to make them *separately pronounceable*, (*Te*, *eF*, *eL*, etc.,) with their powers in *composition*—as elements of *words*: Thus, it is strictly true, that *S* and *R* have a *sound*, without the assistance of a vowel, merely by their mode of articulation. But *D*, or *G*, have no sound at all *by themselves*. The semivowels are *l*, *m*, *n*, *r*, *s*. (*Dion. Halicarn. De Struct. Orat. sect. 14.*")

⁵ i. e. the different organs of speech, from which letters are denominated nasal, dental, labial, etc. Taylor.

⁶ *Gr* is an instance of a syllable composed of a mute and a semivowel; and *gra* of a syllable composed of a mute, a vowel, and a semivowel. Taylor. But see Ritter.

The study, however, of the differences of these, pertains also to the metrical art. But a conjunction is a sound void of signification, which neither impedes nor produces one significant sound adapted to be composed from many sounds, and which may be placed either at the beginning or the end of the period, unless something requires that it should be placed by itself at the beginning; such as *μέν, ἤτοι, δέ*. Or it is a sound without signification, composed from more sounds than one, but naturally adapted to produce one significant sound. An article is a sound without signification, which shows the beginning, or end, or distinction of a word⁷; as *τὸ φημί*, and *τὸ περὶ*, and others of the like kind. Or it is a sound without signification, which neither impedes nor produces one significant sound naturally adapted to be composed from many sounds, both in the extremes and in the middle. But a noun is a composite sound, significant without time, of which no part is of itself significant. For in double nouns, we do not use the parts as of themselves significant. Thus, in the word *Theodorus*, [though *Theos* signifies God and *doron* a gift,] yet *doron* signifies nothing. A verb is a composite sound, significant with time, of which no part is of itself significant, in the same manner also as in nouns. For *man* or *white* does not signify time; but *he walks*, or *he did walk*, signify, the former indeed the present, and the latter the past time. But case pertains to noun or verb. And one case, indeed, [in nouns] signifies that something is said *of* this thing, or is attributed *to*⁸ this thing, and the like;

6. Conjunction.

7. Article

8. Noun.

9. Verb.

10. Case.

⁷ This description is most obscure; but the sense seems to be, that an article is a sound which of itself does not signify any thing definite, but merely serves to indicate a significant sound, before or after which it is placed, or which it distinguishes from other words. Taylor. Ritter denies that there is any sense at all, an opinion in which the reader will probably acquiesce.

⁸ These only, in modern grammar, are called *cases*: in Aristotle, *number*, whether in noun or verb, and the *tenses*, and *modes*, (or *moods*,) of verbs, are comprehended under that term; because *cases* (*περίστασις*—*cases*) are *endings*, *terminations*, *inflections*, etc., and, in the learned languages, all the

11. Sentence.

12. Its unity.

but another is that which pertains to one thing or many things; as *men*, or *man*. And another case pertains to acting⁹, such as what relates to interrogation or demand. For *did he walk?* Or *walk* is a case of a verb according to these species. And a sentence is a composite significant sound, of which certain parts of themselves signify something; for not every sentence is composed from nouns and verbs, (since the definition of man¹⁰ is a sentence without a verb,) but there may be a sentence without verbs. A sentence, however, will always have some part significant; as in the sentence *Cleon walks*, the word *Cleon* is significant. But a sentence is one in a twofold respect; for it is either that which signifies one thing, or that which becomes one from many by conjunction¹¹. Thus the *Iliad*, indeed, is one by conjunction; but the definition of man is one, because it signifies one thing.]

CHAP. XXI.

On Nouns and Metaphors.

1. The species of nouns.

WITH respect to the species of a noun, one is simple; and I call the simple noun that which is not com-

above-mentioned differences of meaning are expressed by different terminations. The French use *chute*, the literal translation of *casus*, in the sense of termination—"La chute d'une periode," etc. And *fall* is used, in our poetical language, for a close, or *cadence*, in music.

That strain again—it had a dying FALL.

Merch. of Venice.

And so Milton in *Comus*, v. 251. Twining.

⁹ These *modes* are the same which he calls *figures of speech*, Sect. 23. Twining.

¹⁰ The definition alluded to appears to be this, literally rendered: "*A terrestrial animal with two feet*" (ζῷον τετράποδον). Twining.

¹¹ Compare *περί Ἑρμην.* cap. v. p. 38.—*Analyt. Post. lib. ii.* cap. 10. p. 469, E.—*Metaphys. vii.* 4. p. 910, D. (where he uses τὸ συνήκει, as equivalent to συνδίσταται,) and viii. 6. p.

posed from significant parts; but another is twofold. And this either consists of that which is significant, and that which is without signification, or of both parts significant. A noun also may be triple and quadruple, as is the case with many of the nouns of the Megaliotæ¹; such as *Hermocairoxanthus*².

But every noun is either proper or foreign³, or metaphorical, [or ornamental⁴,] or invented, or extended, or contracted, or altered. But I call that a proper name, which is used by every one; and that a foreign⁵ name which is used by other nations. Hence it is evident that the same noun may be both foreign and proper, though not to the same people. For the word *Σίγυνον*⁶ is proper to the Cyprians,

2. Their divisions

3. Proper and foreign.

931, C. Twining. Ritter remarks, that the compiler of this chapter did not understand the passages he copied.

¹ I have read, in some ludicrous book, of a country that was "*lost by the ignorance of geographers*." This seems to have been the case of these *Megaliotæ*, if such a people ever existed. They are no where recorded.—Dacier reads, *μεγαρίζοντες*—"ceux qui disent de grandes choses:" and cites *Herychius*—*Μεγαρίζοντες*—*μεγάλα λείγοντες*. But this is too distant from the present reading, *Μεγαλιωτῶν*. Winstanley's conjecture—*μεγαλείων*, *ὥς*, is somewhat nearer, and, in other respects, preferable: but it is, I think, a strong presumption against its truth, that Aristotle constantly uses *οἶον*, when he gives an instance; never, as far as I recollect, *ὥς*.

I have sometimes thought it not very improbable, that the passage might originally have stood thus: *τῶν μεγάλα Διωκόντων*: i. e. of those who affect, aim at, are fond of, grandeur and pomp of expression; who love hard words, as we say. Nothing more common than this sense of *διωκειν*. Twining.

Donaldson, Theatre of the Greeks, p. 27, pt. 2, adopts Tyrwhitt's conjecture, *μεγαλείων ὥς*, as being confirmed by Xenoph. Mem. II. 1, § 34, and renders it, "the bombastic expressions." Ritter prefers *πολλαπλομεγάλωπος*, as an example of this kind of word, but Donaldson seems right.

² This is a noun composed from the names of the three rivers Hermus, Caicus, and Xanthus.

³ Cf. Rhet. iii. 1 and 2.

⁴ Ritter condemns the addition of *κόσμος*, as it has no definition.

⁵ Ritter remarks that *γλώτται* are both provincialisms and obsolete words.

⁶ i. e. a spear.

4. Metaphor. but foreign to us. But a metaphor⁷ is the transposition of a noun from its proper signification, either from the genus to the species, or from the species to the genus; or from species to species, or according to the analagous. I call, however, a transposition from genus to species, such as,
5. Different metaphors exemplified.

Secure in yonder port my vessel stands⁸.

For to be moored is a species of standing. But a transposition from species to genus is such as,

————— Ten thousand valiant deeds
Ulysses has achieved⁹.

For ten thousand is a great number, and is now used instead of many. And a transposition from species to species is such as,

The brazen falchion drew away his life.

And,

Cut by the ruthless sword¹⁰.

6. Analagous.

For here *to draw away*, is used instead of *to cut*; and *to cut* is used instead of *to draw away*; since both imply the taking something away. But I call it analagous, when the relation of the second term to the first is similar to that of the fourth to the third; for then the fourth is used instead of the second, or the second instead of the fourth. [And sometimes the proper term is added to the relative terms¹¹.] I say, for instance, a cup has a similar relation to Bacchus that a shield has to Mars. Hence, a shield may be called the cup of Mars, and a cup the shield of Bacchus. Again, evening has the same relation to day that old age has to life. One may therefore say that

⁷ Aristotle understands *metaphor* in a more extended sense than we do, for we only consider the third and fourth of the kinds enumerated by him, as metaphors. Our usurpation of the word was in vogue in Cicero's time. See *de Orat.* III. 38, sqq. Ritter.

⁸ *Odys.* A. 185.

⁹ *Il.* B. 272.

¹⁰ This, and the next species only, answer to what we call *metaphor*—the metaphor founded on *resemblance*. The two first species belong to the trope denominated, since Aristotle's time, *Synecdoche*. Twining.

¹¹ This is perfectly out of place and useless. See Ritter.

evening is the old age of day, and that old age is the evening of life; or as Empedocles calls it, "The setting of life¹²." In some instances, also, where there is no analogous name, this method may be no less similarly employed. Thus, to scatter grain is to sow; but there is no name for the scattering of light from the sun, and yet this has a similar relation to the sun that sowing has to grain. Hence, it is said,

7. Means of employing them.

—————Sowing his god-created flame.

This mode of metaphor may likewise be used differently, when, calling a thing by a foreign name, something belonging to it is denied of it; as if one should call a shield not the cup of Mars, but the wineless cup. But an invented noun is that, in short, which, not being adopted by others, is introduced by the poet himself. For it appears that there are certain nouns of this kind; as substituting *ἐρνυγες* instead of *κέρατα* for *horns*¹³, and calling a *priest* *ἀρητήρ*¹⁴, instead of *ιερεύς*. And a word is extended or contracted, partly by using a vowel longer than the proper one, or by inserting a syllable; and partly by taking something away from it. An extended noun, indeed, is such as *πόλλως* for *πόλεως*, and *πηληϊάδω* for *πηλείδων*; but the contracted, such as *κρῖ*, and *δῶ*¹⁵; and,

9. Invented words.

10. Extended and contracted.

—————*μία γίνεται ἀμφοτέρων δψ*¹⁶.

—————The sight of both is one.

And a word is changed when the poet leaves part of it, and invents part; as,

11. Changed.

¹² "Thy *sun* is set, thy spring is gone."

Gray, Ode on Spring.

"Yet hath my *night of life* some memory."

Shakspeare, Com. of Errors—last scene. Twining.

¹³ i. e. *branches*; which we also use for the *horns* of a stag. But Aristotle means a *new word*, not a *new application* merely of a word already in use. Twining.

¹⁴ A *supplicator*; literally, a *prayer*, taken in the sense of one who *prays*; as *seer* is used for *prophet*. Twining.

¹⁵ *Κρῖ* is used Il. E. 196. Δω, Il. A. 425. Twining.

¹⁶ Part of a verse of Empedocles, quoted by Strabo, p. 364, ed. Cantab.

Δεξιτερόν κατὰ μαχόν.

In the right breast ¹⁷.

12. On genders.

Instead of δεξιόν. [¹⁸ Further still, of nouns some are masculine, others feminine, and others between, [or neuter]. And the masculine, indeed, are such as end in ν, and ρ, and σ, and such as are composed from σ; but these are two, ψ and ξ. The feminine nouns are such as are composed from vowels, and always end in long vowels; as, for instance, in η and ω, or in α of the doubtful. Hence it happens that the number of terminations for masculine and feminine are equal; for the terminations of ψ and ξ are the same. No noun, however, ends in a mute, or in a short vowel; and only three nouns end in ι, viz. μέλι, κόμμι, and πέπερι. But five end in υ; viz. πῶυ, νᾶπυ, γόνυ, δόρυ, and ἄστυ. And the neuter nouns end in these, and in ν and ς.]

CHAP. XXII.

The subject of Diction continued.

1. Two requisites of diction, clearness, and freedom from meanness, How produced.

THE virtue of diction, however, consists in being perspicuous, and not mean¹. The diction, therefore, is most perspicuous, which is composed from proper nouns, but then it will be mean. But an example of this is the poetry of Cleophon and Sthenelus. It will, however, be elevated, and remote from the vulgar idiom, by employing unusual words. But I call unusual words, such words as are foreign, the metaphorical, the extended, and every word except the proper [name of a thing]. If, however, [a poet] wholly employ such words as these, it will be either an enigma, or a barbarism. If, therefore, it were

2. Results and effects of the different kinds of words.

¹⁷ Il. E. 393.

¹⁸ This following passage is false in its statements, and totally foreign to Aristotle's design. Ritter, therefore, has rightly condemned it.

¹ Cf. Rhet. iii. 1, extr. and 2. init.

composed from metaphors; it would be an enigma; but if from foreign words, a barbarism. For the essence of an enigma is this, to unite things impossible, yet really true². Now, from the arrangement of the words, it is not possible to effect this, but it may be effected by a metaphor; as "I saw a man who had glued brass to a man with fire³;" and others of the like kind. [But from the composition of foreign words a barbarism is produced⁴.] Hence language should be moderately varied with these. Foreign, 3. therefore, metaphorical, [and ornamental] words, and the other species that have been mentioned, will cause the diction to be neither vulgar nor mean; but proper words produce perspicuity. But the extending, contracting, and changing of names, contribute in no small degree to the perspicuity of the diction, without vulgarity. For the use of words in a way different from their proper and usual signification, causes the diction to be not vulgar; but the adoption of words in their accustomed meaning, renders it perspicuous. Hence those do not blame rightly, who find fault with this mode of speech, and like the ancient Euclid ridicule the poet, [objecting] that verse might easily be composed, if one permit the quantity of syllables to be lengthened at pleasure, making Iambics even in common discourse; as

5. Objections ill founded.

ἔτσι Χάριν εἶδον Μαραθῶνάδε βαδίζοντα.

And,

Οὐκ ἂν γ' ἱράμενοι τὸν ἑκείνου ἑλλίβορον⁵.

² τὸ λίγοντα ὑπάρχοντα ἀδύνατα συνάψαι, "to put together things apparently inconsistent and impossible, and at the same time saying nothing but what is true." Twining.

³ Rhet. iii. 2. κόλλησιν εἶπε τὴν τῆς σικύας προσβολήν. The operation of cupping is meant. Compare Celsus ii. 11, and Almelov. on Cælius Aurel. Chronic. ii. 1. § 394. Rhod. on Scribon. Larg. Compos. xvi. The *fire* alludes to the burnt tow (*linamentum*) used to exhaust the air in the cupping glass.

⁴ Apparently a gloss. See Ritter.

⁵ It is of little use to attempt to settle the reading of these "nonsensæ verses." Ritter observes that the fault probably lay in pronouncing βαδδίζοντα, ἱρράμενοι. See his notes.

6. It is evident, therefore, that to be detected using this mode of diction is ridiculous. [But measure is common to all the parts of diction⁶.] For it would produce the same effect, to make an improper and ridiculous use of metaphors, foreign words, and other forms of diction. But how great a difference is made by the appropriate use of them, may be seen in epic poetry, by putting the words in metre. And he who transfers proper names into foreign words, into metaphors, and the other forms, will see that what we have said is true. Thus, for instance, Æschylus and Euripides made the same Iambic verse; but by only changing one word from its proper and usual to a foreign signification, the one verse appears beautiful, and the other mean. For Æschylus indeed, in his *Philoctetes*, writes,

A cancerous ulcer feeds upon my foot.

But Euripides, instead of *ἐσθίει*, *feeds*, uses the word *θουᾶραι*, *banquets on*. And,

Νῦν δέ μ' ἐὼν ὀλίγος τε καὶ οὐτιδανὸς καὶ ἄκις,

by inserting proper [and common] words, it will be,

Νῦν δέ μ' ἐὼν μικρὸς τε καὶ ἀσθενικὸς καὶ ἀειδής⁷.

And,

Δίφρον ἀεικέλιον καταθεις, ὀλίγην τε τράπεζαν.
Δίφρον μοχθηρὸν καταθεις, μικρὰν τε τράπεζαν⁸.

⁶ Twining renders, "in the employment of all the species of unusual words, moderation is necessary." But this meaning can scarcely be elicited from the words. See Ritter, who condemns the passage as an interpolation.

⁷ In this verse Polyphemus complains that he was deprived of sight by Ulysses, a *little, weak, vile* man. But Homer, instead of using the word *μικρὸς*, *little*, uses *ὀλίγος*, which signifies *few*. Instead of *ἀσθενικὸς*, *weak*, he uses *οὐτιδανὸς*, which signifies *a man of no account*; and *ἄκις*, *powerless*, instead of *ἀειδής*, *odious*. Taylor. Cf. Od. ix. 515.

⁸ In this verse, which is from the 21st book of the *Odyssey*, Homer, for the purpose of signifying an *ignoble seat*, calls it by a foreign word, *ἀεικέλιον*, and not by the usual word, *μοχθηρὸν*; and he calls the *table*, not *μικρὰν*, *small*, but *ὀλίγην*, *few*. Taylor. Cf. Od. xxi. 259.

Or change, *ῥιόνες βοῶσιν* (the shores rebellow⁹) to *ῥιόνες κρᾶζουσιν* (the shores cry out). [¹⁰ Again, Ariphraides used to ridicule the tragic poets for employing modes of diction, which no one would use in common conversation; such as *δωμάτων ἀπο*, and not *ἀπὸ δωμάτων*, i. e. *home from*, and not *from home*; *σέθεν* [for *σοῦ*]; *ἐγὼ δέ νιν*¹¹, and *Ἀχιλλέως περί*, and not *περί Ἀχιλλέως*, i. e. *Achilles about*, and not *about Achilles*; and other expressions of the like kind. For all such forms of language, because they are not in common use, remove vulgarity from the diction. But this he did not know.] It is, however, a great thing to use each of the above-mentioned modes in a becoming manner; and also compound and foreign words. But the greatest thing is to employ metaphors well. For this alone cannot be acquired from another, but it is an indication of an excellent genius; since to employ metaphors well, is to discern similitude¹². But of words, the compound are chiefly suited to dithyrambic verse, the foreign to heroic, and metaphors to Iambic verse. And in heroic verse, indeed, all the above-mentioned words are useful; but in Iambics, because they especially imitate common discourse, those words are adapted which may be also used in conversation. And words of this description are, the proper, the metaphorical, [and the ornamental.] And thus much may suffice concerning tragedy, and the imitation in acting¹³.

8. Further objections answered.

9. Proper use of the different words.

10. as suited to each kind of poetry.

* Il. P. 265.—Pope's line is,

"And distant rocks *rebellow* to the roar." Twining.

¹⁰ Ritter objects to this clause. Twining, however, admires and commends its conclusion.

¹¹ Cf. Soph. OEd. col. 987.

¹² More clearly expressed in Rhet. iii. 11. 5, τὸ ὁμοίον καὶ ἐν πολλοῖς διέχουσι θεωρεῖν, ἐκαστόχον.

¹³ These last words appear to me out of place.

CHAP. XXIII.

On the Epic Poem.

1. On narrative poetry. Its similarity to tragedy.

CONCERNING the poetry, however, which is narrative and imitative in metre, it is evident that it ought to have dramatic fables, in the same manner as tragedy, and should be conversant with one whole and perfect action, which has a beginning, middle, and end, in order that, like one whole animal, it may produce its appropriate pleasure¹; and that it may not be like the custom of histories, in which it is not necessary to treat of one action, but of one time, viz. of such things as have happened in that time, respecting one or more persons, the relation of each of which things

2. to the other is just as it may happen. For as the sea-fight at Salamis, and the battle with the Carthaginians in Sicily, though they happened at the same time, tend nothing to the same end; thus also in successive times, one thing may sometimes be connected with another, from which no one end is produced. But nearly all poets do this. Hence, as we have before observed, in this respect also Homer will appear to be divine, when compared with other poets, because he did not attempt to sing of the whole of the Trojan war, though it had a beginning and an end. For if he had, it would have been very great, and not sufficiently conspicuous; or if it had been of a moderate size, it would have been intricate through the variety of incidents². But now, having selected one part of the war, he has made use of many episodes; such as the catalogue of the ships, and other episodes, with which he has adorned his

3. Praise of Homer, and comparison with other poets.

¹ i. e. opposed (as appears from what follows) to that which history gives. *Unity of interest* is essential to the pleasure we expect from the epic poem; and this cannot exist, at least in the degree required, without *unity of action*. Twining.

² Because "*the length of the whole would*" then "*not admit of a proper magnitude in the parts*;" and thus an *epic poem* constructed upon an *historical plan*, would be exactly in the same case with a *tragedy* "*constructed on an epic plan*." Twining.

poem. Other poets, however, have composed a fable about one man, and one time, and one action, consisting of many parts; as the authors of the *Cypriacs*, and the *Lesser Iliad*³. [With respect to the *Iliad*⁴ and *Odyssey*, therefore, one or two tragedies only could be made from each. But many might be made from the *Cypriacs*; and from the *Lesser Iliad* more than eight; such as the *Judgment of the Arms*⁵, *Philoctetes*⁶, *Neoptolemus*, *Eurypylus*⁶, the *Begging* [of *Ulysses*], the *Lacænae*, the *Destruction of Troy*, the *Return of the Greeks*, *Sinon*, and the *Troades*.

CHAP. XXIV.

On the Species, Parts, etc. of Epic Poetry.

AGAIN, it is requisite that the epopee should have the same species as tragedy. [For it is necessary that it should be either simple, or complex, or ethical, or pathetic¹.] The parts also are the same, except the music and the scenery. For it requires revolutions, discoveries, and disasters; and besides these, the sen-

1. The species and parts of epic poetry.

² Of this kind seems the poem of *Ariosto*, the *azordium* of which not only expresses the miscellaneous variety of his matter, but, also, his *principle* of unity.

Le Donne, i cavalier, l' arme, gli amori,
Le cortesie, l' audaci imprese, io canto,
Che furo al TEMPO che passaro i Mori, etc.

Ariosto's expedient was, to "intertwist the several actions together, in order to give something like the appearance of one action" to the whole, as has been observed of *Sponser* [*Lettters on Chivalry*, etc.]: he has given his poem the continuity of basket-work. Or, if I may be indulged in another comparison, his unity is the unity produced between oil and vinegar by shaking them together, which only makes them *separate by smaller portions*. Twining.

³ So called to distinguish it from the *Iliad* of Homer, of which it seems to have been a continuation. Twining.

⁴ i. e. between *Ajax* and *Ulysses*. *Æschylus* wrote a tragedy on this subject, of which the *Ajax* of *Sophocles* is the sequel. Dacier.

⁵ Of these two plays nothing is known.
Condemned by Ritter.

2. Difference between the Iliad and Odyssey.
3. Length of the epic poem.

4. its power of extension.

5. Its proper metre.

timents and the diction should be well formed ; all which were first used by Homer, and are used by him fitly. For of his two poems, the Iliad indeed contains the simple and pathetic ; but the Odyssey, the complex ; for through the whole of it there is discovery² and moral. And besides these things, he excelled all poets in diction and sentiment. The epopee, however, differs from tragedy in the length of the composition, and in the metre. But the proper boundary of its length has been before described ; for it should be such that the beginning and the end may be seen at one view. [And this will be effected if the compositions are shorter than those of the ancient poets, and brought to the same length with the multitude of tragedies that are recited at one hearing³.] But it is the peculiarity of the epopee to possess abundantly the power of extending its magnitude ; for tragedy is not capable of imitating many actions that are performed at the same time, but that part only which is represented in the scene, and acted by the players. But in the epopee, in consequence of its being a narration, many events may be introduced which have happened at the same time, which are properly connected with the subject, and from which the bulk of the poem is increased. Hence, this contributes to its magnificence, transports the hearer to different places, and adorns the poem with dissimilar episodes. For similitude of events rapidly produces satiety, and causes tragedies to fail. But heroic metre is established by experience as adapted to the epopee. For if any one should attempt narrative imitation in any other metre, or in many

² See Pope's translation, xvi. 206, etc., where Ulysses discovers himself to Telemachus—xxi. 212, to the shepherds—xxiii. 211, to Penelope—xxiv. 375, to his father—ix. 17, to Alcinous—iv. 150, etc., Telemachus is discovered to Menelaus by his tears—v. 189, to Helen, by his resemblance to his father—xix. 545, Ulysses is discovered to the old nurse, by the scar. Twining.

³ This is quite contrary to Aristotle's own opinion. See Ritter. Twining's great and tasteful learning cannot bring him to any satisfactory explanation of these words.

metres mingled together, the unfitness of it would be apparent. For heroic metre is of all others the most stable and ample. [Hence it especially receives foreign words and metaphors. For narrative imitation excels all others⁴.] But Iambics and tetrametres have more motion; the one being adapted to dancing, but the other to acting. It would, however, be still more absurd, to mingle them together, as Chæremon⁵ did. Hence, no one has composed a long poem in any other measure than the heroic; but, as we have said, Nature herself teaches us to distinguish the measure best suited. Homer, indeed, deserves to be praised for many other things, and also because he is the only poet who was not ignorant what he ought to do himself. For it is requisite that the poet should speak in his own person as little as possible; for so far as he does so he is not an imitator⁶. Other poets, therefore, take an active part through the whole poem, and they only imitate a few things, and seldom⁷. But Homer, after a short preface, immediately introduces a man or a woman, or something else⁸ that has manners; for there is nothing in his poem unattended with manners. It is necessary, therefore, in tragedies to produce the wonderful; but that which is contrary to reason (whence the wonderful is best produced) is best suited to the epopee, from the agent not being seen⁹. In the next place, the particulars respecting the pursuit of Hector

6. Obscurity of mixed metres.

7. Praise of Homer.

8. The wonderful considered in reference to tragedy and epopee.

⁴ Condemned by Ritter.

⁵ Cf. l. 9.

⁶ Strictly speaking. See Dissertation i. p. 37. Twining.

⁷ This is remarkably the case with *Lucan*; of whom Hobbes says, that "no heroic poem raises such admiration of the poet as his hath done, though not so great admiration of the persons he introduceth."—[Discourse concerning the Virtues of an Heroic Poem.] Twining.

⁸ As gods, goddesses, allegorical beings, etc. Twining.

⁹ The best comment to which I can refer the reader upon all this part of Aristotle, is to be found in the 10th of the *Lectures on Chivalry and Romance*, in which the *Italian* poets, and the privileges of genuine poetry, are vindicated with as much solidity as elegance, against those whom Dryden used to call his "*Prose Critics*,"—against that sort of criticism "*which looks like philosophy, and is not*."—Dr. Hurd's *Dialogues*, etc. vol. iii. Twining.

9. False reasoning respecting poetry.

10. Further precepts respecting poetic probability.

would appear ridiculous in the scene; the Greeks indeed standing still, and not pursuing, and Achilles making signs to them, by the motion of his head, not to engage¹⁰. But in the epos this is concealed. Now, the wonderful pleases; of which this is an indication, that all men, when they wish to gratify their hearers, add something to what they relate. Homer also in the highest degree taught others how to feign in a proper manner. But this is a parallogism. For men fancy that when the consequent follows or results from the antecedent, the consequent may be converted, and that the antecedent will follow from the consequent. This, however, is false. [But why, if the antecedent be false, so long as this other be otherwise, should the consequent necessarily follow? For through knowing the consequent to be true, our soul parallogizes, and concludes that the antecedent also is true. And there is an example of this in "the Washing¹¹."] Again, one should prefer things which are impossible but probable, to such as are possible but improbable. Fables also should not be composed from irrational parts, [but as much as possible, indeed, they should have nothing irrational in them: if, however, this is impossible, care should be taken that the irrational circumstance does not pertain to the fable, as in the case of Œdipus not knowing how Laius died¹². For it must not be brought into the drama, like the narration of the Pythian games in the Electra¹³, or him who, in the tragedy of the

¹⁰ Pope's Iliad, xxii. 267.—Perhaps the idea of stopping a whole army by a nod, or shake of the head, (a circumstance distinctly mentioned by Homer, but sunk in Mr. Pope's version,) was the absurdity here *principally* meant. If this whole Homeric scene were represented on our stage, in the best manner possible, there can be no doubt that the effect would justify Aristotle's observation. It would certainly set the audience in a roar. Twining.

¹¹ I follow Ritter's text and version, but both he and Donaldson regard these words as an interpolation.

¹² Cf. Soph. Œd. Tyr. 112, sqq. This clause is condemned by Ritter.

¹³ Id. Electr. 680, sqq. See my Introduction to Sophocles, p. xiii.

Mysians, comes from Tegea to Mysia without speaking.] It is ridiculous, therefore, to say, that otherwise the fable would be destroyed; for such fables should not at first be composed. But if they are composed, and it appears more reasonable that they should be, the absurdity also must be admitted; since the irrational circumstances in the *Odyssey*, such as Ulysses being left [on the shore of Ithaca by the Phœacians], would evidently have been intolerable, if they had been fabricated by a bad poet. But now the poet conceals the absurdity, and renders it pleasing by the addition of other beauties. The diction, likewise, should be laboured in the sluggish parts of the poem, and which exhibit neither manners nor sentiment¹⁴. For a very splendid¹⁵ diction conceals the manners and the reasoning.

11. The diction in the respective parts.

CHAP. XXV.

On removing critical Objections.

[WITH respect to critical objections¹, and the solutions of them, the number and quality of their species

1. Objections of critics,

¹⁴ The reader may wonder that Aristotle did not add—"nor passion." But that part of the epic and tragic poem, which he calls the *sentiments*, includes the *expression of passion*. Twining.

¹⁵ "His diction [Thomson's] is in the highest degree florid and luxuriant; such as may be said to be to his images and thoughts *both their lustre and their shade*; such as invests them with splendour, through which perhaps they are not always easily discerned."—*Dr. Johnson's Life of Thomson*. Twining.

¹ The original is, *Problems*. This appears to have been a common title of critical works in Aristotle's time. Objections, censures, and the most unreasonable cavils, were conveyed in the civil form of *problems and questions*. Thus, many criticisms on *Homer* were published under the title of *Homeric Problems*.

The scope of this part of Aristotle's work is of more importance to his subject than, at first view, it may appear to be. In teaching how to answer criticisms, it, in fact, teaches, (as far, I mean, as it goes,) what the poet should do to avoid

- and their solutions. will become apparent from surveying them as follows. Since the poet is an imitator, in the same manner as a painter, or any other person who makes likenesses, it is necessary that he should always imitate one of the three [objects of imitation]. For he must either imitate things such as they were or are, or such as they are said and appear to be³, or such as they ought to be. But these are enunciated either by [common] diction, or by foreign words and metaphors. For there are many modifications⁴ of diction; and we concede these to the poets. Besides this, there is not the same rectitude of politics and poetry, nor of any other art and poetry. But of poetry itself, the error is twofold; the one essential, the other
2. accidental. For the error is essential, when it attempts to imitate that which is beyond its power; but [when it attempts to imitate improperly, as⁴] if, for instance, a horse should be described as moving both its right legs together, or an error in any of the
 3. Error twofold, essential and accidental.
 4. accidental.

giving occasion to them. It seems, indeed, intended as an *apology* for Poetry, and a vindication of its privileges upon true *poetical* principles, at a time when the art and its professors were unfairly attacked on all sides, by the cavils of *prosaic* philosophers and sophists, such as *Ariphrades*, *Protagoras*, *Euclid*, etc., and by the *puritanical* objections of PLATO and his followers. Twining.

If Ritter's strictures be true, our acquaintance with *Aristotle's* Poetics is now at an end. In a learned annotation (pp. 263—6) he seems to have completely proved the spurious character of both this and the following chapter.

³ This includes all that is called *faery*, *machinery*, ghosts, witches, enchantments, etc.—things, according to *Hobbes*, "beyond the actual bounds, and only within the "*conceived possibility* of nature." [See the *Letters on Chivalry*, as above.] Such a being as *Caliban*, for example, is *impossible*. Yet Shakspeare has made the character *appear probable*; not, certainly, to *reason*, but to *imagination*; that is, *we make no difficulty about the possibility* of it, in *reading*. Is not the *Lovelace* of Richardson, in this view, more out of nature, more improbable, than the *Caliban* of Shakspeare? The latter is, at least, consistent. I can *imagine* such a monster as Caliban: I never could imagine such a man as Lovelace. Twining.

⁴ *πρόθεσις*, inflections, dialectic variations, etc.

⁵ These words, *τὸ προσκρίσθαι μὴ ὁρθῶς*, are totally inconsistent with the meaning. See Ritter.

arts be committed in poetry, as in medicine, or any other art, when it fabricates things that are impossible, these, therefore, whatever they may be, are not the *essential* errors of poetry. Hence, one must refute the objections of critics from surveying these particulars. For in the first place, indeed, the poet errs, if what he fabricates is impossible according to the art itself; but it will be right if the end of poetry is obtained by it. For we have before shown what the end is, viz. if the poet thus renders what he fabricates, or any other part of the poem, more capable of producing a more striking effect⁵. An example of this is the pursuit of Hector. If, however, this end can be more or less attained, and that according to the art pertaining to these things, then the fault will not be excusable. For it is requisite if possible to be entirely without error. Further still, it should be considered whether the error ranks among things essential to the poetic art, or foreign and incidental. For it is a less fault not to know that a hind has no horns, than to depict a bad copy of one. Besides this, also, if the poet is blamed for not imitating things as they truly are, the reply is, but he imitates them as they should be. Thus Sophocles said, that he described men such as they should be, but Euripides such as they are. If, however, it should be objected, that the poet represents things in neither of these ways, he may say that he represents them as men say they are; as, for instance, in things pertaining to the gods. For perhaps it is neither better thus to speak, nor true, but it is just as it may happen; as Xenophanes observes, "At any rate they tell us such things⁶." Perhaps, however, it may be said, that it is not better, indeed, thus to speak, but that the thing was so; as in the passage concerning the arms [of the sleeping soldiers of Diomed]:

5. Whence objections may be removed.

6.

7.

⁵ A false definition. See Ritter.

⁶ "Tyrwhitt's emendation, ἀλλ' οὐ φασιν τάδε, seems to be the best of those which have been proposed." Donaldson.

ἰγχεα δὲ σφιν δρθ' ἐπὶ σαυρωτῆρος,
 ————fixed upright in the earth
 Their spears stood by———⁷

- For such was the custom at that time, as it is now
 8. with the Illyrians. With respect, however, to the inquiry whether a thing is said or done by any one well or ill, we must not only regard the thing itself which is done or said, whether it is good or bad, but we must also [consider] the person by whom it is done or said, viz. concerning whom, or when, or to whom, or on what account, he speaks or acts; as whether it is for the sake of bringing to pass a greater good, or in order to avoid a greater evil. But it is requisite to remove some objections by looking to the diction; as, for instance, to foreign words:

9. Diction.

On mules th' infection first began.

For perhaps he does not use οὐρῆας to signify *mules*, but *guards*⁸. And in what he says of Dolon,

—— εἶδος μὲν ἔην κακός⁹——
 —— of form unhappy

It may be said that εἶδος κακός does not signify a body without symmetry, but a deformed face. For the Cretans call a man with a good face εὐεῖδης. And,

Ζωρότερον δὲ κίραις ——¹⁰

For ζωρότερον may not mean *undiluted* wine, as for

⁷ Il. X. 152. See Ritter.

⁸ Il. A. 50. Zoilus thought the pestilence should have begun with the men first.

⁹ Il. K. 316. The objection of the critics is *supposed* to have been, that an *ill-made* man could not be a good racer. See Pope's note. Twining.

¹⁰ Iliad ix. 267, 8.—Pope follows the common, and probably the right, acceptance of the word. "Mix *purer* wine."—Aristotle's interpretation has not made its fortune with the critics. He seems to have produced it rather as an exemplification of the *sort* of answer which he is here considering, than as an opinion in which he acquiesced himself. It was, probably, an answer which *had* been given. The cavil, according to Plutarch, came from *Zoilus*. [See the Symposiac Prob. of Plut. v. 4, where this subject is discussed, and several other conjectural senses of the word ζωρότερον are proposed.] Twining.

intemperate drinkers, but wine poured out rapidly.
But a thing is said metaphorically, as,

10 Meta-
phor.

The other gods and men " ———
Slept all the night.

And at the same time he says :

Ἦτοι δὲ ἰς πίδιον τὸ Τρωικὸν ἀθήσειεν
Ἀλκῶν συρίγγων θ' ὁμαδόν. ———

For *all* is said metaphorically, instead of *many*, *all*¹² being a *species* of *many*. And thus οἷη δ' ἄμμορος is said of Orion metaphorically. For that which is most known, is called *alone* or *sole*¹³. Objections also may be solved from accent, as Hippias the Thasian solved the following passages :

11. Ac-
cent.

δίδομεν δέ οἱ [εὐχοι ἀρίσθαι].

And,

—— τὸ μὲν οὐ καταπύθεται εὐβορῆ¹⁴.

Objections likewise may be solved by punctuation ; 12. Punc-
as in the following instance from Empedocles, tuation.

Αἴψα δὲ θνήτ' ἐφύοντο, τὰ πρὶν μάθον ἀθάνατ' εἶναι,
Ζωῶντα τὰ πρὶν κείριτο.¹⁵ ———

¹¹ Beginning of Il. ii.—*What* it was that wanted defence in this passage, and that was to be taken metaphorically, we are not told. That it was the representation of the *gods* as *sleeping*, is the most probable conjecture. This is somewhat softened by Mr. Pope's "*slumbered*." Homer says—"SLEPT *all the night*,"—εὐδον παννυχιοι. Twining.

¹² πάντας is a far-fetched notion from παννύχιοι. The author has blundered between Il. B. 1., and Il. I. 1., and 11—13. See Ritter.

¹³ Il. xxi. 297, has δίδομεν δέ τοι εὐχοι ἀρίσθαι, but the line, as here quoted, is not found in Homer. See Ritter. Taylor observes: "It alludes to the order given by Jupiter to the dream in Il. ii. to deceive Agamemnon. Here, if δίδομεν is read with an accent in the antepenult, it will signify *damus*, and will imply that Jupiter promises Agamemnon glory from the battle ; but if it is read with an accent in the penult, δίδόμεν, so as to be the infinitive Ionic, it will signify *dare*. It will therefore imply that Jupiter orders the dream to *give the hope* of victory to Agamemnon."

¹⁴ If this is read with the circumflex on the οὐ, it will signify that the oak became putrid by the rain, which is absurd ; but if it is read with an acute accent and spiritus lenis οὐ, it will signify *not*, and will imply, that the oak was not rotted by the rain. Taylor.

¹⁵ The sense here depends on the punctuation. For if the

13. Ambiguity. Or by ambiguous expressions, as [in *Iliad*, x.]

—— παρῆχκεν δὲ πλείων νοξ¹⁴.

Night of two parts the greater share had waned,
But of her empire still a third remain'd.

14. Custom of diction. For the word πλείων is ambiguous. Or objections may be answered from the custom of diction; as when wine is called κεκραμένον, *mixed*¹⁷; whence has been said,

—— Greaves of new-wrought tin.

And those that work on iron are called brasiers¹⁸.
Whence Ganymede is said

—— To pour out wine for Jove¹⁹; Il. 20.

15. Contraries. though the gods do not drink wine. But this may also be metaphorically said. It is necessary, however, when a word appears to signify something of a contrary nature, to consider how many significations it may have in the passage before us; as,

—— τῇ ῥ' ἔσχατο χάλκειον ἔγχος—

"There *stuck* the lance²⁰:"——

For here the word *stuck* implies that the lance *was impeded*. Of how many different senses a word may admit, one may learn thus, by a contrary manner

comma is put after ζωρὰ in the second line, instead of πρὶν, the sense will be, "Immediately those things were made mortal which before had learnt to be immortal, and pure which before were mixed." But if the comma is put after πρὶν instead of ζωρὰ, the sense will be, "that those things which before were pure, were mixed." Taylor. But see Ritter's learned note.

¹⁴ But the ambiguity is occasioned by the word πλείων, which may either signify *more than*, or *the greater part of*. Taylor. Il. K. 252.

Ἄστρα δὲ δὴ προβίβηκε, παρῆχκεν δὲ πλείων νοξ,
τῶν δύο μοιράων.

¹⁷ "Ea potio quæ ex aqua et vino commixta est tamen vinum nominatur. Nove dictum φασιν εἶναι pro λέγουσιν." Ritter.

¹⁸ "Schol. in Hom. Il. T. 283. παλαιὰ ἡ χρῆσις τοῦ χαλκοῦ νομίζεω τὸν σίδηρον. ἀμείλει καὶ χαλκίαις τοῦτο τὸν σίδηρον ἐργαζομένους. Ritter.

¹⁹ Il. γ. 234.

²⁰ Il. γ. 272. This is consummate twaddle. See Twining and Ritter.

from what Glauco says²¹, [when he asserts that] "some men presuppose irrationally, and then reason from their own decision: and, having once pronounced their opinion, reprobate whatever is contrary to their [preconceived] opinion." This was the case with respect to Icarius. For the multitude fancy that he was a Laconian. On this supposition, therefore, it is absurd that Telemachus should not meet him, on his arrival at Lacedæmon²². Perhaps, however, the truth is as the Cephallenians say, viz. that Ulysses married among them, and that Ioadius, and not Icarius, [was his father-in-law]. It is probable, therefore, that this objection is erroneous. In short, it is necessary to refer the impossible either to the poetry, or to that which is better, or to opinion. For, with respect to poetry, probable impossibility is more eligible, than the improbable and possible, and things should be such as Zeuxis²³ painted. And also [we may refer the impossible] to that which is better²⁴: for it is necessary that the pattern should transcend those things which are said to be irrational. The objection, also, that something is irrational may be solved by saying, that sometimes it is not irrational; for it is probable that what is improbable may have happened. But^{17.} with respect to the solution of apparent contraries, these are to be considered in the same manner as^{18.}

²¹ This is most clumsily and indistinctly expressed.

²² See Ritter.

²³ "In ancient days, while Greece was flourishing in liberty and arts, a celebrated painter, [Zeuxis,] having drawn many excellent pictures for a certain free state, and been generously rewarded for his labours, at last made an offer to paint them a *Helen*, as a *model* and *exemplar* of the most exquisite beauty. The proposal was readily accepted, when the artist informed them, that in order to draw *one* Fair, it was necessary he should contemplate *many*. He demanded, therefore, a sight of all their finest women. The state, to assist the work, assented to his request. They were exhibited before him; he selected the most beautiful; and from these formed his *Helen*, more beautiful than them all."—Harris's *Three Treatises*, p. 216. Twining.

²⁴ Improved nature, ideal beauty, etc., which, elsewhere, is expressed by what *should be*. Twining. Ritter rightly supplies *τὸ εἰδωμένον διὰ διόγμων*.

19. When
reprehen-
sion is
correct.

20. Sum-
mary.

*elenchi*²⁵ in arguments, if the same thing [is affirmed or denied], and with respect to the same thing, and after the same manner, and whether it is the same person [who affirms and denies], and also with what reference he speaks, and what a wise man would understand from his words²⁶. The reprehension [of poets], on the score of improbability²⁷ and vicious manners will be right, through which it is shown, that they have without any necessity devised something irrational. Thus irrationality is used [without any necessity] by Euripides in his *Ægeus*, and viciousness, in the character of Menelaus, in his *Orestes*. The reprehensions, therefore, may be derived from five species. For they are either made because impossibilities are introduced, or absurdities, or things of evil tendency, or contraries, or as errors committed against the rectitude of art. But the solutions may be surveyed from the above-mentioned number; for they are twelve.²⁸]

CHAP. XXVI.

1. Re-
spective
merits of
tragic and
epic imi-
tation.

ONE may, however, question whether epic or tragic imitation is the more excellent. For if that imitation is the better which is less troublesome to the spectator, and such an imitation pertains to better spectators, that which imitates every thing is evidently attended with molestation. For, as if the spectators will not perceive what is acted without the addition of much movement¹, they make great

²⁵ i. e. confutations.

²⁶ I have followed Ritter, who has done much for this awkward heap of tautologies.

²⁷ Surely the words *καὶ ἀλογία καὶ μοχθηρία* are corrupt or interpolated.

²⁸ The reader who regards his own ease, will, I believe, do well to take this for granted. If, however, he has any desire to try the experiment, he may read my note on this passage; and I wish it may answer to him. Twining.

¹ Though Aristotle instances in *gesture* only, the objection,

gesticulations; just as bad players on the flute turn themselves round, when it is requisite to imitate the action of the discus; or when they sing of Scylla, draw to themselves² the coryphæus, or leader of the band. Such, then, is tragedy, as the modern actors are in the estimation of their predecessors³. Hence, Myniscus called Callipides an ape, in consequence of carrying his imitation to a great excess. And there was also a similar opinion respecting Pindar [the player]. But as these latter actors are to the former, so is the whole art of tragedy to the epopee. They say, therefore, that the epopee is calculated for hearers of the better sort, on which account it does not require scenery; but that tragedy is calculated for the vulgar. Hence, tragic imitation, which is troublesome to the spectator, will evidently be inferior to epic imitation.

2. Complaints respecting actors.

In the first place, however, this accusation does not pertain to the poet, but the actor; since it is possible in reciting epic poetry to overdo action, as Sosisstratus did, and singing likewise, as Mnastheus of Opus did. In the next place, neither is all motion to be despised, since neither is every kind of dancing,

3. But the whole question rather pertains to the actor than the poet.

no doubt, extended to the *whole* imitative representation of the theatre, including the *stage* and *scenery*, by which *place* is imitated, and the *dresses*, which are necessary to complete the imitation of the *persons*. Twining.

² "Ελκοντες τὸν Κορυφαῖον—To imitate *Scylla*.—"naves in saxa trahentem," as Virgil has expressed it. But it is not easy to see how the performer, at least while he was playing, could well spare a hand for this operation.—This was even worse than what we call *humouring* a catch; when, for instance, a singer who is performing Purcell's "*Fie, nay prithes, John*,"—thinks it necessary to collar his neighbour. Twining.

Sheridan has burlesqued this habit of "suited the action" with admirable humour in "the Critic." Sir Christopher Hatton turning out his toes, Lord Burleigh shaking his head, and Tilburnia going mad in white satin, are among the best of his innumerable *facetiae* on the subject. Compare also "the Rehearsal," Act I, where Bayes instructs the Thunder and Lightning how to express their noisy and rapid powers by suitable action.

³ The "decline of the drama," then, was a subject of complaint at Athens, as well as in London.

4. Reasons for the superiority of tragedy.

but only that which is bad; and hence Callipedes was blamed, as others now are for imitating light women⁴. Further still, tragedy, in the same manner as the epopee, may fulfil its purpose without gesture; for by reading, it is manifest what kind of thing it is. If, therefore, it is in other respects better, it is not necessary that it should be accompanied [by motion and gesture]. In the next place, tragedy has every thing which the epopee possesses. For it may use metre, and it has also music and scenery, as no small parts, through which the pleasure it produces is most apparent. To which may be added, that it possesses perspicuity, both when it is read, and when it is acted. The end, too, of its imitation is confined in less extended limits. For being crowded into a narrower compass, it becomes more pleasing than if it were diffused through a long period of time. Thus, for instance, if one were to put the *Oedipus* of Sophocles into as many verses as the *Iliad*, [it would be less pleasing]. Again, the imitation of the epopee has less unity [than tragic imitation]; of which this is an indication, that from any kind of [epic] imitation many tragedies may be produced. Hence, if he who writes an epic poem should choose a fable perfectly one, the poem would necessarily either appear short, as if curtailed, or if it should be accompanied with length of metre, it would seem to be languid⁵. But if he should compose one fable from many fables, I mean, if the poem should consist of many actions, it would not possess unity. Thus, the *Iliad* and *Odyssey* contain many such parts, which of themselves possess magnitude, though these poems are composed, as much as possible, in the most excellent

⁴ Taylor has gone fearfully astray in his version, "for not imitating free women"! The negative particle belongs to the adjective. Twining observes: "as no actresses were admitted on the Greek stage, their capital actors must frequently have appeared in female parts, such as *Electra*, *Iphigenia*, *Medea*, etc. This is sufficiently proved by many passages of ancient authors; and among others, by a remarkable story of Polus, an eminent Greek Tragic actor, told by *Aulus Gellius*."

⁵ *ὕδαρῃ*, milk-and-waterish.

manner, and are most eminently the imitation of one action. If, therefore, tragedy excels in all these 7. particulars, and besides this, in the work of art, (for neither tragic nor epic imitation ought to produce a casual pleasure, but that which has been stated,) it is evident that it will be more excellent than the epopee, in consequence of attaining its end in a greater degree. And thus much concerning tragedy, 8. and the epopee, as to themselves, their species, and their parts, their number, and their difference, what the causes are of their being good or bad, and also concerning the objections which may be made to them, and the solutions of the objections.

QUESTIONS

ON

ARISTOTLE'S POETIC.

CHAP. I.

EXPLAIN Aristotle's notion of imitation.

To what different arts does it apply?

In what manner do these themselves differ?

How do you prove that Poetry is an art?

In what does the poet agree with, in what differ from, the historian?

What does Aristotle say on the subject of metre?

CHAP. II.

What are the objects of (dramatic) imitation, and what inference respecting moral character is thence derived?

What parallel does Aristotle draw between the conduct of painters and poets in this respect?

How also do tragedy and comedy differ?

CHAP. III.

Explain the three modes of imitation.

State the traditional derivations of tragedy and comedy.
Are they to be regarded as genuine?

CHAP. IV.

Give Aristotle's views on the physical and sensitive causes of poetry.

How did men's dispositions actuate their choice of subject and metre?

Were all Homer's poems of a grave cast?

What analogy do his works respectively bear to tragedy and comedy?

What changes took place in the different styles?

Trace the progress of tragedy from its earliest elements, and explain the respective improvements made by Æschylus and Sophocles.

What does Aristotle say on the natural affinity of metres to ordinary life?

CHAP. V.

With what restrictions are we to regard comedy as *μίμησις φαυλοτέρων*?

Define *τὸ γελοῖον*.

Are the changes through which comedy has passed as well known as those of tragedy, and what appears to have been the reason?

What do you read of Epicharmus, Phormis, and Crates?

Trace the analogy between the epopee and tragedy.

CHAP. VI.

Define tragedy, *μελοποιία*, *λέξις*, rhythm, harmony, and *ὄψις*.

Enumerate the parts of tragedy that constitute its quality.

What remark does Aristotle make respecting the manners of modern tragedies?

What parts of tragedy convey most delight?

What fault is usually committed?

Define *διανοία*.

CHAP. VII.

Define a poetic whole, and its parts.

How is beauty concerned therein?
What limits does Aristotle set to the length of tragedy?

CHAP. VIII.

Define fable.
What errors in construction do poets now commit?
What events are the best to select?

CHAP. IX.

Should a poet narrate real events? if not, what kind are best suited?

But may not real and probable events sometimes coincide?

Define poetical probability.

What is the superiority of Poetry over history?

Define universal.

What are the subjects most popular in tragedy?

Of what must the poet be a contriver?

Which fables and simple actions are worst?

Define them.

What kind of perfect actions must be imitated in tragedy?

Give an example of accidents seeming to proceed from design.

CHAP. X.

Define a simple action.

CHAP. XI.

Define revolution and discovery, and give some examples.

CHAP. XII.

Give an account of pathos.

Describe the parts of a tragedy according to its *quantity*.

CHAP. XIII.

Give some examples of the best modes of exciting pity and terror, and compare their respective merits.

What character does Aristotle give of Euripides?

Is this remark meant to apply to his Poetry as a whole?

What kind of tragedy is most popular?

Through what reason?

CHAP. XIV.

Can terror and pity be excited by stage appointments?
 Is it well to depend upon this means?
 Why not?
 What actions are truly pitiable, and why?
 Give different instances.

CHAP. XV.

What are the four requisites of manners?
 Give some examples.
 How ought the *λύσεις* of fables to arise?
 Where should art aim at matters extraneous to the drama?
 Whom should we imitate, and how?
 Does Aristotle make reference here to any other treatise?

CHAP. XVI.

Give some examples of different recognitions.
 Which does Aristotle consider the best?

CHAP. XVII.

How will the poet be best enabled to realize the objects or actions he imitates?
 Who are best capable of persuading, and what inference do you thence derive respecting the character of a poet?
 What plan should be adopted in setting about a subject?
 What follows?
 Give Aristotle's example from Euripides.
 What do you mean by poetic madness?
 What is the character of episodes in epic and tragic Poetry respectively?

CHAP. XVIII.

Explain the *δίσεις* and *λύσεις*.
 Give some illustrations.

CHAP. XIX.

What do you read concerning *λέξεις* and *διανοία*?
 What knowledge properly belongs to the poet?
 How did Protagoras accuse Homer?
 Was it justly?

CHAP. XX.

Give an account of the parts of speech.

CHAP. XXI.

Explain and illustrate the different kinds of words, and collect what has been said in the Rhetoric on the same subject.

CHAP. XXII.

What are the virtues of diction?
How are they respectively obtained?
Quote some of the illustrations.
Does this chapter appear to be genuine?

CHAP. XXIII.

What are the requisites of narrative Poetry?
In what does its form differ from that of history?
Illustrate this by an example.
What was Homer's conduct in respect to episodes?
What do you know of the Cyprica, the Little Iliad?

CHAP. XXIV.

Describe the forms of epopee, and their similarity to those of tragedy.

Collect all that Aristotle says of Homer's excellence in the different departments of poetry.

What do you read of the heroic metre?

Explain Aristotle's views respecting possibility and probability.

CHAP. XXV.

Give a few specimens of the answering critical objections.

CHAP. XXVI.

Compare the respective merits of epic and tragic Poetry.

ANALYSIS

OF

ARISTOTLE'S POETIC,

WITH THE ORIGINAL DEFINITIONS.*

I.—1. ON Poetry in general, its species and parts.

2. Now, all Poetry is an imitation, as also flute and cithern-playing, but they differ either in the *means*, the *objects*, or the *manner* of their imitation.

6. Epopee imitates *μόνον τοῖς λόγοις ψιλοῖς ἢ τοῖς μέτροις*, either simple or mixed.

7. But custom has falsely connected the name of poet with the *metre* only, and not with their manner of imitation, as is shown in the case of Empedocles and Chæremon.

10. Dithyramps, nòmes, tragedy, and comedy employ all the means of imitation, but some do so all together, others separately.

II.—1. But since *actions* are the objects of imitation, the characters must be bad or good, *κακία γὰρ καὶ ἀρετὴ τὰ ἥθη διαφέρουσι πάντες*; and hence men must be imitated either as they are, or under a more exalted or more contemptible view, as in the respective paintings of Dionysius, Polygnotus, and Pauson. The same thing holds good in other arts, and in Poetry, as is shown by Cleophon, Homer, and Hegemon respectively.

4. And hence is the difference of tragedy and comedy, *ἢ μὲν γὰρ χείρους, ἢ δὲ βελτίους μιμεῖσθαι βούλεται τῶν νῦν*.

III.—1. The third difference is as to the manner of imitation. For the poet may imitate the same object, and by the same means, but he may do so either, *i. in narrative, i. e. by*

* As I follow the text of Ritter, no analysis will of course be made of such passages as are satisfactorily proved, by this scholar, to be spurious, especially when such passages are but an analysis of what has been already said in the Rhetoric.

personating other characters, or in his own person. II. Or he may represent πάντας ὡς πράττοντας καὶ ἐνεργοῦντας.

2. Since, then, there are three differences of imitation (ἐν οἷς τε καὶ ἃ καὶ ὥς), Sophocles agrees with Homer, because both imitate τοὺς σπουδαίους, but with Aristophanes, ὅτι τοὺς πράττοντας. [Hence the Dorians lay an etymological claim to the invention of the Drama and Comedy, δράματα, ὅτι μιμῶνται δρώντας, κωμῳδοὶ, τῇ κατὰ κώμας πλάνῃ ἀτιμαζόμενοι ἐκ τοῦ ἄστεως.]

IV. Two natural causes of Poetry. 1. To imitate is the peculiar faculty and pleasure of man, as is evident from his taste for images, pictures, etc., the resemblance even of the worst objects causing satisfaction. And this results from the pleasure felt in *learning* and *forming conclusions*.

6. II. Moreover, rhythm and harmony are equally natural to us, and τὰ μέτρα μόρια τῶν ῥυθμῶν ἐστί.

Poetry, therefore, gradually arose from the combined exertions of οἱ μιμητικοὶ καὶ οἱ μετρικοί.

7. And of these men οἱ σεμνότεροι τὰς καλὰς ἐμιμοῦντο πράξεις καὶ τὰς τῶν τοιούτων, οἱ δὲ εὐτελέστεροι τὰς τῶν φαύλων, the one writing *hymns* and *encomia*, the others *satires*, of which Homer's *Margites* was the earliest known.

8. Iambic was the fit metre for vituperation. But Homer, by substituting τὸ γελοῖον for ψόγος, suggested *comedy*, for his *Margites* has the same relation to comedy as the *Iliad* to tragedy. 10. And the heroic and vituperative poets respectively became τραγωιδιάσκαλοι and κωμωδοποιοί.

11. Tragedy and comedy were at first ἀντοσχεδιαστικάί, the one resulting ἀπὸ τῶν ἐξαρχόντων τὸν διθύραμβον, but the other ἀπὸ τῶν τὰ φαλλικά; they then gradually increased, as improvements presented themselves.

13. Æschylus added a second actor, and gave the pre-eminence to the dialogue (see, however, the note). Sophocles added a third, and introduced scenic decoration. While tragedy remained in its simple, satyric state, the Trochaic metre was employed; but, on its improvement, the Iambic, as being the most naturally adapted to every-day discourse. The Trochaic Poetry was σατυρική καὶ ὀρχηστικωτέρη, but τὸ ἱαμβεῖον μάλιστα λεκτικὸν τῶν μέτρων.

15. Episodes were also multiplied, and the other parts improved.

V.—1. *Κωμῳδία ἐστὶ μίμησις φαυλοτέρων*, but not *κατὰ πᾶσαν λαίαν*, but *τὸ γελοῖον*, which is a part τοῦ αἰσχροῦ. For *γελοῖον* is defined *ἀμάρτημά τι καὶ αἰσχος ἀνώδυνον καὶ οὐ φθαρτικόν*.

2. The progress of comedy, from its being for a long time unpopular, is unknown, but its poets are known from the time when it began to possess any form.

3. The inventor of masks, dialogues, and an increased number of actors is likewise unknown. But Epicharmus and Phormis of Sicily first invented comic fables, but Crates was the first Athenian who began *ἀφέμενος τῆς λαμβικῆς ιδέας καθόλου ποιεῖν λόγους καὶ μύθους*, to introduce dialogues and plots of a regular character.

4. Tragic Poetry and epic agree in imitating τοὺς σπουδαίους, but epic differs from it *τῷ τὸ μέτρον ἀπλοῦν ἔχειν καὶ ἀπαγγελίαν εἶναι*, and also *τῷ μήκει*. For *εποπεία* is *ἀόριστος τῷ χρόνῳ*, but tragedy *ὑπὸ μίαν περίοδον ἡλίον*. But at first there was no such restriction.

5. As all the parts of epic Poetry are found in tragic, (but not *vice versa*), a judge of the former will be a judge of the latter also.

VI.—2. Tragedy is defined to be *μίμησις πράξεως σπουδαίας καὶ τελείας, μέγεθος ἐχούσης, ἡδυσμένη λόγῳ, χωρὶς ἐκάστου τῶν εἰδῶν ἐν τοῖς μορίοις δρώντων, καὶ οὐ δι' ἐπαγγελίας, ἀλλὰ δι' ἐλέου καὶ φόβου περαίνουσα τὴν τῶν τοιούτων παθημάτων κάθαρσιν*. And *ἡδυσμένος λόγος* is ὁ ἔχων ῥυθμὸν καὶ ἁρμονίαν καὶ μέλος. But by *χωρὶς τῶν εἰδῶν*, Aristotle means *τὸ διὰ μέτρων ἕνια μόνον περαίνεσθαι, καὶ πάλιν ἕτερα διὰ μέλους*.

4. And since tragedy imitates action, the necessary parts of it must be ὁ τῆς ὄψεως κόσμος, μελοποιΐα, and λέξις,=ἡ τῶν μέτρων σύνθεσις.

5. And since action cannot exist but by ἦθος and διανοία, which are its two causes, καὶ κατὰ ταύτας καὶ τυγχάνουσι καὶ ἀποτυγχάνουσι πάντες· ἐστὶ δὲ τῆς μὲν πράξεως ὁ μῦθος μίμησις. 6. For he defines μῦθος to be ἡ σύνθεσις τῶν πραγμάτων· and ἥθη, καθ' ἃ ποιούς τινες εἶναι φασὶν τοὺς πράττοντας· and διάνοια, ἐν ὅσοις λέγοντες ἀποδεικνύουσι τι, ἢ καὶ ἀποφαίνονται γνώμην.

7. Hence there are six parts of tragedy, as far as its quality is concerned, μῦθος, ἥθη, λέξις, διανοία, ὄψις, μελοποιΐα· οἷς μὲν γὰρ μιμοῦνται, δύο μέρη ἐστὶν· ὡς δὲ μιμοῦνται, ἔν· ἃ δὲ μιμοῦνται, τρία. καὶ παρὰ ταῦτα οὐδέν.

9. The most important is ἡ τῶν πραγμάτων σύστασις, for tragedy imitates *actions*, not *men*, and *manners* only as far as they are involved by *actions*. Hence *action* is the τέλος of tragedy.

11. For it may exist without *manners*, but cannot without *action*: the later authors are imperfect in *manners*.

12. Nor would a whole string of well *mannered* incidents please so well as a regular plot.

13. And, moreover, τὰ μέγιστα οἷς ψυχαγωγεῖ ἡ τραγωδία, τοῦ μύθου μέρη ἐστὶν αἷτε περιπετεῖαι καὶ ἀναγνωρίσεις. And men arrive at perfection in *diction* and *manners*, sooner than in constructing *plots*. [The rest of this chapter is a repetition, and is inconsistent with Aristotle's own ideas in other places. See Ritter.]

VII.—2. From the previous definition, κεῖται ἡμῖν τὴν τραγωδίαν τελείας καὶ ὅλης πράξεως εἶναι μίμησιν ἐχούσης τι μέγεθος: for there may be ὅλον μηδὲν ἔχον μέγεθος. And ὅλον is τὸ ἔχον ἀρχὴν καὶ μέσον καὶ τελευτήν, 3. but ἀρχή, ὃ αὐτὸ μὲν ἐξ ἀνάγκης μὴ μετ' ἄλλο ἐστὶ μετ' ἐκεῖνο δ' ἕτερον πέφυκεν εἶναι ἢ γίνεσθαι, and τελευτή, τοῦναντίον, ὃ αὐτὸ μετ' ἄλλο πέφυκεν εἶναι, ἢ ἐξ ἀνάγκης, ἢ ὡς ἐπιτοπολύ· μετὰ δὲ τούτου ἄλλο οὐδέν, and μέσον, καὶ αὐτὸ μετ' ἄλλο, καὶ μετ' ἐκεῖνο ἕτερον. To these definitions the poet must conform.

4. Again, whatever is beautiful, must not only have a proper arrangement of its parts, but must be of a proper magnitude, neither too large for its parts to be comprehended, nor too small.

7. The proper μέγεθος of tragedy is ἐν ὅσῳ κατὰ τὸ εἶκος, ἢ τὸ ἀναγκαῖον ἐφεξῆς γιγνομένων, συμβαίνει εἰς εὐτυχίαν ἐκ δυστυχίας, ἢ ἐξ εὐτυχίας εἰς δυστυχίαν μεταβάλλειν.

VIII.—1. Μῦθος is one, not εἰς ἀνὰ ἓν, as the authors of Heracleida, etc. have wrongly supposed, but because it is the imitation of *one entire action*, complete in all its parts.

IX.—1. Moreover it is not the poet's province to relate τὰ γινόμενα, but οἷα ἂν γένοιτο, καὶ τὰ δυνατὰ κατὰ τὸ εἶκος, ἢ τὸ ἀναγκαῖον. For this is the proper difference between the historian and poet, not the use of *metre*.

3. And poetry is more philosophical than history, because it regards τὰ καθόλου, but history τὰ καθ' ἕκαστον.

4. "Ἔστι δὲ καθόλου μὲν, τῷ ποίῳ τὰ ποῖ ἅπτα συμβαίνει λέγειν, ἢ πράττειν κατὰ τὸ εἶκος, ἢ τὸ ἀναγκαῖον, οὐ στοχάζεται ἡ

ποίησις ὀνόματα ἐπιτιθεμένη· τὰ δὲ καθ' ἕκαστον, τί Ἀλκιβιάδης ἐπραξεν, ἢ τί ἔπαθεν.

5. Hence comic writers use names of their own invention, but tragedians τῶν γενομένων ὀνομάτων ἀντέχονται, at least one or two in each play.

8. But it is not necessary that a poet should confine himself to τοὺς παραδεδομένους μύθους, but he should be ποιητὴς μᾶλλον τῶν μύθων, ἢ τῶν μέτρων, inasmuch as he is ποιητὴς κατὰ τὴν μίμησιν. 9. μιμεῖται δὲ τὰς πράξεις; even if he write τὰ γενόμενα, he is no less a poet.

10. Of simple plots or actions the *episodic* are the worst. And ἐπεισοδιώδης μῦθος is that, ἐν ᾧ τὰ ἐπεισόδια μετ' ἄλληλα οὐτ' εἰκός, οὐτ' ἀνάγκη εἶναι, and such are made by bad poets, δι' αὐτοὺς, but by good ones, διὰ τοὺς ὑποκριτάς.

12. And since οὐ μόνον τελείας ἐστὶ πράξεως ἡ μίμησις, ἀλλὰ καὶ φοβερῶν καὶ ἐλκευνῶν, that which is wonderful must also have some appearance of *cause*, rather than of being ἀπὸ τοῦ αὐτομάτου καὶ τῆς τύχης, for even *casual* events are most wonderful when they seem to be from design.

X.—1. Plots, like actions, are either ἀπλοὶ or πεπλεγμένοι.

2. ἀπλὴ πρᾶξις, ἥς γενομένης, ὥσπερ ὄρισταί, συνεχοῦς καὶ μιᾶς, ἄνευ περιπετείας ἢ ἀναγνωρισμοῦ ἢ μετάβασις γίνεται· but πεπλεγμένη, ἐξ ἥς μετὰ ἀναγνωρισμοῦ, ἢ περιπετείας, ἢ ἀμφοῖν, ἢ μετάβασις ἐστὶ.

3. And these should be the necessary consequences of what has gone before, διαφέρει γὰρ πολὺ γίνεσθαι τάδε διὰ τάδε, ἢ μετὰ τάδε.

XI.—1. Ἔστι δὲ περιπέτεια μὲν ἡ εἰς τὸ ἐναντίον τῶν πραττομένων μεταβολή, κατὰ τὸ εἰκός, ἢ ἀναγκαῖον.

2. Ἀναγνώρισις δ' ἐστὶν, ὥσπερ καὶ τοῦνομα σημαίνει, ἐξ ἀγνοίας εἰς γνῶσιν μεταβολή, ἢ εἰς φιλίαν, ἢ ἐχθραν τῶν πρὸς εὐτυχίαν ἢ δυστυχίαν ὀρισμένων. καλλίστη δὲ ἀναγνώρισις, ὅταν ἅμα περιπέτεια γίνωνται.

3. There are also others, but the above is best, as producing ἔλεον ἢ φόβον.

5. And since discoveries are relative, they are sometimes of one, sometimes of both the persons.

XII. [*Of doubtful authority.* The following, however, are the definitions of the *parts of quantity*. 1. πρόλογος, μέρος ὅλον τραγῳδίας τὸ πρὸ χοροῦ παρόδου. 2. ἐπεισόδιον, μέρος ὅλον τραγῳδίας, τὸ μετὰ ὅλων χορικῶν μελῶν. 3. ἐξόδος, μέρος

ὄλον τραγῳδίας, μεθ' ὃ οὐκ ἔστι χοροῦ μέλος. 4. But of the chorus, πάροδος, ἢ πρώτη λέξις ὄλον χοροῦ. And στάσιμον, μέλος χοροῦ, τὸ ἀνευ ἀναπαίστου καὶ τροχαίου. 5. κόμμος, θρηνηὶς κοινὸς χοροῦ καὶ ἀπὸ σκηνῆς.]

XIII.—2. The poet should aim at a plot that is πεπλεγμένη, and φοβερῶν καὶ ἔλεινῶν μιμητική. He should not represent τοὺς ἐπικεικῆς changing from happiness to misery, οὐ γὰρ φοβερὸν, οὐδὲ ἔλεινόν τοῦτο, ἀλλὰ μιαιφόν ἐστιν, nor yet the contrary, for the fall of the wicked does not excite pity or fear, but only τὸ φιλόανθρωπον.

3. The best subject for tragedy is ὁ μῆτε ἀρετῇ διαφέρων, καὶ δικαιοσύνη, μῆτε διὰ κακίαν καὶ μοχθηρίαν μεταβάλλων εἰς τὴν δυστυχίαν, ἀλλὰ δι' ἁμαρτίαν τινὰ τῶν ἐν μεγάλῃ δόξῃ ὄντων καὶ εὐτυχίᾳ.

4. Hence ἀνάγκη ἄρα τὸν καλῶς ἔχοντα μῦθον ἀπλοῦν εἶναι μᾶλλον ἢ διπλοῦν, ὥσπερ τινὲς φασί, καὶ μεταβάλλειν οὐκ εἰς εὐτυχίαν ἐκ δυστυχίας, ἀλλὰ τοῦναντίον ἐξ εὐτυχίας εἰς δυστυχίαν, μὴ διὰ μοχθηρίαν, ἀλλὰ δι' ἁμαρτίαν μεγάλην, ἣ οἷον εἴρηται, ἢ βελτίονος μᾶλλον ἢ χείρονος. 5. Thus the plots are confined to the adventures of a few families.

6. Euripides, from his plots ending unhappily, is unduly blamed.

7. But a happy end pleases the weak feelings of the spectators, as also does the διπλῇ σύστασις, where the play ends in a contrary result to the good and bad.

8. But this is better suited to comedy.

XIV.—1. Scenic decoration may excite terror and pity, but they should rather arise ἐξ αὐτῆς τῆς συστάσεως τῶν πραγμάτων, which is far better, and more suitable to the poet's art.

2. And ὄψις rather produces τὸ τερατῶδες.

4. Now, terrible actions must be either between friends, enemies, or persons indifferent. But if an enemy kill an enemy, οὐδὲν ἔλεινόν, as also with indifferent persons. But it is between friends and relations that such events become piteous.

5. Now, we must not *essentially* alter the received subjects of tragedy, but we must invent new ones, and use the old judiciously.

6. Now, this may be done in the following ways: 1. εἰδότας καὶ γινώσκοντας, as Medea. 2. ἀγνοοῦντας τὸ δεινόν, εἰθ'

ὑστερον ἀναγνώρισαι τὴν φίλιαν, as Œdipus. 3. τὸν μέλ-
λοντα ποιεῖν τι τῶν ἀνηκέστων δι' ἀγνοίαν, ἀναγνώρισαι πρὶν
ποιῆσαι.

7. The worst way is γινώσκοντα μελλῆσαι, καὶ μὴ πρᾶξαι,
for it is ἀπαθές. Βέλτιον δὲ τὸ ἀγνοοῦντα μὲν πρᾶξαι, πράξαντα
δὲ ἀναγνώρισαι. τὸ, τε γὰρ μιὰρὸν οὐ πρόσεστι, καὶ ἡ ἀναγνώ-
ρισις ἐκπληκτικόν. κρᾶτιστον δὲ τὸ τελευταῖον, as in the Iphi-
genia in Tauris.

11. Hence tragedy is confined to a few families, ὅσαις τὰ
τοιαῦτα συμβέβηκε πάθῃ.

XV. Four requisites of τὰ ἥθη. 1. ὅπως χρῆσθαι ἡ. ἔξει δε
ἥθος μὲν, ἐὰν, ὥσπερ ἐλέχθη, ποιῇ φανεράν ὁ λόγος, ἢ ἡ πρᾶξις
προαίρεσιν τινα· φαῦλον μὲν, ἐὰν φαύλην· χρηστὸν δέ, ἐὰν
χρηστήν. ἔστι δὲ ἐν ἐκάστῳ γένει.

2. τὰ ἀρμόττοντα.

3. τὸ ὅμοιον.

4. τὸ ὁμαλόν.

6. Furthermore, χρὴ καὶ ἐν τοῖς ἥθεσιν, ὥσπερ καὶ ἐν τῇ τῶν
πραγμάτων συστάσει, αἰεὶ ζητεῖν, ἢ τὸ ἀναγκαῖον, ἢ τὸ εἰκός. 7.
And hence the *development* of a plot should arise out of the
plot itself, not out of the machinery, which should be confined
to τὰ ἔξω τοῦ δράματος, things happening before or after the
time of action. And ἄλογον μηδὲν εἶναι ἐν τοῖς πράγμασιν,
but if so, ἔξω τῆς τραγωδίας.

8. Like good painters, we must improve upon the original
we imitate.

XVI. [*Doubtful*. The four kinds of discovery are, 1. ἡ
διὰ τῶν σημείων, and these are either σύμφυτα, or ἐπικτήτα,
which are the worst. 2. αἱ πεποιημέναι ὑπὸ τοῦ ποιητοῦ, also
οὐκ ἄτεχνοι. 3. διὰ μνήμης. 4. ἐκ συλλογισμοῦ.

8. But the best is ἡ ἐξ αὐτῶν τῶν πραγμάτων, τῆς ἐκπλήξεως
γυγνομένης δι' εἰκότων. Next to it, ἡ ἐκ συλλογισμοῦ.]

XVII.—1. The poet should put himself as much as possi-
ble in the place of a spectator.

2. And of an actor likewise, for he will best express agita-
tion who feels it, δι' ὃ ἐνφυνὸς ἡ ποιητικὴ ἐστίν ἡ μαρτυρῶν.

3. He should first draw out a general sketch of the subject,
then add the episodes, taking care that they belong properly
to the subject. They are short in tragedy, but serve to
lengthen out an epic poem.

XVIII. [*Doubtful*. Every tragedy consists of two parts:

1. δέσεις, ἢ ἀπ' ἀρχῆς μέχρι τούτου τοῦ μέρους ὃ ἔσχατόν ἐστιν, ἐξ οὗ μεταβαίνει εἰς εὐτυχίαν.

2. λύσεις, ἢ ἀπὸ τῆς ἀρχῆς τῆς μεταβάσεως μέχρι τέλους.

Four kinds of tragedy: 1. *πεπλεγμένη*, ἥς τὸ ὅλον ἐστὶ περιπέτεια καὶ ἀναγνώρισις. 2. *παθητική*· οἶον, οἱ τε Αἴαντες, καὶ οἱ Ἰζόνες. 3. *ἠθική*· οἶον, αἱ Φθιώτιδες καὶ ὁ Πηλεΐς. 4. οἶον, αἱ τε Φόρκιδες καὶ Πραμηθεὺς, καὶ ὅσα ἐν ᾗδῃ, with all which the poet should be more or less acquainted, for the public now expect excellence in all the different kinds.

3. Tragedies are the same or different, not according to the subject, but the δέσεις and λύσεις. Many poets *complicate* well, but *develop* badly.]

4. We must be careful μὴ ποιεῖν ἐποποιίον (i. e. πολυμυθον) σύστημα τραγῳδίαν.

7. Moreover, the chorus must be considered as one of the persons of the drama, and be a *part* of the whole, not arbitrarily introduced.

XIX. The *διανοία* has been treated of in the Rhetoric, and includes τό, τε ἀποδεικνύναι, καὶ τὸ λύνειν, καὶ τὸ πάθη παρασκευάζειν· οἶον, ἔλεον, ἢ φόβον, ἢ ὀργήν, καὶ ὅσα, τοιαῦτα, καὶ ἐπὶ μέγεθος, καὶ συμκρότητα. The poet must therefore draw from the same sources as the orator, except that in the drama things must appear to be such ἄνευ διδασκαλίας, τὰ δὲ ἐν τῷ λόγῳ ὑπὸ τοῦ λέγοντος παρασκευάζεσθαι, καὶ παρὰ τὸν λόγον γίνεσθαι.

4. The figures of speech concern the actor, rather than the poet, οἶον τί ἐντολή, καὶ τί εὐχή, καὶ διήγησις, καὶ ἀπειλή, καὶ ἐρώτησις, καὶ ἀπόκρισις, καὶ εἴ τι ἄλλο τοιούτον.

XX. [This chapter is an useless scholium. The proper divisions and definitions will be found in the Rhetoric.]

XXI.—1. A word is either ἀπλοῦν, ὃ μὴ ἐκ σημαίνοντων σύγκειται, or διπλοῦν, either ἐκ σημαίνοντος καὶ ἀσήμεου, or ἐκ σημαίνοντων. The following are the different kinds.

2. I. κύριον, ᾧ χρῶνται ἕκαστοι.	} Sometimes the same word, in reference to different people, may be both.
3. II. γλῶτταν, ᾧ ἕτεροι.	

4. III. μεταφορά, ὀνόματος ἀλλοτρίον ἐπιφορά, ἢ ἀπὸ γένους ἐπὶ εἶδος, ἢ ἀπὸ εἶδους ἐπὶ γένος· ἢ ἀπὸ εἶδους ἐπὶ εἶδος, ἢ κατὰ τὸ ἀνάλογον.

9. IV. πεποιημένον, ὃ ὅλως μὴ καλούμενον ὑπὸ τινων, αὐτὸς τίθεται ὁ ποιητής.

10. V. ἐπεκτεταμένον, ἔαν φωνήεντι μακροτέρῳ κεχρημένον, ἢ τῷ οἰκείῳ, ἢ συλλαβῇ ἐμβεβλημένην.

VI. ἀφρημένον, ἂν ἀφρημένον ἢ τι, ἢ αὐτοῦ, ἢ ἐμβεβλημένου.

VII. ἐξηλλαγμένον, ὅταν τοῦ ὀνομαζομένου, τὸ μὲν καταλείπη, τὸ δὲ ποιῇ.

[The remainder is both spurious and incorrect.]

XXII.—1. The virtues of λέξις are,

σαφῆ εἶναι

καὶ μὴ ταπεινὴν.

ἐκ τῶν κυρίων ὀνομάτων.

and such will be ἡ τοῖς ξενικοῖς χρωμένη, i. e. γλώτταις, μεταφοραῖς, καὶ πᾶσι τοῖς παρὰ τὸ κύριον. But too great a use of such words will produce an enigma or barbarism, for the very notion of an enigma is τὸ λέγοντα ὑπάρχοντα ἀδύνατα συνάψαι.

4. Both effects are produced by a judicious use of αἱ ἐπετάσεις καὶ ἀποκοπαί, καὶ ἐξαλλαγαὶ τῶν ὀνομάτων.

9. But a judicious use of metaphors is the greatest excellence of all, for it cannot be derived from another, and is a sign τῆς εὐφύας, τὸ γὰρ εὖ μεταφέρειν, τὸ ὅμοιον θεωρεῖν ἐστὶ.

10. τὰ διπλᾶ are best suited to dithyrambs.

γλῶτται, to heroic verse.

μεταφοραί, to Iambic.

But heroic verse admits of all these kinds. Iambic should approach as much as possible to the diction of common life.

XXIII. In narrative and hexameter verse, the story ought to be dramatically constructed, as in tragedy, i. e. it should be περὶ μίαν πράξιν ὅλην καὶ τελείαν, ἔχουσαν ἀρχὴν καὶ μέσον καὶ τέλος, ἢ, ὥσπερ ζῶον ἐν ὅλῳ, ποιῇ τὴν οἰκείαν ἡδονὴν, differing from history, which treats of events of *one time*, not of one action.

3. Hence the excellent management of Homer in not attempting to bring the whole war into his poem, but only taking one part, filling it out with episodes.

XXIV. The epic poem should also agree with the tragic as to its *kinds* [simple or complicated, moral or disastrous?]. Its parts are also the same, except μελοποιία and ὄψις, for it must have περιπετεῖαι, ἀναγνώσεις, παθήματα, διανοαίαι, and

λέξις, suitably arranged, as in Homer, ἡ μὲν Ἰλιάς, ἀπλοῦν καὶ παθητικόν· ἡ δὲ Οδύσσεια, πεπλεγμένον. ἀναγνώρισις γὰρ διόλου καὶ ἡθική. πρὸς δὲ τούτοις λέξει καὶ διανοία πάντας ὑπερβεβληκε.

3. It also differs in length.

4. For it has the advantage of being extended by narrative of many simultaneous actions, which increase the ὄγκος τοῦ ποιήματος, and also by different episodes.

5. Heroic is the established metre of narrative poetry, for it is στασιμώτατον καὶ ὀγκωδέστατον, but the Iambic and Trochaic κινήματα, τὸ μὲν, ὀρχηστικόν, τὸ δὲ, πρακτικόν.

6. A mixture of these metres is absurd.

7. Like Homer, the poet should know when it is fitting for him to speak in person.

8. The θανμαστόν is necessary in tragedy, but in epopee even τὸ ἄλογον is admitted, which is most wonderful, διὰ τὸ μὴ ὄρεσθαι εἰς τὸν πράττοντα.

9. And Homer has chiefly taught other poets ψευδῆ λέγειν ὥς δεῖ, which is by a παραλογισμός on the part of the hearer.

10. And the poet should prefer ἀδύνατα καὶ εἰκότα, μάλλον ἢ δυνατὰ καὶ ἀπίθανα· τοὺς τε λόγους μὴ συνίστασθαι ἐκ μερῶν ἀλόγων, ἀλλὰ μάλιστα μὲν μηδὲν ἔχειν ἄλογον· εἰ δὲ μὴ, ἔξω τοῦ μυθεύματος, as Œdipus' ignorance as to the manner of Laius' death.

11. And the diction should be most studied in the *idle* parts of the poem, where there are neither manners nor sentiment. For these latter are obscured by over-fine diction.

XXV. and XXVI. [*Very doubtful.* As these two chapters are quite unintelligible, except in reference to the examples quoted, it is of little use to analyse them.]

THE END.

INDEX

TO
ARISTOTLE'S TREATISES
ON
RHETORIC AND THE POETIC.

- ABILITY, a specific good, 41.
 Abundant, the, better than the rare, 48.
 Accent, objections to, removed, 467.
 Accident, an element of the apparent enthymem, 195.
 Accomplices in guilt, to be feared, 122.
 Accusation and defence, various reasonings in, 67.
 Achilles, anger of, 107.
 Action, habitual, attended with pleasure, 76.
 Actions, tragedy an imitation of, 418.
 Actors, complaints respecting, 471.
 Admiration, attended with pleasure, 76, 77.
 Adulation, meaning of, explained, 128.
 Adultery, legal definition of, 88, 89.
 Ænesidemus, specious liberality of, 85.
 Æsop, fables of, 166, 167.
 Agatho, remark of, 163; lines from, 425.
 Aged, *see* Old Age.
 Ages, definition of, 150.
 Αἴτιον, definition of, 47, π.
 Ἀληθές, the subject matter of logic, 10, π.
 Ἀλαζόν, application of the word, 10, π.
 Alcæus, saying of, 60.
 "Alcmæon" of Astydamos, the tragedy of, 434 *et* π.
 Alliteration, instances of, 233.
 Ambiguity, an element of apparent enthymems, 192.
 Ambitious, the, likely to feel indignation, 144; disposed to envy, 145.
 Amplification, necessity for, 65, 66.
 — and extenuation, observations on, 201.
 Amusements, attended with pleasure, 75.
 Analogy, an element of the enthymem, 186.
 Androcles, the orator, 188.
 Anger, feelings of, 3, 71; definition of, 105; persons against whom and by whom it is felt, *ib. et seq.*; three species of, 106; how allayed, 114.
 — and hatred, six points of comparison between, 120.
 Anomalies, an element of the enthymem, 190.
 Antimachus, precept of, 223.
 Antithesis, of style, 232; the false one, 234.
 Appetite, impulse of the, 71; the desire of what is pleasant, 73; irrational and rational, *ib.*
 Ἀρχή, definition of, 47.

Areopagus, practice of the, 3.
 Argos, peculiar law at, 93.
 Arguing from cause to effect, an element of the enthymem, 190.
 Arguments, on the solution of, 197 *et seq.*
 Aristippus, passage from, 184.
 Aristocracy, form of government, 55.
 Articles, one of the parts of diction, 449.
 Arts, illustration from the, 4, n.
 Auditors, feelings of the, 12; held to be ἀλλοί, 15; three kinds of, 24; how to appease the, 115.

B.

Bacchic hymns, all the means of imitation employed together by, 409, n.
 Badges, honourable, 61.
 Beauty, different according to difference of age, 36; of objects and words, 213; of style, 234; magnitudo the constituent of, 421.
 Benefactors, friendliness felt for, 117.
 Benevolence, object of, 134.
 Birth, high, qualities of, 34; characteristic disposition of, 156.
 Body, excellencies of the, 36.
 Brave, the, friendliness felt for, 117.

C.

Calippus the orator, 188.
 Callistratus, his charge against Melenopus, 92.
 Cases, one of the parts of diction, 449.
 Censure, attended with pleasure, 78.
 Chance, definition of, 38; mankind impelled by, 70; on the circumstances of, 426.
 Character, goodness of, 35; a specific good, 41; attended with pleasure, 75; men of, are sometimes impelled to commit injustice, 82; comparison of, to be made, 66; what constitutes, 418.

Charemon, saying of, 191.
 Χάρις, definition of, 133.
 Χεῖμασι, meaning of, 441, n.
 Chorus, a part of tragedy, 429; its various divisions, *ib.*; business of the, 445; gradual extinction of the, *ib.*, n.
 Cicero, caution of, 16, n.
 Cithern-playing, a favourite accomplishment of the Athenian youth, 407, n.
 Comedy, an imitative art, 407; origin of, 413, 415 *et seq.*
 Comeliness, different according to difference of age, 36.
 Commendation, language of, 64, 65.
 Commos, a part of the chorus, 429.
 Community, injustice to the, defined, 87.
 Compacts, definition of, 98.
 Compulsion, the motive of human action, 70.
 Confidence, definition of, 125; how created, *ib.*; persons who feel, 126.
 Conjunctions, one of the parts of diction, 449.
 Conon, expression of, 191.
 Consequents, an element of the enthymem, 185, 186.
 Constraint, freedom from, pleasant, 73.
 Contempt, a feeling contrary to emulation, 149.
 Contraries, an element of the enthymem, 178; consideration of, 468.
 Contumely, definition of, 107.
 Courage, quality of, 50; a constituent of virtue, 58.
 Cowardice, illustration of, 128.
 Crimes, on the various degrees of, 92 *et seq.*
 Critics, objections of, answered, 463 *et seq.*
 Custom, mankind impelled by, 71.

D.

Dancing, an imitative art, 408
 Danger, an object of fear, 122

Decisions, legal, an element of the enthymem, 184.
 Declamation, often ridiculous when read, 247.
 Decoration, a certain part of tragedy, 417 *et seq.*
 Deeds, one of the proofs necessary in judicial oratory, 98; arguments to be used for and against, 98, 99.
 Definition, an element of the enthymem, 182.
 Definitions of Aristotle's Rhetoric, 385—403; of his Poetic, 478—487.
 Delicacy of feeling, disquisition on, 127 *et seq.*
 Democracy, form of government, 55.
 Depravity, the cause of injustice, 68.
 Διαβολή, use of the word, 3, n.
 Διαλεκτική, explanation of, 23, n.
 Διαλεκτικός, explained, 10, n.
 Dialectics, rhetoric an offshoot of, 13.
 Διανοία, a certain part of tragedy, 417 *et seq.*
 Diction, an element of apparent enthymems, 192; definition of, 420; on the use of, in tragedy, 446; on the various parts of, 447 *et seq.*; requisites of, 454 *et seq.*; should sometimes be laboured, 463; many modifications of, 464; critical objections to, removed, 466; custom of, 468.
 Dilemma, an element of the enthymem, 185.
 Διονυσκόλακας, origin of the term, 211, n.
 Discovery, explanation of, in fable, 427; feelings excited by the, 428; on the different kinds of, 438 *et seq.*
 Discussions, minute, to be avoided, 28.
 Disgraced, the, motives of, for committing injustice, 83.
 Dissembling, the, to be feared, 123.
 Dithyrambic poetry, an imitative art, 407; all the means of imitation employed together by, 409, n.

Dorieus, conqueror at the Olympic games, 17.
 Draco, the laws of, 191.
 Drama, etymology of the, 411; on its various parts, 420; on exhibitions in the, 421.

E.

Εἶδη, use of the term, 22, 23.
 Εἰκός, definition of, 17 *et seq.*; enthymems deduced from, 17; solution of, sometimes fallacious, 199.
 Ἐκτίπτειν, meaning of, 441, n.
 Empedocles, saying of, 87.
 Emulation, definition of, 147; nature, objects, and feelings of, 147 *et seq.*
 Encomium, language of, 64.
 Enemies, motives of, for committing injustice, 83, 84; objects of fear, 122.
 Enthymems, the very body of proof, 3, 7; consequence of disregarding, 5, n.; a sort of syllogism, 7, 14; deduced from εἰκότα and σημεία, 17 *et seq.*; two different sorts of, 22, 177; suited to judicial oratory, 66; on the nature and use of, 168, 174 *et seq.*; various elements of, 178 *et seq.*; how to be used in legal proof, 263, 265, 267.
 —, fallacious, the various elements of, 192 *et seq.*
 Enumeration of parts, an element of the enthymem, 185.
 Envy, opposed to pity, 141; definition of, 141, 145; on the nature, objects, and feelings of, 145 *et seq.*
 Ἐπαινος, definition of, 64.
 Epic Poetry, similarity of tragedy to, 416; observations on, 458; different species and parts of, 459 *et seq.*; merit of imitation in, as compared with tragedy, 470 *et seq.*
 Ἐπιχαιρικασία, explanation of, 142, n.

Epidictic oratory, the subjects of, 57; the common point of, 64; amplification suitable to, 66; general nature of, 175.
 — style suited to writing, 248.
Ἐπιστολα, difficulty of defining, 408, *n*.
Episode, a part of tragedy, 429; must be suitable to the plot, 442; Homer's use of, 458.
Epithets, on the use of, 213, 215.
Epopée, an imitative art, 407, 408; various parts of the, 459; its power of extension, and its proper metre, 460; necessity for the wonderful in, 461.
Equals, likely to be envied, 146.
Equipose of style, 233.
Equity, in law, explanation of, 89 *et seq*.
Equivocation, an element of the enthymem, 191.
Errors, previously committed, an element of the enthymem, 190.
Ἐθὴ explained, 149, *n*.
Eubulus, adopts a saying of Plato, 97.
Euphony, necessity of, 212.
Euripides, his reply to the Syracusans, 131.
Εὐτράπελοι, remarks on, 152, *n*.
Exaggeration, an element of the apparent enthymems, 194.
Examples, suited to deliberative oratory, 66; different kinds of, and their use, 165 *et seq*.; reasonings derived from, 199; solution of, 200; best suited to proofs, 263.
Excellencies, personal, attended with pleasure, 78.
Excess of good or evil, 46 *et seq*.
Exhorting, objects of, in oratory, 33.
Exode, a part of tragedy, 429.
Exordium, occurrence of the, 250; on the nature and use of the, 251 *et seq*.
Expedient, the object of, proposed, 39; what is the higher degree of, 44.
Exports, necessary to be understood by the orator, 31.
Extenuation, observations on, 201.

F.

Fable, or Apologue, use of, by way of example, 166; suited to the deliberative orator, 167.
 — definition of, 418; revolutions and discoveries of, the cause of pleasure, 419; the soul of tragedy, *ib.*; on the unity of, 422 *et seq.*; on the simple and complex, 426, 427; the various requisites of, 427, 428; the simple preferable to the two-fold, 431; precepts respecting, 434; example of, *ib.*; on the incidents of, 437.
Fact, questions of, to be left to the judge, 5.
Fallacies of apparent enthymems, 192 *et seq*.
Fear, definition of, 121; on the nature and objects of, 121 *et seq.*; closely allied to pity, 124.
Feeling essential to the poet, 441.
Feelings of delicacy and shame, disquisition on, 127 *et seq*.
Flattery attended with pleasure, 76.
Forgiving, the, friendliness felt for, 118.
Fortunate, the, dispositions and characteristics of, 159.
Fortune, definitions of, 38, 150.
Friendless, the, disposition of, for committing injustice, 84.
Friendliness, definition of, 116; those to whom we entertain the feelings of, 116 *et seq*.
Friends, number and excellence of, the difference defined, 38; motives of, for committing injustice, 83.
Friendship, attended with pleasure, 78; causes of, 116 *et seq.*, 119; three kinds of, 119.

G.

Genders, on the proper distinction of, 221; remarks on, 454.
